Dentistry

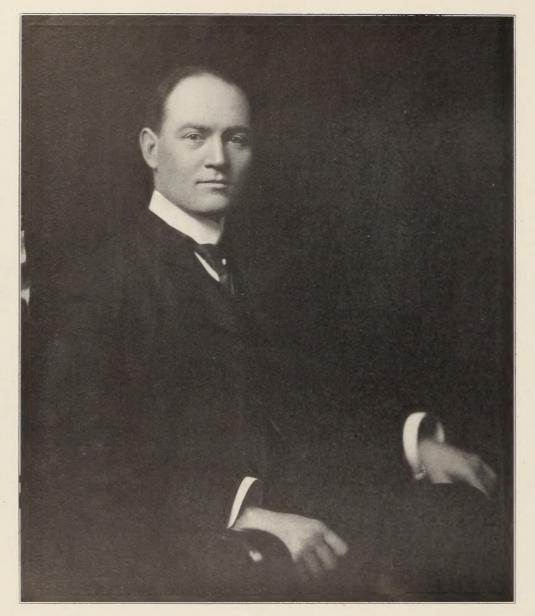

VOLUME TEN

[&]quot;The moving finger writes; and having writ,

Moves on."

-OMAR KHAYYAM

To ROBERT ALEXANDER FALCONER

BACHELOR OF ARTS (London)

MASTER OF ARTS (Edinburgh)

DOCTOR OF LETTERS (Edinburgh)

DOCTOR OF LAWS (Toronto)

DOCTOR OF DIVINITY (Knox College)

PRESIDENT OF THE

UNIVERSITY OF TORONTO

This Tenth Volume of Torontonensis is dedicated by the Class of 1908

Roba Falconer.

The President

PRESIDENT FALCONER claims Charlottetown, on "The Island," as his birthplace, though Pictou, the home of the Grants, the Dawsons, the Gordons and College Presidents in general, has a fair title to the credit of being the home also of the Falconers. The President's father was born in Pictou, and for many years has been its leading minister, and to Pictou he brought the Moderatorship of the Presbyterian Church.

The President's introduction to the school took place in Nova Scotia, but it was in Trinidad that he received his preparation for the University. The Royal College in Porto'-Spain was manned by Oxford and Cambridge men, and the training was thorough and severe. After a brilliant course in the Royal College, the future President captured two large scholarships—one given by the colony, the other by the Gilchrist Trustees. At that time the Gilchrist scholarships were doing for the colonies what the Rhodes' scholarships are now doing on a grander scale. The Gilchrist scholarships were awarded on the results of the London University matriculation examination. Robert Falconer was placed on the colonial list next to the first among all the British candidates for matriculation into that great

He studied in Edinburgh and came under the influence of Professors Sellar and Butcher in Classics, Masson in English, Fraser and Calderwood in Philosophy, Chrystal and Tait in Mathematics and Physics, Davidson, Dods, Flint and Rainy in Divinity. To Professors Butcher and Dods he owes most. The former kindled his enthusiasm for Greek literature, and the latter directed it to New Testament study.

University.

From Edinburgh he went to Germany and studied in Leipzig, Berlin and Marburg, under Harnack, Kaftan, Weiss, Hermann and Julicher.

From the University of London he received the degree of B.A.; from Edinburgh, the M.A., B.D., and later Litt, D.

In 1892 he received an appointment to a chair in the Presbyterian College in Halifax. Here he stimulated the intellectual and religious life of the students to an amazing degree and through them profoundly influenced the life of the Presbyterian Church in the Maritime Provinces.

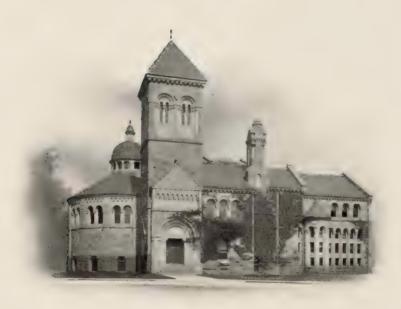

Dalhousie University was also fortunate in having him among its lecturers. His course in Biblical Literature enabled him to reach a large body of students beyond those interested in Theology. His influence with the students of the University rivalled that which he exercised in the Theological College.

Three years ago he was appointed Principal of the College. From that date he was regarded as one of the foremost public men of the city and Province. His public addresses were received with a respect rarely shown to one so early in life. His undoubted influence was due largely to the intensity of his moral and religious convictions and to the note of sincerity which ran through all that he said and did.

The growing esteem and confidence of the public were shown by the honors which he received from the most diverse sources. The Catholic College of St. Francis vied with Presbyterian Knox in honoring him. One enrolled him among the Doctors of Laws, the other made him a Doctor of Divinity. But, perhaps, the most significant of all was the farewell reception given him by the citizens of Halifax, who made him and Mrs. Falconer a most handsome presentation. The Governor, the Premier, the Archbishop, the Bishop and representative citizens spoke in appreciation of his worth and services as a public man and regretted his departure most keenly.

We believe that the future will prove no less fruitful in esteem and affection than the past, and that President Falconer will be as honored and beloved by the students of Toronto and the people of Ontario as he was in the Provinces by the sea.

W. C. M.

University Library.

HOSE who graduate from the University this year are, I hope, looking forward with confidence to their future. Some, it may be, aspire to undertake and accomplish tasks such as only the strong essay: others will be content to do life's average work as it comes; but whatever you set before you to perform, remember that your abiding success will be what you yourself become. A man is far greater than the words he speaks, the professional skill he displays, the bridges he builds, or the books he writes. Those who can follow the advice of Sir Thomas Browne, "be substantially great in thyself and more than thou

appearest unto others," will discover that they possess an ethical reserve which will increase with the years.

In a palimpsest manuscript the obvious surface writing may be of slight importance, while the underlying words, all but obliterated and rendered visible only by careful treatment, are of the highest value. The worth of a man also is determined not by superficial academic distinctions which are known and read of all men, but by the reserve of character concealed under these distinctions, professional skill, or social position, and which, by the subtle treatment of life's experience, will be made to stand out clear and permanent behind all the aplitudes and acquired knowledge.

We turn to noble men and to great books confident that we shall not be disappointed, and I hope that among the graduates of this year there are many who will be found to redeem the brightest promise of their student days, by manifesting to their friends and to the world at large powers of heart and mind which will not be soon exhausted by distress, paralyzed by perplexities or dulled bu the monotony of daily duty.

R. A. FALCONER.

Secretary to the Board: FERDINAND ALBERT MOURÉ, Esq., Bursar

CONVOCATION HALL.

University of Toronto Faculty of Arts

1907 - 1908

President: ROBERT ALEXANDER FALCONER, M.A., Litt.D., LL.D.

Vice-President and Dean of the Faculty: ROBERT RAMSAY WRIGHT, M.A., B.Sc., LL.D.

Secretary: JAMES BREBNER, B.A.

Albert Holden Abbott, B.A., Ph.D. (Würzburg), Associate Professor of Philosophy and Assistant in Psychological Laboratory.

Francis Barclay Allan, M.A., Ph.D., Associate Professor of Organic Chemistry.

Alfred Baker, M.A., Professor of Mathematics.

Andrew James Bell, M.A., Ph.D. (Breslau), Professor of Comparative Philology.

Benjamin Arthur Bensley, B.A., Ph.D. (Columbia), Associate Professor of Zoology and Assistant Curator of the Biological Museum.

MILTON ALEXANDER BUCHANAN, B.A., Ph.D. (Chicago), Lecturer in Italian and Spanish.

ELI FRANKLIN BURTON, B.A. (Cantab.), Lecturer in Physics.

CHARLES AUGUSTUS CHANT, B.A., Ph.D. (Harvard), Associate Professor of Astro-Physics.

ARTHUR PHILEMON COLEMAN, M.A., Ph.D. (Breslau), Professor of Geology.

FREDERICK JOSEPH ARTHUR DAVIDSON, M.A., Associate Professor of Italian and Spanish.

ALFRED TENNYSON DELURY, M.A., Associate Professor of Mathematics.

Joseph Horace Faull, B.A., Ph.D. (Harvard), Associate Professor of Botany.

John Charles Fields, B.A., Ph.D. (Johns Hopkins), Associate Professor of Mathematics.

WILLIAM HENRY FRASER, M.A., Professor of Italian and Spanish.

LACHLAN GILCHRIST, M.A., Lecturer in Physics.

James Gibson Hume, B.A., A.M. (Harvard), Ph.D. (Ludwig), Professor of History of Philosophy.

Francis Boteler Kenrick, M.A., Ph.D. (Leipzig), Associate Professor in Chemistry.

August Kirschmann, M.A., Ph.D. (Leipzig), Professor of Philosophy and Director of the Psychological Laboratory.

EDWARD JOSEPH KYLIE, M.A. (Oxon.), Lecturer in Modern History. WILLIAM ROBERT LANG, D.Sc. (Glasgow), F.I.C., Professor of Chemistry and Director of the Chemical Laboratory.

Augustus Henry Fraser Lefroy, M.A. (Oxon.), Professor of Roman Law and Jurisprudence.

WILLIAM JAMES LOUDON, B.A., Associate Professor of Physics.

ARCHIBALD BYRON MACALLUM, M.A., M.B., Ph.D. (Johns Hopkins), F.R.S., Professor of Physiology.

MICHAEL ALEXANDER MACKENZIE, M.A., Associate Professor of Mathematics.

SIMON JAMES McLEAN, B.A., M.A. (Columbia), LL.B., Ph.D. (Chicago), Associate Professor of Political Economy.

JOHN CUNNINGHAM McLennan, B.A., Ph.D., Professor of Physics and Director of Physical Laboratory.

JAMES MAYOR, Professor of Political Economy.

WILLIAM LASH MILLER, B.A., Ph.D. (Münich), Professor of Physical Chemistry.

WILLIAM ARTHUR PARKS, B.A., Ph.D., Associate Professor of Geology.

ARTHUR LEONARD PARSONS, B.A. (New York), Lecturer in Mineralogy.

WILLIAM HUNTER PIERSOL, B.A., M.B., Lecturer in Elementary Biology and Histology.

THOMAS RUTHERFORD ROBINSON, M.A., Ph.D., Lecturer and Laboratory Assistant in Philosophy.

WILLIAM GEORGE SMITH, B.A., Lecturer in Philosophy and Assistant in Psychological Laboratory.

ROBERT BOYD THOMSON, B.A., Lecturer in Botany,

FREDERICK TRACY, B.A., Ph.D. (Clark), Associate Professor of Philosophy.

EDMUND MURTON WALKER, B.A., M.B., Lecturer in Zoology.

Thomas Leonard Walker, M.A. (Queen's), Ph.D. (Leipzig), Professor of Mineralogy and Petrography.

Faculty of Arts-Continued

ROBERT RAMSAY WRIGHT, M.A. (Edin.), B.Sc., LL.D., Professor of Biology.

George McKinnon Wrong, M.A., Professor of Modern History, James McGregor Young, M.A., Professor of Constitutional and International Law and Constitutional History,

SESSIONAL APPOINTMENTS.

ALLAN HISTON ADAMS, B.A., M.B., Class Assistant in Biology.
GEORGE WILLIAM ANDERSON, B.A., Class Assistant in Biology.
ROBERT GARDINER ARMOUR, B.A., Assistant Demonstrator in Physiology.

PARKER McEWEN BAYNE, B.A., Laboratory Assistant in Biology. SAMUEL BEATTY, B.A., Fellow in Mathematics.

IRVING RUSSELL BELL, B.A., Class Assistant in Biology and Assistant Demonstrator in Physiology.

OLIVER BOWLES, B.A., Class Assistant in Mineralogy.

EDMUND BOYD, B.A., Lecture and Laboratory Assistant in Biology.

ALEXANDER GRANT BROWN, B.A., Instructor in History. EDWARD COOPER COLE, B.A., Class Assistant in Biology.

HAROLD CASWELL COOKE, B.A., Assistant in Chemistry.

KEITH GRAHAM FEILING, B.A. (Oxon.), Lecturer in History.

EDWARD FIDLER, B.A., M.B., Assistant Demonstrator in Physiology.

JOHN ALEXANDER GARDINER, M.A., Class Assistant in Physics.

R. A. GORTNER, M.S. (Vanderbilt), Assistant in Chemistry.

WILLIAM GOLDIE, M.B., Demonstrator in Applied Psysiology.

WILLIAM FOSTER GREEN, B.A., Class Assistant in Mineralogy. FREDERICK CHRISTOPHER HARRISON, B.A., Assistant Demonstrator in

Physiology.

CLARENCE MEREDITH HINCKS, B.A., Class Assistant in Biology.

ARCHIBALD GOWANLOCK HUNTSMAN, B.A., M.B., Instructor in Bi-

ology.

MISS MARGARET IDA JANSEN, Ph.D., Fellow in Mathematics.

ALFRED EDWARD JOHNS, B.A., Fellow in Mathematics.

WILLIAM T. KENNEDY, Class Assistant in Physics.

CHARLES A. LAZENBY, Class Assistant in Aesthetics.

ARCHIBALD BRUCE MACALLUM, B.A., Assistant Demonstrator in Physiology.

Edward Allister McCulloch, B.A., M.B., Class Assistant in Biology.

PERCY BURLAKELY MACFARLANE, B.A., Assistant Demonstrator in Physiology.

ALEXANDER JOHN MACKENZIE, B.A., LL.B., M.B., Class Assistant in Biology.

JOHN FRANCIS MACKEY, B.A., Assistant in Chemistry.

MATTHEW DONALD McKichan, B.A., M.B., Class Assistant in Biology. HENRY ALLEN McTaggart, B.A., Assistant Demonstrator in Physics. Roger James Manning, B.A., Fellow in Chemistry.

FREDERICK ROBERT MILLER, B.A., Demonstrator in Physiology.

James Ross Gillespie Murray, B.A., Class Assistant in Biology and Assistant Demonstrator in Physiology.

A. F. Odell, B.Sc., Assistant in Chemistry.

CHARLES BEMISTER PARKER, B.A., Assistant Demonstrator in Physiology.

ARTHUR LEONARD PARSONS, B.A., Lecturer in Mineralogy.

VIVIAN ELLSWORTH POUND, B.A., Assistant Demonstrator in Physics. LORNE NORRIS RICHARDSON, B.A., Fellow in Mathematics.

LAWRENCE BRUCE ROBERTSON, B.A., Assistant Demonstrator in Physiology.

John Kellock Robertson, B.A., Assistant Demonstrator in Physics. Alexander McGregor Simpson, Assistant Demonstrator in Physics. Alexander Thomas Stuart, B.A., Assistant in Chemistry.

ROBERT BOYD STEWART, B.A., Assistant in Electro-Chemistry. CHARLES JAMES WAGNER, M.B., Demonstrator in Applied Physiology.

CHARLES JAMES WAGNER, M.B., Demonstrator in Applied Physiology. James Herbert White, M.A., Class Assistant in Botany.

CHARLES SEYMOUR WRIGHT, Class Assistant in Physics.

University College Faculty of Arts

1907 - 1908

Principal: Maurice Hutton, M.A., LL.D. Registrar: Malcolm W. Wallace, B.A., Ph.D.

WILLIAM JOHN ALEXANDER, B.A. (London), Ph.D. (Johns Hopkins), Professor of English.

John Home Cameron, M.A., Associate Professor of French. Adam Carruthers, M.A., Associate Professor of Greek Literature

and Archaeology.

Saint Elme de Champ, B.L. (Lyons), O.A., Lecturer in French. Richard Davidson, M.A., Ph.D., Associate Professor of Oriental Languages.

THOMAS EAKIN, M.A., Ph.D., Lecturer in Oriental Languages.
JOHN FLETCHER, M.A., LL.D. (Queen's), Professor of Latin.
JAMES GIBSON HUME, M.A., Ph.D. (Ludwig), Professor of Ethics.
MAURICE HUTTON, M.A. (Oxon.), LL.D., Professor of Greek.

George Wesley Johnston, B.A., Ph.D. (Johns Hopkins), Associate

Professor of Latin.

DAVID REID KEYS, M.A., Associate Professor of Anglo-Saxon.

James Frederick McCurdy, Ph.D. (Princeton), LL.D. (New Brunswick), Professor of Oriental Languages.

WILLIAM STAFFORD MILNER, M.A., Professor of Greek and Roman History.

GEORGE HENRY NEEDLER, B.A., Ph.D. (Leipzig), Associate Professor of German.

GEORGE OSWALD SMITH, M.A., Lecturer in Latin.

JOHN SQUAIR, B.A., Professor of French.

Peter Toews, M.A., Ph.D. (Heidelberg), Lecturer in German. WILLIAM HENRY VAN DER SMISSEN, M.A., Professor of German.

MALCOLM WILLIAM WALLACE, B.A., Ph.D. (Chicago), Lecturer in English.

SESSIONAL APPOINTMENTS.

ALEXANDER GRANT BROWN, B.A., Instructor in History, ALEXANDER FREDERICK BRUCE CLARK, B.A., Instructor in French, WILLIAM HALL CLAWSON, Ph.D., Lecturer in English, PAUL WILHELM MULLER, B.A., Instructor in German, WILSON HAMILTON TACKABERRY, M.A., Instructor in Greek,

Victoria College Faculty of Arts

1907 - 1908

President: REV. N. BURWASH, S.T.D., LL.D. Dean: REV. A. H. REYNAR, M.A., LL.D. Registrar: A. R. BAIN, M.A., LL.D.

MISS MARGARET ELEANOR THEODORA ADDISON, B.A., Lecturer in German.

CHARLES EARL AUGER, B.A., Instructor in Rhetoric and English.

ABRAHAM ROBERT BAIN, M.A., LL.D. (Mt. Allison), Nelles Professor of Ancient History.

Andrew James Bell, M.A., Ph.D. (Breslau), Macdonald Professor of the Latin Language and Literature.

REV. GEORGE JOHN BLEWETT, B.A., Ph.D. (Harvard), Ryerson Professor of Ethics and Apologetics.

REV. JOHN BURWASH, M.A., D.Sc. (Mt. Allison), Professor of English Bible.

VICTOR DE BEAUMONT, M.A., Lecturer in French.

OSCAR PELHAM EDGAR, B.A., Ph.D. (Johns Hopkins), Professor of the French Language and Literature.

Lewis Emerson Horning, B.A., Ph.D. (Gottingen) Professor of Teutonic Philology.

Augustus Edward Lang, M.A., Professor of the German Language and Literature.

Librarian: REV. J. F. McLAUGHLIN, B.A., B.D.

Secretary: J. C. Robertson, M.A.

Treasurer: Hon. G. A. Cox.

ARTHUR LEOPOLD LANGFORD, M.A., Associate Professor of the Greek Language and Literature.

REV. JOHN FLETCHER McLAUGHLIN, B.A., B.D., Professor of Oriental Languages and Literature.

REV. AUSTIN PERLEY MISENER, M.A., Lecturer in Oriental Languages and Literature.

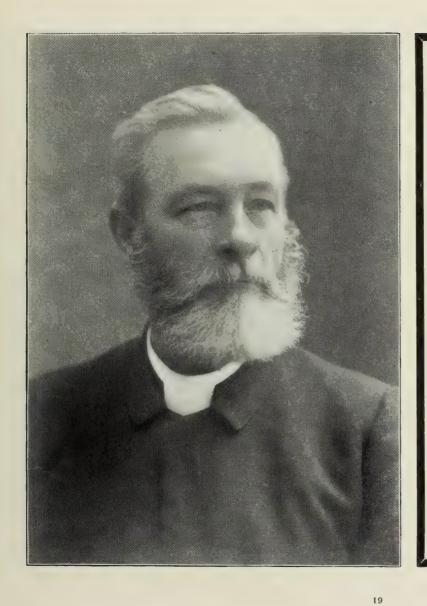

REV. ALFRED HENRY REYNAR, M.A., LL.D., William Gooderham Professor of English Literature.

JOHN CHARLES ROBERTSON, M.A., Professor of the Greek Language and Philosophy.

REV. FRANCIS HOUSTON WALLACE, M.A., D.D., George A. Cox Professor of Biblical Greek.

SESSIONAL APPOINTMENTS.

James Wilfred Cohoon, B.A., Instructor in Latin. Clyo Jackson, B.A., Instructor in German. Rev. Guiseppe Merlino, Instructor in Italian Conversation.

In Memoriam

John Potts, D.D.

Born (Ireland) May 3rd, 1838 Bied October 16th, 1907

Trinity College Faculty of Arts

1907 - 1908

Provost: REV. T. C. S. MACKLEM, M.A., D.D., LL.D.

Dean of Residence: REV. H. T. F. DUCKWORTH, M.A.

Registrar: A. H. YOUNG, M.A.

JOHN WILLIAM GAY ANDRAS, Ph.D. (Tübingen), Lecturer in French. Rev. William Clark, F.R.S.C., M.A., D.D., D.C.L., LL.D., Professor of English Literature.

REV. Francis Herbert Cosgrove, B.A., B.D. (Dublin), Lecturer in Hebrew.

REV. THOMAS FORBES DUCKWORTH, M.A. (Oxon.), Professor of Greek. HENRY CRAWFORD GRIFFITH, M.A., Lecturer in Modern Languages. REV. THOMAS CLARK STREET MACKLEM, M.A., LL.D., Lecturer in English Bible.

ERIC TREVOR OWEN, M.A., Lecturer in Classics.
HERBERT VICTOR ROUTH, M.A. (Cantab.), Professor of Latin.
HERBERT CLAYTON SIMPSON, M.A., Professor of English Language.
ARCHIBALD HOPE YOUNG, M.A., Professor of German.

SESSIONAL APPOINTMENTS.

GEOFFRY ELWOOD HOLT, M.A., Lecturer in German.
J. NEVILLE WOODCOCK, M.A., Lecturer in Classics.

In Memoriam

Reverend William Jones

Professores Emeriti.

MOSES HENRY AIKINS, B.A., M.D. UZZIEL OGDEN, M.D. WILLIAM WINSLOW OGDEN, M.D. JAMES HENRY RICHARDSON, M.D.

HENRY WILBERFORCE AIKINS, B.A., M.B., Associate Professor of Anatomy.

Francis Barclay Allan, M.A., Ph.D., Lecturer in Chemistry.

John Andrew Amyot, M.B., Associate Professor of Pathology and Bacteriology.

HARRY BERTRAM ANDERSON, M.D., C.M., Associate Professor in Clinical Medicine.

ALLAN MACKENZIE BAINES, M.D., C.M., Associate Professor of Clinical Medicine and Associate Professor of Pediatrics,

Benjamin Arthur Bensley, B.A., Ph.D., Associate Professor of Zoology.

Nelson_Henry Beemer, M.B., Extra-Mural Professor of Mental Diseases.

George Arthur Bingham, M.B., M.D., C.M., Associate Professor of Clinical Surgery and Clinical Anatomy.

Geoffrey Boyd, B.A., M.B., Associate in Laryngology and Rhinology.

HERBERT ALEXANDER BRUCE, M.D., F.R.C.S., Eng., Associate Professor of Clinical Surgery.

George Herbert Burnham, M.D., F.R.C.S., Edin. Professor of Ophthalmology and Otology.

ELI FRANKLIN BURTON, B.A., Demonstrator in Physics.

IRVING HEWARD CAMERON, M.B., F.R.C.S., Eng., Professor of Surgery and Clinical Surgery.

WILLIAM PROUDFOOT CAVEN, M.B., Associate Professor of Clinical Medicine.

Graham Chambers, B.A., M.B., Associate in Clinical Medicine. Charles Kirk Clarke, M.D., LL.D., Extra-Mural Professor of

Mental Diseases.

John Lorenzo Davison, B.A., M.D., C.M., Professor of Clinical Medicine.

ROBERT JOSEPH DWYER, M.B., M.R.C.P., Lond., Associate Professor of Clinical Medicine.

WILLIAM HODGSON ELLIS, M.A., M.B., Professor of Toxicology.

FREDERICK FENTON, M.D., C.M., Associate in Clinical Medicine and in Obstetrics.

JOHN TAYLOR FOTHERINGHAM, B.A., M.D., C.M., Associate Professor of Medicine and Clinical Medicine.

ALTON HUYCKE GARRETT, M.D., C.M., Demonstrator of Clinical Surgery.

LACHLAN GILCHRIST, M.A., Demonstrator in Physics.

WILLIAM GOLDIE, M.B., Associate in Clinical Medicine.

Andrew Robertson Gordon, M.B., Associate Professor of Clinical Medicine.

Frederick Le Maitre Grasett, M.B., C.M., F.R.C.S., Edin., Professor of Surgery and Clinical Surgery.

VELYIEN EWART HENDERSON, M.A., M.B., Lecturer in Pharmacy and Pharmacology.

WILLIAM ROBERT LANG, D.Sc., F.I.C., Professor of Chemistry.

CHARLES POTTER LUSK, M.D., C.M., Demonstrator of Pharmacy.
ARCHIBALD BYRON MACALLUM, Ph.D., LL.D., F.R.S., Professor of
Physiology.

James Metcalfe MacCallum, B.A., M.D., Professor of Materia Medica, Pharmacology and Therapeutics and Associate in Ophthalmology and Otology.

GEORGE RAYMOND McDonagh, M.D., Professor of Laryngology and

KENNEDY CRAWFORD MCLLWRAITH, M.B., Associate in Obstetrics, JOHN JOSEPH MACKENZIE, B.A., M.B., Professor of Pathology and Bacteriology and Curator of the Museum and Laboratories.

PATRICK WALTER HUGHES MCKEOWN, B.A., M.B., Demonstrator in Clinical Surgery.

JOHN CUNNINGHAM McLENNAN, B.A., Ph.D., Associate Professor of Physics and Director of the Physical Laboratory.

J. PLAYFAIR MCMURRICH, Professor of Anatomy and Director of Anatomical Department.

ALEXANDER MCPHEDRAN, M.B., Professor of Medicine and Clinical Medicine.

HENRY THOMAS MACHELL, M.D., Associate Professor of Obstetrics and Pediatrics.

WILLIAM OLDRIGHT, M.A., M.D., Professor of Hygiene and Associate Professor of Clinical Surgery.

HAROLD CAMPBELL PARSONS, B.A., M.D., C.M., M.R.C.P., Lond., Associate in Clinical Medicine.

University of Toronto Faculty of Medicine-Continued

George A. Peters, M.B., F.R.C.S., Eng., Professor of Surgery and Clinical Surgery. (Obit.)

WILLIAM HUNTER PIERSOL, B.A., M.B., Lecturer in Elementary

Biology and Histology.

NEWTON ALBERT POWELL, M.D., C.M., M.D., Bellevue, N.Y., Professor of Medical Jurisprudence and Associate Professor of Clinical Surgery.

ALEXANDER PRIMROSE, M.B., C.M., Edin., Associate Professor of

Clinical Surgery.

RICHARD ANDREWS REEVE, B.A., M.D., LL.D., Professor of Ophthalmology and Otology.

THOMAS BEDFORD RICHARDSON, M.D., C.M., F.R.C.S., Edin., Demonstrator in Clinical Surgery.

James Frederick William Ross, M.D., Professor of Gynæcology. Robert Dawson Rudolf, M.D., C.M., M.R.C.P., Lond., Associate

Professor of Medicine and Associate in Clinical Medicine.
George Sterling Ryerson, M.D., C.M., Professor of Ophthalmology and Otology.

CHARLES SHEARD, M.D., C.M., Professor of Preventive Medicine. CHARLES BUCKINGHAM SHUTTLEWORTH, M.D., C.M., F.R.C.S., Eng.,

Demonstrator of Clinical Surgery.

CLARENCE LESLIE STARR. M.B., Associate Professor of Clinical Sur-

gery in charge of Orthopedics.

FREDERICK NEWTON GISBORNE STARR, M.B., Associate Professor of Clinical Surgery.

WILLIAM THEOPHILUS STUART, M.B., M.D., C.M., Associate Professor of Medical Chemistry.

CHARLES ALGERNON TEMPLE, M.D., C.M., Demonstrator of Clinical Surgery.

James Algernon Temple, M.D., C.M. (McGill), LL.D., Professor of Gynæcology and Operative Obstetrics.

LUKE TESKEY, M.D., C.M., Professor of Surgery and Clinical Surgery.

WILLIAM BROWN THISTLE, M.D., Associate Professor of Clinical

CHARLES TROW, M.D., C.M., Associate Professor in Ophthalmology and Otology.

JOHN FRANKLIN UREN, M.D., C.M., Demonstrator of Clinical Surgery. DAVID JAMES GIBB WISHART, B.A., M.D., C.M. (McGill), Associate Professor in Laryngology and Rhinology.

ADAM HENRY WRIGHT, B.A., M.D., Professor of Obstetrics.

ROBERT RAMSAY WRIGHT, M.A., B.Sc., LL.D., Professor of Biology.

SESSIONAL APPOINTMENTS.

THOMAS BOLES ALLEN, B.A., Junior Assistant in Chemistry.

THOMAS DICKSON ARCHIBALD, B.A., M.B., Tutor in Medicine and Laboratory Assistant in Bacteriology.

ROBERT GARDINER ARMOUR, Assistant Demonstrator in Physiology.

IRVING RUSSELL BELL, B.A., Class Assistant in Biology and Assistant Demonstrator in Physiology.

EDMUND BOYD, B.A., Lecture and Laboratory Assistant in Biology.

PERCY GORDON BROWN, B.A., Class Assistant in Biology.

MALCOLM HECTORSON VALENTINE CAMERON, M.B., Clinical-Laboratory Assistant.

Frederick Arnold Clarkson, M.B., Assistant Demonstrator in Pathology.

EDWARD COOPER COLE, B.A., Class Assistant in Biology.

CHARLES JOSEPH COPP, M.D., C.M., Assistant Demonstrator of Anatomy.

MALCOLM McLachlan Crawford, M.B., Assistant Demonstrator in Pathology.

WILLIAM HUME CRONYN, B.A., M.B., Assistant Demonstrator in Physiology.

John Alexander Macdonald Dawson, B.A., Assistant in Chemistry.

MISS MARY LEE EDWARD, B.A., Assistant Demonstrator in Physiology.

George Elliott, M.D., C.M., Assistant Demonstrator in Anatomy and in Physiology.

EDWARD FIDLAR, B.A., Class Assistant in Pharmacy and Pharmacology and Assistant Demonstrator in Physiology.

JOHN ALEXANDER GARDINER, B.A., Lecture Assistant in Physics. DUNCAN ARCHIBALD LAMONT GRAHAM, M.B., Class Assistant in Pharmacy and Pharmacology.

FREDERICK CHRISTOPHER HARRISON, B.A., Assistant Demonstrator

in Physiology.

VELYIEN EWART HENDERSON, M.A., M.B., Lecturer in Therapeutics. ARTHUR CLINTON HENDRICK, M.A., M.B., Assistant Demonstrator in Anatomy and in Physiology.

CLARENCE MEREDITH HINCKS, B.A., Class Assistant in Biology.

RALPH EBENEZER HOOPER, B.A., M.B., Assistant Demonstrator of Anatomy.

Goldwin William Howland, B.A., M.B., M.R.C.P., Lond., Tutor in Medicine and Assistant Demonstrator in Pathology.

ARCHIBALD GOWANLOCK HUNTSMAN, B.A., Laboratory Assistant in Biology.

HENRY SEATON HUTCHISON, M.B., Assistant Demonstrator in Pathology.

MISS LEAH BIDENA JOHNSON, M.A., Assistant Demonstrator in Physics.

Walter Keast, B.A., Assistant Demonstrator in Physics.

Wallace Bruce Large, B.A., Class Assistant in Pharmacy and Pharmacology, and Assistant Demonstrator in Physiology.

JULIAN DERWENT LOUDON, B.A., M.B., Assistant Demonstrator in Physiology.

WILLIAM JAMES McCollum, M.B., Tutor in Medicine and Assistant Demonstrator of Anatomy.

University of Toronto Faculty of Medicine-Concluded

EDWARD ALLISTER McCulloch, B.A., M.B., Instructor in Jurisprudence and Class Assistant in Biology.

Percy Blakely Macfarlae, B.A., Assistant Demonstrator in Physiology.

Donald McGillivray, M.B., Tutor in Medicine and Assistant Demonstrator of Augustian.

Alexander John MacKenzie, B.A., M.B., LL.B., Class Assistant in Biology and Assistant Demonstrator of Anatomy.

JOHN FRANCIS MACKEY, B.A., Junior Assistant in Chemistry.

MATTHEW DONALD MCKICHAN, B.A., M.B., Class Assistant in Biology.

John MacLachlan, Class Assistant in Pharmacy and Pharmacology.

John Harris McPhedran, M.D., Second Assistant in Clinical Laboratory.

WILLIAM FLETCHER MCPHEDRAN, B.A., Class Assistant in Pharmacy and Pharmacology and Assistant Demonstrator in Physiology.

KENNETH JAMES MCRAE, B.A., Junior Assistant in Chemistry.

WILLIAM JOHN OGILVIE MALLOCH, B.A., M.B., F.R.C.S. (Eng.), Assistant Demonstrator of Anatomy.

RODGER JAMES MANNING, B.A., Junior Assistant in Chemistry.

Frederick William Marlow, M.D., C.M., F.R.C.S. (Eng.), Assistant Demonstrator of Anatomy and Demonstrator in Gynaecology.

Frederick Robert Miller, B.A., Class Assistant in Pharmacy and Pharmacology.

DAVID BERTRAM NUGENT, B.A., Assistant Demonstrator in Physics.

Brefney O'Reilly, M.D., C.M., Assistant Demonstrator in Pathology.

HAROLD CAMPBELL PARSONS, B.A., M.D., C.M., M.R.C.P. (Lond.), Assistant Demonstrator in Pathology.

WILLIAM HERBERT PEPLER, M.D., C.M., Assistant Demonstrator in Pathology.

CHARLES EDWARD ROWLAND, B.A., Assistant Demonstrator in Physiology.

EDWARD STANLEY RYERSON, M.D., C.M., Assistant Demonstrator in Pathology and Anatomy and Demonstrator in Clinical Surgery.

Wallace Arthur Scott, B.A., M.B., F.R.C.S. (Eng.), Assistant Demonstrator of Anatomy and Class Assistant in Biology.

CHARLES BUCKINGHAM SHUTTLEWORTH, M.D., C.M., F.R.C.S. (Eng.), Demonstrator in Anatomy.

GIDEON SILVERTHORN, M.B., Demonstrator in Pathology and Demonstrator in Surgery and Clinical Surgery.

George Edward Smith, B.A., M.B., Assistant Demonstrator of Anatomy.

ROBERT BOYD STEWART, M.A., Fellow in Chemistry (Mich. Term).
ALEXANDER THOMAS STUART, Junior Assistant in Chemistry (Easter

WILLIAM HOWARD TYTLER, B.A., Class Assistant in Biology. CHARLES JAMES WAGNER, M.B., Demonstrator in Pathology.

SAMUEL HARRY WESTMAN, M.B., Assistant Demonstrator in Anatomy.

Faculty of Household Science

President—R. A. FALCONER, M.A., Litt. D., LL.D., D.D. Chairman—
Secretary—Miss C. C. Benson, B.A., Ph.D.

MISS CLARA CYNTHIA BENSON, B.A., Ph.D. MISS ANNIE LEWISA LAIRD.
WILLIAM ROBERT LANG, D.Sc., F.I.C.
ARCHIBALD BYRON MACALLUM, Ph.D., LL.D., F.R.S. JOHN CUNNINGHAM MCLENNAN, B.A., Ph.D. ROBERT RAMSAY WRIGHT, M.A., B.Sc., LL.D.
The Librarian of the University.

- J. A. AMYOT, M.B., Lecturer in Hygiene and Sanitary Science.
- C. C. Benson, B.A., Ph.D., Associate Professor of Physiological Chemistry.
- E. F. Burton, B.A., Demonstrator in Physics.
- M. A. CRAIG, Instructor in Household Science.
- E. M. Eadie, Lecturer in Household Economics.
- F. B. KENRICK, M.A., Ph.D., Associate Professor in Chemistry.
- A. L. LAIRD, Associate Professor of Household Science.
- O. G. Patterson, B.H.Sc., Instructor in Physiological Chemistry.
- M. A. PROCTOR, B.H.Sc., Laboratory Assistant in Household Science.
- M. B. TAMBLYN, Instructor in Household Science.

Faculty of Applied Science and Engineering

- R. A. FALCONER, M.A., LL.D., D.D., President.
- J. GALBRAITH, M.A., LL.D., Dean of Faculty
- A. T. Laing, B.A.Sc., Secretary of Faculty.
- F. A. Moure, Esq., Bursar.
- F. B. ALLAN, M.A., Ph.D., Lecturer in Chemistry.
- G. R. Anderson, M.A., Lecturer in Physics.
- R. W. Angus, B.A.Sc., Professor of Mechanical Engineering.
- E. G. R. Ardagh, B.A.Sc., Lecturer in Chemistry.
- J. W. BAIN, B.A.Sc., Associate Professor of Applied Chemistry.
- Alfred Baker, M.A., Professor of Mathematics.
- B. A. Bensley, B.A., Associate Professor of Zoology.
- M. C. Boswell, M.A., Ph.D., Lecturer in Chemistry.
- C. A. CHANT, M.A., Ph.D., Lecturer in Physics.
- J. R. COCKBURN, B.A.Sc., Lecturer in Descriptive Geometry.
- A. P. COLEMAN, M.A., Ph.D., Professor of Geology.
- W. Hodgson Ellis, M.A., M.B., Professor of Applied Chemistry.
- J. H. FAULL, B.A., Lecturer in Botany.
- J. GALBRAITH, M.A., LL.D., Professor of Engineering.
- P. GILLESPIE, B.A.Sc., Lecturer in Theory of Construction.
- J. McGowan, B.A., B.A.Sc., Associate Professor of Applied Mechanics.
- M. A. McKenzie, M.A., Associate Professor of Mathematics.
- G. R. Mickle, B.A., B.A.Sc., Professor of Mining.
- W. L. MILLER, B.A., Ph.D., Associate Professor of Physical Chemistry
- W. A. PARKS, B.A., Ph.D., Lecturer in Mineralogy.
- A. L. Parsons, B.A., Lecturer in Mineralogy.
- H. W. PRICE, B.A.Sc., Lecturer in Electrical Engineering.
- M. R. RIDDELL, B.A.Sc., Lecturer in Mechanical Engineering.
- T. R. ROSEBRUGH, M.A., Professor of Electrical Engineering. L. B. STEWART, O.L.S., D.T.S., Professor of Surveying and Geodesy.
- R. B. THOMSON, B.A., Lecturer in Botany.
- W. M. TREADGOLD, B.A., Lecturer in Surveying.
- T. L. WALKER, M.A., Ph.D., Professor of Mineralogy and Petrography.
- C. H. C. Wright, B.A.Sc., Mem. O.A.A., Professor of Architecture.

SESSIONAL APPOINTMENTS.

- E. W. Banting, B.A.Sc., Fellow in Surveying.
- S. Beatty, B.A., Fellow in Mathematics.
- W. A. Begg, B.A.Sc., Fellow in Drawing.
- W. C. BLACKWOOD, Fellow in Physics.
- O. Bowles, Assistant in Mineralogy.
- A. J. Campbell, B.A.Sc., Demonstrator in Drawing.
- R. E. C. CHADWICK, Fellow in Drawing.
- G. C. COWPER, Fellow in Drawing.
- S. R. CRERAR, B.A.Sc., Demonstrator in Surveying.
- C. S. Dundass, B.A.Sc., Demonstrator in Electrical Engineering.
- S. Dushman, B.A., Demonstrator in Electrochemistry.
- G. H. FERGUSON, Fellow in Surveying.
- H. S. FIERHELLER, B.A.Sc., Demonstrator in Electrical Engineering.
- E. L. C. Forster, B.A., Fellow in Chemistry.
- W. W. GRAY, B.A.Sc., Demonstrator in Thermodynamics.
- W. S. Guest, B.A.Se., Demonstrator in Electrical Engineering.
- W. F. Green, B.A., Assistant in Mineralogy.
- R. H. HOPKINS, B.A.Sc., Demonstrator in Electrical Engineering.
- W. Jackson, Fellow in Surveying.
- A. E. Johns, B.A., Fellow in Mathematics.
- J. D. KEPPY, Fellow in Drawing.
- H. M. LANCASTER, B.A.Sc., Demonstrator in Chemistry.
- T. R. LOUDON, B.A.Sc., Lecturer in Drawing.
- A. W. McConnell, B.A.Sc., Lecturer in Architecture.
- R. W. Moffatt, B.A.Sc., Fellow in Drawing.
- P. F. Morley, Fellow in Chemistry.
- G. R. Munro, B.A.Sc., Demonstrator in Drawing.
- J. B. MINNS, Fellow in Drawing.
- C. R. MURDOCH, Fellow in Surveying.
- T. H. PLUNKETT, B.A.Sc., Fellow in Drawing.
- R. B. POTTER, Fellow in Physics.
- J. F. PROCUNIER, Fellow in Electrical Engineering.
- T. E. ROTHWELL, B.A.Sc., Fellow in Chemistry.
- R. B. Stewart, Assistant in Electrochemistry.
- W. G. SWAN, B.A.Sc., Demonstrator in Strength of Materials.
- L. R. THOMSON, B.A.Sc., Demonstrator in Drawing.
- J. J. TRAILL, B.A.Sc., Demonstrator in Hydraulics
- E. WADE, B.A., Demonstrator in Mining.
- C. R. Young, B.A.Sc., Lecturer in Applied Mechanics

Faculty of Education

THE INAUGURAL CEREMONY

The Inauguration of President Falconer

HE twenty-sixth and twenty-seventh days of September, 1907, were signalized by two of the most important events in the history of the University of Toronto—the formal inauguration of Robert Alexander Falconer, M.A., Litt. D., LL.D., D.D., as President of the University, and the opening of the new Physics Building. The previous Presidents had been Rev. John McCaul, 1849-1880, Sir Daniel Wilson, 1880-1892, James Loudon, 1892-1906. During the interregnum of 1906-7, Principal Hutton performed the duties of President, while the Governors of the University were carefully considering the qualifications of many prominent educationists prior to the selection of a new President.

In their desire to choose the right man "hundreds of letters were sent and received—enquiries by letter and in person were made in every direction; over eighty names were submitted, accompanied by three times as many testimonials, all of which were considered." After patient deliberation the Governors offered the Presidency to Dr. Falconer. The "cable message offering him the appointment caught him at Pompeii, in the house of his friend

Glaucus."*

The official installation took place in the Convocation Hall, which was well filled. Sir William Meredith, Chancellor of the University, occupied the chair. On the dais were the Prime Minister of Canada, Sir Wilfrid Laurier; Hon. A. C. Rutherford, Premier of Alberta; Hon. J. P. Whitney, Premier of Ontario; representatives of many American and Canadian universities and colleges, leaders of various religious bodies, members of the Board of Governors, and a large number of the Faculty.

Dr. John Hoskin, K.C., Chairman of the Board of Governors, presented Dr. Falconer, who was then installed by the Chancellor. After receiving the robe of office, the new President delivered his inaugural address on "The Function of the University in the State and the Duty of

the State to the University."

The address was followed by the conferring of LL.D. degrees, *honoris causa*, after which ceremony Dr. Pritchett, President of the Carnegie Foundation for the Advancement of Teaching, delivered a congratulatory address on behalf of the institutions of learning in the United States.

The Chancellor then invited Sir Wilfrid Laurier to speak. The Prime Minister congratulated the new President and expressed the wish that he could be an undergraduate under Dr. Falconer's supervision. He referred to "the broad catholicity of spirit manifested in the University of Toronto in selecting the best men, wherever they are to be found, and in maintaining, as it does, those high principles of human brotherhood and Canadian tolerance."

In the evening the presentation of congratulatory addresses from sister universities took place.

^{*}From Dr. Hoskin's presentation address.

The Ideal of the University.

EXTRACTS FROM THE PRESIDENT'S INAUGURAL ADDRESS.

The university-bred man should not be simply a caseman, quick to detect what he has seen before, apt at reproducing experiments, ready to imitate, moderately efficient until his information is exhausted. No true university can afford to yield to the superficial demand for what is so often erroneously called the practical. A university man should have "a reach beyond his grasp." We are true to the old university ideal in its essence, when we insist upon the highest possible professional culture, many contributory interests and a finely tempered humanity.

* * *

The true university is a centre for both instruction and research, for the impartation of knowledge already gained, and for the extension of the boundaries of knowledge. It consists of professors and students who not only acquire knowledge, but learn to investigate for themselves. Unless the professor is to be a traditionalist, handing down to his class verbatim what he delivered to its predecessor, he must be an investigator. He must keep the zest of the explorer, fascinated by the hope of new discoveries. He who has ceased to penetrate into new regions loses the power of holding the respect of even the average student.

* * *

The besetting academical sin is an intellectual aloofness which occasionally makes the highly educated man unable to appreciate the outlook of the average man; and the aristocracy of intellect is as exclusive as any other aristocracy. This exclusiveness, however, is really a negation of the true university ideal, which involves a slow and painful search for truth, proceeding patiently and modestly in anything but an arrogant spirit. True culture commands admiration, for it

means an enriched humanity and is the foe of pedantry, cant and machine-like professionalism. The educated man should be the university's best advertisement in the community.

* *

Progress comes slowly, and is conditioned by the accurate observation of essential facts. Here may come in the spirit of the university. It teaches the scientific method, and equips the student to become an impartial and scientific observer of facts. It should, therefore, fit him to observe the social and political situation, awaken in him human sympathies, and the desire to emancipate his fellows from the ignorance and prejudice which are breeding evil.

* * *

Learning is a universal commonwealth, of which the universities of the world are, in some sort, the provinces. Science, philosophy, classical studies, are pursued everywhere by similar methods; professors exchange views as to processes, and announce their discoveries and results through international publications and societies, which are among the most effective peace agencies of our modern civilization. The universities of the world are silently humanizing the minds of men.

* * *

The old Greek view of education is not yet outworn: "The Hellene felt that it was quite as much his duty to the State to educate her citizens properly as it was to die in her cause, and he did both ungrudgingly." Undoubtedly, our idea of citizenship has been widened by the extension of the democracy and enriched by the addition of Christian virtues. But we must still aim in our education at the production of

the highest possible type of citizenship. I believe that the highest type of citizenship cannot be permanently trained apart from a sense of obligation to and reverence for the moral order which is Divine. Religion is the crowning function of our manhood, for in religion we reach out to that which completes this fragment of the present—

"And what is our failure here But a triumph's evidence of the fullness of the days?"

Our people, being a Christian nation, will expect of a university that its influence will be favorable to the promotion of religion. Did I for a moment imagine that there is any antagonism between the spirit and ideals of a state university and essential Christianity, certainly I should not be addressing you here to-day. The university teacher aims at truth, and he can attain it only in so far as his own life is a harmonious

intelligence, controlled by high moral purpose. As a scientist, he can never rest in anything less than the truth, as he believes he has discovered it after the most searching and unbiased investigation. This sincerity, earnestness, freedom, and single-mindedness cannot fail to promote, in the long run, an essentially Christian spirit, and the fine motto which in my student days was inscribed on the walls of the Greek classroom of Edinburgh, $\dot{\alpha}\lambda\eta\vartheta\dot{\epsilon}\dot{\nu}\dot{\epsilon}\dot{\nu}$ $\dot{\epsilon}\dot{\nu}$ $\dot{\alpha}\gamma\dot{\alpha}\pi\eta$ ("holding to the truth in love") might well be taken by all universities to signify that true religion, science and culture may go hand in hand together.

* * *

I believe that my colleagues recognize with me the seriousness of the task that lies before us. I could not undertake the share in it that has been assigned to me were it not that I am persuaded that help comes from the Unseen to him who seeks faithfully to do his duty.

Alma Mater

"In the sea of life enisled."—M. Arnold.

What is more romantic than an island? What is more fascinating than the study of history? What is more interesting than ourselves? How great, then, must be the interest and fascination attaching to the study of the history of "that island valley of Avillion," our Alma Mater!

It is a far cry to the island whence the germ was derived from which the embryo grew that was to develop into the University of Toronto. Early in the reign of Queen Elizabeth (1563) the virgin queen founded and gave her name to a college in Guernsey, that green isle which, like herself, had still remained inviolate. Early in the nineteenth century Sir John Colborne, as Governor of the Channel Islands, restored and modernized Elizabeth College. When he was made Governor of Upper Canada, in 1829, he at once proceeded to carry out a similar reform in his new capital, "muddy little York," and in accordance with the Act of 1797 founded what was at first known as Minor College. In 1843 this school, as Upper Canada College, transferred its Seventh Form into the first freshman class of King's College, and its Principal, Rev. Dr. McCaul, into the first Acting President of the University of Toronto.

Still pursuing the figure of an island, it might be said that during the first epoch of their existence the institutions now so successfully united in our federation were very Symplegades, or clashing islands, in constant collision and a perpetual menace to the ship of state. The Federation Act of 1887, with Chancellor Burwash as its pilot, was the Argo which fixed the two colleges, University and Victoria, in harmonious relationship. Wisdom was justified of her children, and it was not long before Provost Macklem proffered his request in the words of Dionysius:

"Ich sei, gewährt mir die Bitte, In eurem Bunde der Britte." So, by union with Trinity, the Provincial University became a greater trinity of colleges, and removed the fear "lest one good custom should corrupt the world."

The history of Toronto University divides itself naturally into three epochs, each distinctly differentiated as to organization, site, men and methods. The first period, that of King's College, lasted from 1842 to 1850, and was an era of Church domination, marked by a most conservative constitution, by methods that did not differ greatly from those of Dr. Johnson's time, and by the production of scholars who could turn out elegiacs, alcaics and sapphies in either Latin or Greek. Divinity, Law and Medicine were all represented on the teaching staff. The site was in unstable equilibrium, varying from Park to Parliament Buildings and back again more than once in the course of twenty years. The first home of King's College was quietly confiscated by the Government of the day in 1853, and later on turned into a lunatic asylum. Before its removal to make way for the present Parliament Buildings, it had served as a boarding-house, a high school and a pensioners home.

At the opening of the second period, in 1850, King's College became the University of Toronto. The institution was secularized and all church tests were done away with. As an important result its former visitor, the Bishop of Toronto, Dr. Strachan, collected money in England and founded Trinity College, as an Anglican seat of learning which should keep up the tradition of the Oxford and Cambridge type in the colony. For, by the Act of 1850, the new University of Toronto was modelled on that of London and was merely an examining and degree-conferring body, controlled by a Chancellor, Vice-Chancellor and Senate, but without any teaching faculty. For this most important function a distinct institution known as University College was founded, with a faculty of seven or eight professors. who, with the President, formed the College Council. This strange divorce between the teaching and the examining

Alma Mater-Continued

bodies was kept up till 1887, and led to many difficulties, not the least of which was that of enforcing attendance at lectures. In the fifties the faculties of Divinity, Law and Medicine ceased to exist. During the generation that followed Canadians ceased to call themselves colonists, the Dominion was born, the new learning which resulted from the use of the comparative method began to make itself apparent in the curriculum, and Classies and Mathematics no longer formed the staple food of the student.

With the change in methods came the development of new courses, an advance in the number of students, and, above all, a growing interest on the part of the alumni, who, as members of the Senate, began to take an increasing share in directing the University policy. A powerful factor in the development of this esprit de corps was the erection in 1856-8 of the beautiful main building, the home of University College, and also the seat throughout this epoch of the College Residence, which did much to foster such a spirit. So strong was this Canadian sentiment that when President McCaul resigned in 1881, after having guided higher education in Ontario for over half a century, the appointment of an Oxford don as his successor roused such a storm of opposition as caused that gentleman to return to his own college, of which he soon after became President. The Presidency of University College had meanwhile been conferred upon Dr. (afterwards Sir) Daniel Wilson, who had come out from Edinburgh in 1853 as Professor of History and English Literature. What Dr. McCaul had done for British classical archaeology. Dr. Wilson did for the prehistoric annals of Scotland. He and still more his brilliant and idolized colleague, Professor G. P. Young, imparted to the teaching in University College a Scottish flavor, which the continued presence of several notable Scotch professors has since maintained.

The German influence, so supreme in modern education, came into the University through the Natural Science departments, which, if they missed a Huxley and a Tyndall, received in the late Professor Chapman one who united the ponderous learning of Göttingen with the manual dexterity of a Parisian maître d'eserime. In the 'seventies,

graduates in the Sciences and Modern Languages began to go to Germany for post-graduate work. The establishment of post-graduate universities and courses in the United States reached speedily on Toronto and the number of alumni qualified to do higher work in both Canada and the United States soon rendered it less necessary to look to the Motherland for professors. On the death of President Wilson in 1892 it was not surprising that a Canadian, Professor London, should be chosen as his successor.

Under President Loudon, who had already been instrumental in developing the new forward movement, this expansion went on with ever-growing power. He found an able coadjutor in Chancellor Burwash, of Victoria, who, after showing admirable generalship in conducting the difficult negotiations that resulted in the federation of University and Victoria Colleges by the Act of 1887, has continued to promote the success of that measure by his broad-minded and liberal policy. Victoria had been founded in 1841, having grown out of Upper Canada Academy as King's College grew out of Upper Canada College. After fifty years in Cobourg, Victoria College was now moved to Toronto, and occupied its own fine location in the northeastern part of the Queen's Park. Thus, a wholly new element was introduced into University life, bringing with it an increase in numbers, influence and strength. The material development that followed federation was so great as seriously to embarrass the financial resources of the University, which were quite inadequate to meet the demands for increase in staff, buildings and equipment. The restoration of the Medical Faculty in 1887 added force to the plea for relief.

The fire of 1890, which destroyed the library and nearly all the main building, had called forth a sympathetic liberality on the part of graduates and citizens that has not been allowed to slumber; and as one consequence a keener interest in University affairs began to develop. Following the example of our southern neighbors, alumni associations were now formed, pressure was brought to bear on the Government, which after many years of neglect and even spoliation at length evinced some sympathy for the growing needs

Alma Mater-Concluded

of the University. A change of Government ensued, and one of the first acts of the new Premier was the appointment of a Commission to report upon the University and propose such changes in its constitution and government as the altered conditions had rendered advisable. The suggestions contained in the Commission's report were embodied in a new University Act and provision was made for meeting the financial needs by a method calculated to ensure that steady advance in revenue which continued expansion requires.

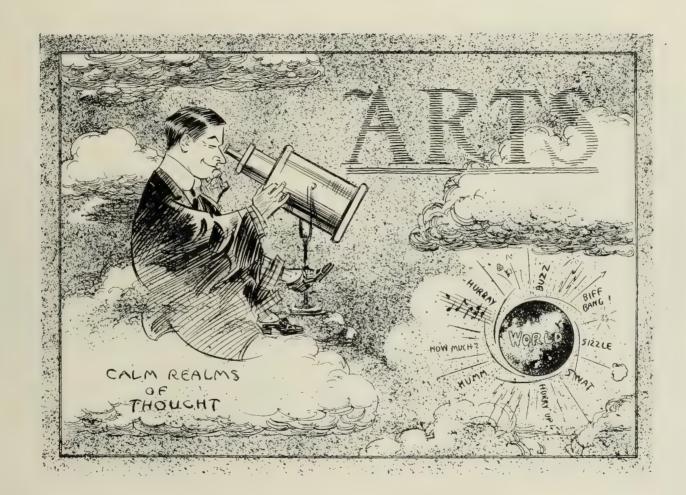

The most radical change effected by the Act of 1906 was the removal of the University from the direct control of the Government. By Section 37, "The government, conduct, management and control of the University and of University College, and of the property, revenues, business and affairs thereof," are vested in the Board of Governors, consisting of the Chancellor and the President of the University, as ex officio members, and eighteen persons appointed by the Lieutenant-Governor-in-Council. Apart from this feature the general tendency of the Act was to concentrate power in the hands of the President and in various ways to approximate rather to the American model than to the British or German type of university.

President Loudon resigned, owing to ill health, shortly after the passing of the Act, and for a year Principal Hutton served as President, while the Board of Governors sought for a successor. Once more, as in the beginning. "the island" sent forth the man, and in a double sense, for President Falconer is not only a native of Prince Edward Island, but the Gilchrist scholar from the West Indies. By a happy augury he thus represents the widely sundered possessions of British North America, and can sympathize with the students from both north and south, who are coming to make Toronto an international university. So we have arrived at the fateful year of 1908, when the first class under the new dispensation will go forth to the world, each to the destined labor of life, and each determined, let us hope, to exalt in every way the renown of his Alma Mater. And unto each may the new age appear as to Obermann:

> "The world's great order dawns in sheen After long darkness rude, Divinelier imaged, clearer seen, With happier zeal pursued."

> > D. R. Keys.

History of Class '08

"It would be sweet to think when we are old of all the pleasant days that came to pass."

HE class of 1908 entered in the brave days when there was a hustle. The feeble pen of the historian cannot do justice to that hustle, nor to the beauty of the autumn afternoon on which it happened. We all remember how the sun's mellow beams shed a soft sheen over Varsity's walls and tower of solemn gray. We remember, too, how we trembled, while on the lawn we waited the advance of the dread sophomores. They Sophomores, they, a little more wise than we an infinitely little more—but, if they were more wise, we were more numerous, and in a hustle numbers count. It lasted all afternoon—the afternoon seemed very long—for did not the sun stand still! There was no open work—all scrimmaging, and everybody off-side-mounted cobs came and they, too, were off-side—so were the three coveted geese. But at nightfall the various kinds are wont to congregate, and so it was that all the geese went to their favorite haunt in the gymnasium.

October came again; other freshmen came, were hustled, treated to sour grapes, as we had been; and all went well until one woeful night when the freshmen fain would feed us ovsters. But '07 objected. They had presumptuously demanded a similar treat from us and been refused; whereas we, asking not, were about to receive. The function was not a success: freshmen, sophs, juniors, cobs, servants, oysters, SALT, paint, darkness made "confusion worse than death." Revenge-word so sweet and so intensely human! Our chance soon came. Already the Scribe of '07 had written, "Moved and seconded by Messrs, O and Co that we have a class reception." The appointed evening arrived, so did the women students—but the men—! It was artists' night; the women were painted some, Paul Kane's Indian chiefs were painted more, '07 men were painted most.

Result: Suspensions, ominous assemblings of class presidents, mass-meetings, strikes, restoration of banished students—and, finally, the return of the long-absent dove.

But our men were more than amateur artists: A man of '08 won in the Undergraduate Tennis Tournament; and in association football we won the Faculty Cup; not to mention our work in hockey. While the men were thus variously employed, our women students were waxing mighty in debate. In the Inter-Year series, while all the women talked much, ours talked to the point; and, think of it, ye men, these very pointed talkers graduate in leap year! May they always be champions!

October, 1906, found us spectators of what promises to be the last Arts hustle. To us, as juniors, the seething, struggling mass seemed the very acme of foolishness—one's view-point changes so much in a year. Age withers, and custom stales all things. We were men now, and, as such, had put away childish things. For two years we had been called students; we knew not why—it was not because we studied. Conscience-smitten, we asked ourselves for what purpose we had come to the University; surely, it was to study—and to our books we went.

Our work, however, was broken with interludes of play. We captained the University Association Team, which won the Inter-Collegiate Championship of America. We also held for a second year the Faculty Cup, while in debate we vanquished our stately senior rivals. Our women students, too, still talked to the point; for, besides winning the Inter-Year series again, they also recorded a victory for the Woman's Lit. of University College in the Inter-College series. Proud of his athletes and debaters, and thinking it well to have them brought more closely together, our President adopted an admirable scheme—a skating party.

They call us seniors now. We have met again—hand has clasped hand, eye looked into eye, inner circles have been reunited and many a narrative told of trails, long and lone, of mountains, purple-robed, mist-shrouded, or thunder-riven, and of seas, wide and wind-tossed. These October reunions, transcendent joys, climax of each vacation; and we have had our last!

EXECUTIVE OF CLASS '08 FOR THE YEAR 1907-08

IST ROW H. B. JOHNSTON, 2nd Historian: W. T. KENNFDY, Treasurer: MISS M. L. NEWFON, Councillor: N. W. LYLE, Indge: W. A. GILLLAND, Althletic Director: MISS J. O. CARMICHAEL, Poetess: J. McEwen, Critic: MISS M. V. McNeely, Prophetess, 2nd Row—J. D. CAMPBELL, 1st Vice-President; MISS C. B. Hunter, Musical Directorses: MISS E. E. Hambly, 1st Vice-President: E. S. Williams, President: Miss H. F. McCuttheon, 1st Historian: MISS K. G. CAMPBELL, Councillor; A. M. SIMPSON, Secretary, 3rd Row—C. W. Milburn, Councillor; T. A. Arthurs, Orator; E. Earchman, Councillor.

History of Class '08-Continued

No hustle lent life to our return. The calendar forbade such, and ye great, strong man told us it was no misprint. It is gone, but other things remain: athletics, debates, class receptions, oyster suppers, a graduating dinner, and untold other social functions—to some a bane, to others a blessing. In what of these are already past we have had a fair share, as we hope to have in what are yet to come. The Captain of Varsity Association Team and two of his supporters are '08 men; so are three members of the Senior Hockey Team. The former won, the latter is winning. Soon, the last match will be played, and then will come the Lit. elections, the May examinations, a little formality in Convocation Hall, a garden party in the Quadrangle, and then shall we pass out into life's sundering sea, "where the lights go wide apart."

In the undergraduate life of the University we trust that we have done enough "to redeem us from a charge of nothingness." We were the first year to respect the freshmen's reception, we materially helped to establish a stag night and make it a success; our representatives on the Students' Parliament are vigorous, for has not one of them revolutionized, if, indeed, not invented, a real Students' Theatre Night!—a much-needed step in the direction of unity among the various faculties. While the men have thus been developing a greater degree of federal unity, our women have throughout sought a greater degree of

local unity. Their effort is best seen in the "Valentine Luncheon," introduced by themselves in their first year, and since continued. Just what is done at it the Historian does not know. It is a rather informal function, by, and exclusively for, the women of '08. They have an ample menu, a highly artistic and exhaustive toast list—in fact, most everything except men, the one indispensable element on Valentine's Day.

As a class, we have seen many changes: Entering, we found the University torn with civil strife, an investigation, and a reorganization by a new Provincial Government, which looked kindly on its University and gave it large grants of money. Finally, we have seen the installation of a new President, a man who has won universal esteem among the students. We entered when the University was weak; we leave it strong. In its weakness it did much for us: in its strength it will do more for our successors.

From the wide world we came to it; from it we now go back into the wide world—but we are changed. Once we had hoped to know all things—now we are content with less; for knowledge is "like a sinking star," in that absolute knowledge is indeed "beyond the bounds of human thought." If our Alma Mater has taught us that "we have but faith: we cannot know," has it not taught us life's supreme lesson?

H. B. J.

Class '08 Graduating Dinner

HE graduating year, the year during which the departing class constantly says farewell to its Alma Mater, is essentially a year of last things. The last reception, the last Arts dinner, the last dance, the last Mock Parliament, the last Lit. elections, each relentlessly marks the progress of the year just as the clock strikes off the hours of the day, and with the last examinations the clock sounds twelve.

During his four years' sojourn within the walls of Varsity, the student's attitude towards these college functions has markedly changed. In his freshman year, the year of first things, eager to see and learn, he attends them all. Having come to college, he must be a college man. As a sophomore he still shows an eagerness to attend. Perhaps the novelty of the life has not yet worn away. Perhaps, too, his desire to see and to learn is exceeded by his willingness to be seen and to teach. In any case, he is present everywhere—the gavest, jolliest, noisiest of the crowd. But as the parent songster must, in obedience to nature's law, later lose his jubilant voice and gorgeous coat, so must the sophomore moult into the comparative obscurity of juniority. There neither the folly of the second nor the grandeur of the fourth year distinguishes him; he lives a while in the twilight, waiting only to become a senior, to illumine the horizon once again, and to fade forever from this view into the obscurity of the vast, all-engulfing outside world.

Of this feeling of farewell, this sense of bidding adieu to a friend who will never return, the Graduating Dinner is the finest expression. On this never-to-be-forgotten occasion the men of the class assemble for the last time. No outsider, not even a member of the faculty, is there to chill the ready flow of happy reminiscence. Sacred is this night to the memory of past joys and past regrets; sacred as well to the expression of future hopes and future fears.

Let no discord mar such harmony!

Alma Mater! Toast so suggestive, so pregnant with lofty thoughts, can by the best speaker be but poorly expressed.

"We have a voice, with which to pay the debt Of boundless love and reverence and regret."

So sings the poet, but yet the truest expression of this love, this reverence, this regret, whose roots entwine the human heart, is not in the words of the departing son, but in his deeds.

The Faculty, too, must ever be inseparably linked with Alma Mater. What if, as the motto runs, "Nature hath framed strange beings in her time;" is not this a blessing? Queer things are ever easiest to remember. Always, then, may the Faculty linger in our memories, yea, for the very queerness of it!

Athletics, "above all Greek, all Roman fame," need little commendation to the wise. The class of 1908 has won her laurels here; no better tribute need she pay.

The last toast on the list, corresponding to the last course on the menu, the dessert course, is to the "Varsity Girls."

"Here's to the light that lies in women's eyes, And lies, and lies, and lies."

So runs my verse. It is the light of co-education. Long may it continue to shed its brightening ray on all that Varsity holds dear.

And now the night is done, a night long to be cherished in the heart, a night to be recalled with feelings of mingled pleasure and regret..

> "The moving finger writes; and having writ Moves on: nor all your piety, nor wit, Shall lure it back to cancel half a line. Nor all your tears wash out a word of it."

> > HARRY C. HINDMARSH.

UNIVERSITY DRIVE

History of Class '10'09

ROM the far east and the west, from the depths of our northern forests, from the neighborland to the south, and even from over the great waters, the members of '09 have once more flocked to the beloved halls of their "Alma Mater." For the third time have we assembled: flinging far behind us the memory of "ye blooming freshman" and of the officious sophomore and entering into the quiet dignity of the junior.

The advent of our gracious President, the magnificent new buildings and college residences all tended to inaugurate a most prosperous season. But over the brightness a shadow hung, in the loss (felt) by (the) death of our much-loved class President, Mr. Cringan. In him the University lost an unusually talented member and his companions a friend indeed.

After installing a new Class Executive, we were enveloped in the crowding interests of student life and the usual round of sports and studies filled our time. Into the former both men and women entered with zest—in the paper-chases our ladies particularly distinguished themselves, bringing great honor to '09; in tennis, a '09 man wrought his way into two finals, and in football our men took an active part. In lacrosse also were we represented, and that even to the far corners of the earth, whithersoever the victorious Canadian Team went, there was '09 ably represented.

Perhaps '09 shines with the clearest light in academic circles, especially in debate. Here have our ladies been to the fore, snatching the laurels from the hitherto invincible '08 debaters. The men of '09 have also been successful and have won for the class a place on the debating shield. Judging from the eloquence displayed at the

impromptu debate at our last class meeting, and from the interest taken therein, our candidates should have a good chance in the oratorical contest. Unfortunately, however, the ladies who on that occasion took such a brilliant part are debarred from the contest.

Surely it is apparent that the unprecedented class-spirit of '09 has dominated college activity and will to the end of the chapter—so shall we always be "the latest and greatest and best of the noughty-noughties."

History of Class '10

→ HREE qualities are inherent in the sophomore class of '10 which tend to make it the most successful year to pass through the University of Toronto. In the first place, the class of '10 is progressive. The "hazing" of freshmen, a habit of our early predecessors, was supplanted by "the hustle" some twelve years back. This treatment of the innocent newcomer, less severe than hazing, has during recent years been developing into a "scrap" between "Arts" and "School," in which the latter, owing to superior numbers, generally carried off the honors, Sophs, and freshmen were thus more apt to become acquainted with the "School" men than with each other. For several years the milder dispositioned men of each class have been advocating the entire abolition of the hustle. This spirit has been growing year by year, but it was not until the progressive class of '10 reached its sophomore stage that the hustle was allowed to become a bit of ancient history. We have introduced ourselves into the hearts of the freshmen by a more efficient method, namely, by an attack on the stomach with grapes and apples.

Secondly, the class of '10 is aggressive. The passing of the hustle was bewailed by some of the freshmen, but on a certain election day, a few doughty warriors of 1910 paid them a visit which has resulted in uniting the two years by a bond of friendship more firmly than ever. The freshettes aided personally in rendering our reception successful, so the sophs., under the earnest solicitation of the freshmen, lent their assistance to make the first year recep-

tion the best attended and one of the most enjoyable ever held. Again, we sophs, turn out in large numbers to every student gathering. At "the Lit." we support our orators. We attend the University sermons and help to swell the music. We patronize the games, cheering on our men to their greatest efforts. At the Arts Dinner we had a more numerous and more enthusiastic representation than any other year. At all these University functions we make our presence felt.

Nevertheless, we sophs. are unobtrusive. We are anxious to learn and are willing to be taught, even if it is by some freshman who, like Nick Bottom, the Weaver, has imposed upon us by his impregnable self-esteem. We are modest. Not a word is heard from us in praise of our debaters, who are considered the best in the University. We do not boast that Junior Arts, mainly composed of 1910 stalwarts, although beaten, had the best team in the Mulock Cup series, or that the sophs, had more representatives on the three Varsity Rugby Teams than any other year in Arts. Nor do we make prophecies as to future feats of strength on the athletic field, marvelous orations in the forum, or brilliant achievements in halls of learning. No! We simply say:

"Parum Claris,
Lucem dare,
One-nought, one-nought, o-n-e,
N=O=U=G=H=T,

Evoi Academia,

Onety Nought, Varsity, 'Rah!' 'Rah!' 'Rah!' '

History Class '11

HE 1st of October, 1907, saw the advent of the largest, happiest and best-looking freshman class in the annals of the University. They were regarded with envy and admiration by their more book-learned fellow students, who required no proof of the ability of these freshmen to hold their own in every department of college life. The calmly confident exterior presented by the male portion of the year, without indicating a spirit of rowdyism, yet so impressed the warlike members of the second year that out of a wholesome regard for their own bodily welfare they refrained in fear and trembling from the long-established hustle, thereby creating an unheard of precedent, and making the important year of '11 famous for all time to come.

But this impetuous sophomore year of '10 was not to go entirely unpunished. The youthful freshmen found it necessary to chastise their more unruly neighbors, and at the elections held by the incoming year the name of the class of '10 was only kept from further disgrace by the timely intrusion of the President and the Registrar.

After being royally entertained by the fourth, third and second years respectively, our first class function—the At-Home—was held on the afternoon and evening of Nov. 30th. We were warned and admonished by our more experienced predecessors to fight against a dearth of men.

Knowing the attractive possibilities of our freshettes we disregarded the advice, and, owing to the intruding sophomores, there was an abundance of the male sex. We were amply repaid for the weeks of worry by the unqualified success of our never-to-be-forgotten primary attempt at entertaining our invited and uninvited guests.

The members of the year have taken an active part in all branches of athletic sports. One qualified for the Senior Rugby Team, while one half of the team representing Varsity in the Inter-Collegiate Tennis Tournament were freshettes. In hockey, both sexes will doubtless be heard from, also.

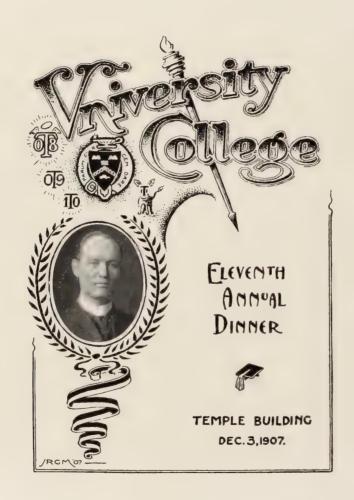

Once again in this term did the class of '11 show its superiority to all previous years, when both the ladies and gentlemen representing the year in the Literary Society debates outdistanced their competitors in three well-fought victories. We are safe in saying that before this freshman class of 1911 shall depart from the precincts of the University of Toronto the halls and lecture rooms will often resound with the sometime famous cry of—

"Undecim, undecim, wunty-one, Nullus secundus, second to none, Eis Kai Deka Tade Prota, Wunty-one, Varsity, Rah! Rah!"

KNOX COLLEGE.

AITKEN, WILLIAM EWART

"Ich tuhle Muth mich in die Welt zu wauen."

William Ewart Aitken was born in the village of Courtright some time in the last century, but went to Sarnia to acquire his secondary education in her collegiate institute. From there he came to Varsity, entering with the class of '07 and taking Semitics in his second year. But the lure of the West called him to Alberta and held him for a year and a half, and he was consigned to the tender mercies of '08 on his return. Last summer he was still further afield. British Columbia being the scene of his mission work, and he talks of going again. Meanwhile, he has been making use of his clear intellect and studious disposition to take a high standing in his academic work, evidenced by the scholarships he has won. We are justified in predicting for him a sure and lasting success.

BARBER, JESSIE EWART

"A countenance in which did meet Sweet records, promises as sweet."

Jessie Ewart Barber was born and has always lived in Toronto. She first attended the Model School and later, upon passing the entrance, entered "Glen Mawr," where she remained for three years. At the end of this time, having matriculated, she came to University College. By her sincere interest in all college activities, Miss Barber has proved herself to be a typical college girl. The Y.W.C.A., her class, the Modern Language Club, and the Women's Literary Society have all received their due share of her attention. On the Executive of this last Society she held the office of Third Year Representative. Miss Barber has always judiciously mingled pleasure with study, and the cares of college life have made but little impression upon her buoyant disposition. She belongs to the international fraternity Kappa Alpha Theta.

ARTHURS, THOMAS ANDREW

"A man he seems of cheerful yesterdays and confident to-morrows."

The folk of Limehouse said "it is a boy." and forthwith called him Thomas Andrew. He found Limehouse too small and migrated to Singhampton, but later returned to Halton, where he attended public school, Georgetown High School, taught four years, shoved hay and hoed roots between times, and in the fulness of time he entered Varsity as a soph. of the year '08. He will get his B.A. from the Philosophy Course, but as ballast he also carried the course in Social Science prescribed by the Class Executives, and the course in Morals prescribed by the "Y." Andy is energetic and his college life predicts for him a successful career as a Presbyterian Minister.

BARLOW, FRED HOLMES

"A man of sense!"

Most of Fred's life was spent at Lyn, in Eastern Ontario, where he received his early education, and then passed on to the Brockville Collegiate Institute. After matriculating, he spent a year at home, and then, as a truly wise man from the east, decided to come to Toronto to take up Medicine. Fred realized in a moment that the Medical environment was not for a man of his good taste, so he joined the happy ranks of naughty-eight Arts. His four years' course has been a great credit to his intellectual vigor, and gives promise that a bright future is in store. His year honored him with the office of Historian in the Third Year Executive.

BARTLET, WALTER GEORGE

"Charmed by his music, trees starting from the ground

Have followed with delight the powerful sound,"

Walter was born in Windsor in 1887, and received his preparatory education at the collegiate institute there, matriculating in 1904. He came to the University the same year, and after a careful perusal of the calendar concluded that the Political Science Course offered the greatest difficulties, and accordingly enrolled in it. Walter's distinguishing characteristic is his versatility—but tennis is his forte. In the University tournaments he has won the undergraduate championship twice, and the novice and handicap at other times. He has held various offices -we might mention that he served two vears on the Executive of the Tennis Club, and was its Vice-President in his senior year. He was on the Executive of the Glee Club while that organization flourished, and was a member of the Historical Club.

BENNETT, CARRIE M.

"Thy prayer was Light—more Light—while Time shall last.

Thou sawest a glory growing on the night,"

Carrie M. Bennett received her publie school training at Kingsville. Further training previous to coming to the University was received by private tuition. Miss Bennett enrolled with the class of 1908 in the General Course, but has also paid considerable attention to work in philosophy. Miss Bennett has been deeply interested in her college course, and has a keen appreciation of the worth of a university training. She has taken the General Course as a grounding for any further academic work she may take up. Miss Bennett will be remembered for her kindly and sympathetic disposition.

BEATTY, ROBERT GILKENSON

"He stands 'high' in all the peoples' hearts,"

Bob was born in that noted flower town of Brampton. His preliminary education was received in his native town, from whose high school he graduated with a brilliant standing, receiving first-class honors on the Senior Leaving Examination. In 1904 he entered University College, enrolling in the C. and M. Course. He has always maintained his place among the foremost of his class, while he actively engaged in various sports. Throughout his undergraduate days the University Rifle Association has found in him an enthusiastic supporter. Bob's genial disposition has made him a general favorite among his classmates, who will watch his future with interest.

BLODGETT, JOHN NELSON

"Plowmen, Shepherds, have I found, and more than one, and still could find— Sons of God, and kings of men in utter nobleness of mind.

John Nelson Blodgett first "kicked" in the village of Roseneath, Northumberland Co. After spending his early days at the Roseneath Public School, the genial John, looking for wider fields, wended his way to Port Arthur. But a yearning for greater knowledge brought him to the University in the fall of '04. Being a wise man he has not limited his university life to his books only, but is an enthusiastic member of the Y.M.C.A. and a loyal supporter of the Lit., being an ardent Unionist. The remaining days of his college life will be spent at Wycliffe preparing for the Anglican ministry. In his chosen calling we feel sure that he, with his untiring zeal, will be a true success.

BOWBEER, HARRIET BEATRICE

"A rosebud, set with little, wilful thorns."

Harriet Beatrice Bowbeer was born in Simcoe, but at an early age took up her abode in Toronto. In 1904 she graduated from the Toronto Ladies' Presbyterian College, and in the following autumn entered the General Course at University College. Miss Bowbeer's career as a student has been a success; while always maintaining a good standing in the class lists, she found time for a keen enjoyment of the things of this life, especially college life. Her genial social qualities have made her a favorite everywhere, not only with her own class, but with the students in general. She is a member of the Zeta Tau Sorority.

BRYCE, PETER INNES

There are many undergraduates who can attract others by the mere geniality of their dispositions, their kindness and good-will. Such a one is Peter Innes Bryce. Matriculating from Harbord Collegiate Institute with honours in English and German, he enrolled with the class of '07 Biology. Two years' sojourn with them proved enough, so in the following year he started with '08a decision reflecting credit on his discretion. In his second year "Pete" was secretary of the Rifle Association; in his third year treasurer of the Science Association, and as a senior held a place on the Arts Dance Committee. Recognition of his literary ability is shown by his election to the much-coveted membership in the Historical Club.

BRADSHAW, ETHELWYN BEATRICE

"The light of love, the purity of grace, The mind, the music, breathing in her face."

Ethelwyn has always lived in Toronto. Her early education was received at Havergal College, from which she matriculated in 1904, and since October of the same year has been a very active member of the class of '08. Her earnestness and high enthusiasm have won for her many responsible positions, but the one for which she was best adapted, by reason of her high dramatic powers, was that of President of the Dramatic Club; while in the Woman's Literary Society she has more than once shown her abilities as a debater. Everyone who comes in contact with Ethelwyn is impressed with her broad sympathies and geniality; while in daily life her constancy and the warmth of her Celtic nature make her one who may truly be said to have been "fashioned for friendship."

BUTTERFIELD, ROBERT MORRIS

"Who comprehends his trust, and to the

Keeps faithful with a singleness of aim."

"Bob" began his career in Milton, Ont., in 1887, and was mainly occupied with football and hockey till 1904, when he matriculated from Milton Public School. In the same year he entered the '08 class of the Biological and Physical Science course of Toronto University. Should fortune prove as favorable to him in Medicine as in Arts he will be a worthy addition to the medical profession.

CAMPBELL, INEZ ADELINE

"Sweet records, promises as sweet."

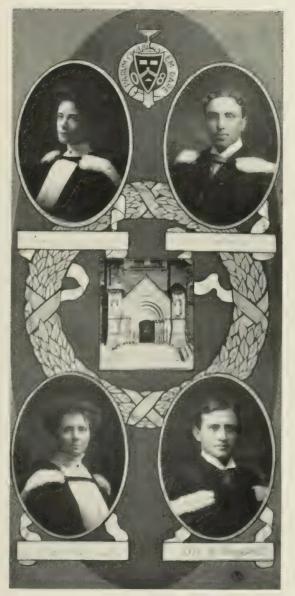

Inez Adeline Campbell was born in Ottawa where she received her preparatory education. At the conclusion of her Collegiate Course in 1904 she won an Edward Blake Scholarship, and the same year entered the department of Modern Languages in University College. Throughout her course she has maintained a good honor standing, and has also taken an active part in all phases of College life. She has shown her good executive ability while holding the offices of Corresponding Secretary of the Woman's Literary Society in her Sophomore year and Poetess of her class in her Junior year. She is a member of the Zeta Tau Sorority.

CAMPBELL, KATHERINE GER-TRUDE

"High thought and amiable words, and courtliness and love of truth, and all that makes a woman."

Miss Campbell was born in Kincardine. She attended the Owen Sound Collegiate, from which she graduated in 1900. In 1904 Kate entered University College in the General Course, and has taken a very creditable standing indeed. In the third year, though she pursued her course "extra muros," she was one of the few who obtained General Proficiency standing. student life was characterized throughout by systematic and conscientious effort. It is, however, as a jovial, unselfish companion, and a many-sided, congenial friend that she will be best remembered, both by her co-workers on the Class Executive, on which she was Councillor in her Senior Year, and by her many friends of '08.

CAMPBELL, JOHN DUNCAN

"Gentleman, scholar and honorable sport."

John D. Campbell hails from Wingham, Ontario. He is a graduate of Harriston High School and the Normal College, Hamilton. He began his teaching career at Belmore, Ontario. He was for three years principal of Highgate Continuation Classes, and the year before entering the University was a member of the staff of Chesley High School, M & P is his course and he is specializing in Pure Mathematics. He was an ardent admirer of the "soccer" game, was a member of the famous team of '08 and also held a place on the line-up of the Intermediate Arts. In his senior year, J. D. was a member of the Class Executive, a representative in the Students' Parliament, a competent critic of the "Lit.," and one of the debaters for the first Inter-University debate.

CAMPBELL, ROBERT MORRISON

"I want to know the truth."

"Chappie" is a walking interrogation, never without a problem to propound, ever seeking the tree of knowledge but sometimes getting tangled in the under-brush. He is religious, but quite likeable: studious, vet ever disposed to chat; a prospective theologue, still interested in life. His slight predisposition to rhetoric he will eventually outgrow. Chatham was his birthplace. There he completed his Honor Matriculation. In his course, G & H, he has won two scholarships, the Knox College in Orientals, and the Murison in Biblical Literature. He has figured on the Class Executive, played Association football with the '08 team, Junior and Senior Arts. Bob intends to enter the Presbyterian ministry. If he lives, he has a bright future; if he dies, a worthy past.

PERMANENT YEAR EXECUTIVE.

Miss M. MacLachlan F. C. Carter Miss E. E. Hambly W. L. Macdonald C. E. Silcox President

J. Gilchrist, Secretary A. A. Scott Miss H. M. Thomson

CANNON, JOHN B.

"And mony a canty day, John, We've had wi' ane anither."

John Beatlin Cannon, one of the big guns of the class of 1908, developed a prediliction for gunpowder and the ladies at an early age. He was born at Annan and graduated from Owen Sound C. I. with senior leaving standing at the age of sixteen. Clever! He taught until 1904, when he entered the course of M. and P., and in each succeeding year has stood very near the top of the class lists. He was vice-president of his class in his second year and in his final year enjoyed the honor of being the only Unionist with portfolio in the Old Lit. Cabinet. He was one of the best sports in the college, manager of the Arts Association football teams in 1906, and during 1907 president of the University Association team which won the Inter-University Championship. His friends are confident that the gods will be gracious to him whether he takes to stargazing or teaching after he graduates.

CARMICHAEL, JEAN OLIVIA

"But in my spirit will I dwell,
And dream my dream, and hold it
true."

Jean Carmichael comes from Penetanguishene. Her collegiate days were spent at Harbord St., Toronto, from which she entered the Moderns Course in University College, where she has stood high in her class. She has a broad nature and a sunny temper, which is never ruffled, even by over-work and exams., though she finds time for work on the Y. W. C. A. Cabinet, and Class Executive, and also for literary work of no small merit. As a friend Jean is dear to all her classmates. She is, besides, a fine example of a college woman who never hurries or worries, and vet secures the very best in college life.

CARLYLE, JOHN AITKEN

"Best be yourself, imperial, plain and true."

Above all, let us recognize his sincerity, his hatred of shams. He disdains to seek a royal road to learning but scales the hill difficulty by faithful and unflagging perseverance. Despite his solemn mien, his nature responds to quiet humor, laughing maidens and the alluring dance,-a gentle Stoic! Teaching taught him the use of discipline, an art needed in organizing his fresuman year, of which he was President. As Scribe of the Y. and a Vice-President of the Lit., his timely warnings and deliberate criticisms have avoided many perils. As a senior, he displayed Toronto's argumentative propensities against Queen's. Though no mean critic of wholesome literature, this Brantford man is primarily a leader of men,—one who seldom leads astray.

CARTER, FREDERIC CHARTERIS

"His limbs are cast in manly mould, For hardy sport or contest bold."

Born in Elora, educated in its schools, and trained on its athletic field until his muscles "grew sinewed with action''-how could Fred bring other than honor to Varsity? Thither he came as a sophomore, straightway to be recognized as a "man o' pairts." Association, football, hockey, and lacrosse:--yes, all three he played, and valiantly. Is he more than an athlete? A casual glance at the records of the Unionists in the "Lit" will answer. His name is there-it is written large. It is among the beloved of James Mayor, for Fred's stand is in Class I. Athletic, literary, scholarly! Are not his prospects bright?

CLARK, DAVID ALEXANDER

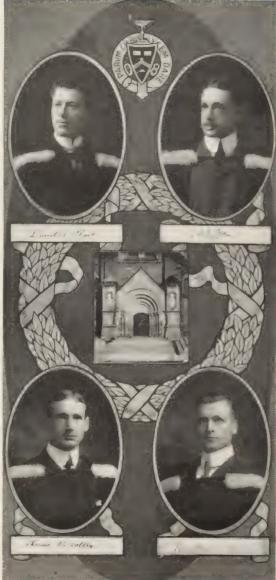

"Sterling worth gains love and respect."

Clark is a man of excellent qualities and he perpetuates very perfectly the names of David and Alexander. Clark came to the University from Harbord Collegiate, and has distinguished himself by his creditable standing taken each year during his course. His executive ability brought him forward rapidly. He was elected to the Literary and Scientific Society Executive in his second year, and was a member of the B. and P. Executive in his third year. Clark will next year continue his studies as a Junior in the Faculty of Medicine. Everyone who knows him expects much of the young Scotchman who has been caught young.

COLLEY, THOMAS BELLASYSE

Thomas Bellasyse Colley was born at Ross in the county of Herefordshire, England, and educated at Dean Close School, Cheltenham. His native land not requiring his services, he came to Canada in 1902, and there for a time interested himself in agriculture. Subsequently, he accepted a mastership in the Preparatory School, Upper Canada College, and simultaneously started his University course as an extra-mural student. The work of the fourth year, however, called for exclusive attention, causing him to resign his position in order to come into residence.

COLLEY, JAMES N. B.

Born at Church Stretton, Shropshire, England, he was educated at the Dean Close School, Cheltenham, one of England's smaller public schools. Here he was on the classical side and captained the school elevens in football and cricket. Coming out to Canada in 1903. he took up school-mastering in the following year. Temporary work at U. C. C. at the beginning of 1904 was followed by a two-year engagement at Ridley. He then returned to Toronto, and is at present on the staff of U. C. C. Has taken most of his course extramurally. having attended lectures only during the Easter term of 1908.

CREE, MATHEW

"With secret course which no land storms annoy,

Glides the smooth current of domestic joy."

Six feet two, well proportioned, and every inch a gentlemen. Mat. proved all too good a mark for a winged shaft from Cupid's bow. Going up to High School at Georgetown, hard by his birthplace, in due season he became a teacher. A course in Pedagogy in Ottawa, supplemented by one in Matrimony, further fitted him for entering Varsity with the class of '08. Round his stalwart frame, the lesser freshies mustered in the hustle to do or die. Straightway recognized as a strong man, he was appointed to the Lit. Executive. His course in Philosophy has been an untiring effort to see behind earth's flux and change. Muscular, studious, and sympathetic, Mat. will be a true Sky Pilot.

DAVIDSON, GEORGE THORALD

"A little curly-headed, mischief-making monkey from his birth."

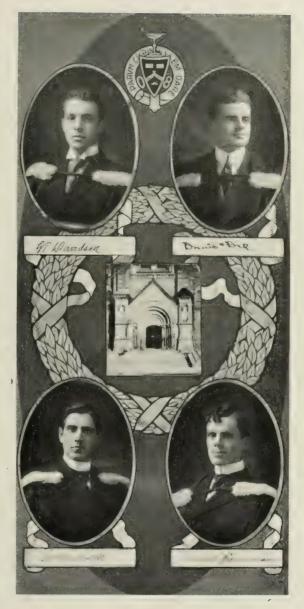

Born in the City of Toronto 21 years ago and nourished on its enlivening atmosphere, George, or more familiarly, "Curly" has grown and acquired the wisdom of a Solomon pertaining to things terrestrial. While still in his teens he matriculated from Harbord St. Collegiate, and entered Varsity with the historic class of '07, but upon beholding the mighty intellect of '08 one year later, with admirable judgment our hero decided to be twice a sophomore—hence this great acquisition. In the Union the inimitable "Curly" has ever been the presiding genius. His career at Varsity has been marked by a multiplicity of interests, which no doubt has given him a thorough understanding of human nature, one of the highest intellectual attainments.

DUCKWORTH, HENRY BRUCE

"My life is one dem'd, horrid grind."

Harry first came to light in the late seventies in Garafraxa Township, near Fergus. In boyhood, the farm and the country schoolhouse; in youth the woollen mill at Hespeler were his fields of labor. A year in travelling followed. He entered Varsity in the fall of 1903, handicapped, for he had no High School training. He had the will, however, and the energy, to make things go, and even found time for his full share of college activities. Three times "Y" Executive claimed his support. Debate and football have been his pastimes; Philosophy his course, and after two more years in Knox the manse will be his home.

DICK, DAVID CAMPBELL

"A jovial lad withal."

Davy was born in Toronto some twenty-one years ago. He received his (very?) rudimentary education at the Parkdale Collegiate and the Upper Canada College, matriculating in 1903. The ordeal proved too strenuous, however, and Davy took a year at golf to recuperate. He entered the Political Science Department with '08 and has managed to stick with it to date. Though hardly a devoted sportsman, he is an ardent golfer and played on the team which captured the championship for Varsity in 1906. He is a member of the XIII Club, and of the D. K. E. Fraternity. Davy has not yet made up his mind as to his future career but in whatever direction he turns his attention, his friends-and they are legion-can already see success assured.

EARCHMAN, EDWARD ADAM

"Steadfast and still the same
On any object bent."

He was born in Ontario County. He received his preparatory training from the Port Perry High School and County Model School. Born an artist, he is fully at home with the pencil, crayon or brush, but realizing the advantages of a course in Philosophy preparatory to entering Theology, he gave up the thought of continuing his work in art and entered Varsity in the fall of 1904. This spring he will have completed his first year in Theology. He is a member of the Class executive. Later on we expect to hear from Ed. in his chosen profession, the Presbyterian ministry.

EDWARDS, MARY ISABEL

"A smooth and steadfast mind, Gentle thoughts, and calm demeanor."

Mary Isabel Edwards was born in Peterboro', where she received part of her public school education. Later she attended Miss Veal's School in Toronto, returning to Peterboro' for her collegiate course. She finally came to 'Varsity and entered the class of '07. But Isabel apparently longed to enter the splendid ranks of '08, as she left 'Varsity for a year. In this way the class of '08 was the gainer by her bright presence and quiet fund of humor. Isabel has taken a creditable standing throughout her Arts Course, and has won many friends in '08, all of whom wish her the best possible success in her future career.

FLETCHER, KENNETH GRANT

"—with a three-decker brain, He could harness a team with a logical chain,"

Grant matriculated from Upper Canada College and entered 'Varsity with '07. A serious illness in the spring of his first year accounts for his enrolment in '08. He has taken a consistently "first-class" stand in his course, M. and P. Yet his horizon is not bounded by logarithms or annuity tables. He is a member of the Historical Club and Gym team. He has taken part in several assaults and is President of the Gymnasium Club. His classmates learn with deepest regret that another serious illness will prevent his graduating with '08. He will probably not complete his course at all, but his ability and strength of character assure him success in a business career.

FINDLAY, MARION CLIVE

"And all that's best of dark and bright Meet in her aspect and her eyes."

The companion of several brothers and sisters, she grew up in Barrie with a love for athletics and a poise of body and soul that is rarely seen. From Barrie Collegiate she entered the '08 class of University College in Moderns. where she has always ranked high. Marion has the gift of true valuation, by which she chooses the things most worth while, shown by her fondness for Browning in poetry, her appreciation of a rare joke in lectures, and her pleasure in helping others. Probably the office she enjoys most is that of representative of the Women's Literary Society to Evangelia Settlement. She is a member of Alpha Phi Sorority.

FRASER, WILLIAM KASPAR

Kaspar came down with the rest of us at the age of nineteen, and joined the Classics and Moderns Course of the class of 1908, having obtained his preparatory school honors at the Parkdale Institute and Upper Canada Cottege. Though he has taken several scholarships he has not allowed books to interfere too much with his education, as he has played with the II. Football Team for two years, captaining the team once, and has always been a member of his year team in hockey and football. He is a member of the Delta Kappa Epsilon Fraternity and the Thirteen Club, and his executive ability has been proved in the Modern Languages Club, of which he is a Past President. Kaspar has not as yet mapped out his future, but it is a matter of no concern to his innumerable friends for they are sure of his ability to encounter anything which may face him.

Wycliffe College

GALLIE, JOHN GORDON

"And smile, and smile, and be a villian."

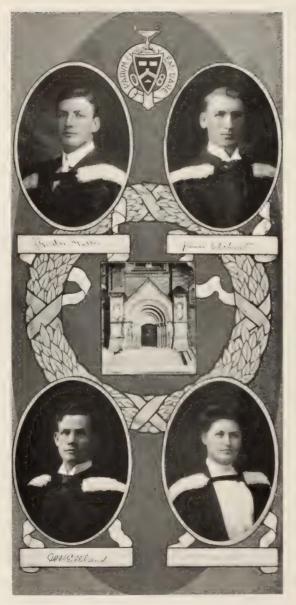

Gordon gathered his youthful knowledge in the far north, from the Barrie schools, and brought said knowledge and his sunny ways to Varsity. The strenuous life of the B. & P. course has always kept his time pretty well occupied, but he has managed to perform the duties attendant on positions on the executives of the class and of the B. & P. Society. Also, he has played some hockey, figuring on various Jennings' Cup teams and on the Varsity II. He was of material assistance to the seconds in landing the Intermediate Intercollegiate Championship in his third year. Two years in Medicine await Gordon after graduation. Of his success in his profession there can be no doubt. His kindly, warm-hearted disposition combine to assure him patients and prosperity.

GILLILAND, WILLIAM H.

"Titles of honor add not to his worth."

He was born in Owen Sound in 1886. attended Collegiate Institute from 1899 to 1904, and entered Varsity in the fall of '04 in the M. and P. Course. He has proved himself not only one of the cleverest students in his course, but also one of the most enthusiastic supporters of soccer football. At full-back he has played on '08 year team, holders of the Faculty Cup; on Senior Arts team, and in '07 on the Varsity eleven, winners of the Intercollegiate Championship. His popularity is shown by the number of positions he has held on student executive bodies. In '06-'07 he was Vice-President of the Mathematical and Physical Society, for '07-'08 he is President of University College Association Football Club, and Athletic Director of the Fourth Year.

GILCHRIST, JAMES

"Tha ni-eigin ann an costas an duine so nach feud gun davine a thaladh ris."

Big Jim came down to Varsity from Tara. Ont., a locality sprinkled with braw Highlanders, where two Gilchrists equal one rod, and where Lowlanders and Irishmen are unnoticed in consequence. After Matriculating from Owen Sound Collegiate, he taught school three years and killed no one. He has been resident of Political Science Associa tion, second Vice-President of the Undergraduates' Union, member of the "Torontonensis" Board, and leader of the Opposition in the Mock Parliament. He played on the Mulock Cup rugby football team. His course has been Political Science, and after graduating he intends to study law-a profession in which his intellectual qualities and genial disposition should ensure him every success.

GOSNELL, MARY CAROLINE

"Hast thou not every gentle grace We love in woman's mind and face."

She was born at Highgate, Ontario, and received her preparatory education at the public school of her native town, and later at the Ridgetown Collegiate Institute, from which she graduated as Senior Matriculant and Gold Medalist in 1903. On coming to Varsity she chose Moderns as her course, and her standing throughout has been very creditable. At the end of her Junior Year she left Varsity to spend the winter in California and Mexico, and on returning joined the class of '08. Her amiability and never-failing goodhumor have made her many friends. the good wishes of each and all of whom will follow her beyond the college halls.

GRAHAM, HARRY CLARK

"Wild Wit, Invention ever new And lively Cheer of Vigor born."

Harry Clark Graham spun his tops in Dundalk, Grey County, committed to memory Gray's "Elegy" in Toronto, and upset the atomic theory in Hamilton, dates unknown. The "Mountain" had peculiar charms for him, affording an opportunity of viewing the interstellar spaces at friendly range. Graham next came to Toronto and lent the prestige of his genius to the class o. '06. For two years chemistry and mineralogy gave up their secrets, and then followed two of practical application. Joining the illustrious class of '08 Graham resumed his scientific investigation in the University Laboratory, where his ingenuity and keen analytic mind have manifested themselves in his skilful interrogation and interpretation of nature's phenomena.

GRAY, GODFREY LAWSON

"When the heart is right, that is true patriotism."

Started life at Mayfield, Peel County, Ont. His preparatory education was laid in the high and model schools of Brampton. After a few successful years as a pedagogue, he was amongst the fortunate ones who cast in their lot with the progressive class of '08. He has therein served acceptably on the Undergraduates Union, Arts Dinner Committee, Class Executive, and the Literary and Missionary Societies of Wycliffe College. His character is marked by an unflinching sense of duty and by uprightness in word and deed, qualities more desirable than common. His amiable disposition predicts for him success in the Anglican ministry which he has chosen for his life work.

CRAHAM, FELECIA

"A face with gladness overspread!
Soft smiles, by human kindness bred!"

Miss Felecia Graham is one of the many students whom Lindsay has sent to find a hearty welcome in the University of Toronto. In 1904 she matriculated from the Lindsay Collegiate Institute with high honors, and entered on a course in Modern Languages, in which she has taken no mean stand. Her interests have been not simply academic, but every phase of college life has received its share of her attention. She enters with spirit into every activity, and she has found many channels for her enthusiasm in the work connected with the various college societies. Her brightness and winning disposition have endeared her to her many friends, among whom she will not soon be forgotten.

GRIFFIN. H. L.

Harry Griffin was born in Woodstock. Ontario, where his home was up to the time he joined the class of '08, although he now writes his home address at Galt. After completing his course at the collegiate institute there. Harry was engaged in newspaper work for two years. Then he decided that '08 was the class with which he ought to graduate, and he accordingly joined it three years ago as a "fresh soph." Political Science was his chosen course, and in it he has managed to carry off some academic honors. His journalistic instincts found expression in work for the Varsity, of which he was editor in the fall term of his Senior Year. His choice of a profession has not vet been made known, and the world must still await the announcement with suspense.

HALL MORTON ELDRED

"Tel casevered from tranquility."

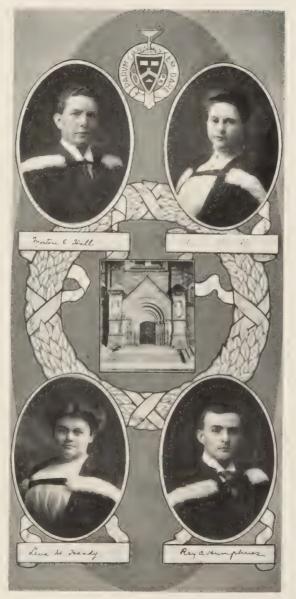

In the Land-of-the-Great-Spirit, where pine and tamarac are tall and winds blow high was Morton born. Here he lived in aboriginal savagery until he obtained Senior Matriculation in 1903 from Gore Bay High School. Then in his birch-bark canoe he paddled to the mainland, and, in October, 1904, was known around Varsity as "Gamey." Since then he has been consuming large quantities of knowledge annually to the end that he may put B.A., M.B. on his shingle. His quiet, kindly disposition and genial manner have won for him a host of friends, and his ability and industry are sure to make him an honor to his country and the profession in which he hopes to do his life work.

HANDY, MARGARET OLIVIA (Leva)

"T'; life \(\circ\) dear; for all that life can rate
Worth name of life in thee hath estimate''

It was in Ridgetown that Miss Handv passed the first period of her life. After four years in attendance at the collegiate institute there she obtained her Honor Matriculation certificate. In 1902 she entered University College to pursue a course in English and History. and being unable to continue her work for two years she united with the class of 'os in her second year. While with us Miss Handy has always taken an active interest in the different branches of college life. Her kind, cheerful disposition has won for her the respect and love of her classmates, who unite ia wishing her every success in her future life.

HAMBLY, ETHEL EDNA

"And what in woman is adored
In thy dear self I find."

Miss Ethel Edna Hambly, who is a resident of Toronto, obtained her high school education at Parkdale Collegiate, graduating in 1900. She entered the Modern Languages Department on Junior Matriculation standing, and has acquitted herself very creditably each year. Edna has always been an earnest worker in the various branches of student life. She has acted in the Cabinet of the Y. W. C. A., and has twice been a member of the Class Executive, as Musical Directress in 1906, and as Vice-President in her Senior Year. Her amiable disposition, her happy faculty of gentle leadership, her cheerful acquiescence, and ability to work have won for her many close friends and the estimation of all the members of '08.

HUMPHRIES, RAY A.

"A true friend—forever a friend."

Born at Warkworth, Northumberland County, where he received his early education in the public school and continuation class, obtaining his Part II. Leaving and Matriculation, going thence to Port Hope Model School, and after having taught school for a time he entered the University with the class of '08. Here Political Science found charms for him, in which course he has been very successful. Although a very diligent student, vet he found time to enjoy the social side of university life. In his third year he was a member of the Class Executive, and in his final year was Chairman of the Dance Committe. As an orator he has won distinction on many occasions, especially during the Intercollegiate Debate. Rav intends entering Osgoode Hall after graduation.

HUNTER, CLARA BLANCHE

"A countenance in which doth meet Sweet records, promises as sweet."

Clara Hunter is a Toronto girl. She received her preparatory education at Jarvis Street Collegiate, from where she took her Junior Matriculation. On entering the University she followed the General Proficiency course, which she has carried through with success and much jollity. Miss Hunter's strongest inclination has been to the study of music. Her proficiency in this branch led to her election to the position of Musical Directress in her fourth year. Nor did Clara neglect the social side of college life, but has taken a deep interest in all its functions. By her genial disposition and warm sympathy she has made a wide circle of acquaintances and has ever proved a true and ready friend.

IRONSIDE, ERELL CHESTER

"He was so true a man, so carnest, honest and full of frankness."

Erell Chester Ironside was born in Rockton, Wentworth County. After receiving his early education at Woodhill Public School he entered Dundas High School, obtaining Part II. Junior Leaving and Matriculation in 1903. He then attended the Collegiate at Hamilton. where he now lives. With the fall of '04 Erell came to Varsity, and during his four years he has made many friends, taking an active part in college life. Athletics claimed part of his time, and he was a member of the Class Executive and the Lit. Executive in his third year. After graduation Osgoode Hall has claims upon him, where the good wishes of all his friends go with him, and they trust that he may have a successful future.

HUTCHINSON, JOHN I.

"Jack's the boy for work, Jack's the boy for play."

The subject of our sketch was born in Toronto, and thinks it the best spot on earth. He has seen Hamilton, After distinguishing himself as a small boy in the school-vard and around certain corners, "Hutch" attended Jarvis Collegiate till matriculation. The next three years he spent at insurance, but this disagreeing with his conscientious temperament, he decided to enter the University. The genuine interest which he feels in his work has always enabled him to take a creditable stand. They say he dabbles a bit in tennis during the summer, but during term his athletic propensities have generally fallen asleep. He has keenly appreciated the Historical Club and will carry away many pleasant memories of old Varsity.

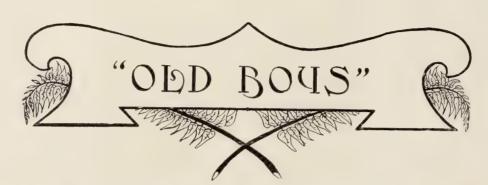

JOHNSTON, HERBERT BAIN

"Great thoughts, great feelings, come to him,
Like instincts, unawares."

The first place Herb made glad with his presence was a farm near Weston, where for several years he held close converse with Mother Nature. Not satisfied to remain the champion ploughman of his township, he entered Weston High School to prepare for the University. At Varsity he first unveiled his strength in a freshmen's hustle. His never-failing humor and ready sympathy made Herb a general favorite. As a Junior he was Vice-President of the Philosophical Society; as a Senior, Class Historian; throughout—a valiant servant of the Literary Society and Y. M. C. A. As a Presbyterian min-

ister Herb will be to many as the

shadow of a great rock in a weary land.

H. C. THINDMARSH

J. A. CAMPBELL

J. M. PATERSON

KEITH, NORMAN MACDONNELL

Norman Macdonnell Keith was prepared for the University at St. Andrew's College, Toronto. Although devoting a great deal of time to his course (Biological and Physical Science) he has taken a prominent part in University athletics. During his first year he was Goal-keeper for the University Intermediate Hockey Team. Since then he has acted in the same capacity for the University Senior Hockey Team. We feel sure that Norman will have a very successful career in his chosen profession, medicine,

KERSEY, ROBERT REID

"All men believed him that as he spake, so he thought; and whatsoever he did, that he did it with a good intent."

"Bob" is a native of Peel County. He received his preparatory education at Brampton High School. After graduating from this institution he attended Model School in the same town, and subsequently spent three years in teaching. Growing tired of wielding the birch rod, he entered the English and History course with the year '08. "Bob" has taken an active part in different college societies, and has managed the Association Football Team of his year with the result that it has held the pennant for three successive years. On graduating he will re-enter the teaching profession.

KENNEDY, WILLIAM T.

"A man

Actually balanced, physically, intellectually and morally-

Determined to solve and serve the living truth."

Scarboro', Ontario, was the scene of Will T. Kennedy's birthplace, childhood and primary education. His search after truth led him to enter Markham High School, from which he graduated in 1904, to pursue a course in M. & P. in the University of Toronto. In the Department of Physics he excels, and for his skilful work in this sphere of science he has in his final year been appointed Junior Lecturer in Physics. Will has demonstrated his executive ability as Treasurer of his Senior Year and as an effective worker in connection with the Y. M. C. A.

KILPATRICK, E. M. R.

"The flower of gentillesse

Of honour and of perfect worthinesse." Miss Elizabeth Margaret Richie Kilpatrick was born in Fifeshire, Scotland. Her early education was received in Aberdeen, Edinburgh and Winnipeg. After one year in Manitoba College, she registered in University College, Toronto, in the English and History Course. She entered at once into the Varsity spirit and officiated upon the '08 Class Executive. Miss Kilpatrick represented the Y. W. C. A. at the Montreal convention, and was their Recording Secretary during 1906-7. Athletics shared her attention and in her third year she proved a capable Secretary-Treasurer and Curator of the Gym. She has been elected a member of the Torontonensis Board. For Miss Kilpatrick's career the best of good things are to be expected, and she has the best wishes of all her classmates.

KNIGHT, CAROLYN MAY

"For grath and so gracious with all

Miss Knielt obtained her Honor Matriculation from the Seaforth Colginte in 1904, having won six scholar ships, among them the "Prince of At University College she followed the Classics and English and History Courses with both options. In Engsh and History she retained first place throughout her course, and won the Classics Scholarship of the first and see and vears and the Alumna Prize in Eng lish. She also took her share in college setivities. She was Vice-President of the year, Vice-President and member of Cabinet for the Y. W. C. A., and Editor of The College Girl. The brilliant position occupied by Miss Knight in her college career she will doubtless retain in the wider field of life's activities.

LAMBERT, NORMAN PLATT

"Take away the sword, States can be saved without it; bring the pen."

Norman Lambert was born in Mount Forest. After tripping through the schools of that busy burg he went into business, where he discovered that in order to be really successful one must have the benfit of a university education. He entered the Political Science Depart ment of the class of '08, and has been one of its most enthusiastic members. Not ran only dabbled in sports, but even at the won his colors on the Track and Lac osse Teams, and played in both the Mulock and Jennings Cup series. He son ght academic honors rather than athletic glory, being an Assistant Editor of Varsity, Secretary of the Literary Society, and a member of his Class Executive and the Historical Club. After Is ving college be intends to enter jour nelism, where the lest wishes of the class follow him.

LAIDLAW, ROBERT ALEXANDER

"E's little but 'e's wise.
"E's a terror fer 'is size,
And yer don't advertise,
Does yer, Bobs?"

In the fall of 1904 a bumptious and irrepressible freshman Bob came up to Varsity and enrolled in the Political Science Department. From the first he has been one of the most prominent representatives of '08. Although Nature saw fit to confine that giant spirit within such a comparatively small bodily space, the aggressiveness of the man has been none the less conspicuous or valuable in the important services which he has rendered to the athletics of the University. Besides holding positions on Jennings Cup and Mulock Cup teams he has also been honored by the Captaincy of the second and third hockey teams, by the Secretaryship of the Hockey Club, by the Managership of the first team, and by a place on the Directorate in 1907 and 1908.

्रम्

LITTLE, EDGAR SYDNEY

"Text-'Books are a mighty bloodless substitute for life."

Svd. happened in London, Ont., about twenty-two years ago, and after matriculating from the London Collegiate, he entered Varsity with the class of '07. He at once made himself felt in Varsity life, and many important offices have fallen to his lot, viz., "Varsity" Board. three years: Manager Varsity III. Football Team, Lit. Executive, Manager "Varsity," President XIII. Club, Member Historical Club and Zeta Psi Fraternity. Though Syd, has never allowed books to monopolize too much of his time, his college life gives promise of a successful business career, and he leaves Varsity with the best wishes of a wide circle of friends to whom he has endeared nimself by his sterling worth.

LYLE, NORMAN WOOD

Norman was born in Hamilton, and received his preparatory education at the Hamilton Collegiate Institute. On coming up to Varsity he chose to enter the General Course. Though quiet and unassuming in manner, Norman is well known to University College men. In the autumn of 1904 he was a member of the Intermediate Football Team, and also helped his year in their endeavors to win the Mulock Cup. He is a member of the Senior Year Executive. Besides taking an active part in general college affairs, Norman has always stood well in his class and there is no doubt that he will meet with every success in his future career.

McCUTCHEON, HELENA FLORENCE

"In thy heart the dew of youth, On thy lips the smile of truth."

Miss McCutcheon resides in Belton. St. Mary's Collegiate Institute claims her as one of its graduates-one who carried away with her the excellent record of an earnest and clever student. In search of wider fields. Miss McCutcheon came down to Varsity, choosing the Moderns Course of '08, with her usual good judgment. This course she has always found very attractive, and has established her right to a high place among the seekers after linguistic excellence and literary attainments. Her sympathies are broad, and her general popularity is indicated by her place as Historian on the Class Executive of our final year. We feel confident in predicting for Miss McCutcheon eminent success in whatever career she may choose.

MacCURDY, JOHN THOMSON

Breathed deeply of the classical spirit at Parkdale Collegiate, winning the first Mary Mulock scholarship at matriculation. Enjoying two years in the Biology Course, he specialized in B. & P. and nas, by capturing the first Fulton Science, Board of Trade Commerce, and sharing the Edward Blake Biology scholarships, shown his true bent. Mingling with the strictly academic the broader University spirit, he served on Dance and Dinner Committees and was chosen by '08 as its second President. John wrote when a Junior as Sporting Editor, and as a Senior on the Editorial Staff of "Varsity." He played Rugby football on the II. and III. teams. During 1907 Mac rowed in the Argonaut eight-oared crew, Canadian and American champions. A member of the Historical and Thirteen Club, and of the Delta Upsilon Fraternity, John is a loyal and warm friend and a cheery companion.

McDONALD, LURENE

"So unaffected, so composed a mind."

Miss McDonald's early education was obtained in the public and high schools of Tillsonburg. In 1904 she registered in Classics in University College. Her studies have been pursued with conscientious thoroughness and her standing throughout has been creditable. Other branches of college activity have received their due share of her attention, and she has held several offices in the Literary Society and the Classical Association. Miss McDonald has deservedly won many friends, whose best wishes follow her in her future career.

MacDONALD, WILBERT LORNE

"Another of his fathom they have none...To lead their business,"

Mac was born in Snellgrove and received his early training in Alton Public School and in Orangeville High School. After matriculation he taught in Erin, and in 1901 entered Normal College, and taught in Orangeville High School for three years following. He entered Varsity in 1904, in the English and History (Classical Option) Course. Throughout he has stood well, notwithstanding attention given and time spent in filling various offices in Historical and Economical Societies. Thirteen Club, and last, and significant of the position he holds among his fellow students-First Vice-President of the Literary Society. He has also gained admittance to the Mendelssohn Choir the last two years. In sports he figured at least once on the Arts Rugby team, a remarkable aggregation in all time, and he himself tells of fierce encounters and heroic deeds on the baseball diamond.

McHUGH, THOMAS GERALD

"He is a man of mirthful creech."

Born in Windsor in 1887, Gerald received his preparatory education at the Collegiate Institute of that city. Deciding early upon law as his profession, he joined the Political Science division of the class of 1908 as a preliminary step. A steady course through Varsity and a somewhat desultory interest in athletics have not brought his name prominently before the public. But those who have had the opportunity of his acquaintance know that his days have not been unfilled. Many sides of his nature have been cultivated—but perhaps he enjoys himself most loafing with a few friends before a grate fire, with some slight exchange of repartee "pour passer le temps." Os goode Hall will claim him. Let us add that the law will gain few keener minds.

McEWEN, JOHN

"How sweet it were With half-shut eyes ever to seem Falling asleep in a half-dream."

This canny Scotch-Canadian was reared in the County of Huron. Through the influences of the country school and "the Master'' he gradually took on some semblance of a thinking creature. Having graduated from the Clinton Collegiate Institute he came to Toronto and took his first two years with the class of '07. The West then claimed his attention, and after eleven months spent in the wilds of Saskatchewan he entered his Junior Year with '08. In his Senior Year he was given the position of Critic on the Class Executive. Jack is more or less of an athlete and all through his course has taken a mild interest in Association foothall.

McKENNA, HUGH JEAN

"Living to learn, he learned to live."

Hugh was born in St. Thomas, Ont., in 1886, and is one of the many Varsity graduates of which St. Thomas may so justly feel proud. He took his Senior Matriculation at the St. Thomas Collegiate Institute in 1904, then came to 'Varsity with the doughty class of '08. He chose Political Science for his course and has always maintained his honors with credit to himself and his class. The pressure of academic work has not kept Hugh from appreciating and participating in the advantages of the larger university life. Library and lecture room did much to help him on, but communion with kindred spirits had as great a part in his making. May his course at Osgoode be as pleasurable and profitable as his Varsity sojourn has been.

In Wemariam

Thomas Roy Keyes

Born 1885 Died September, 1986

"Whom the gods love, die young, and many deaths do they escape by this."

TATATATATAN

MACKENZIE, ALEXANDER JAMES

"He greets the embarrassed gods, nor Frans

To shake the iron hand of Fate Or match with Destiny for Beers."

Alexander James Mackenzie was born in Sarnia, 1887. He received his early education at Upper Canada College, and entered University College in 1903. During his University career "Sandy!" has always been remarkable for his breadth of mind. Believing "that books were a mighty poor substitute for life." he has not allowed the bogev of examinations to hinder his development. His energy has carried him into every sphere of University affairs. In his first year he was made Athletic Director of his year, and has played each season in the Mulock Cup series. He is a member of the XIII. Club, and of the Zeta Psi Fraternity.

MacLACHLAN, MAY AGNES

"A gentle noble temper,
A soul as even as a calm."

Harbord Street Collegiate Institute has sent many a clever student to old 'Varsity, but few of more genuine worth and wider sympathies than May MacLachlan. Miss MacLachlan entered the University as holder of a scholarship in Moderns and Mathematics. Modern Languages claimed her among its chosen ones. In this course she has clearly shown her linguistic abilities, winning the Modern Language Club prize for Italian recitation in her third year. More than once she has helped to win laurels for '08 in the debates of the Literary Society. At various times she has filled places in the Class Executive and on the Cabinet of the Y. W. C. A. Miss MacLachlan is very dear to her many friends, all of whom will bear tribute to her genuine qualities and her steadfast love of truth.

MACKINNON, FLORENCE

"Here's a sigh for those who love me, Here's a smile for those who hate, And whatever sky's above me, Here's a heart for every fate."

Florence Mackinnon matriculated from the Morrisburg Collegiate Institute and in 1904 came to Varsity, entering the class of '08. Her athletic tendency early showed itself and she was made Curator of the Girls' Hockey team, and in her fourth year was President of the Athletic Association. To her good judgment, unprejudiced opinions and winning personality is due the popularity which she enjoyed during her four years at college. Throughout her course in Moderns she has always maintained a creditable standing.

McLARTY, W. J.

· - hunc et fortem crede bonumque."

With a sense of relief the stork dropped Mac, down on the seventh side-line of Oro. When the youth of promise had completed the curriculum of the rural academy his parents forsook res rusticales and he received his collegiate training in Barrie. For three years he trod the thorny paths of pedagogy and, lured by the lofty, came down to Varsity with the class of '07 but, being absent one session, '08 received him as a Junior. While here Mac has developed in all directions and has secured an enviable place in the class lists. His ready wit and unfailing good humor, coupled with a kindly and unassuming manner, has secured for him many a warm friend among those who know him best.

MacLEAN, ALEXANDER

"Of ancient Highland blood was he."

Sandy was introduced among hominum miserum at London in September, 1883, At the age of eight he emigrated to Byron, where he woefully navigated public school. Early in life Mac learned that "a little knowledge is a dangerous thing," and not caring to be dangerous he resumed his studies at London Collegiate Institute, graduating in '01. He next became a school master but returned to London in the spring of '03 and carried off the scholarship in Mathematics and Science. After teaching again for a year he entered University in October, '04 in the department of Natural Science, Geology and Mineralogy is his hobby, in which course his many friends wish him every success.

McNAUGHTON, JEAN BEATRICE

"An angel-watered lily, that near God grows and is quiet."

Jean was born at Woodbridge, and received her high school education at Weston, where she graduated with Honor Matriculation. In the fall of '04 she entered University College as a student in Moderns and History, and in that course has taken a most creditable standing. But it is not so much as a student that Jean has made her name one to be remembered among those who know her well, and those with whom she has come in contact; but in that which is the highest life can hold-"the truest and best of friends." Naturally sunny of disposition, and with that delightful mixture of humor and deep sympathy, she has made for herself a place in college life that is distinctly her own.

McLEAN, EARL REGINALD

"He's little but he's wise, He's a terror for his size."

Not that he loved farming less, but that he loved learning more, is why "Mac" entered Listowel High School, His executive ability, shown in literary work there, proved but an earnest of the interest he was to manifest in similar activity at 'Varsity. As a Sophomore he came to us; in looks, a boy; in mind. a man. No wonder, then, that in his junior year he was appointed Class Critic. A Senior now, he has proven in debate the wisdom of Britain's Free Trade policy. As Convenor of City Missions in Varsity "Y" he is hard after the chief property holder in St. John's Ward -His Satanic Majesty. "Mac" will be a Sky Pilot.

McNEELY, MAGGIE VERNE

"A very woman of very woman."

M. Verne McNeely received her preliminary training at Carleton Place High School, and entered University College with her Senior Leaving, enrolling in Moderns. Throughout her course she has taken an active interest in everything pertaining to college life, especially the Y. W. C. A., having been Corresponding Secretary in her second year, and Mission Study Leader in her final. She is also President of the Grace Hall Library Committee and Prophetess of '08. But above all her true nobility of character has won the love of all who know her and in after years the remembrance of Verne will be one of the sweetest memories of our college life.

McQUARRIE, GEORGE BRUCE

"But something of the Spirit of Old Greece,

Flash'd o'er his soul a few heroic raus."

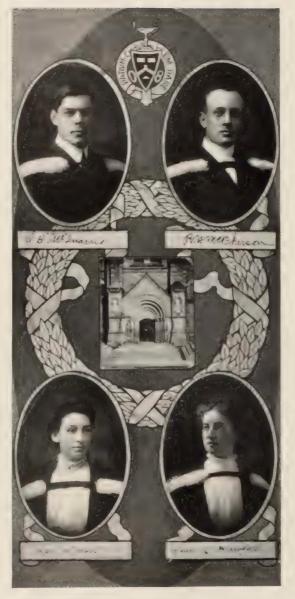

Mae was born in Toronto, but deserted the Queen City and finished his early education in Chatham. After absorbing the surplus information in that neighborhood he tried an examination and incidentally won the Prince of Wales Scholarship. He entered Varsity with '08 and has never summoned enough courage to desert the class. He was a member of the Executive and the Association Football Team, while in debate his voice was seldom raised in vain. Classics cast over him their spell and have been fighting a four-year battle with indolence in the laudable attempt to keep him in first-class honors.

McWHORTER, MARY A. VICTORIA

"A spirit full of pleasant brightness."

After receiving her early education in Smith s Falls, Miss McWhorter registered in University College in the autumn of 1904. In her course—Honor Moderns -her standing has always been credit able; but her energies have been by no means monopolized by academic pursuits. In all branches of college activity, her musical ability and unselfish energy have been invaluable, and her fellow-students have shown their appreciation of her abilities by electing her at various times to offices in the Literary Society, the Y. W. C. A., the Class Executive and the Modern Language Club. Miss McWhorter has also assisted in making her class tamous in the arena of debates. Her many friends can but wish her a future as unclouded and successful as her past.

McPHERSON, ROBERT HARVEL

"My life has been one horrid grind."

"Mae" was born near Grand Valley in the County of Dufferin, and passed his boyhood days on the farm communing with nature. After a course in Orangeville High School he entered the Univer sity with '07 Class of Mathematics and Physics, but his natural aptitude for Chemistry asserting itself he cast in his lot with the famous Chemistry and Mineralogy Class of '08. "Mac" has always been a good amateur sport. He was an active member of the Rifle Association, but was particularly interested in football, baseball and hockey. In the latter sport his sympathetic executive ability was quickly recognized by the Co-eds, with whom he is extremely popular, and who elected him coach during the past season.

MARSHALL, LAURA E.

"So whole inclined to all good To swell the store of happiness."

Miss Marshall, whose University career was preceded by a collegiate course in Owen Sound and a varied experience in the mountains and prairies of the West, is one of few possessing sufficient energy and skill to play a lealing part in every activity open to women students. She has taken high honors throughout her course in Philosophy; she has superintended our athletics, won our debates, played "Pygmalion" to our "Galatea," aided our missions, written our poems, She is a valued member of the Alpine Club of Canada; and her invigorating influence, her keen appreciation of nature and humanity, and her power of endowing others with a widening horizon, her friends associate with her wellloved mountains.

MARTIN. WILLIAM

"And what 'e thought 'e might require 'e went and took."

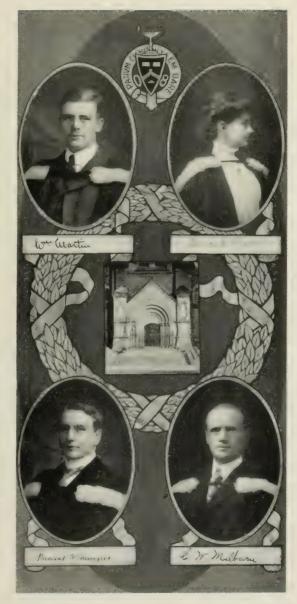

William Martin first saw the light of day in Winnipeg in 1887. After absorbing all the knowledge to be found there, he entered Upper Canada College. In 1904 he enrolled in Political Science. Here he has abundantly fulfilled his early promise both in studies and sports. Last year he obtained the Alexander Mackenzie scholarship in Political Science. In sports he has also taken a high stand, having been for three years a member of the hockey team, during one of which he was Captain. This year he was a member of the first Rugby team. He is a member of the Athletic Directorate, and President of the Inter-Collegiate Hockey Union. He is one of the most popular men in the University, and he will carry the good wishes of all with him in his career.

MENZIES, PERCIVAL KEITH

"No sport of every random gust Yet being to himself a guide."

This sturdy Scotchman was born several years ago in a Western Ontario town. At an early age he changed his residence to North Dakota, where he received his early education and passed his Entrance in 1901. The same year Percy returned to Canada, and went to Woodstock College, matriculating in 1904 with high standing in Mathematics and Science. He then came to Varsity, registering in the "B. and P." course. Recognizing in him a canny Scot, in 1905 the class elected him as their Treasurer. Since then he has reigned as Corresponding Secretary of the Lit., and also as a member of the Dinner Committee. P. K. has the medical profession in view, and expects to spend the next two years at the Medical College.

LIEBLIEBLIEBLIEBLIEBLI

MASTIN, EUNICE EVILENA

"Her air, her smile, her motions told Of womanly completeness."

One bright October day, Eunice-Mas tin came down to Varsity from Bloomfield, bringing with her into the gray walls some of the joyousness of the day outside. Miss Mastin graduated from Picton High School, and entered Varsity in the Moderns course, but was soon tempted by the broader outlook offered in the General Course to transfer her allegiance. In that course she has won and maintained an excellent position for herself. Her sympathies are wide, and in the Y.W.C.A. especially she has done good work. Though studious in nature, she has gladdened numerous social functions with her bright presence. Among her many friends Eunice is justly popular, because of her sunny ways and un clouded optimism.

MILBURN, C. W.

C. W. Milburn was born in Desboro. Owen Sound Collegiate Institute turned him out when he had obtained a teacher's certificate. On the strength of this he lived at Princeton for several years. Wearied by his pedagogical labors, he came to Toronto to rest in "the poppy fields of Political Economy." He was sufficiently restless here to earn some academic honors, including scholarships, in his spare time. The rest he devoted to being a Unionist and propagating that faith. He did not join '08 until the class has spent a year of university life, and has never had cause to repent his choice, thus deliberately made. Upon graduation Walter will re-enter active life.

ARTS DANCE COMMITTEE

OUR HERITAGE

We sought where walls and towers of ancient stone Uprose in quiet beauty toward the sky; For here, we said, dwells Truth in highest form, And here, untrammeled, may we search and find.

Then, to our seeking souls, on entering in,
The spirit that had grown within those walls
Spoke thus: Will ye choose Truth? No more we heard,
Nor asked, but answer made: The Truth we choose;
None other, for another must be less;
The highest we demand.

We passed within.

And ever, as we dwelt within the walls,
More lordly grew the gables and the towers,
Kindlier the halls with their high rafters brown,
But still aloof remained the Truth we sought,
The Truth we thought to gain, though with great toil,
For always were we nearer to the goal,
Yet ever failed to reach, though stronger we
To strive toward that high promise of the Truth;

And ever in our hoping hearts there grew
A grander vision of the ultimate,
That somewhere dwelt, though far beyond our ken.

Now comes the time when we must leave the halls, Where was the scene of our most ardent quest; And passing out into the world beyond, Of us the soul that dwells within these walls Demands again: Will ye choose Truth? We pause, For humble have we grown, and slow of speech, But lo! the question now is made complete: Will ye choose Truth, or but the search for Truth? And humbly, gladly, quickly we reply: Let us seek Truth, for that is worthier Than gaining it—and then no more to gain!

This be our heritage from thee, O home Of those thrice happy here on earth who dwell, The seekers ever of the lofty Truth.

LAURA E. MARSHALL, '08.

禁工经工经工经工经口经口经

MILLS. HARRY PARKER

"That ever with a frolic welcome took
The thunder and the sunshine."

"H. P." is an old boy of Jarvis Street Collegiate, and combines in his nature all the elements of an optimistic philosopher and a persevering scientist. His wide interests in everything human, cosmic and microcosmic, have endowed him with a rare breadth of opinion. He takes an active interest in the Speculative and many other clubs of which he is a member. His originality and ingenuity are in evidence everywhere, and his friends expect much from such bright promises.

MOORHOUSE, VICTOR HENRY K.

"The Future I may face now I have proved the Past,"

Victor was born in Toronto on August 24th, 1886. His early education was received at the Toronto Church School, from which he matriculated in 1902. After this he toiled discontentedly in business until the fall of 1904, when he registered in Class '08, B. & P. During his course steadiness and ability have disguised the effort necessary to achieve his undoubted successes. In the field Victor is unexcelled in endurance. For years past his summers have been spent in Northern Ontario, where he has attained skill as a canoeist and woodsman. and developed his latent love of the beautiful. As a member of K. Company, Q.O.R., he is well known.

MILLS, HELENE MASSON

"One with her are mirth and duty."

Helene Masson Mills received her preparatory education at Ottawa Collegiate Institute, and in 1904 entered University College, registering in Moderns. Throughout her course she has taken a great interest in the life of the College, striking the happy medium of duty and pleasure. Her spirit of true friendship, her keen sense of humor, and many other attractive qualities have made her most popular at Varsity.

MOSS, THOMAS

"Life is real, life is earnest."

Looks like a cherub-but ain't; was born pink; is growing pinker, and will die the quintessence of pinkness. Started passing examinations at a very early age. Entered Upper Canada College. and passed more examinations. Matriculated. Entered the University and continued to pass examinations. Decided to work hard the first year. Took the B. and P. course and obtained second class honours. Started the second year with less energy and took third class honours. Decided that he was working too hard and transferred to Modern History. Obtained first class honours and was first in his class. Has loafed in his fourth year. It is to be hoped that he has justified the appearance of his photograph in the year book. Statistics: Born 1885; height 5 feet 11 inches; color, pink; temper, good; appetite, better; amusements, work; serious business of life, riding and tennis.

MUSTARD, CHARLES ALEXANDER

"In close fight a champion grim, In camps a leader sage."

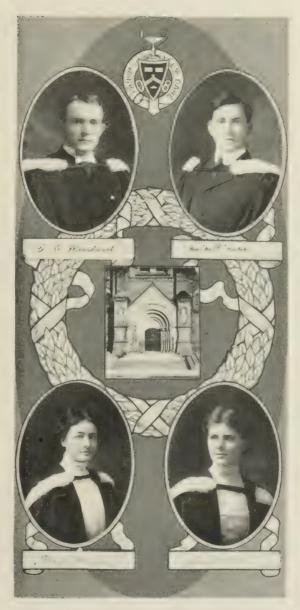

After spending some years in industrial life, Charlie decided to seek a University education. Matriculating from Clinton Collegiate Institute, he entered 'Varsity with the class of '08. Here his career has been an eventful one. In academic work, athletics and indeed in every department of college life he has been a leader. He is a scholarship man in Philosophy, having taken first place in his class each year. Twice he has been captain of the Varsity Association Football Team, Intercollegiate Champions of America. He has been a member of the Y. M. C. A. Executive, Class Executive, and Lit. Executive, and has brought honor to '08 as a debater. His activity and energy will assure his success as a Presbyterian minister.

NEWTON, MAY LOGAN

"Great thoughts, great feelings, come to her Like instincts, unawares,"

Miss Newton received her preparatory education at the Goderich Collegiate Institute, where, after passing through its various forms, she graduated in 1903 with Senior Leaving standing. In the fall of the next year May entered University College, choosing Modern Languages as her course, which branch of learning she has successfully followed during the four years. Many friends will look back with pleasure to the years spent with her at college, as she extended a genuine sympathy and feeling of good comradeship to all those with whom she has come in contact, and has earned the friendship of all associated with her. In her senior year, May filled the position of Councillor on the Class Executive.

MUTCH, JOHN MAURICE GREGG

Sterling worth gains love and respect."

Jack was born in Toronto, and received his early education in Church Street Public School and Jarvis Street Collegiate Institute, matriculating from the latter in 1903. After spending a year in one of Toronto's big insurance offices, he decided to study Philosophy, and gained the far-famed class of noughty-eight. He was honored as a member of the Class Executive in his third year and as Convenor of the Y. M. C. A. Membership Committee in his final year. Jack is going to Knox and we all feel assured that he will make a success of his chosen calling. A genial manner, a progressive spirit, and withal a high and well-defined purpose, characterize him.

NICHOL, SIDNEY WINNIFRED

"A rosebud set with little wilful thorns,"

Miss Nichol was born and brought up in Toronto and is thoroughly imbued with a love for the "Old Ontario Strand." Jarvis Street Collegiate Institute was the scene of her youthful activities. In 1904 she registered at University College. All through her college career she was loved and trusted by the girls for her prevailing cheerfulness and readiness to help. As Councillor on the Class Executive her practical good sense was of great help. Miss Nichol followed the Moderns Course and distinguished herself by winning the Spanish Recitation prize. Her friends give her all good wishes for the future and are sure of her success, confident that "she will do noble things, not dream them, all day long."

NURSE, OSCAR JOSEPH

"This gentleman, in word and deed,
Is short and simple in his creed:
Fear God and help the soul in need."

When Oscar was pleased first to participate in the activities of our planet, Wellington County, Ontario gave him her welcome. Here he spent his boyhood days, surrounded by Nature's kindly influences. After he had been granted a Senior Leaving standing by Orangeville High School the class of '08, Varsity, claimed him at the beginning of its second year and enlisted his abilities with the men of philosophical tendencies. Always a conscientious student, his course has been marked by peculiar industry, so that he has been able to pursue at the same time the study of Theology at Wycliffe College.

PAULIN, GEORGE GRANT

"Ex Missourii sum. Oportebit te mihi demonstrare."

St. Valentine, on the 14th of February, 1886, presented the Town of Chesley with the finest of his gifts and persuaded the rest of his fellow saints to shower on it their choicest blessings. Grant, after a few quiet years in the schools of Chesley. entered the University with the class of 'vo. One year's training and he became Class Orator. Another and he was made Arts Representative on the Undergraduates Union. Meanwhile, Kansas City claimed him. The researchful propensities of the Missourian, quick to take effect in him, were early recognized by his fellow students and twice he has been deputed to look after the Arts Dinner. Whether he stays in the land of his birth or returns to the land of his adoption, we can hope for no more than that his patron saint has still greater blessings in store.

O'BOYLE, LORETTA JOSEPHINE

"And true she is, as she has proved herself."

It was in Lindsay that Miss O'Boyle received her preparatory education, in St. Joseph's Convent and the Collegiate Institute. She entered Varsity with the class of '07 but at the end of her second year left to spend some time in Ottawa. Returning, she joined the class of '08. Her success in her chosen course, English and History, has shown her ability as a student, though the social side of life has also strong attractions for her. Her ready sympathy and unswerving loyalty, coupled with a keen wit and unfailing good nature, have placed her high in the esteem of her friends.

PENTECOST, CONSTANCE MARIE

"A sunshine in a shady place."

After matriculating from Miss Veals' School, Toronto, Constance entered the University to continue her studies, choosing the General Course for its broad culture. She has always been an enthusiast in every phase of college life. The confidence which her fellow students placed in her is shown in the number of responsible positions she has held throughout her course. For three successive years she did excellent service on the Year Committee and was a member of the Executives of the Glee Club and Dramatic Club. She was seldom absent from a Varsity dance and was a favorite not only with those of the male persuasion, but also her sister students because of her vivacious disposition and charming personality.

PORTER, HARRIETT MARGARET

"Like a pleasant thought, When such are wanted."

Miss Porter attended the high school in her home town, Orillia, for two years. Then she came to Toronto to continue her preparation for her university career in Parkdale Collegiate Institute till 1904. The broad culture afforded by the General course appealed to her and claimed her as one of its votaries. She has lent generous support to the many student societies among college women, and has served the year of '08 as a member of its Class Executive. Her happy-hearted courage has made her a general favorite in college circles. In her four years as an undergraduate she has always aided her friends with

"A voice

Of comfort and an open hand of help."

PRINCE, SAMUEL HENRY

"Hit semed as he myst

Be prynce with-outen pere."

"Prof" comes from far-away New Brunswick, being born at a beautiful spot in the Kennebeccasis Valley right on the line of march of the wild-geese in their southward flight. He graduated in 1904 from the St. John Grammar School -gold medallist, and with scholarship by reversion for the U. N. B., the same year joining '08 of Varsity. Prince believes in the balanced life, and has taken a modest part in the various undergrad activities, whether as Inter-Course debater, Philosophical Society Treasurer, or as knight of the quill in the college journal. In the senior year he organized the Atlantic Club. Though hampered by an illness he has taken high honors in Divine Philosophy, and will no doubt become "a prynce with-outen pere" in the Anglican ministry.

PRIESTMAN, GORDON

"A man he seems of cheerful yesterdays

And confident to-morrows."

Gordon Priestman, the subject of this sketch, was born in the County of Weiland. Early days were spent on the farm. Visions of future greatness and usefulness arising before the youthful Gordon, he entered Welland High School. He acquitted himself well in his high school course, matriculating with honors in Classics. Rural life was tried again but was not congenial. His ambitions urged him on. Accordingly he made his way to Varsity and enrolled in the B. and P. Course of the famous class of '08. Gordon is a hard-working student, a jovial companion, a man of high ideals, and we predict for him a brilliant future.

REID, EVA

"Her looks composed, and steady eye Bespoke a matchless constancy."

Miss Eva Reid was born in St. Catharines, but has lived for some years in Streetsville, where she attended high school. From there she entered University College, with the '08 class in the General Course. She has great decision and independence of character, combined with a love of fun and all wholesome pleasures. She is a good student when occasion demands; a merry companion when time permits; and is always a firm friend of those who seek her friendship.

In Memoriam

Allan Corraine Thompson

Born 1887 Died 1907

"Doomed to see the flowers of spring. But not the winter's snow."

ROSS, DOUGLAS HODGSON

"He thought as a sage, but he felt as a man."

"Doug" is a Canadian by birth and an American by expatriation, having spent sixteen years in Erie, Pennsylvania, where he received his early education. After matriculating he showed his judgment by deciding to enter Toronto in preference to an American university. Here he has been identified with nearly all the departments of college life. He has been a member of Class and "Lit" Executives, and the Historical Club, while in his final year, on account of his ability and the length of his legs, he was elected Business Manager of "Torontonensis," Being unable to withstand the attractions of Modern History, he jilted Classics, and, in punishment for his infigelity to the muses, has been compelled annually to accept first-class honors in the former course. He intends to study law.

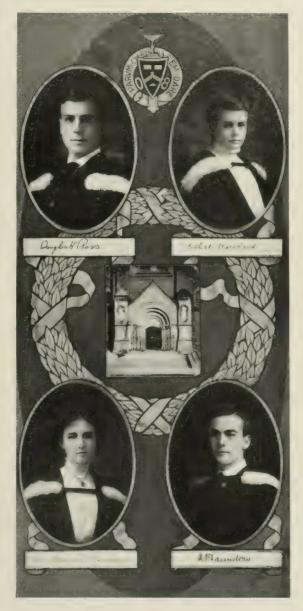

ROWLAND, MARY HAZEL

"Her voice was soft,

Gentle and low, as excellent thing in woman."

Miss Rowland was born in the city of Toronto, and after receiving her preparatory education at Harbord Street Collegiate Institute, she became in the fall of 1904 a member of the Class of '08. In her Arts course Hazel has shown ability and industry, and has taken very creditable standing throughout her course in Modern Languages. Notwithstanding her diligent pursuit after knowledge, she has frequently been known to participate in the gaieties of dance and reception, and at college she has made many friends, the good wishes of each and all of whom will follow her far beyond college halls. Her quiet and independent disposition has made her a popular member of college circles.

ROWLAND, FLORENCE ETHEL

"A violet by the mossy stone, half hidden from the eye."

Ethel Rowland was born in Mount Albert, Ont. She received her preparatory education in Toronto, and in 1904 entered the University, choosing Biology instead of Domestic Science or some other course more fitted to her years and temperament. These scientific studies deprived many of her classmates of her enjoyable companionship, but she was well known and held the office of Councillor on the Class Executive of the second year. All her classmates will remember her fearless truthfulness and friendliness with pleasure.

SAUNDERS, ROBERT PORTEOUS

"Still waters run deep."

Robert Porteous Saunders received his preparatory training at St. Andrew's College, Toronto. Matriculating from that school, he entered University College, joining the class of 1908. "Buck," as his friends call him, proved a good student. In athletics, he played on the University cricket team. His sterling qualities won him the honour of being a member of the Thirteen Club. Those who know him best feel assured that he will be among the fortunate who make their mark in the world.

SCOFFIELD, JOHN

"Contented if he might enjoy

The things which others understand," John was born in Allenford, Bruce County, where he received his primary education. Matriculating at the Owen Sound Collegiate Institute, he taught school for several years. In this avocation he was very successful, and when he graduates the ranks of the pedagogues will be strengthened by his enlistment. He entered University College with the Class of "Nought-eight," and has always been one of the workers in class and "Old Lit." circles. He was a member of the Class Executive, Torontonensis Board, Arts' Dinner, and several committees, where his genial disposition and executive ability were always in evidence.

SCOTT, ALEXANDER ARMSTRONG

"Oh, these ministers' sons-

And to think that he became a philos-

opher, too."

Alex. graduated from the High School in Carleton Place, and entered the University with the class of '08. In his first vear he stood high in first-class honours in "B. and P." But more abtruse problems charmed him, and he entered Philosophy, where his industry and ability have made him very successful. In his second year he captured the Sinclair, and in his third year the Kirschmann Scholarship. Though pre-eminently a hard student. Alex. does not neglect the other sides of Varsity life. The "Lit.," the Y.M.C.A., sports and all college functions find in him a reliable and unobtrusive supporter. He is an inter-year debater and a member of the Philosophical Society Executive. His accurate, painstaking methods of study will make him a very useful member of the Presbyterian ministry.

SCOTT, MAY RUSSELL

"A life that leads melodious days."

Miss May Scott lives in the historic township of Scarboro, where Scotch parentage and the natural beauty of her surroundings have instilled in her a fine character and a wholesome joy of living. Few but her best friends know that this gentle, unassuming girl is a fine horsewoman and a good shot. With this fondness for outdoor sport, she has a strong self-reliance, indicated by her early successes in Mathematics at Markham High School. She has kept to the General Course in University, and has always been ready to assist in Y.W.C.A. work and in any help she might give to others.

SHAVER, GORDON N.

"The very pink of courtesy."

G. N. Shaver was born in Toronto in 1885, and received his elementary education in that city. Later he attended Jarvis Collegiate, and finally entered Varsity with the Class of '08. His academic standing has been very creditable. In his first year Gordon secured the Bankers' Scholarship, and in his third first-class honours in Political Science. He has played on the first Tennis team, and in his fourth year captained the Senior Arts Rugby. He is a member of the Historical and Political Science Clubs, and is Secretary of the latter, The law has cast its spell over his imagination, and after graduating he will journey southward to Osgoode, where we believe a successful future awaits him in legal circles.

SIFTON, JOHN WRIGHT

Though born in Brandon, Manitoba, twenty-one years ago, Jack left his western home at the age of ten and moved to Ottawa. After a course in the Ottawa Collegiate, he obtained his matriculation in time to enter Varsity with the finest year on record. Jack has been a prominent figure in all lines of sport, and managed the Intermediate Hockey team in the season 1905-06. In the same year he was on the Editorial Board of "Varsity." In University politics Jack is a staunch Unionist, and was a nominee of that party for the election in 1905. After graduation he expects to enter into business in Winnipeg, where his many friends hope to see him very successful.

SIMPSON, ALEXANDER McGREGOR

"Ne'er one who bore his honors so meekly."

Newry has produced a mathematician in the person of "Prof." Simpson. His earlier wisdom was obtained in the red school house on the corner. Later, he supplemented this store of knowledge by a course in Listowel High School, from which he graduated in 1904 to take a course in Mathematics and Physics. His power of concentration, and accuracy in reasoning enabled him to capture the Alexander Fulton Scholarship in his first year, the William Mulock Scholarship in his second, and the A. A. A. S. scholarship in his third year. He has shown his executive ability as President of the Mathematical and Physical Society, and Secretary of his graduating year. "Prof." is a good fellow, and we feel assured a bright future is before him.

SILCOX, CLARIS EDWIN

". . . They tried me with their books.

Lord, they'd nave taught me Latin in pure waste!"

This child of the parsonage was born in historic Zorra, migrating at an early age to Paris. In this picturesque little town on the banks of the Grand he received his public and high school education, matriculating in 1903. He has spent some time on his course, E. & H., but more on undergraduate societies. In his third year he was elected Treasurer of the Lit., having received preparatory training as Treasurer of his class. As President of the Y.M.C.A., Editor of Torontonensis, and President of the Permanent Year Executive, he finds his time fully taken up. That he will occupy no mean place among Toronto graduates is the wish of all and the conviction of many.

SINKINS. ADELAIDE GERTRUDE

"Her step seemed to pity the grass it pressed."

Miss Sinkins attended the Collegiate at St. Mary's; and later on, when she came to Toronto to live, went to Jarvis St. Collegiate. There she endeared herself to her associates by her strong Hibernian tendencies. She entered Victoria College with the '08 class in the General Course, with special work in German, French and English. In her final year she registered in University College. Her unassuming character, and unfailing gentleness and good humor have caused her to be liked by all:

Alma Mater

'Tis a love song for Alma Mater,
A song for old Varsity,
And the spreading lawns and the oak trees
Of the place that's dear to me.

A song for Alma Mater,
And we pass up the step-stones ten,
With minds athirst and trusting,
And books that wait the pen.

A song for Our Common Mother,
And all pour out again,
Till the campus green is hidden
With an army of Northern Men.

And the stalwart youth of Canada Flow inland steadily; From far Columbia's mountains, From the Land of the Apple Tree,

They flood the great rotunda

With the rush of a tidal wave;

And they know each call that hourly

Is rung by the old clock, grave.

No winding hand it knows,

Nor cares for face or time,
For once I heard at midnight
The Varsity bells to chime

Out to deserted halls,
Or chance some spirits sit
Silent on benches autographed,
While sages whisper wit.

And we wait on prayers at morning,
When the heart is high and light,
Then pass along the galleries
With classic pictures dight.

Some hear the engine's throbbing,
Some sit where skulls surround,
Where the close-barred taper's burning,
Or where the bell ne'er sounds.

And they find each don whole-hearted
Tho' his gown be rent aflap,
And they love a glimpse of the monocle
Or the cane with the double tap.

And little we'd reck the star-stings, Were it not for the wicket's grin Near to the door where the lantern Glows when the "prof." is in.

So ever we follow faithfully,
While unseen fingers toil
And shape to rich luxuriance
The erstwhile virgin soil.

And the daughters of Toronto
Who grace the lore seat old,
At Varsity's gates oft linger
Ere passing to their fold

Anon they dream of the Autumn,

When the student's lamp shall dim

For the rare delight of the promenade

'Mid the indian paintings grim,

And there's ever a lad in Varsity

That thinks of the distant maid

When the classic halls have charmed her

With a glory that cannot fade.

And once may they stand together
In sunshine or storms of fate,
Like the soldier and the maiden
That guard the entrance gate.

I see the big procession,

They're gathering for a fray,
To make the old score-dial

Show Varsity men can play.

I seem to see the battle,

I hear the shout surge high
When the proud contestants scrimmage,
Or a forward makes a try.

Now some are on the campus, Or in the gym they swing; Some read in the raftered library Till the little bell doth ring.

'Tis night; and the matchless West-wing Is a moonlit ship of glee, And colored lights, whilst a stein-song Issueth merrily;

Then a heavy rush on the stairway, Lo! above our men of might The champions of debate are borne, Hurrah! for the Blue and White.

And so it goes till an hour

As the interlude of a poem,

When the college boy, for a holiday,

Shall cheer his quiet home.

Yet off there's a pause in the anvil-song.
For most at moments drink
Of the good rich wine of fellowship
As they forge, with link on link,

A mighty chain that bindeth
Each to another dear,
And all to one golden anchor
And the land that we revere.

How oft have I on the holy-day, When the portal gates are locked, Free as a day slave lingering, Around these scenes re-walked!

When Beauty I pass on the work days
Speaketh from cornice and grot,
Lureth me from the form of things
To love the world of thought.

But the griffin sleeps on the newel-post,
And the owls in the cluster are quiet,
The doves on the screen of the vestibule
Caress, and I Thee to night.

So vale! vale! Varsity,
God bless Thee thro' the years,
May great men be thy graduates,
And good men fill thy chairs.

Men of the north preserve Thee
Shameless from sullying youth,
May thy future ever bright be
As thy front on the sunny south,

A prayer for my Alma Mater,
And the ivied walls now wait
For the rosening kiss that the sunset
Throws o'er the western gate.

A prayer for the University,
While over tower and tree
The veil of night now droppeth
Curtaining tenderly.

A prayer for Our Common Mother,
And the time-worn turnstile swings,
"Oh, a last good-night" is the whisper
Borne on the breezes' wings.
—HENRY PRINCE.

SMITH, MABEL PAULINE

"Who mixed reason with pleasure and wisdom with mirth."

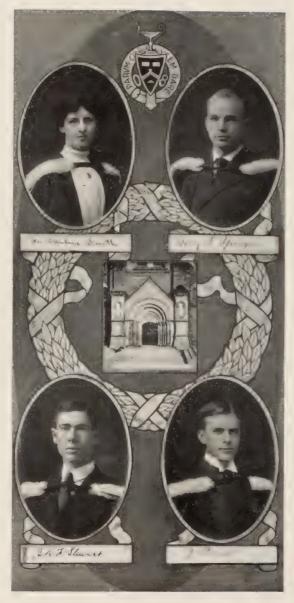

Miss Mabel Pauline Smith matriculated from Harbord Collegiate Institute in 1903, entering University College the same year. The Class of '07 duly appreciated their loss when illness forced her into the class of '08, to which she has given her entire allegiance. Pauline has always been an enthusiastic member of the Dramatic Club, and for the last two years has proved an efficient Treasurer. In spite of the fact that throughout her college career Miss Smith has taken almost the entire work of two courses (General and English and History), she has always found time for the various functions which make college life a social success. Pauline will leave behind her a record of kindness full of sweet memories for her class-mates.

STEWART, JAMES ROWLAND F.

"He is young and of a modest nature."

Rollie was born at Collingwood in 1886. After imbibing some slight knowledge at the Collegiate Institute of that city, he came to Varsity in the fall of 1903, desiring to enlarge his horizon of the realms of wisdom. Needless to say, Political Science offered him the brightest outlook in this respect, and Rollie has been a disciple of Adam Smith ever since. Rollie has found some time for athletics, captaining the Junior Arts hockey team, 1906, and the Varsity Thirds in 1907. In Rugby he did good service by managing the victorious Third team in 1907. Rollie is of a quiet nature, but shows great capabilities, and we hazard the opinion that he will get there. He may join the procession of would-be legal lights to Osgoode subsequent to graduation.

SPRAGUE, HARRY SUTHERLAND

"Cool as an icicle and determined as the rock it hangs upon."

Harry Sprague received his preparatory training at Belleville High School and Albert College. "Doc." has a quiet, unassuming manner, which has made him the most companionable of fellows. His executive ability has shown itself in the able manner in which he has steered the Track Club. Inter-collegiate champions, through its very successful season. Although a good student, no one would call him a "plug." Besides playing rugby, he is interested in all the other lines of University sport, always being on hand to lend encouragement. "Doc." has shown himsen to be a good college man, always having the interests of the University at heart. Although a Political Scientist, he has not definitely decided on his future line of action.

STIRRETT, JOHN THOMAS

"Why should a man whose blood is warm within

Sit like his grandsire cut in alabaster?" Jack hails from Forest, Ont. He entered Varsity with the Class of 1908. and has been most intimate with all student activities. In his second year "Sir John" tied for the First and Second Alexander Mackenzie Scholarships in Political Science, but in his fourth year he transferred into Modern History and graduated there. He has been a member of his Class Executive. the Arts Dinner and Dance Committees, the Mulock Cup Rugby team, the Historical and Economic Clubs, and Secretary of the Undergraduates Parliament; also in his final year he was editor of "Varsity." Jack has made the most of his course. He was a friend of books, yet not a slave. Too many aspire to be "good students." Jack strove to be a "good University man."

TAYLOR, ALEXANDER HAROLD

"But there's more in him than thou understandest."

Harold was born in Goderich in the early 80's. He attended Goderich Collegiate Institute until he acquired all the knowledge that was possible in that institution, and then sought other fields to conquer. At first McGill seemed to offer sufficient opportunities to gratify his ambition, and he entered the class of '07 Arts. However he became convinced that Toronto was the proper place to complete his University education, and he entered the B, and P, course with the class of '08. Harold has been very conserative in the social life of the University, but before a cheerful fireplace when the pipes are lit you will find him the most congenial of companions. We can safely predict that in his future career he will never be anything but successful.

THOMSON, HELEN MACKINTOSH

"Where thoughts serenely sweet express How pure, how dear, their dwelling place."

Miss Thomson, who lives in Toronto, spent her early years in Burlington, and there nourished a deep love of nature. This was intensified when, atter graduating from Hamilton Collegiate, she went to Embro, in the Celtic atmosphere of Zorra. She balanced a fine literary instinct with the M. & P. course in University, where her work ranks high. As Vice-President of her class in '06 and especially as President of the Y.W.C.A. this year, she has added much to our college life. If a name comes to share in the personality it represents, to the '08 girls the name "Helen" will always mean a strong, sweet character, with a quiet sense of leadership and an infinite sympathy for others.

TASSIE, REBECCA W.

"Is she not pure gold?"

From her home in Dresden Miss Tassie came to Toronto, where her education was continued at Jarvis St. Collegiate Institute, from which she matriculated in 1904. She then joined the incoming class of '08 in University College, and enrolled in Modern Languages. In this course she has maintained honour standing without neglecting other phases of college life, having held offices in connection with the Y.W.C.A. and the Class Executive, of which she was elected Prophetess in her third year. It is her sincere and unaffected manner, her quiet sense of humour and lovable disposition that have won for Reba the many friends who will be sorry when the four years' companionship with her are over.

THOMPSON, LENA M.

"A life that moves to gracious ends."

In 1904 Miss Thompson graduated from the Orangeville High School with the first Edward Blake Scholarship in Mathematics and Moderns. In the following autumn she registered at University College. All through her course she was esteemed for her ability and brightness. She has been a member of the Class Executive, Secretary of the Atheletic Association and Literary Society, and President of the Literary Society. As for her intellectual achievements, she came first in the English and History Course, shared the Italian Prize and George Brown Scholarship, and won the Julius Rossin Scholarship. From her college career it is evident that Miss Thompson is endowed with ability above the average. Her companions send her upon her way with loving good wishes for a future as bright as her college life.

TOWERS, NORMAN EWART

"A man he was, to all the country dear,"

Ewart was born in Sarnia, Ontario, in the year 1887. He received his early education in his home town, obtaining his Honor Matriculation from the Sarnia High School in '04; and entered Varsity as a fresh sophomore with the Political Science Class of '08. Ewart takes a keen, though not active, interest in sports, but his abilities run mere along scholastic and executive lines, he having been a member of the Varsity Board in his third year. He is also a member of the Thirteen Club and of the Zeta Psi Fraternity. Ewart enters Osgoode Hall. (D.V.), next fall and a very bright future is the worst and unanimous wish of his class-mates.

TUROFSKY, HARRY ALFRED

··· A gentleman of excellent breeding and admirable discourse.''

Cæsar records that the joy of the populace was great when "Hen," as he is known to his friends, first greeted this world. Without wasting much time, he entered Jarvis Street Collegiate, from which he matriculated with high standing. Since early childhood "Hen" has taken an interest in things mysterious, so naturally chose the B. and P. Course, which he entered with the class of '08. He is liked for his wholesome goodnaturedness, his jovial disposition, and his interest in student proceedings generally. He has obtained very creditable standing in his course, and we do not hesitate in predicting a glorious future and prosperous life in his chosen profession. We will always remember "Hen" as a good friend to have and to remember

TROWERN, IRENE MAY

"Who mixed Reason with Pleasure And Wisdom with Mirth."

Irene May Trowern graduated from Parkdale Collegiate Institute in 1904. and entered Toronto University the following fall, having obtained the Edward Blake Scholarship in Modern Languages. She maintained this standing in her second year by tieing for the George Brown Scholarship, and in her third by winning the prize for French recitation. Throughout her course she has taken both the Romance and Teutonic divisions of Modern Languages, in which she has always obtained first class honors. She has served on the Women's Literary Society and has been Vice-President of the Modern Language Club in her third and fourth years. Miss Trowern is a member of the Toronto Chapter of the Alpha Phi Fraternity.

URQUHART, GEORGE ALEXANDER

"How wondrous bright thy blooming morn arose,"

George was born in Toronto. We are obliged to think he was a large and stirring baby from his present appearance and manner. After attending Harbord Street Collegiate Institute he entered the University of Toronto. In his first year he displayed his budding genius on the Class Executive. In his final year he was President of the Chess Club and Secretary of the Arts Dance Committee. He was a member of the Economic and History Clubs, and a loval adherent of the Old Lit party. George is also a scholar of merit and renown. In his spare moments he trifled with Political Science. He has always taken first class honors and obtained the Alexander Mackenzie Scholarship in his second year. He goes to seek further knowledge at Osgoode Hall.

WALLACE, ROY EDISON

"Suaviter in modo; fortiter in re."

"Ed" arrived from the "wild and woolly" to join the studious contingents of Varsity in the fall of 1906. He was born in Brandon, Manitoba, in 1888, but soon left that rather intemperate Province to seek the more soothing breezes of the Rockies. He made Nelson his home, and there, in the midst of the glorious scenery of Kootenay District, lived and received his early education. Excellent tuition in the public schools of Nelson enabled him not only to get his matriculation for Varsity, but even the first two years. At Varsity he soon won a reputation for industry, which he had already acquired in British Columbia, and took an excellent stand in his subsequent examinations.

WATT, JAMES CRAWFORD

"Jimmie, Jimmie, that's the name they gi' me,"

Made his first appearance in this world at Toronto in 1886, and has been busy ever since following the path of knowledge. Jim was educated at Jarvis Street Collegiate, and brought honor to his school by winning the Second Edward Blake Scholarship. Coming to Varsity with the avowed intention of becoming a scientific medical man, he entered the Biological and Physical Science Course. Here, though never excessively studious, he won: First year, Third Alexander Fulton; second year, the Edward Blake; third year, the Daniel Wilson Scholarship. All these honors he has borne with perfect modesty, and carries with him the highest esteem of his many college friends.

> "He's little, but he's wise, He's a terror for his size."

WATSON, ANGUS DAVID

"Not clinging to some ancient saw,
Not mastered by some modern term,
Not swift, nor slow to change, but
firm."

Angus David Watson was born in Middlesex County, and spent his early years on a farm near Springbank. With a Junior Leaving Certificate, obtained at Parkhill, he entered the teaching profession. After eleven years teaching in Ontario and Alberta, he decided to attend Varsity. Having matriculated with honors in Science, he began his University career with the B. and P. Class of '08. Choosing the ministry as his life's work, in the second year he registered in the General Course, where he has taken first-class standing. In all his undertakings Angus has been remarkably successful, and we predict for him a useful and brilliant career.

WEIR, JAMES GORDON *

"Sir, the exuberance of his youth may pass,

The excellence of his heart will last for ever."

Gordon is a product of the Hamilton Collegiate and his present home is in Hamilton, but that is not his fault, and, besides, he was not born there. He spent his first year at Varsity in the General Course and then entered the greatest course of them all-Political Science. He has negotiated all his examinations successfully, his star subject being Economics, which indicates that he should do well in the business world. He has played on some teams that never won the Mulock Cup, but his special field of athletics is in the gymnasium. He has taken part in every Assault-at-Arms during his course, and is this year President of the Gymnasium Club. He is a member of the Thirteen Club and of the Delta Upsilon Fraternity.

WHETHAM, JOHN DIXON

"He was six feet o' man, A1 Clear grit an' human nature."

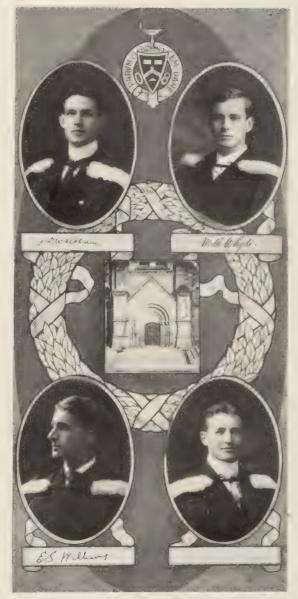

Dix matriculated from Galt Collegiate Institute and joined the class of '08. In his academic work he has been a faithful and industrious student, in his first year standing first in the General Course and in the succeeding years standing high in first-class honors in Philosophy. His interest in athletics has always been keen and active. His executive ability was recognized by the class, which elected him President in his third year; by the University College, which made him Chairman of the Arts Dinner Committee. and by the Y.M.C.A., which elected him to its Executive. Dix is well known in all circles of Varsity life, and during his undergraduate course has formed many fast friendships. His power of making friends, his ability, his conscientious methods of work, and, indeed, his all around manhood, insure his success in after life.

WILLIAMS, EDWIN S.

"And impulses of deeper birth Have come to him in solitude."

Edwin imbibed his early knowledge from a public school in Bruce County and the Owen Sound Collegiate Institute. Impelled by his lucky star he entered the class of '08 as a ''fresh sophomore,'' and joined the ranks in Political Science. Ed. was a successful student and an enthusiastic Unionist, and will be remembered as a genial and considerate classmate. In his final year Ed. filled the Presidential Chair of his class, and piloted the boys safely over the Graduating Dinner. He represented University College in the Inter-College Debating contest and as a student has recognized the benefits derived from a wide and healthy interest in all sides of university life.

WHYTE, MARCHANT BECKETT

"Pronounce him Regular, or dub him Quack."

"Marsh" first sounded his lungs in 1887, near Welland, and if he displayed half the energy he now possesses, his arrival certainly was not unnoticed. He early removed to Toronto, and, with an unquenchable thirst for knowledge, attended Jarvis Street Collegiate. Hearing that he might still learn something at Varsity, he came up to investigate, and was so overjoyed that he wasn't satisfied with four years' study, but delightedly registered for six years' "plugging" in Biological and Physical Sciences. Here he has had a distinguished career, coming second as a sophomore and being in first-class honors in his junior year. He is also proficient in athletics and photography, and his qualifications ensure for him the highest success in his chosen profession as a physician.

WILLIAMS, WILLIAM EDWARD

"To those who know thee not, no words can paint!

And those who knew thee, know all words are faint!"

After matriculating from Owen Sound Collegiate "Billy" spent some time in teaching. Coming to Toronto he entered Varsity with the class of '08. His most striking characteristic is his untiring activity. In addition to the Political Science Course he has taken LL.B. work and the Law Course at Osgoode Hall, and has attained a high standing in all. His interests, however, are not confined to academic work. He takes an active interest in all departments of University life and has served on various committees. His genial manner, sterling honesty and all-round manliness have made him many friends who predict for him a brilliant future in his chosen profession.

THE CAMPUS

WOODHOUSE, CATHARINE FRANCES

"A brow, the harbor of fair thoughts,
And sunny flaxen hair."

Catharine Frances Woodhouse was born in Toronto and received her high school training at Jarvis Street Collegiate, from which she graduated with Senior Leaving standing in 1904. In the fall of that year she came to Varsity and enrolled in the B. and P. course—the second of her sex to do so. Frances was one of the strong supporters of the Glee Club in her first and second years and served on the Executive of the Women's Medico-Literary Society. Her strong independence of character, her kin'l heart and sympathetic disposition ensure for her unqualified success in her chosen career.

WOODHOUSE, JOHN OBINS

"Keeps his counsel, does his duty, Cleaves to friends and loveth beauty."

"Abby," as he is familiarly known to all his friends, was born in Toronto. Matriculating from the old Grammar School in 1904, he enrolled in the Science department, from which his democratic inclinations led him to seek the future in the Chemistry and Mineralogy course. His popularity among the students was shown by his election to the Class Executive during its trying sophomore period. He is an active member of the Rifle Association and a keen baseball player. His cheerfulness and ready wit will long be remembered by those who had the pleasure of coming in contact with him.

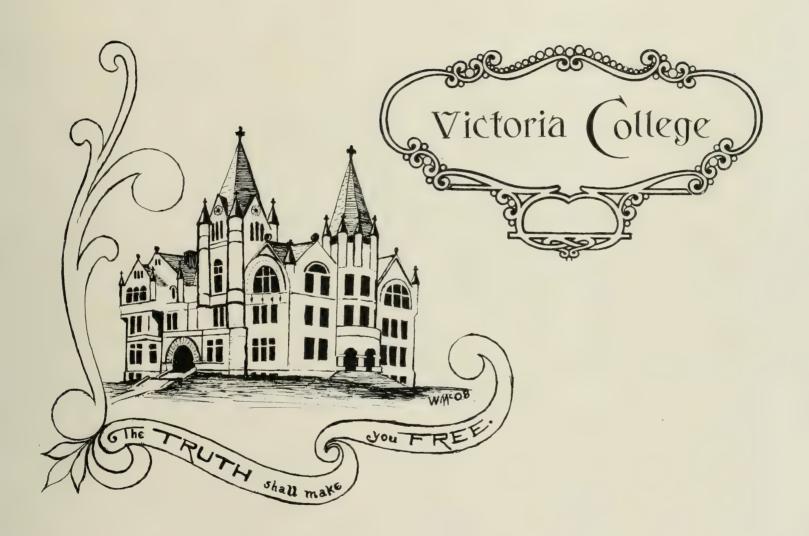

WRIGHT, CHARLES SEYMOUR

"Let him be wise without arrogancy, without ency."

-Montaiane.

Charles Seymour Wright was born in Toronto and received his elementary education at the Toronto Church School, which institution claims many well-known men as its "Old Boys." He completed his schooling at Upper Canada College, matriculating in 1904, and registered at the University that same year, in Mathematics and Physics. His ability and application, his true interest in mathematical and scientific problems, have won for him success in his college career. Charlie has also that quality, helpful both physically and mentally, the saving love of fresh air. He is known to his friends as a good canoeist and woodsman, and to the world as a member of the University Ritle Association and a private in K. Co., Q.O.R.

h. Burnash

NATHANIEL BURWASH, M.A., S.T.D., LL.D., Chancellor of Victoria College.

History of Victoria College

In the early years of the last century an attempt was made to endow the Church of England in Ontario and place the higher education of the people under its control. This was not due to the numerical ascendancy of the Anglicans, but the Governors of the colony, sent from England, had brought with them a preference for the ecclesiastical order of the Motherland and chose for their advisers men of similar prejudices.

When their policy became evident, the Presbyterians and the Methodists promptly undertook the founding of schools of their own—Upper Canada Academy (afterwards Victoria College) being founded by the latter body, and Queen's College by the former. Both these colleges were established for maintaining equal religious rights and have never imposed religious tests on professors or students.

The decision to establish Upper Canada Academy was reached in 1830. The promoters of the enterprise entered a claim for Government aid. Although the Legislative Assembly endorsed the claim, the Governor and his Council refused the request, but were ordered by the Home Government, on appeal, to comply. After some delay, the Trustees received £4,100.

Additional voluntary contributions rendered the undertaking possible, and in 1836 the building was completed and a royal charter was granted—the first given in the British dominions to a college not under the State Church. In 1841, the first Parliament of the United Provinces extended the charter under the name and style of "Victoria College, with power and authority to confer degrees of Bachelor, Master and Doctor of the various Arts and Faculties."

Owing to the lack of widespread preparatory facilities, the new school made provision for elementary instruction. The strictly undergraduate work was almost wholly in Classics and Mathematics, though some place was found in it for History, Metaphysics and the Science of that period. Preparatory training was discontinued about 1867.

Schools in Medicine and Law became affiliated and added prestige to the University, but by the Federation Act of 1887, Victoria ceased to exercise her powers of conferring degrees in these Faculties. In 1871 the Faculty of Theology was established under Rev. N. Burwash, since 1887 Chancellor of Victoria University. The University also attained a marked efficiency in the Scientific department, due to the energy and enthusiastic direction of Professor Eugene Haanal.

The University has had six Principals, Rev. Matthew Richey, D.D., Rev. Jesse Hurlburt, M.A., Rev. Egerton Ryerson, D.D., Rev. Alexander McNab, Rev. Samuel S. Nelles, M.A., and Rev. Nathaniel Burwash, S.T.D., LL.D.

During the administration of Chancellor Burwash federation with the University of Toronto has been culminated. It was argued that the State should supply for all students the costly buildings and apparatus required for the study of Science, and that the Colleges, by giving their chief attention to the Humanities, would still be doing their best work. On the 12th of October, 1890, the Federation Act was proclaimed and on the 1st of October, 1892, the work of Victoria University was transferred from Cobourg to the buildings now occupied in Queen's Park. The present endowment exceeds \$1,500,000.

History of Class '08

WHEN custom calls to not respond is hard. Yet when the class of 1908 was asked by Torontonensis to chronicle her myriad merits so long had she been "Speaking in deeds and deedless in her tongue" that her marked modesty and the limits of one volume made it appear well nigh impossible.

"Though we are wont to strict incognito, Yet upon gala-days one must one's orders show."

So, while the history of '08 is being indelibly written in the annals of achievement and attainment, she will essay to focus on Torontonensis' pages one glimmering ray of her effulgent fame.

Already, though in the first faint dawn of her real greatness, '08 has proven the exception to two historic principles universally recognized. First—that history repeats itself and—that there are no new epochs, history being one eternal chain of progress. In vain de we ransack the historic archives of earth's most illustrious nations, even Classical Greece and Imperial Rome failing us, in our search for that type of genius of which '08 might be the repetition. And surely the theory of one eternal progressive chain

The "Bob," as seen by the Bob Committee.

has been broken, for to connect the recent past with '08's new era—only a multiplied Vulcan could forge the link.

It was in the autumn of 1904 that Victoria proudly welcomed to her halls this honored class. Even though heralded by no unusual panoply or pomp, Victoria, by some peculiar prescience (not for the historian to explain), seemed to know that balmier days were about to dawn and that her name and fame were soon to be emblazoned on peerless parchment and in regions they had never reached before. Such was the emotional content of our Alma Mater when first the footsteps of '08's charming maids and promising men resounded in her halls.

Determined that these fond anticipations should not be foiled, '08 at once buckled on the University armor and commenced her miracle-making tour. The calendar became a sacred book and those appalling passages about term work were read with solemn mien. And many a freshman lay down at night to dream of fulfilling every letter of the law.

"But suddenly a change came o'er the spirit of our dream." To our ears came murmurings of a "Bob"—a name that meant caricature of our flawless class. We asked the why. We saw no need. And while it was generally admitted that '08 possessed few subjects for a "Bob," yet (we were told) Victoria had a tradition that on a certain Friday night the freshmen should occupy front seats in the main hall and behold themselves as in a mirror. That it was meet that this tradition be not broken, even though as now the only purpose served be mere formality, because next year, no doubt, there would be ample chance to fulfill both the spirit and "letter." And so the "Bob" went on —but little did its Committee know the ingenuity of those with whom it had to deal.

Very vividly does the historian's memory reproduce the incidents and coincidences of the days when we were under the tuition of our "Anti-Bob." From the boisterous "mum's the word" of the chalk-talk in our first class meeting we went to the sentinel silence of the "Anti-Bob's" first sanctum—a silence accentuated by the hushed tone of

CLASS OF '08 EXECUTIVE, FALL TERM

R. P. STOCKTON
J. E. BROWNLEE
C. M. WRIGHT
W. A. MCCUBBIN
MISS P. MASON
C. E. KENNEY
MISS P. MISS P. MASON
MISS P. MIS

the proceedings and the fearful gaze of every member—for "Bob" Committee imps were momentarily looked for, either dropping from the ceiling or emerging from beneath the floor.

Never-to-be-forgotten are the masterly rehearsals held in Prospect Park Rink and O'Neill's Hall.

With the instinct of the Indian we simultaneously assembled at these centres from the four winds. It was in these places where '08's debating power was first seen en masse. It was here that our "Anti-Bob" songs first rent the air with vindictive melody. It was here we first revelled in the scathing cuts we had in store for the perpetrators of the "Bob." And right valiantly did we vie with our libellous enemies when the eventful evening came.

Perhaps no "Bob" Committee ever so completely fell into freshman snares. This ingenious '08 outwitted and outgeneralled them at every turn. The illustrious sign of a generation's fame fell an easy prey to '08's courage and cunning and to-day it graces her group of many trophies. College lore will long remember the tragic manoeuvre by

which '07 was entrapped, on issuing from the College, and surrounded by four '08 contingents, which closed in from every quarter, in solid phalanx on the defeated and disconsolate sophomores. Let this be said—the haughty Bobbers became meekest captives, following with hanging heads and drooping spirits to the campus—"and after that the deluge."

May came all too soon, but after the smoke of exams. had cleared away, '08, though some of her valued members had been left behind, was still strong and united. To the work of amending the "Bob" she gave her best, and though hampered by direst threats and prolonged delay on the part of the College authorities, '08 put on the stage the first "Bob" in which ladies were not subjected to gross and ridiculous impersonation. Despite the elimination of this feature, supposed to be the mainspring of all interest, the year 1908 bears the unique distinction of starting a remodelled "Bob" rolling with as great momentum as it had ever attained in any stage of its history.

From then till now her prominence in all phases of College life has never lagged. Her debating power has won her many garlands, and her initiative has received well-merited encomiums.

On the campus she has outclassed all her associate years. Never, with but one exception, has '08 been beaten in association football. Three times has the hockey trophy been taken into custody by this class, and no one disputes her ability to retain it to the end.

'08 mourns the untimely loss, by death, of one who promised fair to enhance the dignity and beautify the memory of his class—Mr. Ira Keys. At the end of the first milestone, insidious disease assailed him and this genuine gentleman became registered in the University Divine.

And now, after so long associating with her comrades, year '08 is loth to leave Victoria's halls. Into such a charming circle she never again can come. For her sister years she wishes the very best that they can wish, and of her Alma Mater she proudly says, "Till the future dares forget the past, her fate and fame shall be an echo and a light unto eternity!"

ELMER KENNY, Historian.

History of Annesley Hall

HROUGH the generosity of many benefactors, chief among whom are the late Hart A. Massey and Mrs Geo. A. Cox, Annesley Hall was opened to receive the non-resident women students of Victoria College in the autumn of 1903. Up to the present it has sheltered within its walls one hundred and eighty-eight young women, one hundred and thirty-six of whom have been undergraduates of the University of Toronto. In 1907 a second hall of residence—South Hall—was opened to give accommodation to the overflow of students from the main hall, thus making room for a total of seventy-eight students.

The system of government is modelled after that of Wellesley College, and is based on an agreement drawn up between the Senate of Victoria College, the Board of the Hall, the Heads of the Houses and the Students, whereby certain privileges of self-government are accorded to the students. Ont of the strong features of residence life is the attention given to daily exercise, both in the gymnasium and out of doors.

Too much cannot be said in favor of residential life for both men and women students, where the intellectual training of the College class-room may be supplemented by a more direct education in morals and manners, and where daily contact with persons of different temperaments is a preparation for citizenship and the larger duties of life.

Margaret E. T. Addison

Annesley Hall

True Living

To feel the generous stream of Life which ever From the great throbbing heart of Nature pours, Flooding all living things; to feel its force Leaping in riotous tide in every vein; To feel the pulsing music of all life In beauty meaning purpose everywhere Striking its glad harmonies through the soul—

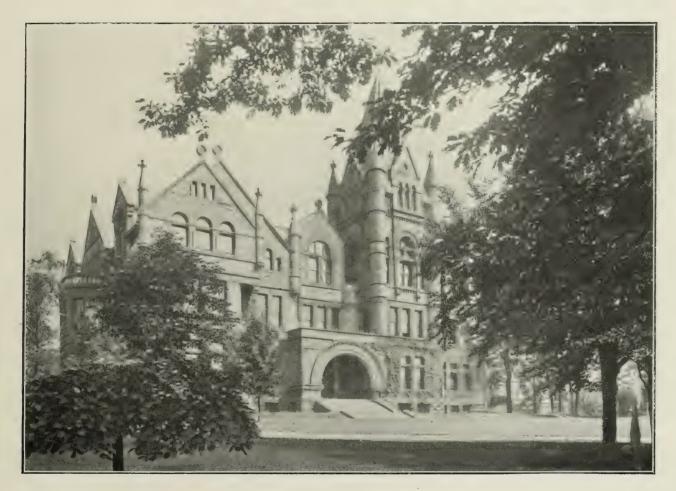

That is living.

To sing a song that fires the human heart With glowing hopes and noble impulses,
Or from a rough hewn mass of shapeless stone
Set free a prisoned beauty to the world
To pluck with arduous toil a single thorn
From out the future pathway of the race,
Or to the sum of human knowledge add
One mite which will enrich posterity—
This, too, is living.

To let the smile of human sunshine burst Into the darkened corners of the earth;
To cast with generous hand the mantle broad Of charity o'er the frailties of mankind;
To break the precious vase of life itself in shattered crystal bits of sacrifice

Yet find it whole before the Lord of All—

This is true living.

VICTORIA COLLEGE

ALBRIGHT, FREDERICK STANLEY

"One of Nature's noblemen."

"Fritz" claims Beamsville as the scene of his boyhood days. There has received his high school and model school training. For several years he taught the "voung idea" and then entered political science at Vic. Besides taking an excellent standing in his course, Fred has been an ideal college man. He has been twice on the Conversazione Committee, leader of the Government in the Lit, and was one of '08's stalwarts who won the final inter year debate in 1906. Finally, he has distinguished himself as editor-in-chief of "Acta Victoriana." Fred will be a decided acquisition at Osgoode Hall, and will some day sway judge and jury by his eloquence and winning personality.

BAIRD, JEAN FERGUS

"Ye were aye leal and true Jean."

Jean Fergus Baird at Parkhill received her preparatory training and entered college in the fall of 1904. Her sterling qualities were soon recognized, and at the end of her first year she was sent as delegate from the Y.W.C.A. to Silver Bay. She was representative, in her second year, on the V.C.A.C., also pianist of the Literary Society, and in her third year was assistant critic of the latter society, while in her final year she holds office on her class executive. Miss Baird has always been a faithful student in moderns. Her bright conversation, interspersed with veiled sarcasm never fails to charm. With her kindly and generous disposition and her unfailing hospitality, she is a general favorite.

ARNOTT, JAMES WELLINGTON

"I would that I were such a man."

James Wellington Arnott was born near Wareham, in Grey County. He received his preliminary training at Dundalk and attended model school at Orangeville. Like many other illustrious men, he taught school for a couple of years before entering Victoria College. Of a somewhat retiring and modest disposition, it is only those who know him best that appreciate most his sterling qualities. He has never wished to shine in college circles, but there is an everwidening circle of friends who realize his worth, and to these he is best known by the name of "Tom Pinch," the kindly and benevolent character of Charles Dickens.

BARKER, PERCY WEEKS

".1 right merry companion, and withal a gentleman."

Although of a scientific bent, he comes from the Classic City. After a creditable course in the Stratford Collegiate and Model School, he spent some time in teaching, but his desire for greater things led him in the fall of '04 to Vic. From the first he has been one of '08's most honored and prominent members. A hardworking and brilliant student in B. and P., he has yet found time to enter fully into every department of college life, having served on the Bob Committee and the Lit, and been successively local and scientific editor of Acta, besides doing considerable in a social way extra-murally. Percy will follow the medical profession, in which his engaging personality and sterling qualities of heart and mind assure him a successful career.

BARR, LYDIA ADAMS

"Strong and of a good courage."

In the Ingersoll Public Schools and Collegiate Institute Miss Barr received her early education. After teaching in the Ingersoll Public School, she learned pedagogy in Toronto. First in the Uxbridge High School, then as lady principal in St. John's Methodist College, Newfoundland, she found large spheres of usefulness. She has been with the class of '08 for her final year only, having completed the first three years of her university course in honor moderns as an extra-mural student. Her success as teacher and student combined has been phenomenal. In her final year she was a representative on the Women's Inter-collegiate Debating Committee.

BOWES, FRANK NELLES

"His strength is as the strength of ten, Because his heart is pure."

Frank's home is at Concord, on "Old Ontario's Strand.'' Graduating from Richmond Hill High School, he spent a year at Varsity. Beginning a pedagogical career, the grandeur of rolling acres and singing brooks awoke his interest in "man, the heart of man, and human life.'' Consequently Frank joined '08's philosophers. Frank has a genial "loud laugh," but not a "vacant mind," and though ardent in looks he plays a good defence in association. His strong mental powers, made stronger by training in philosophy, his whole soul made nobler by "thinking the thoughts of good men after them" are an earnest of his success as a teacher of "the truth which makes men free.''

BEARMAN, KATHARINE FENTON

"Up! up! my friend, and quit your books."

With a desire for greater knowledge Katie came from the Ottawa Collegiate and entered the mysterious course of household science, October, 1904. While battling with its problems, she found energy to enjoy the pleasures of society both within and without college halls. As representative of her year in V.C.A.C. it was seen that "chiefly she was born for something great.' This appeared in the form of the Presidency of the Athletic Club, which she has held with admirable ability. She has taken an active part in the Lit, having debated in her third year. In Y.W.C.A. work also she took her part and was sent as Athletic Club representative to Silver Bay. All who know her recognize her as one of the brightest and most lovable girls of the year.

BOWLES, ALLAN SIMPSON

"Unknown."

"A quiet tonque shows a wise head."

Allan Simpson Bowles first trod this terrestrial sphere in Lambton County, Ont. Before doffing his boyish skirts he, with his family, moved to the famous Huron County, where he received his early education at Belfast Public School. Ambitious beyond a rural life, he entered Goderich Collegiate Institute to prepare for the teaching profession. After teaching some time and taking senior matriculation at the G.C.I. he entered Victoria College as a sophomore with the class of '08, where by his sterling qualities he has formed lasting friendships. Allan being a young man with a strong sense of duty, we predict for him in his chosen profession that success which will do worthy honor to his Alma Mater.

BROWNLEE, JOHN EDWARD

"He was six foot o' man. A1, Clear grit and human nature."

John arrived in the year 1883. After a collegiate course at Sarnia and two years teaching at his home in Brigdon, following his guiding star, he passed through the portals of "Old Vie" in the fall of '04. From the time when he accupied that honored position of President of the "Bob" Committee, "Jack" took an active part in every department of college life, winning debates, being honored with office on the editorial staff of "Acta" throughout his course and with the business managership in his final year. Prominent in class executives and as business manager of the Glee Club, on the campus he took his part, and when exams came the best felt honored to stand near "Jack." He hopes to follow law, but whether "Jack" becomes a lawyer or follows business one thing we know he will always be, and that is a man.

CASS, WM. J. M.

"An honest man of virtuous renown."

Bill hails from Dundas County. After matriculating from the Morrisburg Collegiate Institute he taught school for some time, and then entered Victoria with the class of '08. While always maintaining an excellent standing in his academic work, Bill has yet found time to take an active part in the other branches of college life. His natural ability and willingness to work have made him a valued member of the "Bob" Committee and of the class executive. In athletics he has also taken a prominent part, being a prominent figure on the association football and handball teams. A brilliant future is predicted for him in his chosen profession—the law.

BUCKINGHAM, GEORGE SHERMAN

"In faith he is a worthy gentleman and wondrous affable."

George Sherman Buckingham is an honored citizen of Maxwell, Ont. He heard pleasant voices calling him from his home on the farm to the fields of higher education: accordingly, he went to Albert College, Belleville. In the halls of this historic academy, George was a prominent personage, doing splendid service as President of the Y.M.C.A. In 1904 he matriculated, and a year later graduated with honors in elocution. He entered Victoria as a sophomore, and has followed worthily in the steps of Plato and Aristotle through the labyrinths of philosophy. Though a devoted student, he has found time to do much ministerial work during his course. He expects to complete his B.D. work in Victoria.

COATSWORTH, EMERSON TAYLOR

"There's nothing ill can dwell in such a temple."

Has spent all his life in Toronto. He received his early education at the public schools, later going to Upper Canada College and coming to Victoria from there. "Coat" has taken an active interest in college affairs, having been Treasurer of the Literary Society, while at present he holds the position of literary editor of "Acta Victoriana." He is a good student and without undue exertion acquires a knowledge of his studies. Although he does not take part in athletics, he is a very enthusiastic supporter of the various teams. His quiet, unassuming manner has made him one of the most companionable fellows of the year. Emerson is registered in political science and will practice law in Toronto.

COLLIS, ROBERT ERNEST

"He did no more than others did, We don't know where the change began;

He started as an average kid,

He finished as a thinkin' man.''

Rob received his early training in the public, high and model schools of Mt. Forest. After teaching for a year near Kingsville, he went as a missionary to West Kootenay, B.C., whence he returned east to enter Victoria with the class of '08. His natural bent of mind led him to choose the subtle paths of philosophy as the road along which his mental activities should travel, and without undue effort he has made his way creditably both in class-room and in college life. Rob is possessed of a vein of humor, reinforced by a quiet, earnest manner, and a forcefulness of character which will win for him much success in his chosen calling—the ministry.

COULTER, CHARLES WESLEY

"A smile for one of mean degree, A courteous bow for one of high, So modulated both that each Saw friendship in his eye."

Charles Wesley Coulter was born in Oil City, Ont., where he received his public school education. At an early date he entered upon his high school training in Oil Springs, where he secured his matriculation. Two years were then spent as a probationer in the London Conference of the Methodist Church with some success. He entered Victoria with the class of '08, where he has pursued the combined courses of arts and divinity. His academic life has been characterized by diligent work and social affability. We believe that Wesley is the stuff that heroes are made of and that in the work of the ministry he will amply justify the most sanguine expectations of his many friends.

COOPER. ARTHUR NEVILLE

"Hold thou the good; define it well:

For fear Divine Philosophy

Should push beyond her mark, and be
Procuress to the Lords of Hell."

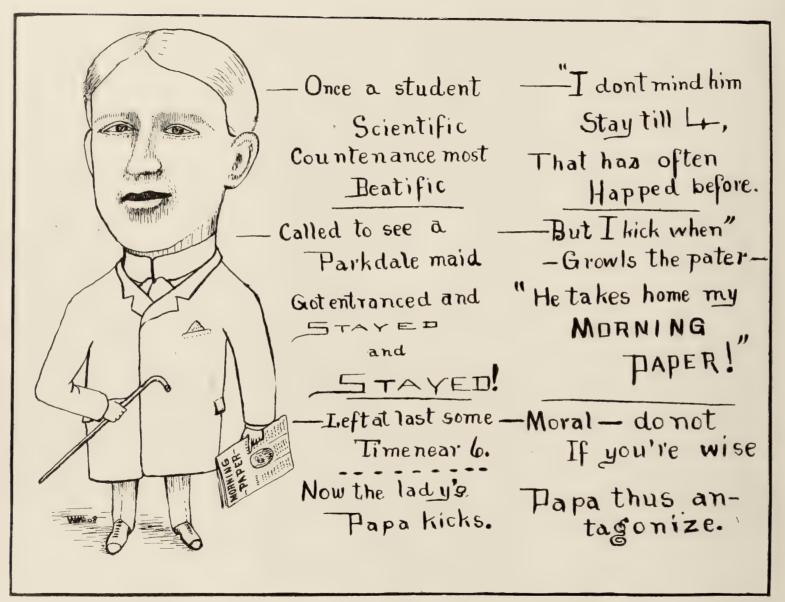

The subject of this biography was born in Waterloo County, near the town of Galt, to which town he afterwards came to reside, and in which he received his public school and collegiate education. He became a candidate for the Methodist ministry in the Hamilton Conference and spent three years in probation at Alma, Hepworth and Tobermory; before going to the latter place he received special ordination. Coming to Victoria he entered his first year with the class of '08, taking the course in philosophy and holding in his final year the Presidency of the Philosophical Society of the University of Toronto. His faithfulness will secure for him a large and permanent influence.

COURTICE, WILLIAM NORMAN

"There buds the promise of celestial worth."

"Willie" came to Victoria from Huron County, where he attended the Clinton Collegiate Institute and later taught school. He is one of the pioneers of the Greek and Hebrew course, but for all that finds considerable time to skate on the rink. During his four years, he has always figured on Vic's football team, being its captain in his final year; while in the winter he is seen displaying his skill on the hockey rink. In other college affairs he has taken a prominent part, having served on the Bob Committee, Alma Mater, Glee Club and Athletic Union executives. His intention is to study theology, and we may be sure that he will be as successful in that field as he has been in college.

DANARD, CHARLES HERBERT

"His life is gentle; and all the elements so mixed in him, that Nature might stand up and say to all the world, This is a man!"

Owen Sound has sent forth many a "good un"; among them Charlie. Graduating from the O.S.C.I. and the O.S.M.S. he taught in Waldemar. Susceptibility to good influences resulted in his continuing to teach, not from the school desk, but from the pulpit. Joining the '08's, he pursued that path of glory, the philosophy course, which leads-but not to the grave. Charlie's "verie good company," his whole-souledness, his myriadmindedness, his all-roundness, and his countless other commendable traits bespeak for him many staunch friends and untold success during his coming career in the ministry.

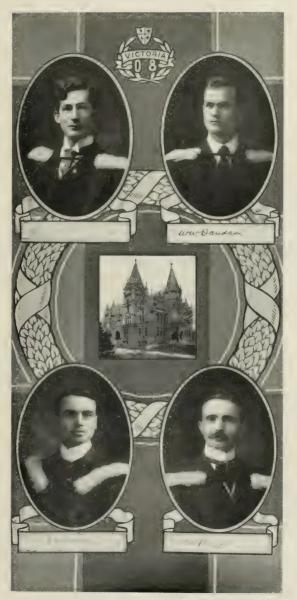

DOMM, EDWARD EZRA

"Thou therefore rise; vanquish thy weariness by the mind's effort;

A longer ladder yet remains to scale."

Accompanied by spherical symphony, Ed. alighted upon the glorious plains of Grey County and set up his domicile at Alsfeldt. In agricultural pursuits and at Harriston High School he learned to drink from life's elixir-developing brawn as well as brain, which made him invulnerable in the encounters with '07 Bob. In his second year at Vic he captured the Robert Johnson prize, took first place in the general course, and was honored with the Presidency of the class. In association, his favorite sport, he played right half on the college team, and fought like a Trojan for his colors. Quiet, friendly, meek and prudent, with a keen business intellect.

DAVIDSON, WILLIAM WARREN

"A man not given to words or strife—a man of sense."

Coming from Stratford, Ont., W. W. Davidson entered the University with the class of '08. Political science is his course. "Davy" soon became well known around Victoria, and deservedly popular. He has filled many important positions around the college, among others being President of the Athletic Union in his final year. He has played on the University hockey team for three years and has also figured on their lacrosse line-up. But "Davy" does not give all his time to athletics and committee meetings, for he is a good student and always keeps well ahead of his work. In short, "Davy" is a good allround college man, and whether he goes into law or business, we feel sure he will "make good."

DOUGAN, HARRY LESLIE

"Non tam portas intrare patentes, Quam fregisse juvat."

The public records of Hastings County show that Harry Leslie Dougan was born in Madoc village some twenty odd years ago. It was here that he received his early education as well as collegiate and model training. After three years in the teaching profession, he took an additional course of instruction at the Ottawa Normal School, but his experience as a pedagogue was cut short by his resolve to take an arts course as a preliminary to entering the Methodist ministry. Having spent one year at Albert College, he entered Victoria as a sophomore in 1904, and his three years amongst us have shown him to possess those qualities which make for success in his chosen calling.

DOWNEY, RICHARD ALBERT

"Fortune hath her throne upon a rock, But brave men fear not to climb,"

Dick was born at Crookston, in Hastings County, and received his early education at Whit Lake Public School. After spending two years at Madoc Collegiate Institute and obtaining junior leaving standing, he went west and secured a normal training at Regina. The following year he gave ample proof of his pedagogical abilities in a school near Indian Head. But desiring a higher education, he returned to Toronto to register in arts at Victoria College. Here his genial manner and manly bearing have won for him many close friendships. While heartily participating in athletics, the "Lit" and other features of college life, his high stand in University examinations gives promise of a successful career.

FOREMAN, ARTHUR O. W.

"And so he bore without reproach The grand old name of gentleman."

Arthur comes to us from the County of Haldimand. After a preparatory course at Hagersville and Hamilton, "Art" became a dominee and wielded the pointer for .. years. The fall of '04 saw him discussing the pros and cons of the philosophy course with Dr. Bain and the Bob completed his transformation to a college man. Besides doing his part towards upholding the traditions of '08 in academic lines, Art has always taken a prominent place in college circles, having been a member of the Bob Committee, President of his class, and President of the Y.M.C.A., while his class-mates have shown the confidence and esteem they entertain for him by electing him to carry the senior stick. Arthur's future will be spent in the ministry, where we trust he will meet the success he so well merits.

DUNHAM, BERTHA MABEL

"True as the dial to the sun,
Although it be not shined upon."

—Butler.

Miss Mabel Dunham received her earlier education in Berlin, Ont., passing examinations with high honors. After a term spent at the Model School, she remained on the staff for a time, afterwards graduating from the Normal School. She registered in University College with the class of '08. The following year she registered in Victoria. where she has taken an active part in every phase of college life. She has been Vice-President of her class, Recording Secretary of the Woman's Literary Society, and Literary Editor of Acta. She is bright, capable and warm-hearted, and has a decided manner which will carry her through to the success which her many friends wish for her.

GIBBARD, FLORENCE VIOLETTA

"And tho' we praise her winning ways, She's fairest when she cooks."

Miss Gibbard comes from Napanee, Ont., where she attended the Napane Collegiate Institute. Matriculating from the Westbourne Girls' School, Toronto, she entered upon a cours, in household science at Victoria in the autumn of 1904. Florence has always taken an active interest in all phases of college life. In her first year she was Vice-President of the class of '08; in her third year, Secretary-Treasurer of the Athletic Club and representative on the Toronto University Athletic League; in her fourth, she was appointed official chaperone of her class as a token of the high honor in which she is held. She combones with the sedateness of the chaperone, sparkling wit and originality.

GOVENLOCK, ISABEL

"So from her sky-lit spirit gentleness Drops even like a sun-lit fall of rain."

Isabel Govenlock was born at Hubrey. where she received her early training. After taking a collegiate course in London, the love of learning drew her to Toronto, and she entered Victoria, registering in the mathematics and physics course. At college, her gentle and kind disposition, her sound judgment, her sincerity and her unfailing adherence to the truth have made her a woman of whom her friends feel justly proud. She was Treasurer of the Y.W.C.A. in her second year, Vice-President in her third year, and is President in her final year. We feel confident that Miss Govenlock will always reflect great credit on her Alma Mater.

HILDRED, EDNA ELIZABETH

"Her heart was in her work and the heart giveth grace unto every art."

Edna Elizabeth Hildred was born at a little village called Lucknow, the name of which seems to have been a forecast of her bright future. Shortly after the family moved to St. Thomas, where she obtained her collegiate training. In 1904 she secured her honor matriculation and entered college in the fall of that year. Besides realizing to some degree her ideals of scholastic attainments by gaining first class honor standing in each year, the English prize in her second, and the Nelles Scholarship in her third, she has held various offices on the class executive and the Y.W.C.A. Throughout her academic life she has been diligent and faithful.

HALBERT, EDWIN JAMES

"Thy modesty is a candle to thy merits."

Edwin James Halbert comes from the picturesque limestone cliffs of Mono, near Shelburne, Ont. Like many of the world's best, he got into fine training for the race of life by running about on his father's farm, 'After a course in Orang ville High School, Eddie taught for sev eral years; then some kind astral influence led him to enter University in the class of '08. In his course (chemistry) he has shown himself a careful and painstaking student. Eddie was a familiar figure at the "Lit" and has filled several offices both in it and the class executive. The Bob labelled him the "Ever Juvenile," a name very appropriate to his genial and happy disposition.

JAMIESON, EDITH CATHARINE

"Ah! bless'd with temper whose unclouded ray

Can make to-morrow cheerful as to-day."

The home of Edith Catharine Jamieson is in Morrisburg, a small town on the banks of the St. Lawrence. There her childhood slipped away uneventfully till 1898, when she entered the Morrisburg Collegiate Institute, of which her father is principal. In 1904 she obtained her honor matriculation, and in the fall of that year came to Victoria to join the ranks of nineteen hundred and eight. Her popularity and faithfulness is witnessed by the various offices which she has held on the class executive, as well as on that of the Y.W.C.A., and her gentle courtesy and high ideals of right and truth have won for her many friends who "wish her all the joy that she can wish" throughout the su-ceeding years.

JOHNSTON, ROBERT EDMUND

"He is little, but he's wise, He's a terror for his size, And he does not advertise, Does yer, Bobs?"

Robert Edmund Johnston originated near the town of Sarnia and it was there that he first gained a thirst for knowledge, graduating from the Sarnia Collegiate Institute. His strong but sympathetic and genial personality have won for him many fast friends. He is the embodiment of good nature and has been connected with most of the societies of the college, as well as a valuable member of the College Glee Club. The goal of his ambition is an M.D., which we are sure he will wear with the same quiet strength that has characterized his life throughout. He will brighten many a gloomy spot in the practice of his noble profession.

KENNY, CHARLES ELMER

"So ripe in judgment and so rare in wit"

Elmer Kenny was born at Heathcote, Gray County. After indulging his propensities for mischief at the Owen Sound Collegiate, where, as President of the Literary Society, he gained a reputation as a wit and orator, he spent three years in the ministry acquiring a becoming air of dignity before entering Victoria. He has always been amongst the most prominent members of his class, as Secretary of the "Bob" Committee, Vice-President and Assistant Critic of the "Lit," Class President and Historian. A live interest he has taken in every phase of college life, social, religious and athletic. He graduates in the general course, with a view to the ministry, where his personality and fluency will assure him success.

KELLY, CHARLES BELFRY

"To be what we are and to become what we are capable of becoming, is the only end of life."

Big and strong, gruff of voice and kind of heart, a man more of deeds than words, "Slats" Kelly has won for himself an enviable place. As a student, good enough to get exams; as a man, bright and cheerful enough to be welcomed anywhere; as a friend, unfailing in his quiet loyalty. One of the mainstays of the rugby team, he has been prominent in athletics throughout his four years, also a conspicuous figure in the social life of the college. In the B. and P. course he pursues the way leading to an M.D. Fate has been kind to the community among whom his lot is cast.

LAIRD, FLORENCE ETHEL

"The sunniest nature that ever drew the

Miss Laird is a daughter of the itineracy. Her high school training was received in Caledonia, whence she came in the fall of 1904 to enter moderns at Victoria. Her happy disposition, her unfailing power of seeing the humorous side of every situation, and her lovalty to her friends, have made her exceedingly popular in her year and college. In her first and second years she worked on her class executive, in her third year was a delegate to the Y.W.C.A. convention in Montreal, and local editor of Acta Victoriana, and, as a senior, is convenor of the Bible Study Committee of the Y.W.C.A., and poetess of her class. Her many friends predict for her a bright literary career.

INTERIOR OF VICTORIA CHAPEL

LANGFORD, FRANK H.

"These will give the world another heart And other pulses: Hear ye not the hum Of mighty workings."

The subject of this biography was born in London Township. He received his collegiate education at St. Mary's, obtaining senior leaving standing. After attending London Model School he taught in London and Yarmouth Townships. He entered Victoria in his second year with '06 in the Easter term. The next two years he spent on probation in the London Conference at High Street, London, Walpole Island and Westminster. Refurning to Victoria, he entered his third vear with '08 and obtained first place in general proficiency. He has been a member of Torontonensis board, President of the Missionary Society and Leader of the Foreign Missionary Band. Possessed of a brilliant intellect, an intense personality and a lofty devotion, he gives promise of a life of more than ordinary usefulness.

LEWIS, NORA

"A full, rich nature, free to trust."

Nora Lewis was born in Toronto, and received her early scholastic training in the Model School. After a brilliant course at Jarvis Collegiate, she won in 1904 the third Edward Blake and the Flavelle scholarships in classics and moderns. In University she has acquitted herself honorably in her favorite department, classics, and promises an excellent stan't next May. Nora has been a valuable member of the Classical Association. In her second year she was Corresponding Secretary, and occupies, now, the President's chair in the Woman's Literary Society. Nora has intellectual gifts such as her class-mates doubtless covet, but what most endears her to those who know her best is her generous and unprejudiced way of looking at peoply and things.

LEECE, JOHN ALBERT

"A loyal, just and upright gentleman."

John Albert Leece, believing in the influence of early associations, selected "Hope" for the place of his nativity. He received his early mental discipline at King City, later migrating to Aurora, where he secured honor matriculation. After a year's ministry on Novar Circuit, he entered Victoria as a sophomore of '08, selecting the honor philosophy course as the best equipment for dealing with the deep problems of life. While successful as a student, his public spirit found scope in the various college organizations, particularly the Glee Club and Y.M.C.A. Unassuming, but strong in character. Albert has won the esteem of his fellow students, who anticipate for him a successful career in his chosen profession.

LEY, ELMER HOBBS

"Of a truth he can discourse most excellent music."

Elmer hails from St. Thomas, where he also received his collegiate training. After four years of Y.M.C.A. work, deciding that his sphere of usefulness would be enlarged by a University course, he entered the class of '08, then in its sophomore year. A good student, Elmer has always taken a high standing in the general course, while his ability and versatility have gained him a prominent place in college circles, where he has ably filled such offices as Treasurer of Alma Mater, Secretary and Leader of the Government in Lit. He possesses a rich bass voice which has always been in great demand and has been a tower of strength to the Glee Club. Elmer will leave college well equipped to reap a brilliant success in his chosen field of business activity.

LOVERING, JOHN EGERTON

"Titles of honor add not to his worth."

"Ege." as he is popularly known, hails from the historic village of Coldwater, Ont. His early days were spent on the farm, and at Orillia Collegiate. Afterwards he attended Albert College, where he gained laurels as a debater and won the Ritchie prize in pulpit oratory. But desiring deeper draughts from the Pierian spring, he registered at Victoria in his sophomore year in "divine philosophy.' Though an earnest student, he is also an enthusiastic leader in college sports, and as captain of the rugby team has worked hard for its success. His strong personality and winning manners have won many friends, and we predict for him an eminently brilliant career which will do honor to his Alma Mater.

MARSHALL, ALPHEUS EPHNOR

Alpheus Ephnor Marshall was born at Abingdon, in Lincoln County, where he attended public school. Entering the high school at Smithville, he secured his third class certificate, and after a term in model at Hamilton, taught school near home, where he gained the respect of the children and the confidence of the parents during his two years' stay. But a "still, small voice" was calling him to a higher sphere of labor. So after two pleasant years in the Hamilton C.I. he entered the Methodist Church as a probationer, preaching and working acceptably in the Okanagan Valley of the Pacific Province. In '04 he entered "Vie" in his sophomore year, where, with diligence, he has pursued the combined courses of arts and divinity. We wish Alpheus large success in the "Great Work."

MASON, PANSY JULIA

"She has wit, and song, and sense, Mirth, and sport, and eloquence."

Miss Mason was born in Toronto, but spent several years of her childhood in Cleveland. She received her preparatory training at Havergal Ladies' College and entered Victoria in 1904. Pansy's varied talents have won her many friends. In her third year she brought honor to herself and class by winning the story contest of Acta Victoriana. In her final year, she is a representative on the Torontonensis Board, Historian of her class, and fourth year representative on the Athletic Club. Her fund of bright and original ideas, her power of song, and her gifted pen will, no doubt, bring her a bright and successful career.

MORLEY, GEORGE ESMOND

"I cannot lie—if your book is badly written I cannot recommend it."

George E. Morley is a Middlesex boy by birth, but going to Oxford, that banner county, he received his primary education at Pleasant Valley, and high school training at Norwich, taking both junior leaving and junior matriculation. He registered in the faculty of arts at Victoria with the class of '07 and after a successful year with that class joined the sophomores of '08. At examinations his standing is high, and being a young man, ambitious, energetic and painstaking, with clear convictions and a high ideal of life, we are assured that when George leaves these sacred halls continual success will crown his efforts "to live for something."

McCUBBIN, WALTER ALEXANDER

W. A. McCubbin was born in York County. After graduating from Tottenham High School and Orangeville Model School, he taught successfully for several years and then decided on a University course. He entered the University in October, '04, registering in biology. As a member of the rugby team, Captain of '08 hockey team, Athletic Editor of Acta, and holder of the Athletic Stick. Mac has shown himself an all-round sport, His athletics have not prevented him from "holding down" the Edward Blake and the Daniel Wilson scholarships in biology in his second and third years respectively. His future will be followed with interest by his many friends.

McDONALD, NATHANIEL

"Your brain well-furnished, and your tongue well-taught

To press with energy your ardent thought."

Mac hails from a farm in Bosanquet Township. He matriculated at Forest High School and then taught for three years in his native township. He became a candidate for the ministry of the Methodist Church in London Conference, preaching on the Elimville, Fullerton and Port Stanley circuits. In '05 Mac came to Victoria, and entered the class of '08 in his second year in the philosophy course. He has served on many college committees, and was honored with the Presidency of his class in the Easter term of '07. Mac's future life is to be invested in foreign missions, where his big heart and great mental ability will make him abundantly successful.

McDONALD, MAUDE SARA

"Order is Heaven's first law."

Maude Sara McDonald received her public school education at Tara, and her collegiate training at Owen Sound and Galt. For several years she posed as a pedagogue and then the University beckoned her to Toronto. Of course, she chose household science, with tennis, skating and gymnasium work for recreation. Throughout her four years at college she has done excellent work in the kitchen and in sports, as well as in examination halls. In her third year she performed the onerous duties attending the Vice-Presidency of the class. Maude is a girl of good, sterling qualities. She possesses diligence and independence of judgment to a marked degree and enjoys the reputation of being one of Victoria's most methodical and conscientious daughters.

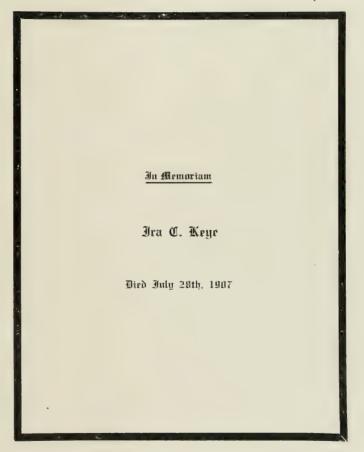

McKENZIE, CHARLES WILLIAM

"The reason firm, the temperate will;
Endurance, foresight, strength and
skill."

It was about a quarter of a century ago that "Charlie" decided to become a citizen of this planet. The neighborhood of Mitchell's Bay reaped the benefits of his juvenile activities. The Chatham High and Model Schools prepared him to cultivate the stony fields of pedagogy. Next he resolved to enter the ministry and preached with much acceptance for two years. Then he came to Victoria, entering his sophomore year and became a staunch supporter of the general course. Football and tennis are his favorite sports. Industrious, genial and affable, with a spicy wit and a philosophical turn of mind, "Charlie" possesses the qualities that make for success.

OLDHAM, JAMES HENRY

"A heart to resolve, a head to contrive, and a hand to execute,"

Received his primary education in Cobourg, Ont., and entered the University in the fall of 1904. Though a political scientist, "Oldie" took religious knowledge as a side line and won the Massey Bursary in the same in his first year. Perhaps he does not make friends as quickly as some, but, once known, is most highly prized. Everyone wonders how he can pass his examinations with so little work, but he does, although he has much time taken up with committee work, not to speak of athletics, for "Oldie" is a keen sport. His executive ability is recognized, for he has been Secretary-Treasurer of the rink, and has held positions in the Literary Society and the other social organizations around the colleges.

OWEN, ALBERT EDWARD

"A mind conscious of rectitude."

Albert Edward Owen became a citizen of this mundane sphere first in Yorkshire. England, but early sought a capacious and brilliant field of activity for, at the age of four, he steered his barque for Canada's shore. After receiving his primary education at Thornton, he matriculated at Barrie High School. In obedience to his call, Albert decided to enter the Methodist ministry, and when two years of probation were fulfilled entered the faculty of arts at Victoria College with the famous class of '08. Albert carries a lot of sunshine with him, and being a man of high ambitions and sterling qualities, will make this old world the better and Canada the richer for his having sojourned here.

OSBORNE, WILLIAM ROY

"A place above all earthly dignities,
A still and quiet conscience."

Roy is a native of the County of Essex, Ont., not far from Cottam, where he received his public school education. Some years were then spent in the cultivation of the soil and of his noble Christian character, which marked him among his associates in after years. In '98 he entered high school in the town of Essex, from which in four years he secured his senior matriculation. After preaching with considerable success and acceptance for two years in his home conference he entered "Vic" in his sophomore year. His diligence as a student, his true manly character and his affable disposition won for him the earnest appreciation of his fellows. In his work in the ministry we confidently expect his college success will be continued.

PARLOW, HELEN CLARE

"Thy voice is sweet, as if it took Its music from the face."

Helen Clare Parlow entered the University as a matriculant of Jameson Ave. Collegiate Institute. Her course is honor moderns, in which she has always taken a most creditable standing, but it is the versatility which she has shown that has won for her the esteem of her class-mates. She has taken a prominent part in all the various activities of college life, and in her final year holds an important position both in the Women's Literary Society and in the Y.W.C.A. Helen adds to the attraction of a very winning "personality the enviable gift of a voice of great sweetness and charm.

PINEL HATTIE LOUISE

"Short, but sweet! Ah, better so."

Miss Pinel claims the parsonage for her home. Smith's Falls High School prepared her for her college training and she came to Victoria to enter moderns in the fall of 1904. Many and varied are the positions she has held. In the first year she was Treasurer of the Women's Literary Society, as a sophomore was Vice-President of her class in the fall term, and went as a delegate to the convention at Nashville, and in her senior year is convenor of the Missionary Committee of the Y.W.C.A., carries the senior stick and is critic of the Women's Literary Society. Her bright, animated disposition, her many talents and her earnest purpose ensure for her a useful and happy life.

SANDERS, EDWIN GORTEN

"They laugh that win."
—Othello.

Edwin G. Sanders started on his genial jaunt through life in Stouffville, Ont., and the gauntlet of preliminaries being run, he sojourned for matriculation purposes at Markham High School, whose senior medal graces his athletic record. '08 soon saw in Ed. one of her best, for to him is the honor of sitting first in her Presidental chair. The athletic promise of former days has been redeemed. Of '08's two ''T's'' Eddie's stick handling privileges him to wear one. In tennis tournament and association line-up, as Glee Club President and Government Leader, we see him looming large. Ed.'s cheery enthusiasm and buoyant spirit augur well for his continued popularity and success when he leaves honor philosophy for the Christian ministry.

RAYMER, GORDON CUYLER

"The spirit of a youth who means to be of note begins betimes."

Toronto Junction was the scene of "Gordon's early life, and from that collegiate he matriculated in 1904. Gordon is that type of college man we all appreciate, taking an active part in every phase of University life. Brilliant in intellect, as a student he stands second to none. He has held positions on '08 Bob Committee, class executive and other college organizations, is an expert tennis player, hockey enthusiast and a wonder on the alley-board. Pre-eminently a "ladies' man," he feels most at home in reception and conversazione, where his ready wit and brilliant repartee make him a popular companion. He will take post-graduate work in Semitics, and we feel sure he will do honor to himself and his Alma Mater.

SCOTT, MARY CORDELIA

"Thy modesty's a candle to thy merit."

Mary Cordelia Scott received her primary education from a multiplicity of schools in Ontario, studied four years with tutors in Japan, spent three years in collegiate life in London and Toronto, and then the examiners pronounced her sufficiently advanced intellectually to register at Toronto University. Accordingly, she entered Victoria with the class of '07 and chose the general course, but soon she saw the error of her way, went home for a year, and became identified with '08 as a sophomore. Her quiet, unassuming, generous nature has won for her many friends among her fellow students, but none love her so well as those who know her best. This year she holds the Vice-Presidency of the class.

TESTESTESTESTESSUESSUESSUES

SMITH, K. HAROLD

"He who hath not music in his soul Is fit for treasons, stratagems and spoils."

Harold was born at Quinn, Kent Co., Ont., where he spent his boyhood days and received his public school education. Here also he began the study of music, which made him useful and popular in his high school and college days. After attending for a short time Chatham Collegiate and spending two years in New York State, he returned to matriculate from Essex High School. Entering with the class of '08, his college life has been one of popularity and success. Besides occupying many important and honorable offices on the executives both of his class and of the Literary Society, he was successively musical director of the Y.M.C.A., Vice-President and President of the Glee Club.

STOCKTON, RONALD PICKARD

"He is generous and noble as well as valiant and honorable,"

Spent his early days in St. John, N.B., where, from contact with the sea air, he has developed a freedom of personality and a "vastness" of form. He graduated from St. John High School with distinction, entering Victoria with the class of '08, and has been one of its brightest and most conspicuous students. "Stocks" is an all-round athlete, having played in the various hockey and rugby teams of the college, besides playing tennis well. He has been Secretary of "Acta Victoriana,'' member of Conversat Committee, Secretary of Athletic Union, 1907, and Treasurer this year. Although no "'plug," he is a brilliant student. His future energies will be spent in law, where his genial personality and shrewd scholarship predict for him unbounded success.

STEELE, GEORGE ALBERTUS

"Say to all the world—this is a man!" "His heart is true as steel."

George Albertus Steele was born on the sunny heights of Vankleek Hill. His intellectual training was begun at Stardale and continued at the collegiate of his native town, from which he graduated with senior leaving standing, and entered the teaching profession. Visions of a broader outlook allured him to Toronto. where he entered "Vie" with the class of '08. In his second year he transferred from mathematics and physics to honor philosophy, attaining to first class honors. His manly bearing and genial humor have won for George the good will of his fellow students, who have shown their appreciation of his college spirit by honoring him with the Vice-Presidency of the "Lit." We expect him back for a course in theology.

WORTMAN, WILLIAM BONNER

"If thou do but pierce his reserve
A goodly fellow thou findest."

Bill comes from London. Matriculating from the London Collegiate in 1904, he entered Victoria in time to qualify as one of the brightest and voungest graduates of 1908. And yet Bill has evinced a decided antipathy to application, else his great native ability would have replaced his creditable standing with the highest honors of his course. Despite his rather quiet, reticent manner, his services have been much in demand about college owing to his varied talents and his cheerful readiness to help along with any good cause. He excels at alley and gleefully breaks his quota of hockey sticks during the skating season. He will go into business in the Forest City.

WRIGHT, CLARE MONTROSE

"He hath a daily beauty in his life."

After a youth dutifully spent in a Methodist parsonage, and a preparatory course at Arthur High School, where he won two medals in general proficiency, "Rosie" migrated to Vic. in the fall of 1901. After two years with '05, ill-health compelled him to leave college for a time, to return in 1906, a welcome addition to the class of '08. Rosie is a genuine good fellow, and by his sterling qualities and cheerful outlook on life, has won himself many friends. An all-round college man, he has not only taken a good stand in his chosen course, but has also been prominent on Senior Dinner and Coversat Committees and has graced the Presidential chair in the Lit. True to family traditions, Rosie will enter the ministry, where we predict for him a brilliant and fruitful career.

CONVERSAT COMMITTEE, '07

IST ROW—C. M. WRIGHT, '08, L.H.KIRBY, '10. A. O.W. FOREMAN, 08, Secretary. J. E. HORNING, '09, Treasurer. W. E. MacNiven, '10. H. B. Van Wyck, '11. W. H. Irwin, C.T. R. K. Swenerton, B.A. 2nd Row—H. F. Hazelwood, '11. R. E. Morton, C. T. C. E. Kenney, '08. C. F. Connolly, '09. D. Wren, B.A., President, C. C. Washington, '10. G. B. King, B.A. K. H. Smith, '08.

Valedictory

With winged speed the moments pass,
The four short years are o'er,
In vain regret we say, "Return,"
They whisper, "Nevermore."

The days of visions fair are gone, Stern Duty beckoning stands; But how discern the path to take? In mist is veiled the land.

One guiding star alone we see,
A point of dazzling light,
Which shines undimmed thro' mist and fog,
In beauty radiant bright.

Then follow on where'er it leads, O'er streams, o'er trackless plain, Up mountains steep, cross marshy fens, If ye the truth would gain.

Still not midst strife of mighty deeds
As dreams the ardent youth,
But In the lowly acts of love
The wise man found the truth.

F. ETHEL A. LAIRD

" On the Old Ontario Strand"

Trinity College

PROVOST MACKLEM

Trinity College Chapel

HEN the College was first erected in 1851-52, it was deemed inexpedient to build the Chapel as then shown in the plans. Till 1882 what is now the library did duty as a Chapel, the present structure dating from that year." The altar and the chancel, with its beautiful marble steps and tesselated floor, were the gift of the Henderson family in memory of Miss Millicent Henderson. Subsequently the screen of the ante-chapel and the gallery were added, together with the stained glass windows in the chancel. Of these there are five, representing Aaron, in memory of the first Provost, the Reverend George Whitaker; David, in memory of Sir John Beverley Robinson, Bart., first Chan-

cellor of the University; the King of Kings, in memory of the founder, Bishop Strachan; St. John, in memory of the second Bishop of Toronto; and St. Peter, in memory of the Reverend J. G. D. Mackenzie, a distinguished alumnus of the College, at one time headmaster of St. Paul's Grammar School, rector of St. Paul's Church, and inspector of grammar schools for Upper Canada.

The embellishment of the Chapel has been due in large part to Dr. Jones and members of his family, in particular to his nieces, Mrs. ffolkes and Miss Strachan, for the Bishop's chair, and a brass tablet commemorating Major Charles Jones; for the gas standards, to Mrs. John M. Strachan, and for the altar cross to a friend of Dr. Jones. The vases and the rug came from the same family, while the retable was presented by Dr. N. Jones, and the candlesticks by Mr. and Mrs. William Ince, on their marriage. The lectern, a handsome piece of brass, was a gift from friends of the College in England.

The litany desk was the gift of friends of the late Reverend Ogden Ford, the litany book coming from members of St. Hilda's College. The undergraduates and graduates in residence at Trinity College, through the

offertory, paid for the organ.

Besides the brass commemorating Major Jones, there is one testifying to the affection in which Professor Boys was held by his students and his colleagues. The classmates of Mr. E. P. O'Reilly, who died in South Africa, erected a brass in his memory, as was done also by the class-mates of Messrs. William W. Hart and Ashleigh C. Moorhouse, who were drowned in April, 1906. The latest memorial of this kind is the effigy in marble of the late Archibald Lampman, the poet.

The communion plate is of great interest, as having belonged originally to King's College, Toronto. Presented to that institution by presbyters in England, it, with the theological books donated to the library by the S.P.C.K., was handed over to Trinity when King's College was secularised and turned into the University of Toronto.

CHAPEL EXTERIOR.

:

History Class '08

WHEN '08 came up to Trinity they little thought what a remarkable class they were; but enlightenment soon came to them at their formal matriculation in Trinity Convocation Hall, when they were told that they were to be the first year to study under the Toronto University curriculum in Trinity College, and that some of them were to be the first student occupants of Trinity House, the new addition to the College accommodation.

The first year is, perhaps, the happiest in a University career, the only thing to be done is to obey, and if the worms do that in Trinity all goes well with them. That year '08 played the usual inter-year rugby games and hockey matches, and tried their forensic talents in the Literary Society. Somehow they failed to win a championship, but, looking forward to the years to come, did not lose heart.

The next year proved equally remarkable. In it the last undergraduates who had entered under the old Trinity three-year course were to get their degrees. It also brought trouble for '08, as they had to undertake the difficult task of moulding the freshmen to the proper Trinity standard. There was also an innovation in the shape of a motor omnibus in which the undergraduates were to travel to and from their lectures in Queen's Park, creating quite a sensation as they drove up to the main buildings three times a day. Alas, the electric tally-ho is no more! One cold winter's night it ascended into the heavens in fire and smoke; so Trinity men and the ladies of St. Hilda's had to descend to the humble street car.

This year the men again played the usual inter-year matches and their chosen ones lifted up their voices in debate with the same results as in the year before; but again they looked forward to the years to come and refused to be downcast, for had not the ladies of the class won the inter-year debate at St. Hilda's?

By the third year federation with the University of Toronto had got into full swing, and when '08 returned in October with their ranks very much depleted, the general course people found that they did not need to go up to Queen's Park for any of their lectures, as arrangements had been made to have all their lectures in University subjects duplicated at Trinity in accordance with the federation agreement. This was much more satisfactory than the former arrangement, and the undergraduates of the year showed their appreciation of it by attending these lectures with great regularity.

This, too, was an annus mirabilis, for the members of '08 were already seniors, all the men who had entered the college under the three-year course having left its halls or entered the divinity class. This year every man in the class played on the year teams, but the fates were unkind and the old story of defeat was repeated. However, '08 supplied the College with a Rugby Captain, a most energetic Secretary of the Athletic, and the Scribe of Episkopon; while two Nought-Eight men, with the Rev. J. B. Fotheringham, '07, almost succeeded in wresting the inter-college debating championship from McMaster. The ladies were again victorious in their inter-year debate, and '08 supplied the victors in the Women's Inter-College Debating Union series, while the Misses Kammerer, Greenwood, and Endacott succeeded in carrying off the inter-college championship in tennis.

It is difficult at such an early date to say much about the final year. For the third time Nought-Eight has come second in the inter-year rugby championship. Basketball is in full swing and hockey has only just been thought of; but '08 ought to win the Trinity inter-year debates, and Miss Waugh and Miss Hunt will doubtless repeat their former triumphs at St. Hilda's.

Whatever the year may lack in athletics, as a collective body, they have the honor of having G. L. Ingles, twice college field-day champion, as one of their number. L. V. Redman has distinguished himself by heading the class lists in the chemistry and mineralogy course, thus winning to himself scholarships without end. Both he and E. A. Baker are noted champions who have upheld the honor of Trinity in inter-college debates. During the final year the latter has made a most successful President of the Athletic Society, in which he has been willingly assisted by the Vice-President, P. M. Lamb. The Scribe, too, is

a Nought-Eight man, who has to maintain the high standard set by W. W. Judd last year, in this, the 50th anniversary of the first visitation of Father Episkopon.

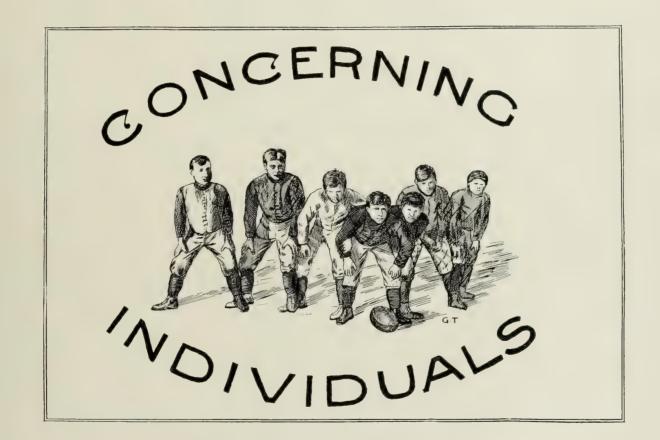

As the pioneer year of federation between the University of Trinity College and the University of Toronto, Nought-Eight has had a hard struggle to hold its own, and it has come out with greatly diminished ranks, but those who have triumphed will be all the better prepared to meet the battles of life in the future. Its members are proud of being students of Toronto University, but Trinity still has a warm place in every heart and will have when each man and woman passes to "that undiscovered country from whose bourne no traveller returns."

T. B. W.

Dr. Jones' House

BAKER, EDWARD ALFRED

"Comis et urbanus liberque."

Like so many other good men who have come to Trinity. Baker hails from Trenton, where he took his high school course. Leaving school he entered business life for several years, but having a call to the priesthood came to Toronto to prepare himself. As a freshman, Ed. was first year representative on the Lit Council, but as the Athletic Committee needed him, he became Secretary of that organization in 1906-07 and President the following year. He has also played on the first rugby team, but chiefly shines in debate, helping to defeat Victoria in his third year, and giving McMaster a hard fight in the finals. His courtesy and frankness make Baker an ideal business manager of the Review, while his discourses on his philosophy course are always entertaining.

BURGESS, WILMOT AMOS

"Much study is a weariness of the flesh."

Wilmot comes from the narrow strip of country to the south of Canada known as the United States of America. Missouri is his native State, and on a summer day in 1886 he first opened his eyes in St. Louis. He spent a few years in the public school there, but realizing the superior advantages of the Canadian educational system he came north and took senior matriculation standing in Windsor Collegiate Institute. It was natural that a man who had such an appreciation for good things should come to Trinity College, so Burgess entered the general course in 1905. He is a most agreeable companion and like all the other men in his year plays football in the inter-year rugby games.

BOULDEN, WINIFRED

"My crown is called content:
A crown it is that seldom kings enjou."

Until she matriculated, Miss Boulden was a student at St. Clement's School, Eglinton. Since coming to St. Hilda's and Trinity, she has varied the monotony of the general course with almost daily journeys between Eglinton and Queen street. Whether it is snowing or the sun is shining, whether the cars are blocked on Yonge street or on Queen, Miss Boulden is almost always punctual at lectures and her quiet, steady ways should bring her much success and happiness in the future.

CONNOLLY, BERNARD STUART

"Who mix'd reason with pleasure, and wisdom with mirth."

B. S. first saw the rays of Phœbus in the town of Yarker. After attending public school in the place of his birth he went to Napanee Collegiate, and coming to Trinity in 1905 with honor matriculation standing, entered the general course. Connolly has the happy faculty of being just where he is needed and made a most successful manager of the junior O.H.A. team in 1907. He played on the second rugby team in 1906, acted as tennis captain in 1907-08, and was elected on the Athletic Executive for two years in succession. He intends to enter the financial world, in which we wish him every success.

GREENWOOD, GLADYS C. HAMAR

"You have a merry heart: It keeps on the windy side of care."

Miss Greenwood entered with a scholarship from the Whitby Collegiate Institute and has taken the honor course in modern languages. She has been in turn Curator of the Literary Society, Editor of "Literary Notes" in the Chronicle, Advertising Manager of the same, Mistress of the Chase, Head of the Hockey Club, President of the Toronto University Athletic League, Representative to the same, and throughout her course a member of the first tennis teams. She belongs to the Delta Sigma Sorority.

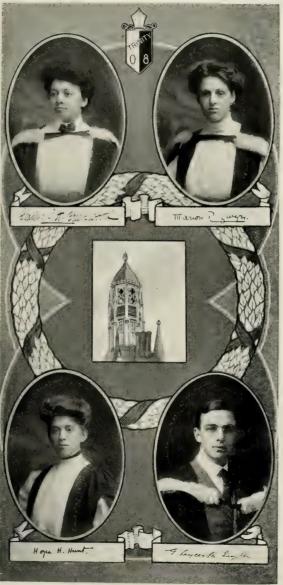

HUNT, HOPE HOLLAND

"How hast thou purchased thy experi-

By my penny of observation."

Miss Hunt was educated at the Brantford Collegiate Institute and the Ontario Ladies' College, Whitby. As it was at the original Whitby that the Abbess Hilda founded her famous monastery, it was natural that Miss Hunt should follow our patroness to her foundation in Toronto and enter St. Hilda's in 1905. She has taken the honor course in modern history, English and French, and has been Recording Secretary of St. Hilda's Literary Society, Sub-editor (that is, Editor in residence) of the Chronicle, 1906 to 1908, St. Hilda's Representative on the Woman's Debating Union, and a winner of the inter-collegiate debate, 1907.

"Who hath among least things An under-sense of greatest."

Miss Gwyn comes from the ancient town of Dundas, and was educated at the Hamilton Collegiate Institute and at Bishop Bethune College, Oshawa. She has pursued the general course with success, in spite of having lost the greater part of a year through severe illness. She has been Head of the Basket Ball Club, Editor of "Literary Notes" in the Chronicle, Recording Secretary of the Literary Society, and Sub-editor of the Chronicle, and has also represented her vear as a resident at Evangelia House.

INGLES, GEORGE LEYCESTER

"For feat of strength or exercise Shaped in proportion fair."

Trinity extended a warm welcome to Leycester as the son of a former graduate, when he finished his work at Trinity Cellege School, Port Hope, and Toronto Church School, and came to college. In the field of athletics he shines most brightly, having played on all the college teams since he came up; Captain of Hockey and Secretary of the Cricket Club in his second year; Captain of the Football team of '06. In track sports he has won the college championship twice, in '06 and in '07. Ingles was a member of the Athletic Executive Committee of 1905-06 and in his final year a member of "Torontonensis" board. His course of study has been the general course. Next year he expects to return to commence his work in the divinity class.

TRINITY COLLEGE CLASS OF 1909.

JUDD, WILLIAM WALLACE

"Enthusiasm is the genius of sincerity."

Hamilton is Judd's birthplace, but he attended school in Eglinton and Jarvis Street Collegiate. Leaving school, Wallace went into business for six years, spent a year lay-reading at Oxbow, Sask., and, returning east, matriculated from St. Clements's School, Eglinton, whence he came to Trinity. His willingness to help soon brought Judd plenty of work. He has twice been on the Glee Club Executive, once on the M. and T. Committee. has been Treasurer of the Lit, Scribe of Episcopon, Tennis Captain and a member of the second rugby team. During his final year, Wallace is pursuing his course in philosophy extra muros as he has accepted a mastership at Ridley, but he intends to return to Trinity and read theology.

LAMB, PERCIVAL MORLAND

"An abridgement of all that is pleasant in man."

Percival was born in Verulam Township, Victoria County, and went to school at Lindsay Collegiate Institute. After teaching for three years in his native county and St. Joseph's Island, Lamb came to Trinity and started work in the general course. He has been both Committeeman and Vice-President of the Athletic Executive and acted as gymnasium Captain in 1906-07. On the field he has shown much prowess in the second Rugby and Association teams, and as centre scrimmage has been of invaluable assistance to his own year. In debate Lamb has much spirit, a fact which augurs well for his future success in the ministry.

KAMMERER, CHRISTINA E.

"Turning daylight into sunlight by making the happy happier."

Miss Kammerer received her school training at the Jameson Avenue Collegiate and at the Bishop Bethune College, Oshawa. She has taken the honor modern language course. She has been Curator of the Literary Society and Treasurer of the same; Business Manager of the "Chronicle," 1906-08; successively Treasurer, President of the Athletic Society. Representative on the Toronto University Athletic League, Head of the Tennis, and a member of the first team throughout her course. She belongs to the Delta Sigma Sorority, and has been a representative in residence at Evangelia House.

McMICHAEL, ALBERT ROLAND

"True in word and tried in deed,"

Mike was born in Toronto and got his early education at the Model School and Upper Canada College. Taking honor matriculation, he gained the Bishop Strachan and Leonard McLaughlin scholarships in classics, the Wellington in mathematics, and the U.C.C. (Trinity scholarship) in general proficiency. In his first year, McMichael divided his attentions between mathematics and classics, since then he has devoted himself to research in ancient literature. He was President of his class for the first two years, and has not neglected athletics. Mike played on the second Rugby team in 1905, and on the first team in 1906 and 1907, was Captain of the Trinity '08 Hockey team in 1907, and Assistant Treasurer of the Athletic Executive in his third year.

TRINITY COLLEGE CLASS OF 1910.

IST ROW—S. F. TACKABERRY, R. ST. E. MURRAY, E. A. W. H. WILSON, C. S. YOUNG, H. BEDFORD-JONES, W. H. FORD, G. R. FORNERET, L. H. M. BREADON, J. A. DONOVAN, A. J. JOHNSON, L. E. SILLS, R. HAINES. 2nd ROW—R. M. BOULDEN, C. J. S. STEWART, E. N. L. REID, T. H. D. STORMS, J. L. MARA, G. TYNER, A. F. BROCK, H. G. HISCOCKS, R. S. JONES, J. D. BEASLEY, W. G. O. THOMPSON, 3rd ROW—R. H. ARCHIBALD, W. PROUDFOOT, J. T. D. KING, J. H. DIXON, D. P. WAGNER, G. S. ANDREWS, E. HARRINGTON, A. BRADSTOCK, G. M. THOMPSON, A. D. CASLOR.

St. Hilda's

"Timor Dei principium sapientiae."

EW persons realize that St. Hilda's has been the pioneer of the residential movement for women students in Canada. Twenty years ago, though women were admitted to lectures and degrees by the University of Toronto and by different colleges, there was no residence for them, and the founding of the first women's residence was due to the wise foresight and courageous initiation of the Rev. C. W. E. Boddy, D.D., Provost of Trinity College, who, as soon as the first woman student entered Trinity, perceived that consistency with her own principles required her to provide for women the same advantages—those of religious training combined with life in residence—which it had been the object of her foundation to afford to men. The idea, being new and untried, met with considerable opposition at first, but has long ago justified itself by the results that have attended it.

In October, 1888, St. Hilda's was opened with two resident and two non-resident students, under the care of Miss Patterson (now Mrs. Rigby, of Trinity College School), who continued at its head until 1903. The first years were anxious ones, owing to the smallness of the numbers in attendance, and the necessity of establishing a tradition. St. Hilda's was at first a college, and separate lectures in all pass subjects were given here by members of the Trinity College staff. It is only in looking back that it is possible to realize the debt which St. Hilda's owes to the wisdom of Dr. Boddy and his supporters, to kind friends for gifts in early years, to the members of the Trinity College staff for their devoted help and sympathy, and to the first principal and the earlier generations of students for the sound and wholesome tradition that was established by them.

In 1899, mainly through the help and initiative of the late Dr. Jones, for so many years a member of the Trinity College staff, and a most generous and helpful friend to St. Hilda's, the present excellent building was erected in the grounds of Trinity College; at the same time the plan of separate lectures was abandoned, and the system became completely co-educational. The college has steadily in-

creased in numbers and in efficiency, though the numbers are comparatively small. The students take their share in the various activities of the University; they have their own Literary and Athletic Societies, and have competed successfully in the inter-college tennis and hockey contests, as well as in the debates. They edit and manage an excellent magazine, the "Chronicle," and hold an annual sale, mainly for the benefit of St. Mary's Home, Matsumoto, Japan, where a member of St. Hilda's is in charge. The Alpha Chapter of the Evangelia House Council was formed by St. Hilda's, and the resident students take their share in the work of the House. Father Episkopon visits the college annually on Shrove Tuesday. Discipline is maintained largely by the students themselves, who are proud of their traditions and earnest in maintaining them, and there is a well-organized Alumnæ Society, which, though not large in numbers, is strong in lovalty and enthusiasm.

MACNAUGHTON, ARCHIBALD C.

"Much may be made of a Scotchman, if he be caught young."

The village of Vellore, in York County, was the scene of Mac's birth. He first devoted himself to the study of The Humanities in Maple Public School, from thence he went to Richmond Hill High School and obtained his matriculation in three years. On his arrival at Trinity, Cameron was one of the first undergraduates resident in Trinity House, but as he is in the political science course, he thought a room in Wall Street would make a good vantage point from which to look forward to Osgoode Hall. In his last two years Mac has been Vice-President of his year and represented Trinity on the Undergraduates' Parliament Executive in 1907-08.

REDMAN, LAWRENCE V.

"Endued by nature and by learning taught."

Red received a silver medal when he left the public school at Oil City at the age of twelve. He went to high school in Petrolia, taught school for three years, went back to school and got his honor matriculation and at the same time the Dickson and Barnside scholarships in science, and the Englehardt and 5th Edward Blake in general proficiency. Since coming to Trinity, Red has continued to carry off scholarships each year in his chemistry and mineralogy course and has twice gained the English essay prize. He has also been Librarian and First Vice-President of the Lit, and President of the Inter-college Debating Union, and was on the winning side in 1907 in two inter-college debates. For the last two years he has been head of his year at Trinity.

NEWTON, JEAN COATES

"An air
Of life's kind purposes pursued
With ordered freedom sweet and fair."

Miss Newton was educated at the Hamilton Collegiate, from which she entered Trinity with two scholarships. She has taken the honor course in modern languages. She has been Editor of "Athletic Notes" in the Chronicle, Sub-editor of the same, successively Corresponding Secretary and President of the Literary Society, and is a member of the Delta Sigma Sorority. She has been Head of College for two years and has filled this somewhat exacting position with conspicuous tact and success.

RUTHVEN, ELIZABETH

"I like the good all-wool of common-sense.
Which warms you now and will a twelvemonth hence."

Like many other successful students at St. Hilda's and Trinity, Miss Ruthven was educated at St. Clement's School, Eglinton. Since matriculation she has varied the work of the general course with an almost daily study of the scenery of Yonge street, in her travels to and from college. In spite of the distance she has to travel Miss Ruthven very selectures and her zeal for knowledge augurs well for her success and happiness in life after taking her degree.

In Memoriam

Frances Herbert Endacott

Born July 19th, 1886 Died May 8th, 1907

EPISCOPON

I was in 1858 that the genius of Episcopon first made itself felt in Trinity College. Why he came to us is not known—at least it is better not to say anything about it. That he came and has been with us ever since is quite enough. He took up his residence in the belfry, and from this point of vantage has watched over his "children" for the last fifty years, with all a father's care.

His first acquaintance in Trinity was Pakenham Edward Stewart. Since then the Episcoponical succession has been handed down from Scribe to Scribe to the present day. Such names as those of the Rev. C. J. S. Bethune and Archibald Lampman are to be found on this long roll of honor.

This year the Jubilee Volume was read on March 2nd, when the old Scribes held a re-union, as they are scattered abroad on the face of the earth; Bishop Brent in the Philippines, the Rev. C. H. Short in Japan, and W. J. Rogers in England, to mention only those who are outside our continent. It was not possible that all should be present, but a goodly band, with a number of former residents of Trinity College, met the present generation of students at dinner in Convocation Hall, after which all adjourned to the dining hall, where after immemorial custom the Message, with its satires, puns, and rhymes, was read by T. B. Winter, the Scribe for the year, while the songs, which were an excellent item on the bill of fare, were rendered by Messrs. McGreer, Wiseman, and Sills.

"Notandi sunt tibi Mores."

WAUGH, EFFIE GORDON MARY

"The eyes

An outdoor sign of all the warmth within."

Miss Waugh was educated at the school of the Sisters of the Church, and at St. Clement's, Eglinton. She has taken the Honor Course in Classics, having won the Wellington scholarship in that department on matriculation. She has been Editor of "St. Hilda's Notes" in the Chronicle, and Vice-President of the Literary Society. She has been a winner in the final Inter-college Debates, in which she has for three years taken part. She is a member of the Delta Sigma Sorority. With the work of her course she has combined teaching at St. Clement's.

WINTER, THOMAS BRADBURY

"Nil desperandum,"

Talbot began his travels early, at the tender age of one he left Brighton, England, for India. Returning to his native shores, he was educated at Merchant Taylor's School, London, and after some years in business came to Canada. In 1904 he spent a summer session at the University of Wisconsin and coming to Trinity entered the General Course. In his third and fourth years, Winter has been on the Missionary and Theological Societies Committee, was Trinity's Representative on the Undergraduates' Parliament Executive in his third year and in his final year, Scribe of Episcopon, Second Vice-President of the Lit., and a member of the Torontonensis Board. T. B. means to study theology for the next two years and to enter the Anglican priesthood.

MEDICAL BUILDING

J. Playfair McMurrich, M.A., Ph.D.

Newly appointed Professor of Anatomy

OPERATING ROOM, GENERAL HOSPITAL

History of Class '08

1904-5

In the autumn of '04, the most casual observer of University events could not fail to notice that a new spirit seemed to imbue the incoming class in Medicine. We may have appeared to our senior confrères somewhat verdant, just a trifle unsophisticated, but there was an undercurrent of vigorous, pulsating life, and a vivacity of spirit that was impossible to mistake. Many a wise fourth-year student shook his head, heaved a deep sigh, and filled his pipe anew, thinking regretfully of his freshman days, as he saw this new, eager body of hopeful students, bubbling over with zest for this new life and satisfaction at the first glimpse of new fields to conquer.

With remarkable celerity our boys of '08 settled down to routine of lectures and laboratory work, bone grinds and physiological demonstrations, and with characteristic energy gained a knowledge of the basic sciences of their chosen profession. Not alone on the lore of the sages did they expend their talents. The realm of athletics found many devotees in our ranks, who in their first session made '08 Meds. a factor in University sport.

In association, the college game par excellence, C. W. Williams, Clarke, Bricker, Robertson, Kelly, Lailey, Taylor, Moore, McCabe, Hawley, Mahood, Hewitt, Walker, Garrity, Phair, Kearns and Feldhaus were among the leading spirits who fought the first athletic battles for '08.

In rugby we were brilliantly represented by Lailey, Phair, Gideon and Marshall.

Baseball was supported by Walker, Mahood, Jamieson, McLean, R. O. Davidson, Miller, Carswell, Collins, McEwen, McCabe, Murray, Marshall, Lailey, Phair, Chapman, Davison and Millyard.

Canada's fastest game claimed several clever players: James, Davison, Linscott, McLean, Chapman, Hyland, Walker, Phair, Wallace and A. H. Brown.

Our own national game, lacrosse, was ably demonstrated by such capable exponents as Lailey, Carswell, McLean and B. Scott.

In the midst of the spring excitement, tennis was the neglected Cinderella in sports, except for one capable expert representative, in the person of Jack Phair, who wound up a successful tennis career by captaining Varsity Seniors in '07-'08.

In track athletics and indoor basebail our class was also represented.

Our athletic prowess was exemplified by the following trophies that rewarded our efforts in the gladiatorial arena: Intermediate Football Cup, '05; Inter-Year Football Cup. '05; Silverthorn Cup.

The destinies of our freshman year were skilfully presided over by President Tyerman, Councillors Ross and Graham, who steered the good ship '08 safely through her maiden voyage, in spite of some adverse winds and foggy weather that rendered her navigation somewhat difficult. but in the spring of '05 she swung to her anchor safe in the shelter of the sophomore haven.

Our boys, ever fond of the fine arts, were quick to recognize skilled masters of the piano among their number. Reading room siestas were made doubly enjoyable by the harmonious contribution of these disciples of W. Hambourg—to wit, Fader, Ross, McKay, Craise and Harry Hamill, whose symmetry of figure was only rivalled by the harmony of his productions.

History of Class '08-Continued

In our early lectures we were delighted to find that our class numbered among its members several representatives of the gentler sex. To these ladies, our sisters in the profession, our sincerest gratitude is due for their refining influence. Their presence in our class-rooms was largely responsible for the development of the gallantry and altruism among the members of our class at large.

1905—1906.

With Indian summer's recurring sunshine the men and women of '08 reassembled as budding sophomores. To be sure, there are changes in our class. The eager, half-anxious look of the first year has given place to the "pale cast of thought" associated with the student at this im-

Dr. MacPhedran: "I could get as good an answer, Mr. Shepherd, if I asked your feet."

portant era in his college course. We are at home now and greet with hearty hand-shake, bright smile and eager inquiry the friends we have made in the preceding session—the friends that shall be friends when our college days remain only as happy memories.

We view the gentlemen of the first year, if not with the eye "serene and high," at least with some sympathy. For a hustle of "ye olden time" is planned and carried out in a most complete fashion, and so far as the sophomore year is concerned, the members of '09 have no cause to criticize the warmth of their welcome into the assembly of the elect.

The dreaded second year weighed none too heavily on our class. The hours of toil were often lightened by the inspiration of song, and even the prosaic walls of the dissecting room echoed to the "Glory Song," rendered in true '08 style.

The irrepressible spirit suffered nothing from hard work and the second year kept its representatives busy showing cause to the professors why they should not be expelled from the lecture halls indefinitely. Casserly, Moore and Carswell grew proficient in the art of making apologies, and were rewarded by the very cordial support of their classmates in critical periods.

By dint of long hours of labor the class gradually found themselves to have a grasp of the elementary principles of Medicine, while the broader, practical field opened out in the future. The close of the second year found our boys much graver grown, and with a more serious eye for the main chance. Each congratulated himself on having crossed the Rubicon of Medicine and looked forward with eager longing to the promised land of the third year, whose smiling plains beckoned the weary wayfarers with all the allurement of the mystic future.

History of Class '08-Continued

1906-1907

HEN we look back over the four years of college life we feel that if one year can lay claim to a greater store of happiness than any other, it is the third. It is then that the student first breaks away from the continual grind of necessity imposed upon one who would have a clear understanding of the fundamental principles of medicine and surgery, and from the almost unbroken confinement of the dissecting room and laboratories, and begins to breath the air of freedom afforded by an occasional idle hour, and also to partake of the keen enjoyment of combining science with art, as he applies the laws learned during the first two years to the cases he is confronted with in the hospitals. It is in the third year again that the student finds most time to devote to his fellow students, and thus strengthen the friendships begun in the earlier years, and, when all is over, and we are scattered to distant parts of the world, will not the warm friendships and close companionship enjoyed with our fellow students be that which will longest linger in our memories?

Our third session in Medicine was ushered in by a lecture on "Opsonius" by Sir A. E. Wright, and, needless to say, it was heard with profit and enjoyment by everyone in noughty-eight. During the session it was our privilege to listen to many other men distinguished in medicine and science, among whom must be mentioned Dr. Osler, who lectured on "The advantages of a medical academy," Dr. McPhedran on "Perforation in Typhoid Fever," Professor Schott, from Nanheim, on "Acute Physiological Dilatation of the Heart," and Prof. Müller, from Munich, on "The Clinical Importance of Blood Examination." In reviewing this list, we cannot but feel that we were particularly

fortunate, and we take advantage of this opportunity to express to Prof. McPhedran our appreciation of his efforts in inducing the last two speakers to address us.

While recalling the public lectures we must not pass over our Dean's Hallowe'en entertainment, at which we listened with delight to a lecture by Prof. Coleman on "A Trip Through Mexico," and then partook of the refreshments provided by Dean Reeve with unstinting hand. It it rumored that the freshmen for once did not eat the apples during the lecture.

And now a few words about athletics—for have not noughty-eight held a championship all through the course, and that, too, in a game which is a test of endurance and

A lecture from Professor Irving Cameron

History of Class '08-Continued

skill? Bricker, of undying fame, with his band of stalwarts, encouraged by the cheers of all the year, once again added the championship in association football to our previous laurels. Other championships we could have won, but fate allotted us little time for sports.

Of other events of 1905-06 which it will give us pleasure to recall in after years, must be mentioned the Medical Society elections, which were contested with the usual rivalry, and the dinner which was so successfully managed by Mr. Hamill and his able committee. The speeches were witty and entertaining, the water was sufficiently diluted, so everybody had a good time.

Would that we here could end the history of our third year. But it is "sunshine and shadow for everyone," and it were fitting that reference be made to the loss sustained by the University and the class of noughty-eight in the death of Prof. Peters, a member of the Medical Faculty, and that of H. A. Daly, one of our fellow students. Few of us had yet been privileged to listen to the lectures of Prof. Peters, or to enjoy his personal friendship, and thus found it more difficult to realize the loss the class, the University, the city, the Dominion, and the medical world, had suffered in his early death.

Mr. Daly was a member of the combined six years' course, and while but slightly known to many of us, was a general favorite among his many friends, and highly respected by all. As a year we join in paying this tribute to his memory.

1907---1908

"Eheu fugaces. . . labuntur anni."

And already we are seniors, respected by the juniors, reverenced by the sophomores, and worshipped by the fresh-

men. Truly, our happiness would be overwhelming, and we should set up a haughty and intolerable tyranny were we not reminded that to-morrow our short reign will be over, and we shall be out into the busy, bustling and selfish world, having said farewell to the calm and peace of college life. It is now that we must recall the words of the Latin poet so familiar to us all:

The year 1907-1908 promises long to be a memorable one in the history of the University of Toronto, and we who are back for our last session will be glad to remember that it was in our time that Dr. Falconer was installed as President of our University.

We have also the pleasure of welcoming to the Medical Faculty Dr. Playfair McMurrich, a graduate of Toronto University, who comes to us from Ann Arbor to succeed Dr. Primrose as Professor of Anatomy, and, while welcoming the new, may we briefly express our appreciation of the retiring Professor of Anatomy, who has endeared himself to all, both within and without the class-room. Few of us will ever forget the inspiration to do our best, received from contact with Dr. Primrose, and we are glad to feel that he is but giving up one position that he may devote more time to another, and is not severing his connection with the Medical College.

Among the events of the fall term that deserve to be recorded, the Dean's Hallowe'en supper and the Medical Society's dance must have the first place. Mr. Frank

History of Class '08-Concluded

Yeigh's entertaining lecture and his splendid views, giving us a glimpse of the magnificence and grandeur of the scenery of Western Canada, were greatly appreciated. It is to be regretted that the unpleasant weather kept many away, but the four hundred who were present thoroughly enjoyed the Dean's hospitality, and did their best to make way with refreshments that had been provided for over six hundred.

The Medical Society's dance was a pronounced success. Everyone in noughty-eight had a glorious time, and the committee won the outspoken appreciation of all for the zeal with which they had undertaken everything that could add to their fellow students' enjoyment.

In sports, noughty-eight once again gave proof of their prowess by winning the inter-year championship in association football. That we might not forget we are human the fates allotted the championship in baseball to the gentlemen of the first year.

Of affairs pertaining to the class-room, but little is to be said. We all appreciated the endeavors of the professors to make their lectures practical, and welcomed the tendency to substitute demonstrations and clinics for lectures wherever possible.

There remains to say only a few words of the fore-shadowing events, and first looms up the Medical Society elections. If one reproach has been raised against nought-eight, it has had reference to the modesty of the individual men, the lack of desire for public honors, or, possibly, the shirking of the responsibility entailed by public office. It has been a matter of regret that so many honors or responsibilities have gone by "acclamation." Possibly the fault lies with the Medical Society, which has failed to answer the purposes for which it was established, and which

requires a complete reorganization. Whatever the trouble, may the men of nought-eight see one more good old-time election before they bid their Alma Mater farewell.

In closing, one cannot but take a hasty glance into the future. To-morrow we shall be a scattered people. Let us not forget as we go out from our College halls that it is the lack of association and the petty jealousies among medical men that constitute the great weakness of our profession. Let us remember that we are members of the same profession, and that the most humane and honorable of all, and let us work together to further the interests of that profession and of one another, believing that on whatever head fortune may choose to place the crown of success, the class as a whole will gain from the reflected glory.

Passing of the Woman's Medical College

IN October, 1904, when the ladies who are now members of the graduating class of 1908 in the Faculty of Medicine of the University of Toronto first ascended the flight of steps of the Woman's Medical College, as first year students in Medicine, coming events had already cast their shadow before, inasmuch as two ladies had registered in the Biology and Physiology Course of the University of Toronto.

It is well known that the matter of medical education for women was finally brought before the Royal Commission on the University of Toronto (appointed on October 3rd, 1905) by the Faculty of the Woman's Medical College, represented by the Dean, Dr. Nevitt, the Professor of Anatomy, Dr. Duncan, and the Secretary, Dr. Wishart, and by the Alumnæ of the College, represented by Dr. Augusta Stowe-Gullen, President of the Alumnæ Association, Dr. Minerva Greenway, Secretary, Dr. Jennie Gray and Dr. Helen MacMurchy.

In the report of the Commission to His Honor the Lieutenant-Governor of Ontario, dated April 4th, 1906, the following sentence is quoted from the memorial of the Faculty of the Woman's Medical College, "As far as the Ontario Medical College for Women is concerned, they merely desire that women should have an opportunity of pursuing their medical studies unmolested, on fair and equal terms with the men." Then follows the statement of the Commission, as follows: "This being the aim of the advocates of medical training for women, it seemed to us reasonable that some means should be devised of meeting the request. The subject has since been dealt with by a Committee of the Senate, which, after conference with the Faculty of Medicine, has communicated to us the result of its deliberations. In future women will be admitted to

registration in the Faculty of Medicine. This appears to be the simplest solution. The precise form in which the Faculty has communicated its views to the Senate is as follows:

"That in view of certain prospective changes which are suggested in connection with the method of providing instruction in Medicine for women in Toronto the Faculty of Medicine of the University of Toronto is now prepared to register female students in Medicine, and agrees that whatever arrangements are deemed necessary should be made for their instruction."

Accordingly, the Ontario Medical College for Women closed its doors on July 1st, 1906, so that the graduating class of 1907-8 have had the first two years' instruction of the Medical Course in a separate College, and the last two years in the Faculty of Medicine of the University of Toronto.

The attachment of the Faculty and Alumnæ of the Woman's Medical College to the Dean, Dr. R. B. Nevitt. was felicitously shown in the presentation to the Dean of his portrait, painted by Mr. J. W. L. Forster, on the auspicious occasion of the inaugural meeting of the Academy of Medicine, December 3rd, 1907. This testimonial was subscribed to by nearly one hundred persons, chiefly Alumnæ of the College, in India, China, the United States and every Province of Canada. As Dr. Duncan said in making the presentation, "If there had been no Dean Nevitt, there would have been no Woman's Medical College." Dr. Nevitt presented this portrait to the Academy of Medicine, where, side by side with the portrait of the founder and first Dean of the College, Dr. Barrett, formerly Professor of Physiology in the University of Toronto, it will serve to keep in remembrance the name and work of the Woman's Medical College.

Women's Medico-Literary Society

The Lay of a Fourth Year Student

We have crammed our heads with learning though the brain for rest is yearning,

And have sat sad-eyed and weary listening to most boresome lectures.

We have planted in our cortex symptoms, signs and syndromes complex.

We've inflamed our minds with theories—theories born of wild conjectures.

And like wheals but evanescent, and though fade, come more conjectures.

Theories these of frailest textures.

We have passed examinations and have frittered 'way vacations, And our minds been aberrated, and our cortex obfuscated By the lore we've impregnated into our receptive cells. We've percussed and auscultated, we've inspected and palpated And our noses educated to the diagnostic smells.

We have studied bugs microbic, acid-fast and aerobic, Symptoms, signs, the cells and stroma of the fiendish carcinoma, And this lore—surcharged aroma permeates our whirling brains, And such learned conglomeration taxes our assimilation Wish we were in hibernation to be free from mental pains.

The Stethoscope Song

A PROFESSIONAL BALLAD

There was a young man in Boston town,

He bought him a STETHOSCOPE nice and new,
All mounted and finished and polished down,

With an ivory cap and a stopper, too.

It happened a spider within did crawl, And spun him a web of ample size, Wherein there chanced one day to fall A couple of very imprudent flies.

The first was a bottle fly, big and blue,

The second was smaller, and thin and long;
So there was a concert between the two,

Like an octave flute and a tavern gong.

Now, being from Paris but recently,
This fine young man would show his skill;
And so they gave him, his hand to try,
A hospital patient extremely ill.

Some said that his *liver* was short of *bile*,

And some that his *heart* was over size,

While some kept arguing all the while

He was crammed with *tubercles* up to his eyes,

This fine young man then up stepped he,
And all the doctors made a pause;
Said he, This man must die, you see,
By the fifty-seventh of Louis's laws.

But, since the case is a desperate one,

To explore his chest it may be well;

For, if he should die and it were not done,

You know the autopsy would not tell.

Then out his stethoscope he took,
And on it placed his curious ear;
Mon Dien! said he, with a knowing look,
Why, here is a sound that's might queer!

The bourdonnement is very clear,—
Amphoric buzzing, as I'm alive!
Five doctors took their turn to hear;
Amphoric buzzing, said all the five.

There's empyema beyond a doubt; We'll plunge a trocar in his side,— The diagnosis was made out, They tapped the patient; so he died,

Now such as hate new fashioned toys
Began to look extremely glum;
They said that rattles were made for boys,
And vowed that his buzzing was all a hum.

There was an old lady had long been sick,
And what was the matter none did know;
Her pulse was slow, though her tongue was quick;
To her this knowing youth must go.

So there the nice old lady sat,
With phials and boxes all in a row;
She lasked the young doctor what he was at,
To thump her and tumble her ruffles so.

Now, when the stethoscope came out, The flies began to buzz and whiz;— O ho! the matter is clear, no doubt; An aneurism there plainly is.

The bruit de râpe and the bruit de scie,
And the bruit de diable are all combined;
How happy Bouillaud would be,
If he a case like this could find!

Now, when the neighboring doctors found A case so rare had been descried, They every day her ribs did pound In squads of twenty; so she died. Then six young damsels, slight and frail, Received this kind young doctor's cares; They all were getting slim and pale, And short of breath on mounting stairs.

They all made rhymes with 'sighs' and 'skies,'
And loathed their puddings and buttered rolls,
And dieted, much to their friends' surprise,
On pickles and pencils and chalks and coals.

So fast their little hearts did bound,
The frightened insects buzzed the more;
So over all their chests he found
The râle sifflant and râle sonore.

He shook his head;—there's grave disease,— I greatly tear you all must die; A slight post-mortem, if you please, Surviving friends would gratify.

The six young damsels wept aloud,
Which so prevailed on six young men,
That each his honest love avowed,
Whereat they all got well again.

This poor young man was all aghast;
The price of stethoscopes came down;
And so he was reduced at last
To practice in a country town.

The doctors being very sore,

A stethoscope they did devise
That had a rammer to clear the bore,
With a knob at the end to kill the flies.

Now use your ears, all you who can, But don't forget to mind your eyes, Or you may be cheated like this young man, By a couple of silly, abnormal flies.

-Oliver Wendell Holmes.

ALLISON. DUNCAN

"Shallow men believe in luck, believe in circumstances. Strong men believe in cause and effect."

Duncan Allison was born in the village of Belgrave, Huron County, in the year 1878. He received his primary education in his native village, and his Third-Class Certificate from Clinton Collegiate Institute. He then taught school for three years. He later attended Goderich Collegiate Institute, where he took his Junior Leaving and Junior Matriculation certificates. Following an early desire to study medicine, he spent three years with the class of '06, to whom he was well known owing to his kind manner and genial nature. During his undergraduate course he was a prominent figure in association football. He is now completing his course with the class of 1908.

ARMOUR, ROBERT GARDINER

A resident of Toronto. Obtained early education at the Church School, Toronto, and later at Trinity College School, Port Hope. He graduated with the degree of Bachelor of Arts from Trinity University in 1904, and in the fall of that year entered Medicine, 1908. He has throughout taken a most enthusiastic interest in every branch of the work, taking the broadest aspect of each. He served as class-assistant in Physiology in his third and fourth years, also in Pharmacology in his final.

ANDERSON, CHARLES EDWARD

"The man of independent mind,"

Charles Edward Anderson was born June 28th, 1885, in Oil Springs, and like the crude petroleum was refined in his native town, but by a different process. After learning all that was known in the Petrolea High School. and after a brief spell at teaching, he came to Toronto, graduated in Arts. B. and P., '06, and fell in with the '08 Meds. Throughout his college career he has always been at the head of his class -alphabetically. Baseball, chess and "fussing" are his favorite recreations. On the fourth year's crack baseball team. he was catcher, and the team lost the series in its first game. He upheld medical honors at the Trinity dance. Although his home is now in Philadelphia, he is a loval subject of King Edward. and will be a shining light in the profession in Ontario.

BARNETT, FERDINAND LION

"All young and ignorant was he, But innocent and mild."

It was on a windy day in March, 1885, when Ferdinand first opened his eves to the light of day. The event occurred in the quaint little town of Chippawa. Here he spent his boyhood days, going to school when not otherwise engaged. His higher education was received at Stamford High School, where he gained a name for himself in football. He matriculated from here in 1903, and the next year was spent in travelling around the States, getting the rough edges knocked off before entering Medicine with the class of '08. "Barney" has been a good, diligent student and has always been a favorite with the boys, owing to his brightness and geniality. On graduation he intends settling in Chicago, where he will carry with him the best wishes of the class of '08,

BATES, HENRY KENDALL

"Nature made him as he is, And ne'er made such another."

In Burlington in the year 1887 was born the subject of this sketch. Ken, however, did not long remain in the town of his birth, for in 1890 we hear of him in Hamilton, where he received his primary education. Matriculating in 1904 he came to Varsity, and with that good judgment which characterizes those who emanate from "The Ambitious City," he joined the class of '08 in Medicine, where he has proven himself to be a kind friend to all who know him. He pays good attention to his work, enjoying athletics, particularly rugby, and leads a quiet life. Success in his chosen profession is for him all but already assured.

BOYD, EDMUND

Edmund Boyd obtained early education at Toronto Church School and Upper Canada College. He graduated with honors in Natural Science in 1905, and that fall entered the 1908 class of Medicine. He was then appointed Lecturer and Laboratory Assistant in Biology, which he has held throughout his course. He was one of the examiners in Biology in 1906 and 1907, Vice-President of the Rugby Football Club in 1906, and a member of the Executive of Torontonensis in 1908.

BEAVER, GEORGE WASHINGTON

"Felix qui potuit rerum cognoscere causas."

George was born at Lewiston, N.Y., but showed his love for things Canadian by going to the Collegiate Institute at Niagara Falls, Ont., for his primary instruction, and then coming to Toronto for his medical training. Before entering the Faculty of Medicine, he spent one year in Arts, and there first became infected with his earnest yearning for knowledge. Knowing that he is the best physician who best understands the hidden causes of disease, George has diligently cultivated the inquiring spirit, and has learned to look right through the bodies of men. He is well known about the college, and the good wishes of many friends will accompany him in his professional career. George says not even Longboat will beat him out when the interests of a patient are at stake.

BOYINGTON, LILY FALARDEAU

"A cheerful life is what the muses love;
A soaring spirit is their prime delight."

Lily Falardeau Boyington was born at Croton, Kent County. Her academic years were spent in Demill Ladies' College, St. Catharines, and Loretto Abbey, Toronto. Very early she showed an ability in art, and for a time contemplated the serious pursuit of it. She contributed frequently to the Leaflets, the organ of the B. V. M. in America. During her college life, Miss Boyington took a quiet but sincere part in all religious and social societies. In spite of the fact that her course has been a very busy one, she has always found time to be sociable, and her presence has graced many little evenings and teas given by herself and the other girls of her college.

BRICKER, JAMES G.

"Everything they break they lay to me Everything that's stolen they lay to me, Really it is unbearable."

James Bricker was born near Galt. Waterloo, Jim was educated there at the public school and later at Harriston High School. He attended Normal School in Toronto and then taught four years. Then he attended Owen Sound Collegiate for a short time prior to his embarking with the '08 class in '04. Jim is best known to the boys as "Bricker." Coming from Galt he could not but play football, and he displayed his ability as full back on the '08 team and Senior Meds., Inter-Faculty champions of '07-'08. He also upheld the Blue and White Intercollegiate Champions of the same year when he was Secretary of the U. and T. Association Football Club. His modesty and unassuming manners have made him a general favorite, and will continue to win for him many friends.

BROWN, PERCY GORDON, B.A.

"Goodness and wit,

In seldom meeting harmony, combined."

"P. G." was first heard from in Markdale, Grey County, Dec. 14, 1884. Later he appeared in Toronto, and in due time matriculated from Harbord Street Collegiate Institute in 1902. Percy was beguiled into taking the B. and P. Course and was one of those who were left to receive their Arts Degree in 1906. During his University Course the executives of many societies have been benefited by his presence, and last year he was Vice-President of the Undergraduates' Union. He also held the position of Assistant Demonstrator in Biology. His keen insight and healthy optimism, combined with a ready wit, are bound to place him up near the front rank in his chosen profession.

BROWN, JAMES BRUCE

"One of the few immortal names that was not born to die."

James B. Brown destined to become great, like many others who have come from Bruce, was born at Paislev and received his early education there. He is always ready to proclaim his Scotch parentage and does not mind going to the Presbyterian Church. He early showed the fighting spirit in joining the 32nd Bruce Infantry at 16 and at 19 had been appointed lieutenant and captain. He is a graduate of London Military School. Then he turned his attentions to fighting the diseases of the body and was lucky in joining '08. We will watch him rise in his profession. "You can't keep a good man down.'

BUSWELL, ROBERT EDGAR

"Titles of honor add not to his worth."

R. E. Buswell, alias Buzzie, appeared first on this terrestrial sphere at Exeter, Huron County. Following a brilliant career in the halls of primary learning, we find him first at Lucan High School, then at St. Mary's Collegiate Institute, where his high standard of intellectual ability won for him a Junior and Senior Leaving standing. After a professional training at Regina he was in the Great West at High River, Alberta. Here he was principal of his school, and by his painstaking assiduity showed a precocious faculty for commanding the rising generation. In the fall of 1904 he entered the field of Medicine, where his geniality has won for him the good-will of all his fellow students.

CAIRNS, LORENZO LAFAYETTE

"Cheerfulness is an off-shoot of goodness and of wisdom."

Although Hollypark does not appear on the maps, yet we are led to believe there is such a place in York County, and it is to this place that we are indebted for the occurrence of "Leafy" some twenty-three years ago. Having received a training along educational lines as well as those of mischief-making at Port Elgin High School, he migrated to Toronto University, enrolling with the class of '07 B. & P., but having met with an accident after his first year, he was forced to forego the pleasure of writing on the spring exam, and to enter the class of '08 Medicine. Although Leafy's chief joy at present is a strong pipe, poor tobacco and a good game of pool, yet we feel confident that his genial smile and courteous manner will do wonders for him in his prospective profession.

CARSWELL, DUNCAN FRANCIS

"He came, he saw, he conquered."

Duncan Carswell was born in Elora. June 14, 1884. He obtained his matriculation from Elora High School in the year 1900, and four years later entered Medicine with the class of '08. He was elected as Councillor to the Medical Society, and also as Vice-President of his year in '05-'06. "Dunc," besides being one of the most popular boys in Medicine, is also one of Varsity's star lacrosse men, having played with the Varsity Lacrosse Club, Inter-Collegiate champions of America, '05-'06 and '06-'07. He is one of the few athletes who has obtained the much-coveted University "T." In '05, as a valued member of Inter-Year Baseball Club, he helped his year into victory.

CAMPBELL, JOHN A. MACD.

"The mind makes the man."

Jack was born in Waubaushene, on the rocky shores of Georgian Bay. He matriclated from the Orillia Collegiate Insti tute in 1902. Driven south by the rigors of the Georgian Bay winter, he came to Toronto and entered University College, but finding the Medical Building closer to his lodgings and being loath to move his trunk, John, with an originality wholly his own, overcame the difficulty by entering the profession of Medicine. Here he soon gained a well deserved popularity. He was prominent in athletics, a member of the University Rifle Association, and a mighty hunter of (dear)s. We are sure his future, if it be at all in keeping with his deserts, will be all the heart of man could desire.

CASSERLY, JOSEPH MICHALL

"I never saw so much essence of devilment put in so small a vessel."

Less than fifty years ago Joe first beheld the light in the balmy climate of southern Simcoe, in the town of Tottenham. He received his primary education in St. Catharines Collegiate and Tottenham High School. After wielding the birch for a few years he decided to follow the example of his one-time neighbor, Osler, and became a follower of Hippocrates. He entered the Faculty of Medicine of the University of Toronto in 1904, acted President of the class in his second year, and by his skilful diplomacy ably led the boys through those stormy times. By his genial good humor and Irish wit he made many friends, and we all wish him success.

CHAMBERLAIN, HARRY WILLIAM

"Light heart lives long."

In 1902 the Aylmer Collegiate presenting greater possibilities than the old homestead in Elgin County, our friend betook himself thither. Matriculating in 1904, he joined the ranks of the Meds. at the Western University, and in 1906 he transferred his affections to Toronto. His ability to sing a song or tell a story have oft times entertained audiences of students of varying size. Assistance as full back was given by him to two football teams, both of which were champions, viz., Western Meds., '05, and Third Year Inter-Year Medical, Toronto, '06.

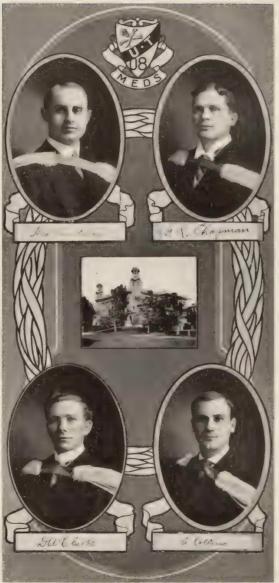

CLARKE, DAVID WESLEY

"Loathing pretence, he did with cheerful will

What others talked of, while their hands were still."

Wes was a new, nineteenth century, Ballyduff edition to the boys of "Old Durham'' and "Old Ireland." He received his preliminary education in his native village, and later attended high school at Lindsay and Bowmanville. He attended Ottawa Normal School in '01. and became principal of Hawkesbury Public School. In '04 he entered upon the study of Medicine. Wes. has always taken an active part in athletics, distinguishing himself as "Right Forward" in Association Football. In '06 he was Secretary of Varsity Association Football Club, and played with the winners of International championship at New York, and was awarded the coveted "T." His genial disposition will continue to win for him many friends and a bright future.

CHAPMAN, FREDERICK ROBERT

"He is complete in feature and in mind,
With all good grace to grace a gentleman."

Fred. was born in Peel County, Ontario, where also the earlier years of his life were spent. He graduated from Essex High School and, obeying his desire for knowledge of the healing art, joined the class of '08. In college life his genial and kindly nature has made him a general favorite. These are qualities too, which, coupled as they are with a sterling character and a strong sense of duty, will make for success in the practice of his chosen profession. Fred is a familiar figure around the Gym. and a loyal supporter of college athletics of all kinds.

COLLINS, ALBERT

"A pipe is all I need."

"Dude" hails from Niagara Falls. He was born there on December 30th, 1884. He received his preliminary education in the public school and collegiate institute of that city, matriculating in 1902. After spending two years in railway work, he decided to take up the study of Medicine, and picked Toronto as the best University in which to learn his profession. He joined the class of '08, and has been with us ever since. "Dude" has shown himself a good student, and is popular with his classmates. His friends unite in predicting that he will make his mark in the world.

COTTAM, JOHN AUGUSTUS

John Augustus Cottam was born in Georgetown, British Guiana, August 27. 1885. He received his early training in the elementary schools, from which he went to Queen's College, taking his Senior Cambridge in 1903. During his course in Queen's College he was wellknown for his athletics, being star bowler for the Cricket Club and left forward on the soccer team. He spent eight months in the New Amsterdam Hospital, from which institution he came to Toronto to enter Medicine. "Jack," as he is known to the boys, has had a successful career in the University, and all wish him the success that will undoubtedly come to him in his chosen profession.

CRAISE, OLIVER SIMMONS

"The mind's the measure of a man."

Oliver Craise, alias "Liver," grew to man's estate in the town of Petrolea. He matriculated from the Petrolea High School while quite young, and after a few years a natural tendency toward Medicine ultimately resulted in his joining the class of '08. "Liver" (derived from Oliver and not the dissecting room) is well known as a good student and a good fellow, a rare combination and one likely to aid in his future success. On completing the third year he visited the great Northwest, and there, where ample opportunity afforded, proved himself well adapted for the profession he has chosen. His humor is well known to his fellow students, who in this respect unconsciously associate him with the Emerald Isle.

COULTER, WILLIAM G. G.

"In arguing, too, the doctor showed his skill,

For, e'en though vanquished, he could argue still."

"Billy," as he is known to all, was born in Windsor in 1886. He liked the locality so well that he stayed there to receive his preliminary education. After matriculating from the Windsor Collegiate Institute, he spent one year in honor work, followed by a year in business. He then decided to go into Medicine, and joined the class of '08 at Toronto. He has taken a good course, but, at the same time has not neglected the social side of life, winning many friends, both in the University and in the city. He is a member of Nu Sigma Nu Fraternity.

CRASSWELLER, HENRY

"He keeps good nature still whate'er he lose."

Henry was born at Oshawa in 1888. but spent most of his boyhood days in Essex. He received his Junior Matriculation from the Essex High School and one vear later his Senior Matriculation from the Sarnia Collegiate Institute. Having made up his mind to follow the Medical profession, he spent one year in Pharmacy and then entered the University with the class of '08. He has not been known in the year as a grind, but has made a very creditable stand in his whole course. Although rather quiet and retiring in manner, Harry has made a wide circle of friends. He is a member of the Nu Sigma Nu Fraternity.

D'ARC, HARRY THORNTON

"Too true to flatter, and too kind to sneer."

Harry T. D'Arc was born in Manitoba, May 31st, 1880. He graduated from Manitoba University in Pharmacy in 1903, and entered the University of Toronto in the Medical class of '08 in 1904. After graduating he hopes to spend some time in post-graduate work in London. Those who have had the privilege of his friendship would say that his loyalty is such as one rarely finds, to his work, to his class, to his friends, and to the West, of whose breadth and optimism he seems the very embodiment. There are few for whom one could more safely predict a successful future.

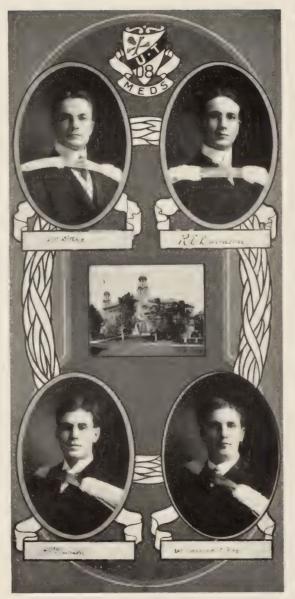

DAVISON. REGINALD OLIVER

or mixed in him that Nature might stand and say to all the world, 'This was a

man.

"Ollie" was born, October 7th, 1885, at Brantford, Ont. He matriculated from Brantford High School in 1902 and entered the Medical Class of '08 in 1904. He is one of the best all round athletes in the University. Lacrosse, hockey, basketball and tennis have all received their share of his attention. In 1904 he played with the Toronto Central Basketball Team. In 1905 he played lacrosse with Brantford, and in '06 and '07 with the Te umsels of Toronto. In 1905 he was Captain of the Year Hockey Team and also of the Jennings Cup Team of the same year. Although of a retiring disposition, his sterling worth could not fail to be recognized, and he was elected president of the Medical Society of this year, and President of the Graduating Year.

DAVIDSON, ROBERT EDWARD

"A man he was to all the country dear."

Robert Edward Davidson, or "Davie." was born August 2, 1883, in Beachburg. He graduated from the Pembroke High School with Senior Matriculation. Entering the University he spent two years in Mathematics and Physics. But at this time Medicine appealed so strongly to him that he withdrew from the Mathematical Course and entered Medicine in the class of '08. In his first year he took the second scholarship, but illness in his second year interfered materially with his studies. His interest in college affairs was manifested by being appointed Second Vice-President of At-Home Committe, '05 '06; as a Member of the Students' Parliament, '06-'07, and also as a Member of the University Glee Club on its eastern tour, '04-'05.

I.

DAY, WILLIAM EDMUND CECIL

".1 man whom it is a pleasure to meet."

Ed. was born at Balaclava, Ont., in 1882. He received his primary education in the Owen Sound Collegiate, from which he matriculated in 1901. For three vears teaching was his vocation, but in 1905 he determined to make Medicine his life-long study. During the academic intervals Ed. ministered unto the ills of many sufferers in British Columbia, and many a story has he of the sick recovering "regardless of the best medical assistance." A good student, of a genial disposition, he is highly esteemed by everyone, and we wish Ed. the best success in his chosen profession, and when he casts adrift on the sea of matrimony.

DORSEY, CHARLES FREDERICK

"A useful life must needs be one That lives to help its fellow man."

Charles Frederick Dorsey hails from Collingwood, where he was born in 1885. His earlier years were spent in Allandale, where he received his primary education. He attended the Barrie Collegiate for three years, and, again making Collingwood his home, entered the collegiate there, from which he graduated an Honor Matriculant in '02. He began his Medical career with the class of '08, and has always been one of the popular men of that year. His genial disposition and kindly, sympathetic nature will ever be his most powerful therapeutic agents in the conflict with those ravages of disease which he has set out to conquer.

EDWARD, MARY LEE

"Tis but a base, ignoble mind That mounts no higher than a bird can soar."

-2 HENRY VI., ii.l.

Name-Mary Lee Edward. Occupation—Medical Student. Address -Petrolea. Habitat—Chiefly the T. G. H. Complaint—Over anxiety; began insidiously about six years ago with a lecture now and then. No similar complaint in any other member of the family. The subject of this study completed her course in the Petrolea High School without showing symptoms of the disease, but late hours, and the exciting laboratory work of the B. & P. Course formed the foundation of the present condition. (Her social conditions have always been comfortable, but the need of living in gregarious communities during the last three or four years and the musical enthusiasms of some of the community have been predisposing causes.) The present condition, which is one of hyper-activity of certain pyramidal cells of the cerebral cortex.

DURNIN, RICHARD BROWN

"There waits for him no worful aftermath.

The aftermath foreboding genius fears. When stain ideals haunt the sunset wears."

Richard Brown Durnin was born in '82 of Irish parents in an Irish town. Dungannon, Ontario. He qualified for a public school teacher at Goderich Collegiate Institute, but not being satisfied with this sphere of usefulness he entered the class of '07 Medicine. Business investments compelled him to drop out at the end of the second year, and consequently he completed his course with the class of '08. During his course he has made a host of friends as a result of his superior ability, his genial disposition. and his connection with all forms of athletics. We predict for him a very bright and prosperous future.

ELLIS, ARTHUR WM. MICKLE

Arthur Ellis, a resident of Toronto, obtained his early education at the Church School and Upper Canada College. He graduated with honors in Biological and Physical Sciences in 1906, and the following fall entered the 1908 year of Medicine. In the fall of his final year he served as class assistant in Pharmacology.

ELMORE, CAMERON

"Men rise the higher as their task is high, the task being well achieved."

Cameron Elmore was born in Spring-vale in 1884. Early in life he expressed a desire to investigate the inner workings of the corner drug store. 'Twas but a step from the brilliantly lighted corner to the Freshmen Class of '08, where he was introduced in due time to the eleven points of interest on the inferior surface of the temporal bone. He has always carefully avoided the befogging influence of the midnight oil, thus being able to approach the annual May rehearsal with a clear upper Nemone and an optimism equalled by few of his fellows.

FADER, WILLIAM RICHARD

"A man not of words, but of actions."

Will was born in Olinda, Essex County, on December 16th, 1883. After matriculating from Windsor High School in 1903 he decided that Medicine should be his life-long study. He spent his first year at Detroit College of Medicine, but his desire to remain a Canadian has influenced him to graduate from the University of Toronto. Entering in 1905 with the Class of '08, he soon became popular through his attractive piano playing and genial disposition. His worth was soon recognized, and in his third year he was appointed Medical Representative on the Undergraduate Union Executive, and in his final Representative to the London Medical College. We predict for Will a brilliant career in his chosen profession.

EMMETT, HARRY L.

"Reputed wise for saying little."

Fonthill, situated in the beautiful valley of the Niagara Peninsula, was honored in the year 1881 by the birth of Harry Emmett. After satisfying the demands of the rural instructors, he departed for the city of Toronto, where, in due time, he graduated from Jarvis Street Collegiate, and in 1903 we have him registered in that most noble of all professions, Medicine. Although modest and retiring, he was persuaded by his friends to accept a nomination, and was elected President of his year in '06.

FELDHANS, HARRY WILLIAM

"With many a social virtue graced And yet a friend of solitude."

harry's early days were spent in the village of Chalk River, Ont. After imbibing all the knowledge he could there, he entered Pembroke High School from which he graduated in 1902. His people moving to Copper Cliff, Harry spent the following two years amongst the sulphur fumes there. The profession of Medicine having strong attractions for him, we find him enrolled with the Class of '08 in U. of T. Although of a somewhat retiring nature, he has proved himself a true friend to those with whom he has come in contact, and his friends will watch his future with great interest and expectations.

FERGUSON, ALEXANDER D.

"Come one, come all, this rock shall fly From its firm base as soon as I."

Alexander Dougall Ferguson, born in the sturdy little village of Fergus, and thus naturally acquired a penchant for "scrapping." In boyhood, "Doug." never reckoned the odds and this early tenacity and fearlessness have remained with him. In due time he graduated from Fergus High School and for a while wielded the dominee's ferule in Northern Ontario. "Doug" has always had a finger on the pulse of human nature and knows men's characters as well as anatomies. He has also been a top-notch lacrosse player, though wisely has not allowed sport to interfere with the serious aims of life. In his professional work he has always maintained a high standard. Pleasant, courteous, sincere, resolute and manly, he is liked and respected by all and an honorable career is confidently predicted.

FIELDING, WILLIAM MARVELL

"Few hearts like his with virtue warm'd, Few heads with knowledge so inform'd."
—Burns.

William Marvell Fielding was born at Hamilton on Jan. 27th, 1888. Having received his primary education in the public schools and collegiate of the "Ambitious City," he came to Toronto in the fall of 1904, to begin the study of Medicine with Class '08.

FERGUSON, WM. D.

"Much can be made of a Scotchman if caught young."

The subject of this sketch was born in '86 in Valetta, Kent County, on the famous Middle Road. In this Scotch settlement the "braw laddie" spent his early days. His politics and religion were gifts of the cradle. At an early age he went to Chatham. where he received his primary education, distinguishing himself in the Senior Matriculation course there. He came to us as a freshman, and has won a warm place in the affections of '08. Fergie is made of the stuff that Scotchmen are proud of. Industrious, bright, cautious, we shall follow with interest his professional career.

FOWLER, JORDAN MOTT.

"A sharp witted youth, Grave, thoughtful and reserved among his mates."

"Jerd." was born in Redbank, New Jersev, in the year 1884. Two years later he became interested in Laveran's work, and leaving the deadly mosquitoes behind, settled in Petrolea. Here he attended the Public and High Schools, partly through necessity, partly as a means to matriculate. The fall of 1904 found him enrolled as a member in good standing of the freshman class. He has shown considerable executive ability, and as Vice-President of the At-Home Committee he was seen at his best in his best. "Jerd." has a host of friends-not all male. Books have not occupied all his attention.

FOX. FREDERICK JOHN

"I'm a student of Philosophy and Science, and well versed in the Healing Art."

For four years Fred has been with the class of '08, "culling the choice fruits of all kinds of excellence.' That he has been so successful in at-'aining the summum bonum of the college life is due to the fact that he first took a course in Arts, graduating in 1902, where he learned the value of the golden mean. His friends would have made him a bank man, but Fred desired to learn methods of alleviating the physical and psychical ailments to which humanity is prone. He is a lover of good music, and his wide circle of friends will ever remember many hours made brighter by the sweetness of his songs. Fred is a member of the Nu Sigma Nu Fraternity.

GALBRAITH, DOUGLAS JAMES

"Ye are sac grave, not doubt ye're wise."

"Doug." was ushered into the world in the village of Iona Station in 1885. He s; ent his early days on the farm, and attended the local public school. Having assimilated all the knowledge obtainable here, he went to High School at Dutton, graduating in 1903. Then the difficulty of choosing his future calling presented itself, and after debating this question for a year, he came to Toronto and registered in Medicine. He has always taken a keen interest in all college sports, and was elected to represent his faculty at the annual S. P. S. dinner. Doug. has not yet decided where he will direct his steps in the future, but he is bound to be a success wherever he goes. Such is the expectation of his colleagues, who will watch his future with interest.

FRANCIS, ROBERT BUCHAN

"Duty is his law, conscience his ruler."

Bob's sterling character made him a true friend of his classmates in Arts. He was Treasurer during his first year. played on the University Lacrosse Team, and later he was a member of the Thirteen Club and of Alpha Kappa Kappa Fraternity. Graduating with honors in Arts, Bob entered the class of '08 Medicine. Now, as he leaves the college walls to enter that sacred sphere of service, for which he has so eagerly worked, enthused with the high ideals and lofty aspirations of his vocation, we wish him God-speed, for in his fight with sickness and with death he will be a true physician, true to his patients and true to himself.

GARRITY, JOHN JOSEPH

". A man of such a genial mood The heart of all things he embraced."

Jack was born amid the foothills of Caledon in 1883. He received his primary education in Orangeville, where he matriculated in 1900, after which he spent four years in the drug business. Being naturally of a thirsty tendency, his thirst for knowledge led him into the corridors of the University of Toronto. Throughout his course Jack has been one of the most popular boys of '08. He was always prominent in athletic circles, and held a place on the Inter-year Football Team. He was Representative on the "At-Home'' Committee in both his first and final years. His success in student life will doubtless be followed by a brilliant career.

GIBB. WILLIAM BLAKE

"He who wishes to secure the good of others has already secured his own."

In St. Mary's about a score of years ago the subject of our sketch began to make his terrestrial rounds in a go-cart. But a little later, an old head on young shoulders led him to higher

centres. Matriculating from St. Mary's C. I., he afterwards spent a year in Arts before joining our class in Medicine. With good common sense and the happy faculty of gathering only the facts, he quietly makes his way to the honor rungs in the class work. In the class he is known as one who will always do the square thing, a very good omen for the future. Blake was elected a member of the 1907 At-Home Committee, and is also a member of the Alpha Kappa Kappa Fraternity.

GIDEON, CYRIL SEARLE

"He is young and of a modest nature;
I hope he will deserve well."

Cyril received his early instruction at Bedford Grammar School, Eng., where he incidentally learned to play a "straight bat." His father, noticing his coolness on the cricket field, de-

cided to make him a doctor. Throughout his four years with '08 ('yril has worked quite diligently, though often convinced that "much study is a weariness to the flesh." His charming personality and joyous nature have won for him a host of friends, especially among the fair sex, and many good wishes will accompany him into his professional career. Following his brother Eugene, Cyril will spend next year in England, and will ultimately practice at his home in Jamaica. He is a member of the Nu Sigma Nu Fraternity.

GREEN, THOMAS MILTON

"Mens sana."

Thomas Milton Green is one of the self-made men of '08. He arrived on the scene (amid circumstances of which he does not remember) at Markham, and later was one of the illustrious students

at the high school of that place during 1894 and 1895. With staff in hand he taught school, but this calling proved too narrow for his master mind, so he engaged in business, where he was in a position to study mankind and learn the great lessons of life. His progressiveness and originality would not allow him to remain here, so he took the greatest step of his life and entered the class of noughty-eight of the Faculty of Medicine in the University of Toronto. Uncle is a worker; we will watch his ascent to the top with interest.

GRIER, LEOPOLD ALBERT B.

"He lived his daily life, but not apart From those whose contact had long since endeared,

He felt the warming touch of friend ship's hand

And wished for nothing more divine than that."

Leopold Albert Bradford Grier was born in Priceville, Ont., and received his public school education there. At sixteen years of age he entered mercantile life, in which he labored earnestly for a number of years. He entered Owen Sound Collegiate in Jan., 1903, and after obtaining Junior Leaving Standing entered Medicine at Toronto in the fall of the same year. His home address is Dundalk, Ont.

HAMILTON, ROBERT J.

"His fair large front and eye sublime declared absolute rule."

R. J. was born at Brinsley, County of Middlesex, and forthwith began his career. After his juvenile training here, he received a higher education at Lucan and Goderich. After attending the Normal in the Forest City, he taught with equal success at "The Garden of Eden." While here, not having found his Eve, he was taken with the desire to study Medicine. His student days have been exceptionally brilliant, while as an athlete he excels-his big body on the anchor helped to win the Inter-faculty "Tug of War." He held office in the Athletic Association during his first year. His good nature and sunny face have won for him the friendship of all, who predict a continuance of his success.

HAMILL HARRY ERLESLEIGH

"Much attribute he hath."

Perhaps the most jovial as well as the most weighty member of the class began his career in the town of Meaford in '86. Here he received his early education, and, graduating from the High School in '03, he came to Toronto with the determination to delve into the science of Medicine. He at first entered the B. and P. course, but his good sense soon asserted itself, and he joined the class of '08. Among the boys he has always been most popular, being elected to the first At-Home Committee, and afterwards to the Presidency of the Year's Dinner Committee in '07. He has ever proved himself a good student and a good fellow, and the year hopes to see him fill proportionately as large a place in the medical world as he ever did in the lecture theatre.

HARKNESS, JAMES GRAHAM

"To follow knowledge like a sinking star Beyond the utmost bound of human thought."

Graham was given to the medical profession Jan. 1st, 1886, being a son of Dr. John Harkness, Irene, Dundas County. After attending Iroquois High School for several years he was successful in obtaining his Honour Matriculation and Senior Leaving in 1903. In the fall of 1904 he entered the freshman class in Medicine. Since he has shown the wisdom of his choice of professions, for during his first and second years he led his class at examinations. Music is one of his many accomplishments. Graham has shown himself to be a thoroughly capable and all-round good fellow, and his many friends will watch his career with keen interest.

HARRISON, FREDERICK C., B.A.

"At whose sight, all the stars Hide their diminished heads."

Frederick Christopher Harrison, B. A., is a Torontonian born and bred. He issued his "Declaration of Independence" in 1885, and chose Feb. 22nd as the date, as did another distinguished gentleman, who, like Fred. would rather cut down a thousand cherry trees than tell a lie. From a scholastic standpoint he is a product of Upper Canada College, where in 1902 he was "Head Boy." Evidently he "got the habit," for on entering B. and P. he soon was at the top again, and retained this position until graduation in Arts in '06. He has been Class Assistant in Physiology and Pharmacology for two years. All who know his learned son of Æsculapius predict for him an eminently successful career in the profession of his choice

HARVIE. W. ARTHUR

In the County of Simcoe, near the town of Orillia, Arthur first commenced his successful career some twenty-one years ago. Here he received his public and high school education. With the characteristic tendencies of a long line of ancestors, he turned his eyes towards the teachings of the great Hippocrates, entering with the class of ... '08.'' As a student he has been eminently successful, having taken a high standing in all his work. He was elected a member of the "At Home" Committee of "'04." By his quiet, unassuming manner, and frank, open demeanor, he has won for himself a host of friends, who will watch with interest his career in Medicine.

HARRISON, JOHN PARRY.

"Oh, what have we here!"

On the 27th of September, 1886, the village of Dunnville was thrown into a state of excitement, the cause being no less than the arrival in their midst of a total stranger, who later was to be known to the world as John Parry Harrison. At a very early age he evinced a decided partiality to erudition, and did credit to himself and his relatives at both schools of his native burg. In the fall of 1904 he entered Medicine at the University of Toronto, and by his smiling countenance and jovial disposition soon gained everlasting popularity among his classmates in the college. He purposes taking a post graduate course in the Old Land before he settles down as the head of a happy family, and proceeds to lead the blind of Canada into that light for which they have been groping helplessly and without hope until J. P. announced his intention of making a specialty of diseases of the eye.

HAWKE, MERVYN SAUNDERS

Merv. was born May 13, 1885, in Fernbank. He acquired his primary education at Listowel High School. but completed his Matriculation at Jarvis St. Collegiate Institute in '04. Filled with ambition, he entered Medicine with the class of '08, and has always been one of the prominent men of his class, his popularity growing with each passing year. In 1904 he was a member of the University Glee Club, and in 1905 was elected member of the At-Home Committee. His popularity was again shown in his election by acclamation to the coveted position of President of the At-Home in '07.

HAYWOOD, ALFRED KIMBALL

The subject of this biography was born in Toronto in 1886. He obtained his primary education at Upper Canada College. The fall of 1904 found Alf. studying "Bones" with the Medical class of '08. His smiling countenance was soon known to all the members of his own year by the distinguished part he played in "scraps" and "hustles." He was a member of the Dinner Committee in his third year. He is a member of the Phi Delta Theta Fraternity.

HILL, CLARENCE EDGAR

^ The heights, by great men reached and kept,

Were not attained by sudden flight, But they, while their companions slept, Were toiling upward in the night.

Clare was born twenty-one years ago in the village of Stouffville, Ont., and in the due course of events moved to Toronto in 1897, matriculating from Jameson Avenue Collegiate Institute in 1904. Always of a lively, optimistic disposition, his energy and ambition have steadily urged him forward till now he is found in his final year in Medicine. Summer generally finds Clare in Muskoka, where he has almost become a naturalized citizen. Being a resident of Toronto, he has many outside interests, which, however, do not interfere with his academic work. Fortune has placed him in a position where he makes many friends, who will watch closely for the results of his faithful application to duty.

IIBWDDD CDCII DOILGIAG

HEWETT, CECIL DOUGLAS

Born August 18th, 1884, at Teluk Anson, Malay, Straits Settlements: educated in England at Bedford Grammar School 1894-1898, Hart House School, Burnham, Somerset, 1898-1901. Chigwell Grammar School, Essex 1901-1903. Caius College, Cambridge University 1903-1904. C. D. Hewett came to Canada in August, 1904. He went to Winnipeg, where he joined the rest of his family. In company with his father, he visited British Columbia and the West. He registered as a Medical student at Toronto University in Oct., 1904. Each session he has played as goal-keeper for the Football Team of '08. In the summer months of 1907 he spent a very useful and enjoyable holiday at the Homewood Sanitarium, Guelph, in the capacity of Dispenser and Medical Assistant.

HORTON, BERTRAND BLAKE

"Haply the gods so moulded every trait
That mortals dare not criticize his
way,"

Bertrand Blake Horton had "the cauld blast blaw itsel' " in upon him in Northumberland County, Ont., in the year 1881. The son of a Methodist clergyman, he received his preliminary training in the primary halls of learning in different localities. He spent three years in Trenton, matriculating in 1900 with The following year, first-class honors. spent at Albert College, Belleville, obtained for him a superior Honor Matriculation and Senior Leaving standing. Following a term at Lindsay Model School, we next find our hero teaching for three years at Lakefield in the Kawartha Lake region. During the past four years his affability has won for him the good-will of the undergraduate body,

HURST, REUBEN L

"He is the soul of honour."

Reuben first breathed the breath of life on that frosty morning, February 1. 1882, in Peffers, Perth County, Ontario. Reube received his early education in the public school at Peffers. After leaving school he spent five years of unsettled life. As days passed he thought "of the morrow" and decided to return to the books, entering Stratford Collegiate Institute in '02 and matriculating in 1904. R. L. cast in his lot with the students of '08 of the Medical Faculty of the University of Toronto. He is known among his year as a good fellow, of whom we can look for good honest work in his future life.

JACKSON, GORDON PARK

"Conspicuous for mirth and laughter; The ladies first, the fellows—after."

To anticipate the disputes of after years, we beg to announce that Gordon was born in Elora, Nov. 30th, 1884. Becoming bored, however, he soon hastened to Toronto, where he "did time" at Gladstone Avenue and Queen Victoria Public Schools. In 1902 he matriculated from Jameson Avenue Collegiate Institute, and for one whole year tried Biology and Physics. Then, wishing to be either fish or fowl, he entered Medicine with the class of '08, and became identified with rugby football. He was Captain of the Varsity III. Team in his first year and has always been prominent on his Faculty's Mulock teams. One likes Gordon on sight, and he improves on acquaintance. His genial presence and hearty manner will tide him over many difficulties, and inspire hope in the hearts of the sick ones. He is a member of the Alpha Kappa Kappa Fraternity.

HYLAND, GORDON

Gordon Hyland was born September 23rd, 1886. He received his preliminary education at Upper Canada College, matriculating in 1903. In 1904 he entered the Medical class of '08. He has won for himself an enviable reputation as a "disturber of the peace." In spite of many social duties he has nevertheless proved himself an efficient student, and his pathological drawings are the pride of Unit Room T. We are all confident that he will have a brilliant future.

JAMES, ARTHUR

"All young and ignorant was he, But innocent and mild."

Art was born and reared in the city of Brantford. He received his early education at Brantford Collegiate Institute, graduating from there in 1904. But having a keen desire to delve into the mysteries of the healing art, he entered Medicine with the class of '08. He has been both a popular and a good student; not a hard worker by any means, but one prominent in every side of college life. He was particularly active in social affairs, hardly missing a University dance. In sports he was also a participant, playing with the Junior Meds. in the Jennings Cup Series. He is a member of the Intercollegiate Basketball Committee. In leaving school and entering into the sterner duties of life, we all wish and predict for him a very successful career.

JAMIESON, DOUGALD GALBRAITH

"The rank is but the guinea's stamp, The man's the gaud for a' that."

Dougald Galbraith Jamieson honored the Scotch burg of Beaverton with his initial visit in 1881. Removing to Victoria County, he gained his elementary education at Glenarm Public School, and later became a distinguished student of Lindsay Collegiate Institute, from which he matriculated. For three years the lights and shadows incident to a schoolmaster's life played over his path. And then the inevitable turn landed "Duke" among the vigorous freshmen Meds. A typical '08 boy, he was a keen athlete, bright student, and cheery classmate. He was a familiar figure in the reading-room and his smiling countenance will ever be vividly recalled by his confreres of '08. The honors he received from his class were: Captain B. B. Team, 1906: Member Dinner Committee, 1907: Representative to Queen's, 1908.

JOHNSTON, THOMAS JAMES

"The mind's the measure of the man."

Carthage, in Perth County, is responsible for "Tom" with the honor of his early education divided among the rural school, Listowel High School, and Me-Master University. The farm could not contain him, so turning his back upon the rustic charms of his early environment. he studied a year in Detroit Medical School previous to his advent in the class of '08 in the fall of 1905, Here he has proven, to all who know him, a warm friend and a scholar of exceptional ability. He has a bright, cheerful, loving and modest disposition, and being endowed with an unquenchable determination, we feel sure that his chosen profession must, in the years to come, yield a leading place to his superior qualities.

JAMIESON, LEONARD FOSTER

Was born at Port Hope. He attended the Blenheim Public School, and matriculated from the Ridgetown Collegiate Institute. After attending the Western University for two years, he showed his good judgment by continuing his medical studies in the Medical Faculty of the University of Toronto. His quiet, yet genial disposition have won for him many friends.

KELLY, B E.

"And the lock of lustrous curls that made his forehead like a rising sun."

It was twenty-one years ago at Bridgenorth, that Kelly first cried for the bottle, and since that time has had a great longing for liquid diet, but of a different nature-strange to say. He received his primary education at Peterboro Collegiate Institute, and finally, having decided to enter Medicine, joined the '08 class of the Medical Faculty of the University of Toronto. In his first year, when deeply interested in his studies, he often became confused with the Porifera and Protozoa. It was in his second year that Kelly became more prominent, having been chosen Captain of Intercollegiate F. T., and under his "iron hand" that team flourished. He was a member of the Torontonensis Board in his fourth year, and helped the good work along to the satisfaction of the entire student body. Kelly's career will be watched by all and doubtless, in the years yet to come, we will see his smiling countenance wrapped up in the leaves of Surgery.

KEYES, JOHN ELLWOOD L.

"Our youth we can have but to-day,
We can always find time to grow old."

Keyes was born in Barrie in 1887. He attended several different public schools and also the Lindsay Collegiate Institute from which he matriculated. Being of an enquiring mind he decided to give vent to his youthful energies in the study of Medicine, and accordingly entered the class of '08. Keyes has won many friends among his classmates and we wish him a successful future.

KRUPP, WESTON

"Then up stepped he
And all the doctors made a pause."

Weston Krupp is of the Oxford (New Dundee) variety. At public school he was a football enthusiast until an accident stopped it. Three years were spent at home and that was enough for "Willie." His restless, expanding mind seek ing broader fields, he went to Berlin High School and Model School, and spent the following year teaching, but only as a placebo, for we next see him registering with '08 Meds. His record as a favorite is unequalled. He was elected to the At-Home Committee in the first year, was elected as delegate to Nashville Convention in the second year, represented the Faculty of Medicine at a Knox College function, and was Vice-President of the University Y. M. C. A. in the final year.

KINSEY, ALBERT LAUDER

"Thus spoke the monk in solemn tone:
"I was not always a man of woe,""

Bert's earlier days were spent among the pine trees of rocky Muskoka, in the town of Bracebridge, where by the aid of Cornelius Nepos he graduated from the collegiate in 1903. Eager for knowledge and professional life, he decided to expend his energies by entering the class of '08, of the University of Toronto. He has always taken a keen interest in athletics, and all excitement prevailing at the college, which endeared him to his fellow students. Being a good sport, and brilliant student, we trust his future career in his chosen profession will be as bright and successful as his college days.

Ţ

LAILEY, WALTER WHITNEY

"The brave man seeks not popular applause."

Walter Whitney Lailey, after a preliminary course in the Model School, Toronto, attended the Woodstock College, from which he matriculated in 1899. After a year spent in the West, the country to produce iron frames and cast iron muscles, he returned to the Queen City to spend four years in McMaster University, where after a course in Special Science he graduated in 1904. The fall of '04 found him enlisting in the ranks of '08 Meds. His big figure has ever been a favorite and familiar sight on the campus in the battles of the Senior Rugby Series, nor was he less familiar to the Association ball enthusiasts. His knowledge of the game gave wide scope to his executive ability while a member of the University Athletic Association during the last two years, and its Vice-President in 1907-'08. Popular in athletes, popular in class, we are assured he will be no less popular and successful as a physician.

LARGE, OLIVER SYDNEY

Oliver Sydney Large was born Jan. 18, 1886, in Poole. He received his primary education at Stratford Collegiate Institute, from which he graduated in '04. The ever popular "Magnus" dawned on our horizon, with a smile on his face which has never left it, and which has made him the best known and most popular man in Medicine. His popularity was demonstrated by his election by acclamation as Vice-President of '08, and also as Treasurer of the Medical Society in '07-'08, and as Representative to the At-Home Committee in '08. His military ability and marksmanship secured for him the appointment as Lieutenant of the University Rifle Corps. He was also a member of the Graduating Photo Comimttee.

MABEE, WILLIAM.

"A woman is only a woman, But a good cigar is a smoke,"

The class of '08 owes much to the hamlet of Etobicoke for the birth and public school training of Bill Mabee. He then had his eye on Varsity, for he soon afterwards wandered in that direction. Realizing, however, that matriculation would come in handy, he remained over at Toronto Junction Collegiate to play football and get other people into mischief. The strain being too great, Bill was compelled by ill-health to postpone his further search of knowledge until October, 1903. During the interim his experience behind the drug counter is well worth the envy of any student of Medicine. As a member of '08 he has proven himself to be a student of exceptional worth, and will long be remembered as a prince of good fellows. And now as he goes out to follow his chosen profession we wish him that success which his merits and sense of honor are sure to bring him.

LAWSON, JOSEPH HENRY

"Always roaming around with a hungry heart."

In 1902 Joe captured the Edward Blake Scholarship in Moderns and Science, came to Toronto, and leaving his native town of Brampton, came to Toronto and enrolled in the Class of Arts, '06, Graduating with honors in the Biological and Physical Science Course, he received his B.A. in the partially-completed Convocation Hall. Joe's notes show verbatim the first lectures in our new Medical Building. His six years' study in B. and P. has given him that breadth of mind which only comes to those who enter such a magnificent course. His physique, mental capacities, love of labor, high ideals, and sympathetic nature, all fit him for the life-work of a true doctor. Joe is a member of the Alpha Kappa Kappa Fraternity.

LESLIE. NORMAN VICTOR

"Let something good be said."

—James Whitcomb Riley.

Born in the city of Hamilton on the twentieth day of September, 1883. He received his preparatory education at Upper Canada College, and before entering Medicine he spent three years in Arts.

MILLS. STANLEY GORDON

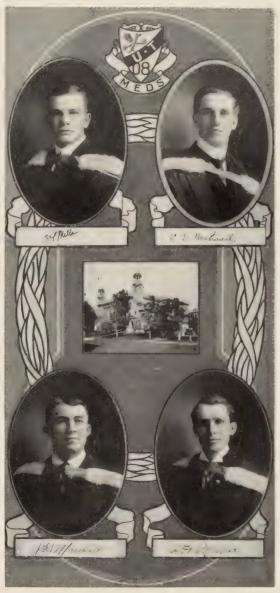

"How dull it is to pause, to rest unburnished."

Stanley Gordon Mills was born in Winnipeg, August 13th, 1885. He came to Toronto in 1889 and received his preparatory education at Jarvis Collegiate Institute. In the fall of 1902 he entered the Faculty of Arts in the Biology and Physics Course. In 1906 he managed to receive his B.A. degree from the authorities, after which he entered the Faculty of Medicine.

MARSHALL, JAMES FREDERICK S.

James Frederick Stewart Marshall, or 'Bishop.' was born in 1887. He obtained his primary education at Forest High School, and it was a lucky day for the class of '08 when Dame Fortune guided him to Toronto. He has represented his year and the Meds. in baseball and in rugby, having played on the Mulock Cup Teams. In his final year he was Treasurer for the 'At-Home.' His enthusiasm for athletics was only excelled by his capabilities for grasping his work. So here is good luck to 'Bishop' and a successful career.

HANDER HANDER HANDER

MAHOOD, CECIL STANLEY

"O, he sits high in all the people's hearts."

Cecil Stanley Mahood was born in the picturesque village of Lakelet. Here he obtained his first degree of knowledge and then going to Harriston matriculated in 1900. Believing that knowledge leads to sovereign power, he joined class '04 Victoria. Remaining here some two years and believing he could do more for his fellow men, he joined '06 Medicine. Taken ill after his first year he was obliged to join '08. He not only gained the confidence of his classmates as a fellowstudent, but also as an athlete, and was elected to the Presidency of the Athletic Association. Through his instrumentality trophies were won which never before were captured by teams in Medicine. He played on '08 Baseball and Football Teams and on Senior Meds. championship teams. As little works have been watched in the past, so greater ones will be watched in the future.

MILLAR, ADAM HUME

"Gic fools their silk and knaves their wine,

But I'll tak' the Globe."

One of the most popular members of the class is Millar. Born near Castleton, East Northumberland, he attended public school there and high school at Colborne, The next two years he spent wielding the rod of authority as village schoolmaster in his native town. Entering Medicine with the class of '08 he has proven himself a good student. He is also noted as a baseball enthusiast and a politician of the most chronic variety, he and his "Globe" being inseparable. His weakness led to his election to the Students' Parliament this year. "Ad." is sure of success in his chosen profession and carries with him the good will of his classmates.

MILLYARD, WILEY SHELL

"He who loves not wine, women and song Remains a fool all his life long."

It was in Kingsville, away down by the blue and restless waters of Lake Erie, the nurse first mantled a kicking form and remarked to the peering father that it was a "Wiley" kid, and this turned out to be no wild hallucination. Being a son of the parsonage, many various schoolvards were graced with his serene countenance, but Exeter alone is responsible for his high school discipline. Assimilating all drug knowledge in three years, Wiley entered a wider field of application and joined class '08. Mixing in the social life, we here also find him a peer, and the Meds. recognizing this he had the honor of representing them at the University Conversazione of '08.

MONKMAN, JOHN ALFRED

"He is wise who talks but little."

John Alfred Monkman was born in the Township of Arran, County of Bruce, Ont., in 1874. He took his Junior Leaving in Port Elgin High School in 1894, attended the Ottawa Normal School in 1896, and secured his Senior Leaving Certificate from the Owen Sound Collegiate Institute in 1899. After having taught school for several years in Ontario and in the North-West Territories he decided to study Medicine, and is to be found in the graduating class in 1908.

MINTHORN, HERBERT LORNE

"This, above all—to thine own self be true.

And it must follow as the night the day.

Thou canst not then be false to any man."

The subject of this sketch first saw the light of day on February 25, 1884. Having received his preliminary education at Queenston Heights and Niagara Falls, he had long entertained the early desire of studying the "healing art," and entered the University of Toronto in 1903. But, owing to ill-health, he was forced to drop his studies for a year and we now find him in the graduating class of '08. He has proven himself to be a brilliant student and his gentle manner and genial disposition have won for him many friends, and every good wish for his future welfare is tendered to him by his fellow students.

MONTGOMERY, JOHN EDWARD

"Tears, idle tears, I know not what they mean."

Barrie "Gazette," Jan. 26, 1886: "Born to Mr. and Mrs. F. M. Montgomery, a son." Such was the modest announcement which heralded the birth of '08's "glass of fashion," for who, except his parents, could know how important an event it was. The conventional course of training followed for John E. till, in 1903, he was emancipated by matriculation from the Barrie Collegiate Institute. Following his natural bent, he then registered in Medicine at Toronto, where, as any nurse will testify, he has been most enthusiastic in his work. Jack has proved himself no mean student, and gives promise of great professional ability. His happy disposition has endeared him to his friends, other qualities to the ladies.

In Memoriam

Henry Aldworth Daly, B,A.

Died November 4th, 1906

"A hand that can be clasped no more."

MOORE, HERMAN HENRY

"Of manners gentle, of affections mild, In wit a man, simplicity a child."

Herman first expanded his lungs in -, 18-. After receiving his teacher's certificate from Aurora High School he spent a few years imparting some of his knowledge to the younger generation. During the year of 1902 he took notes from ---- at Ottawa Normal School. From Ottawa he wandered to Temiskaming, where he proceeded to direct the affairs of the Temiskaming Navigation Company. During these years he gradually drifted from bad to worse, and finally landed in Toronto in October. 1904, registering in the Faculty of Medicine. Here he soon won the respect of his fellow students, which was shown by electing him as Representative of '08 on the Medical Society of 1905. His friends feel that the fates have a successful future in store for him.

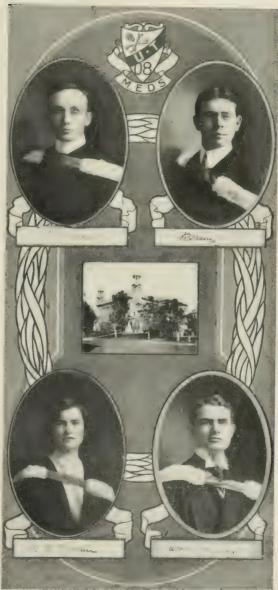

MORDEN, MILLIE

"Her airs, her manner, all who saw, admired;

Courteous, though coy, and gentle, though retired;

The joy of youth and health her eyes displayed,

And ease of heart her every look con veved."

MOORE, S. E.

"My good blade carres the casques of men,

My tough lance thrusteth sure."

"Sammy" first inflated his lungs in Collingwood. He received his early education in Chesley, Ont., but not finding the Saugeen River wide wide enough, we next find him diving off the high rocks of Bruce Peninsula, in the meantime completing his matriculation at Wiarton High School. Contracting that dread disease, "Western fever," we next find him roaming the wild and woolly West. This treatment not suiting his taste, he decides to prescribe his own and enters Medicine with the renowned '08 class. Sam has always proved himself a thorough student, a good fellow, and his frank manner and sterling character have won for him a host of friends and will insure him success through life.

MURRAY, ALLISTER McDONALD

"For nature made him what he is,
And never made another."

Allie is one of the outstanding mem bers of '08 and first graced the planet at the village of Newton, Perth County. While travelling the rough path of preparatory school life Allie escaped many of his merited punishments. But regardless of his faults, his instructors saw in him marvellous capabilities and spurred him on to fame - in which direction he is still travelling. After completing his public school education at Milverton, we next find him disciplined by old Cam at Stratford Collegiate. Now he is lost for two years to halls of learning, but again the Fates guide him into Medicine. A lover of fun, a disciple of Cupid, and never letting study interfere with his education, the class expect much of him.

McCABE, LEO GEORGE

"A man of such fastidious taste, He never thought the best too good."

Leo George McCabe arrived in the little hamlet of Nixon in 1886. After a short rest Mac resumed his journey on life's lone pathway, and has been alone ever since, but still holds out for the future. He matriculated at Waterdown in 1903. He joined the class of '08. where he has made many warm friends and proved himself to be a jolly good fellow. Mac held positions on both baseball and football Inter-year teams. As a fitting tribute to his sterling qualities his fellow-students honored him as their representative to McGill University. When college days are gone Mac will carry with him the best wishes of '08 for his future success and happiness.

McCULLOCH. WILLIAM GEORGE

"His mind his kingdom, And his will his law."

Born at Enfield, Mac was a promising reinforcement to the old clan. He re ceived his early education at the public school there and was an honor student in Oshawa High School. He attended Ottawa Normal School in '01, and later was Principal of Public Schools at Port Perry and Oshawa, until he entered Medicine in '04 as a member of the '08 class. Not only on the campus did he distinguish himself as "full back" in the Association Football Team, but also in college, occupying a prominent place among the honor men of his year. His literary genius was recognized in his being appointed Medical Editor of Torontonensis. His sterling qualities and devotion to his profession bespeak for him a bright future.

McCORMACK, VICTOR VIVIAN

Victor Vivian McCormack, better known as "Vic," landed in Canada twenty-five years ago at a small burg in York County. Ont., which still bears his name, "Vivian.'' After being a considerable worry to his parents and to a number of public school teachers of that place, he attended Markham High School, completing his course in 1900. The following two years he spent wielding the bir h, but being ambitious he left this occupation to join the class of '07 Medicine and became one of the most popular boys of that year. and established a reputation in senior football circles. After completing his second year, business investments claimed his attention for a year, and then we find him among the class of '08, where he has the reputation of being not only a good fellow, but also an ambitious and energetic student. We feel certain that his genial disposition coupled with his extensive knowledge of medicine, will bring him many patients as well as friends.

McEWEN, JOHN ALBERT

"May ne'er guid luck be far awa'."

Near the town of Hensall, County of Huron, Jock first raised his lusty cry. Here Mac received his early education. Continuing his studies he obtained his high school education at Glencoe and Clinton, where he was a member of the Intercollegiate Football team, which won the Hough Cup. Entering Medicine with Class '08, he has won for himself many friends by his typical Highland characteristics. In athletics he has proven himself a worthy sport, taking an active part, especially aiding materially to win the football cup for '08. For him in his chosen profession we venture a most favorable prognosis.

MACFARLANE, PERCY BLAKELY

"Undaunted Truth and Dignity of mind, Courage compos'd and keen; sound Temperance,

Healthful in heart and look."

A "son of the parsonage," Mac learned his ABC's in divers places, finally matriculating from Albert College, Belleville, in 1901. He came to Victoria College and, being a hard worker, enrolled in the B. and P. Course, graduating in Arts in 1906. Although always a good steady worker, he has found time to play football and hockey and he figured on the Mulock and Jennings Cup Teams at Victoria for several years. For the last two years he has been Assistant Demonstrator in Physiology and Pharmacology. A sound common-sense, together with high professional ideals, should bring him all the success which his many friends wish for him.

McKAY, CHARLES REGINALD

"He could distinguish and divide
A hair, 'twixt south and south-west
side."

Commonly known as "Mickey," honored Port Colborne as his birthplace, which humble town rejoiced exceedingly at his arrival. He received his primary education and flourished under the "birch" at Welland. Having definitely decided to enter Medicine he was initiated into high life by two other "Meds." at 421/4 Anne Street. In his second year, he spent many weary hours with "Duke" suturing important structures that had been carelessly lacerated by Kelly and Wilson. In his final year, as a penance for his sins, he was sent as representative to Victoria. His genial character will assure his success as a practitioner.

McILMOYLE, WM. DAVID

"Why should life all labor be?"

If there was any dissatisfaction among the people of Fraserville when they woke up on the morning of Aug. 8th, 1884, and saw what the stork had left them during the darkness of the preceding night, it is all rarefied long ere this, for Mac turned out to be a real live one. He may not have been a very pretty kid, but we can shake he could deal out the upper cuts and stomach hooks with any of the boys of Fraserville. In his native village he learned much, in Millbrook more, and specialized along certain lines which he pursued ardently during his Medical Course. Mac is a Scotch Presbyterian and carries the "Globe." He was and is a man-Mac can't be anything else. May Providence share her good things on him as Mac shared his money among the

McKELVEY, ALEXANDER DUNBAR

On September 17, 1885, in Brussels, Ont., there was born Alexander Dunbar McKelvey. Like all other children, he grew up-experiencing all the intercurrent diseases of childhood -and eventually matriculated from Mount Forest Collegiate in 1902. With the genuine greenness which our country friends always exhibit, he registered in Arts at University of Toronto, but after completing two years decided that Medicine—unadulterated-was the better course. In spite of his almost supernatural love for Y.M.C.A. meetings, the patient has done exceedingly well in his course and holds a good standing at graduation.

MACKENZIE, CHARLES RODERICK

"Our bootless host of high-born beggars, MacLeans, MacKenzies, and MacGregors."

He was born at St. Thomas on Feb. 16, 1885. He received his early education in the public school and collegiate institute of his native town, graduating from the latter with Senior Leaving in 1904. His first serious studies were begun when he entered the Faculty of Medicine of the Uniersity of Toronto. He joined the class of '08, in which he is known to be a man with "strong mental grip and a wholesome capacity for hard work." His future is one of brightness and his many friends will without doubt be proud to claim Mac as "my old classmate."

McPHERSON, JAMES L.

"Come, gae us a hand, my trusty friend, And here's a hand o' minc."

James L. McPherson first cried and clung to the bottle at Teeswater, and has it in his grip yet (Haig & Haig). He compiled knowledge at Harriston, Owen Sound and even Hamilton, After recuperating at Kincardine for two years he joined the class of '08 to study the microscopic bugs of infection. Mac soon became a leading man of the year and served on '07 Medical Society Executive. His quiet and perceiving intellect, his commanding personality and his farreaching and unselfish triendship has won for him a distinct place in the hearts of the boys of '08. As Father Time dissipates the reminiscences of college days our conception of Mac shall grow illuminated for we shall experience how few there are like our good Scotch friend.

MACKINNON, ALLAN JAMES

"I dare do all that may become a man; Who dares do more is none."

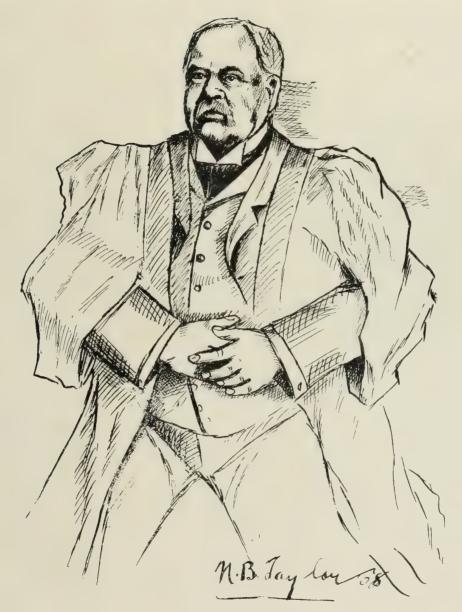

Allan James MacKinnon was born in the County of Peel, Ont. He attended the public school in his native county and received his secondary education at Orangeville High School, and later in Jameson Avenue Collegiate Institute, Toronto. He then taught school for a time; afterwards we find him a tiller of the soil. However, his early desire to study Medicine returning, he entered his Medical Course, and we find him in the graduating class of 1908.

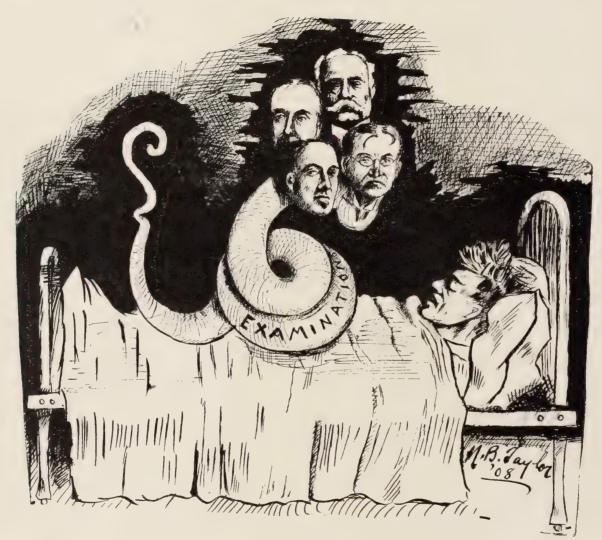

McVEAN, SARAH GEORGIANA

"A woman's a woman, for a' that."

Sarah McVean, better known as "Sally," was born at Dresden, Ontario. She matriculated from London Collegiate Institute, and commenced her Medical career at the Woman's Medical College in 1903. At the end of her sophomore year she deserted the ranks of '07, dropping back to '08. She believed in neither "all work" nor "all play." for she has studied sanely and has been prominent socially. Her charming personality has gained her many friends who believe that usefulness and success lie before her. She is a member of Alpha Phi and Zeta Phi Sororities.

"Sometimes, gentlemen, the prominence is all over."

THE INCUBUS

LEACOCK, ROSAMOND M. B.

"It doth appear you are a worthy judge; You know the Law, your exposition hath been most sound."

Rosamond Leacock is a native of Toronto. She was educated at Orillia Collegiate Institute, then took one year in Arts at McGill University, commencing Medical study in 1904 at the Woman's Medical College. Perhaps Law lost what Medicine gained, for Miss Leacock's unruffled judicial turn of mind has been often times in evidence, and when a problem, medical or otherwise, required solution her direct, keen questions to the root of affairs have proven a useful pleasure to her classmates. This characteristic, combined with her studiousness and indefatigable energy, makes her future in Medicine open fair for her. She is a member of Zeta Phi Sorority.

PATERSON, ROBERT H., B.A.

"Mark you this youth, You will hear of him yet."

Born in Hamilton, of good old Scotch descent. Bert came to Toronto, registering in Arts, from which he graduated with honors. He then entered Medicine. '08. During his course he was prominent in University circles and was always an esteemed favorite. Bert is a member of Alpha Kappa Kappa Fraternity. Those who know him well find a deep, sympathetic nature which will, in the future, comfort many an aching heart and dispel the sorrows of a troubled mind. Conscience, his ruler, will always lead him in the path of duty, assuring us of his future success. Devoted to his calling and untiring in energy, we can safely prophesy Medicine will be richer for his life's work.

OGDEN. WILLIAM EDWARD

"A man of life upright,
Whose guiltless heart is free
From all dishonest deeds
Or thought of vanity."

Will is a Toronto boy, born in 1880, receiving his primary education in Rverson School and Harbord Collegiate, later graduating from Ridley College. Prompted by a worthy desire to perpetuate the good name of Ogden in Medical Annals, he registered in Medicine in 1902, but after his first year dropped out and became a "knight of the grip," representing a physicians' supply house in On tario. Desiring to complete his course he registered with the 1908 class. His popularity won him the Vice-Presidency of the Union and other offices during his course. Genial, affable, cultured, refined and truly professional, he is assured of a brilliant career. Fraternity: Alpha Kappa Kappa.

PHAIR, JACK THOMAS

Was born in Toronto, May 27, 1887. Graduating from public school he entered Harbord Collegiate Institute, matriculating in 1904. While at Harbord he took an active part in athletics, playing on Association football, hockey and tennis teams, winning the school and interscholastic championships in tennis in '04. Jack, as he is known to the boys, entered Medicine with '08. Here he continued his successful athletic career by playing on the Mulock Cup Rugby team, '06. He was elected Secretary-Treasurer of the Medical Athletic Society by acclamation. In '07 he captained the Senior Tennis team, and in the same year captaining Champion Tug-of-war team. His many friends, and all the men of '08 are his friends, wish him the same unbounded success in Medicine which he achieved in athletics.

PLEWES, WILLIAM FRANCIS

"A man he was to all the fellows dear."

Frank made his debut into this troublesome world in the city of London. Here he received his early training, and soon entered into the musical arena, being for several years organist and choir-master in one of the leading churches. His thrifty character drew him into business activities in Brantford and New York for a few years, but leaning toward a professional career, "Willie" came to Toronto, matriculated from the University and entered the '08 class in Medicine. He was always considered one of the strong men in the year, and his "fatherly" advice was weighed by all. His executive ability and genial manner vouch for him a successful professional career in the West, where he intends to locate.

PRATT. WALLACE

Wallace Pratt hails from the town of Cobourg. Here he received his early education, and after spending some time in the Bank of Toronto, he again resumed his studies, matriculating in 1903. The following summer saw him voyaging to the Land of the Heather and across to the Land of High Wines. Entering the class of '08, he has proved himself a thorough student in every particular. His failure to observe Osler's cold storage edict and his fondness for the skirl o' the bagpipe occasionally use their magnetic force, but 'a man's a man for a' that.'

POGUE, OSMAN A.

"A rantin', rovin', Billy," —BURNS.

The year 1885 being one of strife and turmoil, "Poguie" must needs get in line and just start trouble for his parents on Hallowe'en. After receiving his preliminary education in the public schools of Lindsay, he entered the Collegiate Institute of the same town, from which he graduated in 1903, the proud possessor of those small documents so necessary for admittance to the Faculty of Medicine, which course he entered in the fall of 1904. During his college days he took a lively interest in things medical and "otherwise." In his fourth year he was elected Secretary of the Medical At Home Committee.

PROWD. C. WESLEY

"One ruddy drop of manly blood the surging sea outweighs."

The subject of this sketch was born of Irish parents near Owen Sound, Ont., in the early eighties. His primary teaching he got at the Owen Sound Collegiate Institute. His next few years were strangely checkered. Genial, capable, clever, we see him as teacher, commercial traveller, guide, the same warm friend of all. People forgot the name in remembering the man. His course in Medicine has been brilliant. He carries a broad mind and a big heart. We love "Prowd." He was born for big things, and we shall follow closely the career of one whose future seems so big with promise.

RICE, ALLAN GORDON GRANT

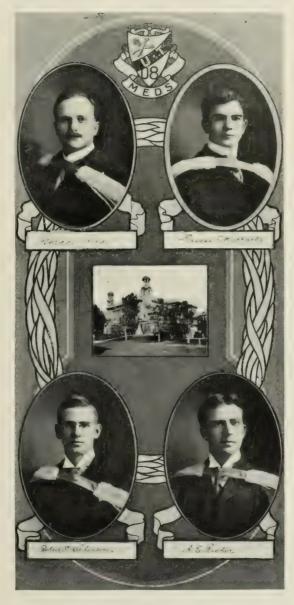

"An officer and a gentleman."

Gordon claims Welland County as his birthplace, and Welland cannot denv it. Very early in life he came to Toronto Junction, and busied himself in educational and journalistic work. After acquiring all the available knowledge at the Toronto Junction Collegiate Institute, he looked about for other fields to conquer. In the fall of 1902 he enrolled in the Faculty of Arts, Biological and Physical Science Department, from which he graduated June, 1906. Gordon has served faithfully and well on his class executive and as Vice-President of the Undergraduates' Union. He takes great interest in military affairs (N.B.-the knightly growth) and is a sergeant in the Army Medical Corps. Gordon is a member of the Alpha Kappa Kappa Fraternity.

RICHARDSON, ROBERT

Bob Richardson was born in the year 1886. He obtained his primary education at Upper Canada College, which institution he left in the spring of 1904 to enter Medicine in the following fall. Though of an unobtrusive and retiring nature, he has always been advanced by his fellows to any position requiring stability and sound judgment. He was elected Curator of the Medical Society for 1906 and 1907. He was also appointed to the At-Home and Dinner Committees of 1907. Richardson's love for travel and the collection of antiques is paramount; he has visited nearly every explored country on the map, each of which is represented on the walls of his den by some weapon redolent with ancient lore.

RICHARDS, GORDON EARLE

"Dick," as he is popularly known among the class of "08," first beheld the light of day in the village of Lyn. Leeds County. At the age of six he was placed under the care of the village school-master at Newboro. Later he attended High School at Athens. After completing a successful course, he took Horace Greelev's advice and went West, where he spent two years of his life, when he decided to enter the glorious profession of Medicine, with the class of "08." He has been an ardent Y.M.C.A. worker, being President of the Medical Executive for the present year. His genial disposition, his happy manner and his auburn hair will not soon be forgotten.

RICKER, ALBERT CARMAN

"Thou art of those, who better help their friends

With sage advice, than usurers with gold."

Carman was born in Haldimand County in the nineteenth century. His infant mind soon turned to things educational, and e'er long we find him a graduate of the Dunnville High School. He wielded the rod for some time, but in the fall of 1902 he yielded to the blandishments of the heavenly Minerva and enrolled himself in the class of 1906. He graduated in Arts, June, 1906. He was a member of the Executives of the Literary Society and of the Natural Science Association. He is a careful student, very thorough in his work and every inch a man.

ROBERTSON, WILLIAM ALEX.

"Keeps his counsel, does his duty, Cleaves to friends and loveth beauty."

Will was born in Elma, Perth County, and received his early education at Mitchell High School. Later took his Senior Leaving from Stratford Collegiate Institute. After attending Model in Mitchell, he taught successfully at Newry for four years. Being of a scientific turn of mind, he determined to study Medicine and entered the class of '08. As a student Will has distinguished himself as one of exceptional ability, and not in study alone, but also on the football field he has won honors. His genial disposition has won him many warm friends. and we predict for him a most brilliant future.

ROSS, CHARLES FREDERICK W.

"And I said of Medicine, that this is an art which considers the constitution of the patient, and has principles of action and reason in each case."

Charles Frederick William Ross became a citizen of earth at Harwood, Ont., on October 22, 1883. He received his primary education at the village school and afterward attended the Cobourg and Peterboro' Collegiate Institutes. He then entered the class of '08 in Medicine at Toronto University. Of warm though retiring disposition, those who knew him best most appreciated his good qualities. He possesses marked ability and determination and his many friends confidently predict a very successful future in his chosen profession.

ROGERS, GEORGE WESTLAKE

"If aught of prophecy be mine, Thou will not live in vain."

He comes from the tobacco country and can pull out a small package at any time to make him think of and feel at home. He was born at Kingsville, where he learned to read, write and think, all of which he can do well. He matriculated at Leamington and duty forced him into Medicine. He shows the sterling qualities of the U. E. L. stock, of which he claims his lineage, and after their manner he has been compiling medical knowledge during his course so that now we see disease and infection fall back and atrophy as Rog, moves forward to life's duty. Though no Sunday-school teacher. he goes to the Presbyterian Church and his Globe keeps him good all week. He drinks Haig & Haig when out with

ROUTLEDGE, JAMES ANSON

Following the example of many other great men. James Anson chose for his native land the County of Bruce. He attended public school at Dunkeld, and, later, Walkerton Collegiate. From here the scene shifts to the rolling plains and cattle-covered hills of Montana, where he lived near to Nature's heart for five years, when he decided to join the class of '08. He is a member of the Students' Parliament and a crack shot at the rifle ranges. "Jamie" has proven himself a good student and by his modest, whole-hearted and friendly ways has become a favorite with every one. For him we are confident of a bright and successful future in which we wish him a hearty "bon vovage."

ROWLAND, CHARLES EDWARD

"He knew the cause of every malady."

Charl, has served a full sentence at Varsity and has learned much that is not written in the prescribed text-books. His first term of four years was spent in the Classical Course from which he was graduated in 1901. Then for three years he spoke wisely and well to the boys at Ridley College, St. Catharines, where he made lasting impressions. Throughout his course in Medicine Charl, has proved himself a good student and has obtained an honor standing. During his third and fourth years he has been Demonstrator in the Department of Physiology. He is a good fellow, too, and a true sport, which makes us forgive his being clever, Charl, is a Member of the Nu Sigma Nu Fraternity.

SHEARD, ROBERT HENRY

"Cool as an icicle and as determined as the rock it hangs upon."

Bob first became a citizen in Stratford, Ont., in 1884. Before reaching the pinfeather age he emigrated to Toronto, where he received his early training. He attended Jarvis Collegiate and Upper Canada College. On matriculating from the latter institution in 1904 he decided to enter Medicine, so joined the class of '08. Bob's ability is not confined to Medicine. His artistic representation of microscopic sections would make Zeigler envious. Unassuming though he is, his college career has not been uneventful, and he goes out into the world with bright prospects for a useful career, attended by the best wishes of his fellow students.

SCOTT, WILLIAM RUSSEL

William Russel Scott was born in St. Thomas, the "City of the Saints," in February, 1881. His public school days were spent in St. Thomas. Later he attended the St. Thomas Collegiate Institute, from which he graduated in 1899. As a "Knight of the Key" he spent the next five years at Chatham, when he wisely decided to enter Medicine with the class of '08. His perseverance and faithful work has made him a good student, while outside of the lecture room no man in the year is better known as a good fellow than "Bill Scott." He has won for himself many warm friends in the class of '08 who wish him much success in his medical career.

SHEPHERD, WILLIAM GORDON

"Music hath charms."

The subject of this biography was born in Almonte, Ontario, February 22, 1884. He received his primary education at Almonte High School, obtaining his Junior Leaving in 1901. He then went to Ottawa to study Pharmacy, and while there enlisted in the Canadian Mounted Rifles, going with them to South Africa. On his return he again entered Pharmacy, spending a year in New York. In the fall of '04 he entered the Medical class of '08. Possessed of an excellent and well trained baritone voice, he won a much-coveted place in the Mendelssohn Choir, singing last year with them here, in Buffalo and in New York. He is singing with them this year also. He has been baritone soloist in Trinity Methodist Church since 1905. He was a member of the Third Year Dinner Committee last year, and is a Member of the Phi Delta Theta Fraternity.

SHEPLEY, EARL EVERARD

"His years but young, but his experi-

His head unmellowed, but his judgment ripe."

Born in the sunny County of Essex, near the village of Harrow, Mr. Shepley removed early in life to the town of Leamington, Ont., where he received his education. Having decided on the study of Medicine, he entered the '08 class at the University of Toronto. Despite the drawback of a serious illness in his second year he was able, by natural ability and honest effort, to retain his place in his class. We feel we will not be disappointed in predicting a bright and prosperous future for this son of Old Ontario.

SMITH, JOHN MASSON

"A friend so faithful and tried and true,

That nothing can win him from me and you."

Masson first saw the light of day in Cannington, Sept. 18, 1885. After only two years spent in Lindsay Collegiate he matriculated in 1904, and entered the Medical class of '08 the following fall. A good student, but more than that, a thoroughly good fellow, he has always taken a keen interest in all aspects of village life. Unobtrusive, but approach able, he has made for himself a host of friends, both in and outside University circles, whose best wish for him is that he may win the success he deserves. We are all confident that he will reflect credit on his Alma Mater.

SMITH, ESTELLA OLIVE

"She hath the gracious calm and poise Of life that waits and wills,"

Estella Olive Smith was born and educated in Toronto. She has taught in the public schools and entered Medicine in 1903 at the Women's Medical College. Miss Smith is a splendid student, possessing a tenacity of purpose, clearness of vision, and power of mentality that have carried her steadily onward in spite of difficulties, enabling her to keep in touch with home, church and social affairs. while doing good work at college. The Women Students' Medical Society appointed her President for 1907-8. She is gifted with a peculiarly winning personality and ability to see from another's standpoint which have endeared her to her fellow-students and ensure for her the truest success in future years.

SPENCER, FRANK EVERETTE

"Some fell by landanum.

And some by steel.

And death in ambush lay
In every pill."

Frank was born in Picton, Prince Edward County, on the 9th of June, 1885. Received his public school and collegiate education at Picton. Completed his course in the collegiate in July, 1994. Entered Medicine with the class of 1908. Ite is a man not understood by his fellow-students, yet will undoubtedly make a good physician.

TAYLOR, NORMAN BURKE

"Benevolent and kind he was, and had a smile for all."

The subject of this interesting tale is a native of Toronto, in which place he was born in 1885, and attended Jarvis Street Collegiate. After some valuable experience in the business world, gained in the Bank of Commerce, he entered upon the study of Medicine in the fall of 1904, and completed his matriculation in 1905. Earnest and cheerful, anything Norman cannot tell you he can draw for you. He is a member of the Nu Sigma Nu Fraternity.

THOMSON, JAMES

"In arguing, too, 'The Doctor' owned his skill

For, even though vanquished, he could argue still."

Jim was born in Hastings in 1887, a son of the manse, of Scotch parentage. He was educated at the public school in his native town and in Norwood High School, from which he matriculated. Being of a scientific mind he determined to study the Art and Science of Hippocrates and accordingly entered the class of '08. Among his classmates he has won many warm friends by his inherent good nature. The eight o'clock lecture was his greatest bane. As a student Jim was faithful and painstaking and we predict for him a rosy future.

THOMPSON, ALFRED ALEX.

"Self-reverence, self-knowledge, self-control.

These three alone lead life to sovereign power."

The subject of this sketch first saw the light of day in the township of East Flamboro, near the village of Waterdown, on the 8th of October, 1880. Having received his primary education in the Waterdown Public and High Schools, he engaged in agricultural pursuits for several years. Having had a desire from early youth to study the healing art, he entered upon his medical studies in the University of Toronto. Being of a genial and generous nature he made many friends during his undergraduate course, and we at length find him in the graduating class of 1908.

TINDALE, WILLIAM EDWARD

"The man who has no music in his soul, And is not moved by concord of sweet sounds,

Is fit for treasons, strategems, and spoils."

W. E. Tindale was first launched upon the world some twenty odd years ago in Woodstock. He attended public school and the collegiate there, matriculating with honors. After a few years engaged in office work in Woodstock, Indiana, Ohio, and Toronto, he decided to abandon the more lucrative field of business for the less selfish one of medicine, and joined the class of '08 in the fall of 1904. Possessed of decided musical ability, he has always unselfishly helped out our functions with high-class violin selections, and our only regret is that we have not had opportunities of hearing him oftener. We feel safe in predicting for him a successful future.

TOWERS, THOMAS LOGAN

"Idleness is but an appendix to nobility."

The subject of this touching little ditty was born in the year 1883 in Sarnia, Ont., where he matriculated in 1902. He entered the study of medicine in the fall of 1903. Owing to poor health he dropped out a year and entered the illustrious class of 1908, from which he hopes to be launched on the trusting public in the spring. Thomas is a member of the Zeta Psi Fraternity and his home address is Sarnia.

TYERMAN. HOWARD FLETCHER

"There is a nobleness of mind that heals wounds beyond salves."

H. F. Tyerman was born in Huron, Ont., December 28, 1880. He received his high school education at Hanover Collegiate, from which institution he graduated with Junior Leaving and Matricu lation standing. After teaching a couple of years he joined the class of '08 and had the honor of being its first President. Upon him devolved the difficult task of piloting the year through that troublous season when disturbed lectures and apologies to the Faculty on behalf of the class were the order of the day. The task was no sinecure, but Tyerman proved equal to the occasion and displayed an executive ability that marks him for great things in the future.

TROW, EMERSON JAMES

"A man not given to words or strife—a man of sense."

Stratford lost a good fellow when Emerson left town and came to the University. His first intention was to register in Arts in McMaster, but coming from a family of doctors it is not surprising that his chief interest was in Medicine, and he wisely cast in his lot with the Varsity Meds. Throughout his course he has been interested in all college sports and functions. His general good nature and irresistible smile have made him very popular in the school and will always win him friends. He has proven himself an honest student, a true sport and a gentleman. He is a member of the Nu Sigma Nu Fraternity.

WALKER, ROBERT RITCHIE

"His life is gentle; and the elements So mixed in him that Nature may stand up,

And say to all the world, 'This is a man,' ''

Robert R. Walker was born in 1886, in the village of Waterdown. Here he was fortunate in obtaining a good primary education. Securing his matriculation, he left his parental domicile in 1904 and showed his good discretion by joining '08 Medicine. During his college days he has proved an intelligent and adept student. Not only in the line of his profession, but also on the campus, has he shown superiority in various contests. He was Captain of the famous '08 Baseball Team and has been one of the speedy forwards in the Inter Year and Senior Meds, teams which have carried off so many trophies. We predict for him an eminently bright future and extend "best wishes for his future success. ..

WALLACE, FREDERICK W.

"Take him for all in all, he was a man."

Frederick W. Wallace was born twenty two years ago near Saintfield, Ont. He took his primary education in that vicinity and matriculated from Uxbridge High School in 1904, after which he immediately entered the Medical course. His forefathers were of Scotch descent, of which race he has many of the characteristic traits. Although naturally of a retiring disposition, he has made many friends during his college life. In his third year he was elected to the position of Corresponding Secretary of the Medical Society. Fred. will always be known as a faithful student, a fast friend, and a man among men.

WARD, CHARLES BYRON

Not quite a quarter of a century ago West Middlesex greeted as a future citizen the subject of our sketch. Having distinguished himself more at school than as a worker on the farm, his name was enrolled at Strathroy Collegiate in '98. Leaving here in '01 his energies were for the next three years devoted to teaching. In '04 his initiation as a medical student at the Western University claimed attention. In '06 he decided to cast in his lot with Toronto men. From one of his dimensions one might expect something on the athletic field. In the photo of the champion football team of '05 those who seek will find the familiar face. The class lists testify to his ability as a student.

WALLACE, GUY HALIFAX

Was born in St. Thomas about a score of years ago, and is now one of the youngest of the class of '08. His preliminary education was obtained at St. Andrew's College of which he was Head Prefect during his last year. Since ma triculating in 1904, he has been on quite a number of university teams. In Rugby he played on the Seconds for two years, and during the past season seemed to have every chance of getting his first team colors when an unfortunate accident, early in October, put him out of the game for the rest of the year. He has also occupied the offices of Secretary, Captain and President of the Cricket Club. All his examinations have been passed with credit. He will probably some day occupy a high position in the medical world.

WELWOOD, THOMAS RICHARD

Thos. R. Welwood is a native of Caledon Township, in the County of Peel. His education was begun in the public school at Mono Mills and continued later at Orangeville High School, where he obtained Junior Leaving standing in 1900, and Senior Leaving and Senior Matriculation in 1901. During the autumn of 1901 he attended Normal School at Regina, and in January, 1902, accepted a position as teacher in Saltcoats, Sask., succeeding to the Principalship in the following December. During his stay there, as a side issue, he experimented in ranching and homesteading. In October, 1904, he resigned his position in Saltcoats and began the study of Medicine at Queen's University. After completing his second year he migrated to Toronto in 1906.

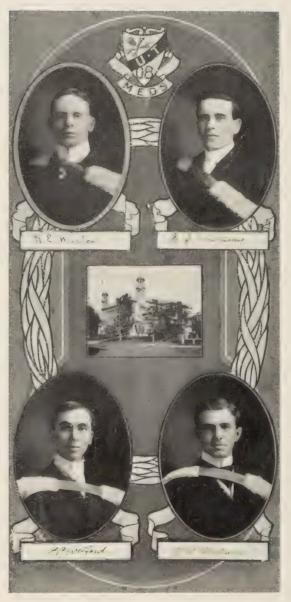

WESTON, R. E.

In the year 1887 the prospering town of Tillsonburg committed a fatal indiscretion, viz., it allowed the owner of the above peaceful physiognomy to come into existence. It would be unnecessary to describe the process of evolution by which he grew to robust boyhood and proved to his fellow citizens that Tillson burg had not committed an indiscretion after all, and when he demonstrated his wisdom by deciding to enter upon the study of Medicine with the class of '08, after having graduated from Tillsonburg High School in 1904, his friends all said that there surely was a career before him. Ever since starting his career in Medicine he has been a constant source of joyfulness to his fellow-students, and it will be with a distinct pang of regret that we part with him in the spring.

WILFORD, EDWARD C.

Born in Blyth, where he received his public school education, and where his parents still reside; attended Clinton C. I. and obtained Junior Leaving '02; attended Clinton Model School same year, after which he taught school until entering Medicine, 04. At college he took considerable interest in Y.M.C.A. work. In '06 was a delegate from '08 class to the Students' Volunteer Convention at Nashville, Tenn. In Sept., '07, while in New Ontario as a fireranger, he took typhoid, which proved to be very severe, and resulted in his losing the Xmas term of the final year. Wilford entered Medicine with the purpose of becoming a medical missionary, and after a post-graduate course in England intends going to China under the Methodist Church.

WHITEWAY, CHARLES I.

He was born at Musgrave Harbor, Nfld., March 5th, 1878. He received his later education at the Methodist College, St. John's, obtaining Intermediate Grade. During his two years at college he played on the Association Football Team, which won the Intercollegiate championship for two consecutive years. He taught elementary and superior schools for six years. He then entered Medicine as an '08 man at the University of Toronto.

WILLIAMS, GARNET WOLSELEY

"Describe him who can, An abridgment of all that is pleasant in man."

Garnet was born February, 1883, at Bunker Hill Farm, Aurora. His early years were spent receiving his preliminary education, and, when yet a boy, he chose the farm as his field of labor, where he spent four years. He then decided to enter the profession of Medicine. With this end in view he matriculated from Aurora High School, July, 1904, and registered at Toronto the same year. Here he is well known on the campus. For four years he has helped to uphold the honor of Old Varsity in the soccer game, in which they were Inter-Collegiate champions 1904-'05-'06. He was also one of the players chosen to represent the University on their tour to Philadelphia and New York, 1905, and in '06 he held the office of Vice-President of the Athletic Committee of the Faculty of Medicine. His friends bespeak a very successful future for him.

WILLIAMS, HARRY ADDISON

"And thus he bore, without abuse,
The grand old name of gentleman."

Harry Addison Williams was born in Clinton, Ontario, on April 24, 1880. He matriculated from Welland Collegiate in 1900. After two years of teaching he joined the class of '07. However, owing to illness in his third year, he fell in with the present graduating class. In this respect Harry has fulfilled the one qualification of a good physician as outlined by Plato in the Republic, namely: "A physician had better not be in robust health and should have all manner of disease in his own person." Harry has an agreeable personality, which will be a valuable asset to him in his future career.

WILSON, FRANCIS DOUGLAS

"A true friend to the true."

Pickering and Woodstock Colleges were the essential factors in Frank's preliminary education, and from the latter institution he matriculated in 1902. After attending McMaster University for a short time he decided that the medical profession had need of him, and entered with the class of '08. From the first Frank made himself a general favorite and he was elected to the At-Home Committee in 1906 and the Torontonensis Board in 1908. Possessing, as he does, the ability of keeping up numerous social as well as academic duties, and with his geniality to all with whom he comes in contact, all who know him feel sure that he will "make good" in his chosen profession.

WILLINSKY, ABRAHAM ISSAC

"So shall thou feed on Death, that feeds on man.

And Death, once dead there is no more duing then."

Complaint-Swelled head, Duration-Since March 29th, 1885. Family History -Excellent. Personal History-Born in Omaha, Neb., he settled in Toronto in 1890, where he attended Jarvis Collegiate, 1900-02, then took the B. & P. Course in Arts, graduating in 1906 with first-class honors. He positively denies bad habits. Present Condition—Complains of excessive sleepiness, bulimia and inaptitude for work. Agraphia and ill-fitting hats also observed. Physical Examination— He is a rather well-nourished individual of decidedly Semitic appearance. The cephalic region is enlarged, so also the abdomen. A characteristic cynicism and imperturbility are not uncommon. Prognosis-Very hopeful.

WINDSOR, F. EVELYN

"And I would that my tongue could utter

The thoughts that arise in me."

Evelyn Windsor, sometimes known as "Gipsy," is the eldest daughter of Rev. Walter Windsor. Her family resides in St. Johns, near Montreal. She was born in the latter city and educated at St. Johns High School. Matriculating at the age of fourteen, she came two years later to Toronto, commencing the study of Medicine at the Women's Medical College, 1904. Her course has been one of sunny success and happy friendships. It is not on record that she has ever been known to hurry in word or deed, but examination results show her standing always in the fore, and an emergency finds her ready. Miss Windsor is a member of Zeta Phi Sorority.

WOOD, J. H.

"Who mixed reason with pleasure and wisdom with mirth."

Born in Lambton County, Ont. Here he devoted his energies till 1904, when he decided to enter the profession of Medicine. During the following two years he completed his junior years in Medicine and part of the Arts Course in the Western University, London. In 1906 he entered the University of Toronto to complete his medical studies, and while there made a goodly number of friends.

WORTHINGTON, GEORGE HARVEY

"Most worthy is he, centred in the sphere Of noble duties, decent not to fail,"

G. H. Worthington received his primary education in Guelph Collegiate Institute, and some years later he graduated from Ontario College of Pharmacy. He then went to New York, where he gained a vast experience in several dispensaries. But the strenuous life, and confinement in America's metropolis, combined with the recollection of his native land, induced Worthington to return. "Worthy" received his first year's tuition in Trinity, consequently he was unknown to '08 class during their first year. He became a member of his present class in 1904, but unfortunately his presence was not discovered until, at "a meeting after lecture," in the midst of a warm discussion, a strange but eloquent voice was heard opening up new avenues of thought. Thus, when the class recovered from the suddenness of the onset, they beheld Mr. Worthington in all his splendor.

Engineering Building

J. GALBRAITH, M.A., LL.D. Dean of Faculty

History of the School of Practical Science

HE earliest effort of the Province of Ontario to establish a School of Technology was made in 1871, by the Premier, Mr. John Sandfield Macdonald, who succeeded in piloting an Act through the Legislature providing a liberal appropriation for the purpose. Accordingly, the Mechanics' Institute Building was bought and fitted up for this work, and Mr. Alexander Mackenzie appointed the following staff to conduct evening classes for workmen and mechanics: Mr. James Loudon, Instructor in Mechanics; Mr. W. H. Ellis, Instructor in Chemistry; Mr. W. Armstrong, Instructor in Drawing.

The Legislature in 1877 made provision for the establishment of a School of Practical Science on the plan proposed by the Minister of Education (Honorable Adam Crooks). This scheme proposed the erection of a building in proximity to the Provincial University, and recommended that the services of the professors in University College be secured for this work as far as possible. The first session of the School began in October, 1878, with the following staff: H. H. Croft, Professor of Chemistry; E. J. Chapman, Professor of Mineralogy and Geology; James Loudon, Professor of Mathématics and Natural Philosophy; R. Ramsay Wright, Professor of Biology; J. Galbraith, Professor of Engineering; and W. H. Ellis, Assistant to the Professor of Chemistry.

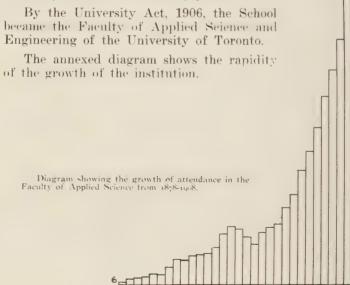

Another change was necessitated by the University Federation Act, which transferred the professors in Science from University College to the University of Toronto. The Senate of the University passed a statute, in October, 1889, affiliating the School to the University, and in November of the same year the Lieutenant-Governor approved of an Order-in-Council appointing J. Galbraith as Principal, and investing the management of the School in a Council consisting of the professors, lecturers and demonstrators on the teaching staff. The first Council, under these regula-

tions, consisted of J. Galbraith, Professor of Engineering, Principal and Chairman; W. H. Ellis, Professor of Applied Chemistry; L. B. Stewart, Lecturer in Surveying, Secretary; T. R. Rosebrugh, Demonstrator in Engineering; and C. H. C. Wright, Lecturer in Architecture.

The centre and south wing of the present Engineering Building were first occupied in October, 1890.

The Senate of the University, in 1900, passed a statute constituting the School, ex officio, the Faculty of Applied Science and Engineering of the University.

The Chemistry and Mining Building was first occupied in October, 1905, and the equipment in the Milling Building completed in the following year.

BIOGRAPHIES

AKERS. HENRY GOULDING

In his early days at the Model School Harry evinced a great desire to cut off his fingers in the making of model yachts, and at the end of several years at Upper Canada College had a number of dinghies to his credit. While giving a fair proportion of his time to study, he has not neglected athletics, always taking a keen interest in boxing and fencing. Last summer he joined the great army of those looking for fortunes in the Cobalt district, going nearly as far as James Bay, and besides silver mines found so much that proved of interest that we hope it will not lure him from his original intention of becoming an Electrical Engineer.

ALLISON, CALVIN BRUCE

"His fame from Science, not from fortune drew."

Calvin Bruce Allison early showed remarkable wisdom, in selecting Canada for his native land, Essex County, Ont., was the district chosen for his entry, and the time June 16, 1884. At Public School Section No. 4, Maidstone, he completed his primary education, and his secondary at Essex High School. For two years, in the West, he taught public school, returning in '04 to complete his Senior Leaving, at Essex, and to teach in that high school for some time. In '05 he entered the '08 class of Civil Engineers, University of Toronto, and has carried his course with honors. The skill and ease which characterize his work should win for "Cal" a position of prominence in his chosen profession.

ALLAN, LAWRENCE FRANCIS

"He who would make a pun would pick a pocket."

Lawrence Francis Allan was born in Crystal City, Manitoba, from which place he gravitated eastward to Brockville, matriculating from the collegiate institute of that city in time to join the class of '08 Electricals. He has shown himself to be a good student, but, alas! he makes puns. This propensity, we believe, should be severely censured, and quote Dr. Johnson above for our support. Yet, with all his faults, we love him still, and feel assured of his success in his chosen profession.

ANDERSON, RALPH MACKENZIE

"I dare do all that may become a man, Who dares do more is none."

The subject of this sketch was born in 1889, in Carberry, Manitoba. He began his school life in Wisconsin, but coming to Ontario a couple of years later, he finally matriculated from the Hamilton Collegiate, Institute. The profession of Civil Engineer appealing to him, he entered the school in the fall of 1905 with '08. He is quiet and unassuming, but is always ready to give his aid in carrying out anything in connection with the "School." Anderson has taken an Honor standing both years and graduates with the respect and best wishes of his fellow students.

ARENS, RUDOLPH JOHANN

"Slave to no sect, who takes no private road,

But looks through nature up to nature's God.''

Rudy graduated from Orillia Collegiate Institute with Senior Teacher's Certificate, went to Pedagogy, and the following year became principal of North Bay Public School. His ambitions, however, took him to the S.P.S., where he entered the Chemistry Course with the class of '08. On the champion Lacrosse Team of Orillia's '04 intermediates, thrice touring the Eastern States with successful teams, twice as Varsity's Captain, around the world with the All-Canadian Lacrosse Team, which so successfully toured Australia, in every case a star on the team, speaks bountifully for his ability and enthusiasm in the national sport. His class standing is enviable and his future well assured.

BARTLETT, ERNEST

"I am a man, and nothing which relates to a man can be a matter of unconcern to me."

Was born in the vicinity of Smithville, County of Lincoln, in 1883. After matriculating from Smithville High School, he followed the vocation of public school teacher successfully for a period of three years. Seeking a higher sphere for his intellectual abilities, he decided on a course of Civil Engineering. and joined the class of '08. In this his desire for thoroughness in all duties has been abundantly manifested, and this, combined with a frank and unselfish nature, has bound him in friendly ties to professors as well as students. Those who know him can have no doubt as to his future success and prosperity.

BARBER, HERBERT CAMPBELL

Bert was born in Toronto and spent his early years at the Model School and U.C.C. He spent a year with the C.G.E. before coming to the School and has since spent his holidays with them. He is an enthusiastic sailor and has held down a place on the crew of both the Temeraire and the Crusader, besides sailing innumerable smaller boats to victory. He was made a life member of the R.C.Y.C. in recognition of his bravery in saving a fellow yachtsman who had been carried overboard. He is well up in both his practical and school work and we all expect to see him take his place among the foremost engineers of the country.

BECKSTEDT, ROSS D. S.

"Vanitas, Vanitas, Poeta dixit; Omnia Vanitas."

Ross D. S. Beckstedt entered this vale of tears at Chesterville, Ont., receiving his early education at Prescott High School, from which he matriculated in 1900. Our friend then essayed to make a name for himself along pedagogical lines, but not being enamored of the profession, entered Varsity with '07. After spending a year with that class, Becky turned his attention to the typhoid bacillus, subsequently turning up with '08. He has had practical experience in electro chemical work at Niagara Falls, and with the G. E. Co., Schenectady, N.Y. While in this American town, Becky attained fame as a canoeist; his exploits on the Mohawk will long be remembered by his friends.

BEDFORD, FREDERIC JOHN

"Woman, Man, or God, or Devil— Was there anything he feared?"—Kipling.

In the town of Thessalon, in the spring of 1885, "Beddy" first saw the light of day. Being of a roaming disposition. he rambled through various parts of the Province to obtain his public and high school education. Although by nature more athletic than studious, his scholastic career so far might well be the envy of many of his year. Pugnacious to a degree, his battle-roar is the first heard in times of trouble, and woe betide the luckless "freshie" who may cross his path. Good-hearted and care-free, he has made many fast friends in the "bunch" who foresee for him a very strenuous and successful career in the engineering world.

BLACK, GEORGE

George Black was found under a rhubarb leaf in October of the year 1888, in the city of London. His early school days were passed in that city, when his family moved to Stratford, where he graduated from the high school in 1905. In that railroad city, locomotive work interested him, and to lay a foundation for a future career in the construction of the iron steed, he came to the S.P.S. in the class of '08. Many clever men have come from the western counties, and we predict for George a successful career.

BITZER, ARMIN MORITZ

"A gentleman, well bred, and of good name."

Armin Moritz Bitzer attempted his first smile in the city of Berlin, Ont. Here he received his early education, attending the public schools of that city, and also the Berlin High School and Technical Institute, from which he matriculated in '04. Interested in engineering, he came to the School with '08, with whom he has become a general favorite from his cheerful disposition and obliging manner. He is an association football enthusiast, being a member of the '06-'07 Intermediate Champions, and the '07-'08 Senior School teams, to the success of which teams he has largely contributed. He is of German descent, which, as he humorously puts it, will not prevent him making a success of his chosen profession, in which he takes a live interest.

BOWES, HERBERT F.

Herbert F. Bowes was the name given to a new arrival near London, somewhat over two decades ago. Like other boys, he grew up and went to school, and at last matriculated from the collegiate in that growing city of western Ontario. Mechanical instincts led him to further pursue his studies, so in 1905 he came to the S.P.S. and here he has carried on his work with continued success. It has not yet been discovered whether he was the inventor of Bowes' notation or not.

THIRD YEAR S.P.S.

BRACE, JOHN HOLLIS

"Here you are! A man that can give an opinion that is brighter than diamonds."

Brockville, the Island City, has every reason to be proud of Holly as an Old Boy. There he learnt his ABC's as unwillingly as do the most of us, but so effectively that, resigning from an important position in the Bank of Toronto. he was enabled on coming to S.P.S. to probe into the mysteries of rotary converters, static transformers and squirrel cage induction motors. A firm believer in the old adage that, "All work and no play makes Jack a dull boy," Holly was ever ready to uphold the School's honor in sports. We who have seen him "stopping the hot ones" for junior and senior teams in the Jennings Cup series can testify to this. A sterling good fellow, diligent and reliable, we shall soon hear of J. H. Brace, the Electrical Engineer.

BRYCE, WILLIAM F. M.

"He has merit, good nature and integrity, And all unite in perfect harmony."

Was born in Toronto in 1887. Graduating from Harbord, he entered the School as a Civil. Bill has always taken an active part in rugby, being a member of the School teams and also of Varsity III. When things were doing, Bill proved himself capable of applying the tap and the brush most successfully, this being due, probably, to his skill in aquatic sports, having held the championship of the Muskoka Lakes Association. He has spent his summers on railroad construction work for the C.P.R., which branch of work he will no doubt follow with marked success in future vears.

BRECKEN, PAUL RALPH

"To follow knowledge like a sinking star."

This seems to have been Paul's motto. but if he was willing to follow at a respectful distance, let us take it as an intimation of one of his cardinal virtues --modesty. The chase seems to have been a strenuous one, for after leaving Halifax, his birthplace, he obtained his early education in Fredericton and Sackville, N.B., his intermediate at Mt. Allison Academy, his college preparatory at St. Andrew's, a year of Arts work at Victoria, and his technical equipment at the S.P.S. Along other lines Paul has been no less strenuous, being President of the Y.M.C.A, Vice-President of the Fencing Club, Representative to Students' Parliament, Junior Fencing Champion and an active participant in tennis and track athletics.

BROWN, EDWARD IRVING

"Who is that nice fellow, With his hair so thick and yellow?"

Edward Irving Brown first cried for porridge at Paris, Ont., Dec. 8, 1886, and with brief intermissions has been calling for it ever since. Received primary education in his native town, winning a scholarship on entering high school. His company manners are such that often strangers do not suspect that he is a student of S.P.S. This graciousness of manner was acquired by running at large among the preponderating female population for which Paris is noted. A good singer and very fond of music, he became famous by paying a dollar to see "Madame Butterfly" from the gods, while his friends looked upon him with wonder, astounded at such a display of wealth.

BUCHAN, PERCY HALCRO

"So gallant in love and so dauntless in war."

-Scott.

Of Scotch and English extraction, this brown-eved boy first saw the light in Toronto, on October 8th, 1886. He learned his ABC's at a private school, and finished his primary education at the Owen Sound Collegiate Institute. His father, recognizing in his youthful fondness for toy motors an electrical genius. sent him to S.P.S., where he poses as a slide rule expert. Percy never was a leader in athletics, though he played most of the games common to the "Genus puer," but he shines in ladies' society and has many friends within that charmed circle. Percy has passed his fresh and soph, years with honors and we expect great things of him some day.

CAMPBELL, JOHN E.

"Life is a jest, and all things show it, I thought so once, but now I know it."

"Jack" is a London boy, like a great many others at the University. He was born and received his primary education in the County of Middlesex, finishing at the London High School. Entering in the class of '08, he has made many friends and is justly popular with the boys. His chosen course is Mining, and he has shown his good judgment by choosing "the best course in the School."

CAMERON, DUGALD

"He has common sense in a way that's uncommon,

Hates humbug and cant, loves his friends like a woman."

Dugald Cameron was born in Argyle. Scotland, in 1882. At a very tender age he perceived he would need much wider scope for his abilities and hence migrated to Canada in 1883, where he settled in Marmora Township, Hastings. He matriculated from Madoc High School in 1902, and spent his next three years in commercial work, part of the time occupying the position of municipal clerk of Marmora Township. He entered the S.P.S. in 1905, with the Civil Engineering class of '08. His vacations have been spent with the C.P.R. and his friends feel sure that this fact, coupled with his sterling qualities, will insure him early distinction in his chosen profession.

CAMPBELL, N. A.

In the year of our Lord 1888, O gentle reader, a child was born and they named him Norman Alexander Campbell. After divers experiences in public school, he sought knowledge in that grand old school of learning, Upper Canada College. During five years spent here he captured numerous honors and on matriculating joined '08 in the faculty whose motto is "meekness and peacefulness," and for three years did his best to live up to it. On graduating he joined the ranks of those who look back with fond remembrance to the happy and peaceful days spent in the "little red school house.", Norman has already had a taste of electrical work in several summers spent with the C.G.E. Co., and undoubtedly a bright future awaits him in the electrical field.

History of Class '08

ITH the departure of the class of '08, the Faculty of Applied Science will add to its list of graduates the most promising "made in Canada" brand of engineers that ever went forth in a single year

to develop our young and growing country.

Each fall, as we entered upon a new term, the timid faces of the freshmen brought back very vividly to our minds our first few weeks of college life. At that time, however, we soon overcame our fears, and within a week were in possession of a flag which told of our prowess in battle. Within another week or so we had tried conclusions with our medical neighbors, a deed which precipitated one of the most noteworthy events in the annals of the University, when for ten days we rested from our labors and expended our time and energy in organizing, so as to defend ourselves against the powers, and when many a rising orator gained notoriety in speeches that would have done justice to any modern socialist.

As spring approached, we began with fear and trembling to prepare ourselves for our first set of exams. Many were the tales that poured into our ears of the fearful slaughters that had taken place in the past, but one statement always brought hope to our breasts, this was the one made by confiding sophs.: "Cheer up, boys, two-thirds of you'll

pass." And everyone smiled and felt confident.

In the fall of '06 many of us came back to find some of our friends had fallen by the wayside, but we also found that a number of '07 men had become anxious to throw in their lot with us, and, thanks to the examiners, they had had no

difficulty in following out their plans.

We will always remember the nervy bunch of freshmen that we had to deal with that year, and it is needless to say that they were soon subjected. Any who are blessed with good memories will recall the modest refund from our deposits, the greater amount of which was held, we were informed, as a warning to future years to be good and obey their teachers. In this year we had little difficulty in winning the Mulock Cup in rugby and the Jennings Cup in hockey. We also, as might well be expected, supplied much of the material for the various Varsity teams.

During the winter of '07 a number of the class, while doing some research work, propounded the theory that the molecule existed in the nascent state and was ready to fly at anything.

In the fall of '07 the first week was fully taken up renewing old friendships and recounting the many experiences gone through in the preceding five months. Dear old "Flanny" was back with a brand new edition of stories, which were fully appreciated by his many friends. Again, a number of men were missing from our ranks, while many of us had not fully recovered from our strenuous battle with the preceding spring exams. "How many 'sups.' have you?" This, indeed, was a very common question to have thrown at one, and, of course, most of the poor fellows "in 3" had one in the subject with which they are supposed to be most familiar.

The address given by the new President early in the term seemed to have an excellent effect, for there was very little disturbance of any kind. Of course, we found it necessary to chastise the freshmen when it was known that the sophs, were unable or unwilling to do it, but aside from this, salient virtues of meekness and peacefulness reigned

supreme.

In our graduating year we seemed to be particularly fortunate in our selection of year officers. Most noteworthy, perhaps, was our choice of Chaplain. Without doubt, the supervision of our moral and spiritual welfare has been in most capable hands.

It has been found by some of the Civils during the past few months that frenzied finance may be studied much more cheaply by reading "Everybody's" than through practical experimenting. They, however, hearing so often that experience is the best teacher, considered it necessary to study the fall of dice, and have, no doubt, obtained a much better knowledge of the game than they wished.

Were we to submit a full category of events we suppose that even the world itself would not contain the books that should be written, and we have, therefore, merely hinted at some of the characteristic doings of the great and only class of 1908 of the Faculty of Applied Science.

THIRD YEAR EXECUTIVE

F. C. Dyer

BRACE H. C. McMordie C. D. Henderson J. H. Coyne G. CHALLEN P. GILLESPIE V. J. O'DONNELL J. D. CUMMING

J. St. Lawrence

CARROLL, ANSON MACKAY

"His limbs are cast on manly mould, For hardy sport or contest bold."

Anson Mackay Carroll opened his eyes on a bright morning in 1884 in Fremont, Nebraska, on a new and wondrous world, and soon learned to kick up his heels and play—a habit that still clings to him. Not before the stirring life of his birthplace had permeated his soul did he move to Toronto. Since entering the School, A. M. has spent eighteen months in Pittsburg, with the Westinghouse Company. Associated with his studious tendencies, there is a pleasing personality that carries all before it. He is a good sport in the truest sense. having played in both Mulock and Jennings Cup games for the School. He takes with him the best wishes of his class-mates.

CHALLEN, GEORGE

First saw light of day in Simcoe, August, 1881. His school days were spent in his native town, where he graduated from the high school in 1899. The allurements and better opportunities of a great city attracted him to Hamilton, the Ambitious City, where he occupied a position with the Canadian Express Company for some time. Then, after spending about four years and a half at machine work, he decided to bury the hatchet with Mr. Toil and enjoy the vicissitudes of the S.P.S. for a while, by joining the class of '08. Here he is very popular, and has held several offices on the year committees. He expects to build a steel escape to the moon, where moonlight revellers may have peace.

CARSCALLLEN, HOBART R.

"The world is a ball at his feet."

Carscallen hails from Calgary, Alberta, but to Newbury, Ont., belongs the honor of being his birthplace. He prepared for matriculation at Smith's Falls High School and enrolled in his freshman year at S.P.S., with the famous '07 class. Along with a high class standing, "Carse." won the distinction of being one of the best sports of the School. and always played a good game on the rink and football field. He was a member of the Champion Intermediate Association Football Team and of the Jennings Cup Hockey Team, 1906-07, also of the Varsity Association Football Team, Inter-Collegiate Champions. 1907-08.

CHARLEBOIS, JOSEPH P. CHARLES

After spending three years at La Salle Institute, "Charlie" joined the aspirants of "05, latterly changing to the ranks of "08. He has taken keen interest in all school affairs and been an earnest supporter of, and participant in, athletics generally. His great popularity in the School is attested by the fact that he has been repeatedly elected to office in the Engineering Society, as well as representing the faculty on several University committees. Energy and capability, coupled with a cheerful and obliging disposition, assure that he will be more than an ornament in his chosen profession.

CHESNUT. FREDERICK HAMILTON

"Take him for all in all he was a man."

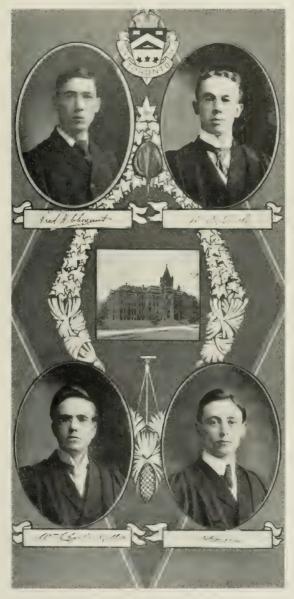

Frederick Hamilton Chesnut was born Sept. 5, 1884, at Chatham, New Brunswick, but moved to Toronto at an early age, where he attended the public schools and afterwards St. Andrew's College. Here he began his athletic career, being a member of the cricket and football teams, also capturing some of the track events. Since entering the School, in 1904, he has continued in the good work. being a member of Varsity II. Rugby Team and of the Mulock Cup Team of 1904, 1906 and 1907. If earnest work and fidelity of purpose count for success, the subject of this sketch will have no difficulty in attaining a high position. So, here's luck!

COLBETT, WILLIAM CHARLES

"The world knows nothing of its greatest men."

"Wacha" gave his first Toike Oike in 1884, in the city of Toronto, and started his scholastic career at the Wellesley School. Matriculating from the Jarvis Street Collegiate in 1904, he entered the "School" in the Mechanical and Electrical department, but switched over to Architecture, feeling it better suited to his artistic temperament. He has filled to the satisfaction of all the responsible position of Secretary-Treasurer of the 708 Architectural Association. Colbett is a musician of no mean ability and it is rumored that he is on the verge of a composition. His never-failing cheerfulness and his willingness to help all will make his path easy in the profession he has chosen.

COLE. WILLIAM ERNEST

"I will yield neither to the song of the siren, the voice of the hyena, the tears of the crocodile, nor the howling of the wolf."

William Ernest Cole was born in Sarnia Township some time in the carboniferous period, spending his early life near the Indian Reserve, where he acquired much of the information, on paints and warhoops, which has been so useful during his sojourn with "Galbraith's Indians." He wielded the willow with great success as Principal of Osborne Public School, of which period he has many cherished recollections, one standing out with particular prominence. In athletics he was most interested in playing association football. On construction work with the C.N.R. he spent the long summer evenings in Muskoka on special investigations of belt line problems.

COYNE. HEBER

"Vive le Président!"

The subject of this sketch was born, and spent his youth, in St. Thomas. His college course, upon which he entered in 1905, has been to us, his fellow students, "One grand, sweet dream." Honors come to him, seemingly, because be cannot avoid them, and studies never prevent his sending from his year bouquets to the theatrical stars, or keep him from participating in the other "joys" of student life. After his second vacation spent with our worthy Chaplain O'Donnell, in Pittsburg, the "Inferno of America,'' he returned to college to hold the position of President of his year, and, incidentally, was Third Year Representative on the Engineering Society, both positions receiving more than justice from his hands. Freshman-Go thou and do likewise!

CUMMING, JAMES D.

"Ah me! What perils do environ The man that meddles with pig iron."

"Jimmie" arrived in 1888, but there are no records at the Observatory that show any unusual disturbances. He spent most of his school days at Campbellford. but after coming to Toronto, he put in a year at Harbord Collegiate. He entered the School in the class of '08 and chose Mining as his future profession. Since coming to the School, he has served on Year Executives and is a member of the School Committee on the Board of Torontonensis. He has also distinguished himself at tennis, in a mild way, by winning the novice in the tournament last fall. Last summer he spent five or six months on a geological survey in the mountains of British Columbia, coming back in the fall, ready for the same old grind.

DANKS, FRANK AUBREY

"In the shadow of the great."

Like many other successful men, Danksie came to among the oil wells of Petrolea, on March 20th of that lucky year, 1888. He received his early public school education in London, Ont., moving to Toronto in '99. In the fall of 1903 he entered as a student in Jarvis Collegiate, graduating two years later. Coming from a family of Civil Engineers, he enrolled with the class of '08, School of Practical Science. In the fall of '05 he became an enthusiastic member of the Canadian Engineers, and a hearty supporter of indoor baseball.

DAHL, ALVIN D.

"But there's more in him than thou understand'st."

After graduating from the Dutton High School with a second class teachers' certificate. Alvin mastered the handicraft of the saddler and also learned something of the lumbering and veneering business. Following the bent of his early inclinations, he entered on his Engineering studies in the fall of '05. His vacations have largely been spent working at his trade, though he has also obtained some machine-shop practice. By all who know him, Alvin is regarded as a conscientious and hard-working student, and with a well-trained head and hand he will embark upon his engineering career well equipped and with every promise of success in the field which he enters.

DARROCH, JOHN

"How high a pitch his resolution sours."

"John" was born near Paisley in '79. He received his early education at the Walkerton High School, and after several years of roaming life landed at the "School" in '08, to be instructed in Mechanical Engineering and etiquette. His progress in the "School" is one worthy of note. He at once became a favorite among his fellow students; his steady, manly ways attracting many friends. During his course he held the offices of Poet for '08 class, and of Vice-President of the Engineering Society for the term '07-'08. In his last year at the University he became a member of the " '05 School Rugby Team." His many friends wish him the success he deserves in his chosen career.

DOORLY, HENRY CUMMING

"Orpheus made trees,
And the mountain tops, that freeze,
Follow him, when he did sing."

Henry Cumming Doorly was born in Port-of-Spain, Trinidad, B.W.I., in 1883. He received his early education at the Queen's Royal College, in that island, passing the Junior Cambridge Local Examination with Honors. This obtained for him matriculation to the University of Toronto, which seat of learning he entered in 1904, taking up the Mechanical and Electrical Course at the "Schoool." Since landing on the continent, he has identified himself with many musical organizations, among which are the Schenectady Symphony Orchestra and the National Chorus of this city. He has also proved himself a pianoforte composer of no mean order. He has always acquitted himself creditably during his college course, and we predict for him continued success in his chosen profession.

DYER, FRED. K. C.

Fred. K. C. Dyer was born in Manchester, England, where he served his apprenticeship as teacher. Coming to Canada, the beautiful, he went to the Woolly West, where he engaged in various occupations, finally deciding that mining was the thing for him. After digging gold in the Lake Superior country, and doing some diamond drilling in Ontario, he came to S.P.S., determined to become a Mining Engineer. Starting with the "heavenly" '07 year, he has shown by his work that he has chosen the right course. After being out one year, he joined the class of '08, where he quickly earned many friends who wish him every success in his profession.

DOUGLAS, R. H.

"Quick on the hardest tasks to run, Thus nature disciplines her son."

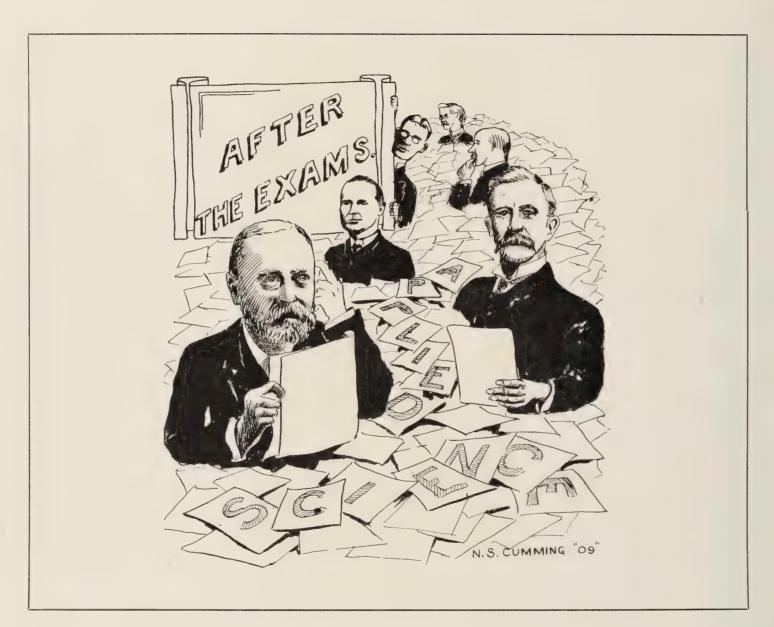

Ralph Howard Douglas made his debût at Calgary, 1888, but at an early age he moved to Banff, the beautiful, where his boyhood was spent, for the most part, on the hurricane deck of a bucking cayuse. He took a preparatory course at St. John's, Winnipeg, and in '05 enrolled himself with the class of '08 at the School. After one year in Electrical, he changed to Mining Engineering, as more suited for the West. He has always been a staunch supporter of athletics, and has played with the winners of the Jennings Cup in '06, and also with the Varsity III. Having his full share of Western energy, his many friends are assured of his future success.

EAGLESON, FRANCIS MERWIN

"If honest worth to heaven rise, You'll mend ere you get near him."

Francis Merwin Eagleson first secured a position, among things terrestrial, in the latter part of the nineteenth century. and has ever since been assisting the world to bear its burdens. He spent several years in the enjoyment of agricultural pursuits, at Wroxeter, Ont. After finding that he was needed in the ranks of the engineering profession, he matriculated at Harriston, Ont., and registered as one of the distinguished class of '08. Though not what is technically known as a "sport," he has taken considerable interest in the work of the Y.M.C.A. in the Science faculty. He has a reputation for diligence, which will be a great hindrance to success in his future work.

EDWARDS, CLEMENT

"He knows what's what, and that's as high

As metaphysic wit can fly."

With the April showers, of 1887, he made his appearance in this busy world. Early in life, his ambitions were to become a great engineer. He matriculated from the Parkdale Collegiate in 1905, and the following fall found him enrolled in Civil Engineering, with the never-to-be forgotten class of '08. Always on the spot, when anything was doing, Clement has done his share to keep up the School's reputation. He takes an active interest in all things athletic, and is one of the School's crack swimmers. His sunny disposition and genuine sincerity have made him a general favorite among hie fellow students, who all wish him the best of success.

EWING, ERNEST OLLIPHANT

"When any great design thou dost intend, Think on the means, the manner, and the end."

In the year 1887 there became a citizen of Toronto the person of Ernest Ewing, one who will in time, no doubt, play a leading part in the development of our great Dominion. He attended almost every primary school in the city and after outgrowing them all he entered Jarvis Collegiate, and from there matriculated into the University of Toronto, entering the Civil Engineering Course in the Faculty of Applied Science, in the fall of 1905. Ernie has always been a great admirer of our soldier boys, and has imitated them so well that he now is a sergeant in the Second Field Co. of Canadian Engineers. His last two summers have been spent exploring our northern wilds, and having escaped the dreaded bear and the cares involved by locating a mine, he continues to wear his same good-natured smile, which will be hard to replace around our halls.

EVANS, STANLEY L.

"For all he did he had a reason, For all he said a word in season."

His voice was first heard in the little village of North Bruce. E're long he came to his present home, the town of Corinth. He matriculated from Avlmer in 1904. While here, his course was interrupted by a four-years' business training. In 1905 he entered Civil Engineering at the University of Toronto. and soon became a prominent component of the class of '08. In his third year, he was Vice-President of the School Y.M.C.A. and Debating Society. He was a member of the Canadian Engineers. and was a noted association football player. His genial disposition has won him many friends, who wish him the success which surely awaits him,

FLANAGAN, O. L.

"Possessor of a genial soul, Untainted yet by crime, He has upon the whole A very pleasant time."

O. L. Flanagan is a Scotchman-all but his name, which is of Dutch origin. But notwithstanding these disadvantages, he is a student of high attainments. He hails from Manitoulin, and before entering the University spent several years as a pedagague in New Ontario. Becoming fatigued with this mild form of life, he entered the class of '08. His natural gift of being witty and humorous is appreciated by his fellows. We have often been compelled to listen to his naive episodes. With his natural ability, experience and college training, coupled with a good physique, we predict a brilliant future.

FLINT, CHARLES

Born in Toronto, October 12, 1888, he matriculated from St. Alban's Cathedral School in 1904, and in the fall of the same year joined the ranks of "1907." After taking his first year, he decided that some practical experience would prove beneficial and dropped his work at the "School" for a year. During this time he was employed on C.P.R. surveys in the West. Flint has the faculty of doing things quickly and thoroughly; qualities which have not only made him successful at work and elsewhere, but have gained him the respect and good will of his fellow students.

FRANCIS, G. C.

"Energy and enterprise stamped on every line of his manly face."

As the class of '08 pass into the ranks of the full-fledged professionals, the busy inhabitants of the sturdy hamlet of Verchoyle may well pause in their business pursuits and raise their heads in pride. for one among our number has nobly done them credit. After receiving a Normal training we find our friend laboring in that Western Land of Promise as a pedagogue. A residence in this land, where every breeze sends energy and vigor coursing through one's veins, was enough to stimulate him to advance further in learning, and what more natural than that he should join us. It is customary to prophesy great things, but we defer, feeling that our feeble pen could but dimly depict the brilliant future before him.

FOSTER, ARTHUR HILLIARD

"Bebamos."

At the Royal City, on the day before Christmas, 1887, A.D., the stork stole a march on old St. Nicholas and left as a present for Hilliard's parents a bouncing baby boy, destined to become a sturdy son of "Toike Oike." The dream of his childhood days was to be an "engineer" and do things. Consequently, upon matriculating from the Guelph Collegiate Institute, he entered "School" in the fall of '05 as a "Civil." Without any apparent effort on his part, he has succeeded in satisfying his professors and examiners, and so we find him graduating with class '08. "Fossie" took a great interest in sports. Hockey was his favorite pastime, and in his freshman year he played in the finals for the Jennings Cup with Junior School. He has always been one of the boys and a future awaits him.

GEAR, SIDNEY STUART

"I only ask that fortune send
A little more than I can spend."

Sidney Gear first saw the light of day in Fort Erie, Ont., on Jan. 19, 1884, receiving his early training in the public school there. His preparatory school training was received at Niagara Falls Collegiate Institute, during the period of power development there. This accounts for his choice of the Electrical Engineering Course in the Faculty of Applied Science. Sidney's experience has been varied, having been with the N. Y. Gear Wheel Co., in machine shop and draughting office, and later with the Lackawanna Steel Co. as draughtsman. This experience and the fact that he has been an Honor man since his appearance in Applied Science should mean success in the course he will follow.

GRASSIE, CHARLES ANDREW

"A School of Science student, but gently born and bred."

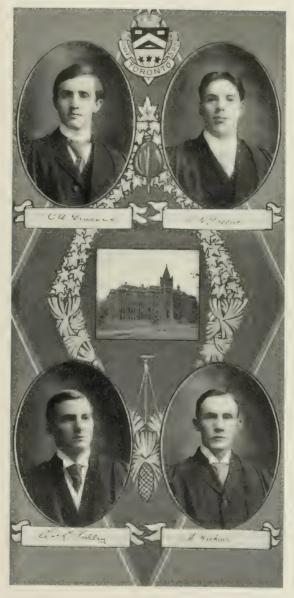

In the village of Smithville, County of Lincoln, Andy was an adept in school-boy pranks. After completing his high school course he spent three successful years as a pedagogue. Determining then to become a Civil Engineer, he joined the notorious class of '08, whose reputation he faithfully sustained, both in scholastic duties and sport. His untiring and persistent exertions in chasing the pig-skin have made him a member of the University Eleven Champions. As he goes forth into the duties of his profession, he is followed by the good wishes of his class-mates.

GULLEY, CHARLES LESLIE

"I have no ambition
To see a goodlier man."

Charles Leslie Gulley was born in the village of Greenbank, Ont. Here he obtained his primary education. Moving to Uxbridge shortly afterwards, he received his high school training. After his matriculation it was a toss-up whether to go into mercantile life or engineering. Two years of the former, however, decided him in favor of engineering, so he joined the class of '08, with whom he has obtained First Class Honors every year. He has a liking for association, and played on the Senior School Team this fall. He is very popular among the boys. which was evidenced by his being elected to the Vice-Presidency of the Electrical Club. It is needless to say that he has a bright future ahead of him.

GREENE, WILLIAM HARVEY

"Was there ever known a more misguided youth?"

Commenced his busy career in Toronto in 1884. Here he received his early education and matriculated from Jarvis Street Collegiate. After serving on the "World" staff, as proofreader and reporter, Harvey entered the School in 1903. He completed his first year successfully and then sought practical experience, which he obtained in the C.P.R. office, in mine surveys and prospecting trips. Since entering the class of '08, Harvey has made many friends, not only on account of his mathematical talent, but by his happy disposition. These same qualities will be no small help to Harvey in his chosen field of railway construction.

HACKNER, J. W.

"A man not given to words or strife—
a man of sense."

Joseph Wesley Hackner first gave trouble to humanity near Uxbridge. His public school days were spent in a rural school and those of his high school in Uxbridge. He then wielded the beech rod at Mount Albert for two and a half years, when he decided to leave the missionary field for the more lofty realms of Science. Decision and energy seem to be his guiding characteristics, which give him his good standing in the year.

History of Class '09

Back from the shop and the field they came, the first freshman class of the Faculty of Applied Science. Not as freshmen, however, did they return, but as sophomores, those guardians (or disturbers) of College peace. The early weeks of October were weeks of hearty greetings and solid enjoyment and as one passed group after group of laughing fellow-students recounting summer experiences and undisguisedly glad to see each other again, one felt that here were friendships being cemented which would last long past the mere three years of a School course.

As freshmen they had been given their place among the other years, after more than one bloody (or rather inky) contest, as men who were not easily beaten or afraid, and merely to show that their reputation as artists with the tap and ink bottle was not founded on "bluff," the freshmen were given a small demonstration during the quiet of a certain noon hour, which, however, was drawn to rather an abrupt close by the appearance of members of the faculty.

In sport '09 has been second to none. The Mulock Cup winners showed the kind of men in the year, and the representatives on the rugby and track teams did credit to the class and to the School. Dinners and excursions have always received hearty support from the year, and on more than one occasion the volume of their yell has testified to the number present far more forcibly than mere statistics could have done.

Next May the class breaks up once more and scatters to all parts of the continent, but as October approaches one experiences a feeling of elation at the thought of getting back among these jolly good fellows again.

May the men of '09 be always glad to shake each other's hand, not only at School, but after, wherever and whenever they may meet, and may good luck and continued success follow our year '09.

J. E. McDougal.

N. S. Cumming
Prof. L. B. Stewart
Black
G. A. James

HAVILAND, FRANK LESLIE

"To be merry best becomes you; for out of question, you were born in a merry hour."

During the summer of 1885, the most important occurrence in West Lorne was the advent of Frank Leslie Haviland. This personage early developed a strong taste for mathematics, and a character for overcoming difficulties, whereupon the sages of the community marked him for an engineer. October, 1905, the "School" opened its doors to him. During his course not only has he developed his mind in Mathematics and Science, but has seized the opportunities offered to gain a deeper conception of life. We think him a very deserving fellow, and that he may receive kind consideration from the "fates" and the "ladies" is our parting wish.

HUETHER, ALVIN DAVID

"He was a six-foot man, all clear grit

Allie first became a member of his father's family at Neustadt, Grev Co., July 24, 1887. A graduate of Wiarton Collegiate Institute, he entered Toronto University with the class of '08, in the Department of Civil Engineering. A man of strong personality and of tremendous physical strength, he took the deepest interest in all ahtletic pursuits. He secured a place on the Track Team in his freshman year and played on Varsity Senior Rugby Team this last season. His many friends will miss him from the halls of learning and the gridiron, and wish him much success in his chosen profession.

HENDERSON, CHARLES DUNCAN

"O, what may man within him hide, Though angel on the outward side!"

Charles Duncan Henderson, in the year 1887, decided on this planet as the scene of his future activities. He fixed upon Wellesley Public School as the starting point of his chequered career. Rising steadily, he succeeded in matriculating from Jarvis Collegiate just in time to enter the class of '08. In the famous insurrection of 1905 he played a star role, which necessitated a temporary absence of the whole company, "Henny," as he is better known, has been successful in combining work and pleasure, without detriment to either. His friends are confident of his success in his chosen profession.

HUETHER, DAVID JOHN

"Still achieving, still pursuing."

David J. Huether, a graduate of Wiarton Collegiate Institute and Durham Normal School, spent several years in the teaching profession before entering on his course in Applied Chemistry at the S.P.S. An Honor man, and leader of his class, he occupies a position of respect and admiration amongst his class-mates, to whom he has become endeared through his keen sense of humor. A brilliant future is destined for Dave, if his past showing may be taken as a criterion.

HUNTER, ALEXANDER NEIL

"And strong in will,
To strive, to seek, to find, and not to
yield."

Alexander Neil Hunter was born in Toronto the good. After graduating from Harbord Collegiate, where he won many friends by his amiable disposition and active interests in all things, including athletics, he entered the year "S.P.S. '08'' as a greaser. With good looks and a happy soul, willing to help others, and lend a hand, being clean and straight. meaning what he says, he has found a place in the hearts of many. He easily took Honors in '06 and '07, and his practical experience, plus his S.P.S. scientific training, have sunk deep into his nature, and, combined with his ready wit and quick insight, will produce an expert, an inventor who will dig deep down and unearth great scientific treasures. We wish him well.

JOHNSTON, JOHN T.

"One equal temper—strong in will,
To strive, to seek, to find and not to
yield."

John T. Johnson selected the lakeside town of Kincardine as being best fitted for his appearance on this planet. On passing through the high school of that place, he decided to become an Electrical Engineer, and forthwith enrolled himself with the class of '08. One year convinced him that Civil Engineering was his proper sphere, and he made the necessary change. He has always been an ardent supporter of athletics, mainly by means of a powerful pair of lungs, and has the proud record of having participated in all the hustles within his reach. His friends all wish him the same success in his future studies that has attended his past.

ILER, STANLEY BURRITT

"I would make reason my guide."

The subject of this sketch was born in the historical city of Quebec. He came to this Province with his parents when but six weeks old, and now resides in Belleville, Ont. Here he received the major portion of his education in the public and high schools, matriculating from the latter in 1905, and entering the School of Practical Science in the fall term of the same year as a student in Mechanical and Electrical Engineering, thus bringing him into the graduating class of 1908. "Stan" is a good student, popular with the boys and generally gets there not far behind the leaders.

KENNEDY, HAL G.

"The ae best fellow e'er was born."

"Mike" came after Murray and Moosejaw was the scene of his advent. Then he went to Ridley, and after years of confinement he was discharged and shortly after came to Toronto. It is rumored that he was born clutching a rugby ball, and it is known that he cut his teeth on a hockey puck. He is a splendid cricketer, one of the best paddlers in the Dominion, having been a member of the Ottawa Britannias' famous champion war canoe. He has played hockev since he could first walk and football-well, "everybody knows!" Undoubtedly, he is the best all-round athlete at Varsity to-day. But Mike has an ambition. He is going to be a Mining Engineer (perhaps). However, he has always taken a creditable stand in his class. Mike's happy manner and winning smile have won him a multitude of friends.

KENNEDY, MURRAY D.

"By nature honest, by experience wise, Healthy by temperance and by exercise."

Murray was born in Toronto several years ago. Shortly afterward the Garden City claimed him, and for eleven years he was the "hoodoo" of Ridley. There he learned, amongst other things, a great deal about football, cricket, hockey and "fussing," but very little about engineering. After matriculating he entered "School" with '07, but after completing his first year he dropped out a year, and hied him to the north country with a Transcontinental location party. Returning, he took his place with '08. and is now probably the best-known man in Varsity athletics. He has represented Varsity both on gridiron and rink, climaxing his career as Captain of this year's Rugby Team. He is also a member of the Athletic Directorate and Secretary-Treasurer of the University Hockey Club. To know Murray is to be fortunate, to be his friend, an honor.

KILLIP, WILLIAM CHARLES

"We build the ladder by which we rise."

Yes, the year 1881 was an eventful year as shown by the annals of the little lakeside town of Consecon, due to the advent of William Charles Killip. He grew up, as boys do, and in October, 1905, he wandered into the School. During his course, he has taken great interest in all academic affairs, and having gained a broad education looks out upon the field of Egnineering with a confidence of its future. He has proven to us his adaptability to this special line of work by his ingenuity and thoroughness, and in entering upon it he carries with him the good wishes of the class of '08.

KEYS, W. RALPH

"Woman, the fairest work of the Great Author.

No man should be without a copy."

W. Ralph Keys was born at Winchester in the ancient days. Attended High School at Morrisburg, where he spent his time making teachers' lives miserable. He then entered the teaching profession and made his pupils' lives miserable. Throughout his course he has fully sustained the nick-name given him by the class in '05, when he was married. Every one truly loves Pa Keys.

LESLIE, JOHN N. M.

"Then a soldier,

Full of strange oaths, and bearded like the pard,

Jealous in honor, sudden and quick in quarrel."

John N. M. Leslie was born at Elora. March 23rd, 1888. He received his early education at the high school of that town, being matriculated in 1904, From afar he heard the call of S.P.S., and accordingly entered its sheltering walls with '08. Here his academic record has been above reproach. Our friend, being in love with things military, at once joined the Engineers, and shortly afterwards demonstrated that pontoons could ascend hills without horses. John is also noted for his concentration: wordy conflicts may rage, but none the less does he preserve his equanimity. Might we add, that he has also won the love and respect of Prof. Williams.

LEWIS, FRANCIS CHARLES

"Do but pierce his reserve and a goodly fellow thou findest."

Again that city of celebrities, Ingersoll, looms large before our mental vision. for in the subject of our sketch she has presented us with a prince of good fellows. 'Twas in the month of June, 1885, that this young man brushed aside the curtain and entered this vale of tears. During youth's delightful morning he resided in the above town and drank deep at the local fount of learning. Looking round for a suitable environment in which to pursue engineering studies, he decided to climb the ladder to fame through the ranks of '08. We part with him reluctantly, but with all assured that the wider world into which he enters will recognize those sterling qualities that have been so manifest to us.

MACDONALD, F. R.

"Here comes a man from the North."

Mac, as he is familiarly known, came to us with a smile and a stride that bespoke a sunny disposition and a confidence in self. He was born in Kirkfield in 1886, but finding this hamlet too small for his untrammeled spirits he journeyed to Lindsay, where he matriculated in 1901. Joining the class of '07 he was soon a favorite, but he must have heard the onward tread of '08, for at the end of two years he went out into practical work and waited for us to catch up. Since joining the main body he has proved himself worthy indeed. As a student he has stood high, but more especially will we remember him for his social qualities. Parting at best is touching, but as we picture his future it is robbed of its sting and we say farewell. We will ever watch with pleasure your upward course.

LYNAR, HUGH R.

The subject of our sketch was born in Toronto in 1885. His primary education was well cared for by the worthy staff of the De La Salle Institute. Later he matriculated from Jarvis Street Collegiate. While a thorough Canadian his heart leans toward the Emerald Isle, and in the heated discussions on the political affairs of that land we have not infrequently heard his eloquence propagating the principles of Home Rule. The thirst for a wide field for natural ability, coupled with an intuitive knowledge of the demands of the future, led him to enlist with those striving for engineering fame. Since joining us he has shown much aptitude in grappling with those quantities which are to many of us all too elusive, and we part with him assured that he will win a high place in the profession.

McGEORGE, WILLIAM GRAHAM

"A merry heart maketh a cheerful countenance."

And it came to pass in A.D. 1887 that there was born at Chatham a boy, concerning whom we have much to say. Now, as "Mac," for so we shall call him, grew up, he faithfully attended to his household duties, and also found time to attend school, and in 1905 his name came before the Minister of Education and he matriculated. Thus were Mac's infant days spent and in the fall of 1905 he joined the great year of '08, S.P.S. Here Mac's early training stood him good, and we find him passing every year successfully. We predict for one of such capacity not only success but great popularity wherever he goes.

McLEAN, L. ALVAN

"He is little, but oh my!"

Born in Kippen, 1887, and graduating from Scaforth Collegiate, he registered with the class of 07 and completed his first two years. Then, believing that all knowledge was not to be acquired in college, he spent eighteen months in Western Canada. Having had most of the romance of living in the wilderness on Chicago chicken eaten out of him by black flies and mosquitoes, he resolved to complete his course with the class of '08. "Mae" was always an enthusiast in association football and hockey, having played on different school teams. He was President of the Association Football Club in 1906, and the same year was elected Third-Year Athletic Representative. His jolly disposition and happy smile, which have made him popular in college, should certainly bring success in his profession.

McMORDIE, HENRY CAMPBELL

"His form accorded with a mind, Lively and active, frank and kind." Scott.

It seems unnecessary to write up Mac's life now, for it will before long be written by a more able biographer. Like every one else, he was born and went to school. Huron County was the scene of the first incident; Clinton Collegiate Institute has the honor of the second. On leaving school, Mac spent three years in the Molsons Bank, on leaving which, to join '08 Civils, he displayed his usual good judgment. In his second year he played intermediate soccer, in his third he made the senior team, and also was Vice-President of the year. One of the best known and most popular men of his year, '08 join in wishing him all and every success.

McMASTER, WILLIAM A. A.

"Who saw in every man a brother:
And found in each a friend."

Harriston High School did no small thing when she contributed to the class of '08 the subject of this sketch. After leaving high school, he taught for four vears in his home school near Palmerston, but tiring of a pedagogue's life he entered the University of Toronto in '05 to take a course in Civil Engineering. So far his efforts have been productive of success, he being an Honor Graduate of the first rank. "'Mack" has a disposition and a character all his own, and such that those who know him best will well remember him as being an intellectual, tactful and honorable young man, blessed with a good deal of personal magnetism which has won for him many friends, and if this be taken as a gauge for the future "Mack" will always find himself in a whirl of true admirers.

McROBERTS, ARTHUR A

Born in Manvers Township, County of Durham, at an early age he moved to the village of Pontypool, where he received his preliminary education. Later he attended Bowmanville Collegiate Institute and Ottawa Normal School, where he was qualified to teach the young mind. For several years Mac. wielded the rod, fulfilling his duties with great success. In 1905 he enrolled in the class of '08, Applied Science, where he has distinguished himself by his Honor Standing throughout his course. That a brilliant future is assured to Mr. McRoberts is the hope and expectation of those with whom he has been associated in college life.

At-Home Committee, Graduating Class 'o8. F. A. Robertson J. J. Spence A. H. Foster

H. COYNE

J. A. Walker Secretary H. C. McMordie Chairman R. H. Douglas Treasurer

MADGE, NORMAN GIBSON

"Keeps his counsel, does his duty, Cleares to friends and loveth beauty."

Norman Gibson Madge helped to swell the census in the year 1885. He attended collegiate institute of St. Mary's, where he was President of Literary Society. After wandering around gaining experience. Norm, decided that he was destined to be a famous chemist, so entered S.P.S. with the class of '08 in Analytical and Applied Chemistry, Although maintaining an enviable standing throughout his course, he has always found time to take an enthusiastic interest in all college affairs. His class showed their esteem of him when he was elected to the Torontonensis Board. His friends, who are numerous, wish him all success in the future.

MARLATT, KENNETH DEAN

"A merry heart goes all the day."

Ken, was born in Oakville in 1888. In early years, however, he decided to imbibe knowledge in Toronto, realizing, perhaps, that his field of endeavor was slightly restricted. Matriculating from U.C.C. in 1905, Ken entered the Department of Analytical and Applied Science of the Faculty of Science. While not exactly killing himself with work, he has taken a creditable stand throughout his course, and has found some time to devote himself to football, playing on the Junior School, 1905, and Senior School, 1907, Mulock Cup Teams. Ken. has a genial disposition. Those who knew him will long remember the sunny smile which should ensure him a fairly even journey through life. After graduation, he will probably take some further study in England. We may yet hear of him as Mayor of Oakville.

MALONE, JOHN EDMUND

"Of their own merits modest men are dumb."

We find this individual first coming before public notice in Brechin, Ont., in which place he was born in 1887. Here he spent his childhood days and received his primary school training at the "Foley Institute." He afterwards entered St. Michael's College and completed a three-years' course there in 1904. Being undecided as to what profession he should follow, he spent the following year in the Arts Course in Ottawa University. Finding his aspirations leaning towards Mechanical Engineering, he decided to register at the School in the class of '08. He was always found to be a faithful student, a pleasant companion and a firm friend. He has gained much respect among his fellow students and all those who know him, and we all ioin in wishing him every success in the profession he has chosen.

MARSHALL, ROBERT JOHN

"You know I say just what I think and nothing less nor more."

"Bob," was first heard in the early eighties in the town of Galt. He migrated to Toronto when yet young, attended school here and matriculated in 1902 from Parkdale Collegiate. His engineering proclivities were early apparent, and so he finally threw in his lot with '08, and has truly assisted the year in all its undertakings. Of a strong physique, he has taken a keen interest in sports, being most conspicuous on the rugby field. In his first year he was elected Assistant Librarian. "Bob." has the admiration and respect of the year, and we all wish him good success in his future career.

MILLIGAN, GORDON LATHROPE

"We could have better spared a better man."

Gordon Milligan conferred the honors of his birthplace upon Brampton, Ont. His name, however, is evidently misleading, for it is to blame for his nickname, "O'Toole," whereas Gordon is really of Scotch descent. In the earlier part of his education the Brampton Public and High Schools are responsible. His ambition going further led him to choose a course in Industrial Chemistry as the preparation to a brilliant career. While not confining himself too strictly to the academic work alone, "O'Toole" has always shown a keen interest in the general affairs of student life, and he will long be remembered for his lovalty to the "School" and to the University.

MOLESWORTH, JOHN C. PONSONBY

"Thy modesty is a candle to thy merit."

The subject of this sketch first came to light in the city of Toronto, in the eighties. He received his early training at the Model School, Toronto, afterwards matriculating at Jarvis Street Collegiate in 1905. He joined the "Toike Oike" Institute as a member of '08, passed his first and second years with Honors, and at the elections this year was made President of '08 Association of Architects. "Jack," as he is called by the boys, has for some time been connected with the Varsity section of the Engineers. at the present time holding the position of sergeant of that body. His good nature and unfatiguing energy will gain him many friends and clients in his professional career.

MITCHELL, ANDREW BLAIR

"His ways were unique; even himself."

Born in Toronto, 1886. He had his early schooling at Lansdowne Public School. At Harbord Collegiate he first gained renown as a rifle-shot, and has since done great credit to himself in military rifle shooting, being the youngest man that has ever gone to England on a Canadian Bisley Team. Blair shows his love for the School and Science and qualifications for leadership, by being first at lectures in the morning. Never was he late. His habits of living lead us to predict an old age. From his exact following of the motto of carefulness in his pursuits, enterprise and success are surely to be his. Blair has made friends at the School and always will make friends. He has the best wishes of his '08 mates.

MONK. E. D.

"What damned epicurean rascal is this?"

Edmund Dering Monk was born at Ottawa on April 5th, 1888, where he spent his childhood days. He later lived in Almonte for a few years, and since then Cornwall has been the family home. As well as success at school, he obtained some distinction in athletics. He entered our long halls in '05 and soon learned the art of painting, and throughout his success has followed him. The ladies have not had "Dearie" wholly theirs, till his graduating year. In his working hours (?) he ponders over the mysteries of Chemistry, hoping ultimately to solve the equation PV = nRT, which as yet has five unknowns. His morning yawn and his graceful good-nature have won all hearts.

MOODY, FREDERICK HAYWARD

"He was a gentleman on whom I built an absolute trust."

On May 31st, 1887, at Kingston, Ont., Fred, gave his friends the benefit of his first smiles. Finding the songs of the eastern jail-birds rather unmelodious, he migrated at an early age to the Queen City, where he received his school and collegiate trainings. After testing his chosen profession for two years he entered the University of Toronto to study Mechanical Engineering with the class of '08. His efforts have always been rewarded by the highest success. As a member of the Electrical Club Executive he has shown himself to be a free-thinker and a good councillor. All his friends expect him to make his mark in the Engineering profession.

MOWBRAY, FRANK E. H.

F. E. H. Mowbray, son of R. R. Mowbray, a farmer in the Township of Pickering, in the County of Ontario, was born January 20th, 1884. At the age of seven vears he commenced his education at the Kinsale Public School and obtained his Junior Leaving when 17, at Whitby Collegiate Institute. Then, for four years he was at home. He entered the School of Practical Science in 1905 as a student in Mechanical and Electrical Engineering. Naturally, he was of studious disposition and retentive memory, and a lover of books. He always displayed a taste for doing his work well, and thoroughly understanding it. Knowledge thus acquired he was able at any time to recall to his advantage. He is of a genial disposition, honest and truthful, and a general favorite with his associates.

MORICE, JACK HENRY

"Be firm! One constant element of luck Is genuine, solid, old Teutonic pluck."

Jack was born in Stratford, but nomadic blood took him to Niagara Falls, London and Toronto before he finally settled on Niagara Falls. He attended the Parkdale and Niagara Falls Collegiates, matriculating from the latter in the spring of '05. Coming from the Power City, he naturally took Electrical Engineering, and has shown himself quite equal to his course. His characteristic energetic meandering appears also in his vacation work, for he spent the last three summers with the Ontario Power Co., the Toronto-Niagara Power Co. and the Niagara Falls Machine and Foundry Co. respectively. With the record he has left we can predict for him nothing but a successful career.

MURRAY, WILLIAM PAUL

Possessed with an innate desire for higher education, W. P. Murray in the vear 1904, having graduated from S.C.I., determined to appease his thirst for knowledge in partaking of the par excellence instruction to be won in the Faculty of Applied Science and Engineering. In his youthful days, he showed himself endowed with considerable mechanical ingenuity, and in his secondary education a desire for Mathematics was nurtured to be more fully matured in Varsity. An amiable power of concentration developed an alertiess in reasoning which has won him a foremost place in class '08. In other phases of college life he has held prominent positions, being a zealous Y.M.C.A. worker, and holding the position of "Guardian of the Exchequer" for the past year. In now sending him forth from these historic precincts to face the world, we may safely predict brilliant achievements and unbounded success.

MURRAY, STUART

"When there's a woman in the case
You know all other things give place."

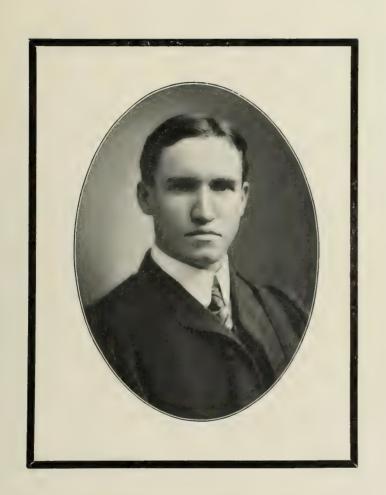

The subject of these remarks received his public school education at Goderich, as will be remembered by the "wielders of birch" in that town. In his collegiate days he took a hearty interest in athletics, and became an active participant himself. On matriculation he entered S.P.S. with '08. During his course his evenness of disposition won him many friends, and among the boys he was regarded as a "good fellow" by every one. His executive ability has lately won him a good position and a place on the board of directors of a large manufacturing establishment across the border, where his success is already assured.

A busy day in the Electrical Lab.

CHEMISTRY AND MINERALOGY BUILDING.

In Memoriam

Henry Gilbert Smith, B.A.Sc.

Demonstrator in Electrical Engineering

Died July 3rd, 1907

"MORE HASTE LESS SPEED."
TIME- 8:45 AM

"TAPPED" (POOR FRESHIE!)

NASMITH, MUNGO EWING

"Im Glück nicht jubeln. In Leid nicht Klagen;

Das Unvermeidlige mit Würde tragen."

Before entering on his course in Applied Chemistry at S.P.S., Mungo had had considerable experience both at home and abroad. He spent two years in the large baking concerns of England and Scotland, finishing in the Borough Polytechnic Institute in London, from which he took the highest honors ever awarded a Colonial. Since then he spent a term in a Pittsburg Technical Laboratory. As Vice-President of Engineering Society his thoughtful handling of his various duties has won him the highest esteem of his fellow pupils. For two years on the First Varsity Rugby Team, he has gained a most enviable reputation as a star of the season 1907.

O'GRADY, WALLER de C.

This member of '08 came into existence in Montreal, P.Q. After adding some years to his age, he attended Woodstock College and on leaving there spent three years in the London Collegiate Institute. Something prompted him to take an Engineering Course and we find him attending S.P.S. Here's to O'Grady, may he live long and prosper in the profession which he has chosen!

O'DONNELL, VINCENT JOSEPH

"And let me the canakin clink, clink; And let me the canakin clink:

A student's a man; A life's but a span;

Why, then, let a Science man smoke?"

The subject of this sketch was born and spent his youth in Merrickville. After a course in Smith Falls High School he for a few years applied the rod in a school in Glengarry County. On entering college he soon became a leader in matters of interest to the student body. In Hydraulics he conclusively proved that a number of "liquids" glow more readily and produce a larger "head" than does water. In his final year he held positions on the Torontonensis Board and on the year Executive, his efforts being attended with great success.

PECKOVER, HORACE JOSEPH

"A friend to truth; of soul sincere."

Horace Joseph Peckover first delighted the eyes of his parents in Kingston, Jamaica. From the care of his 'mammey'' he came to Toronto in 1906. The following year he moved to the States. where he remained for three years, returning then to Toronto. He passed his matriculation from Harbord Street Collegiate in 1901. After engaging in commercial life for some years, he decided to become an Engineer and entered "School" with the record year of '08. Since entering, "Peck" has always taken a position in the front row, proving himself an industrious worker and good student. Success to him is sure.

History of Class '10

HEN Mother Earth had yielded up her harvest and the birds of prosperity and contentment had settled upon city and hamlet, it was then that youth decided to forsake the distressing monotony of manual labor to seek some wider sphere for his restless ambitions.

What profession should he choose? There's the rub. Around the fireside at night the older heads gathered to discuss the young man's future. When the engineering profession was first mentioned it caught the youthful fancy. In the last glow of the dying embers he saw himself leading a party of engineers constructing great railroads, spanning broad rivers, or directing the building of great structural edifices, to be monuments of his régime. Another stood amid a vast number of whirring machines of intricate design. By a movement of his hand he could plunge cities into darkness and demoralize traffic. He held the power within his hand.

And yet again, another pictured himself in the world of minerals, in some far off wilderness, sinking shafts, driving drifts and running cross-cuts. He was giving to the world fabulous wealth, hidden for ages.

Medicine! Divinity! Law! What did these hold for him

in comparison to the life of an engineer?

From east and west, from north and south, the motley army of knowledge-seekers wended its way to the Faculty of Applied Science—University of Toronto.

Thus, on October the first, nineteen hundred and seven, the illustrious class of "Nineteen-Ten" was born—numerically the greatest year that ever came to S.P.S.

After the usual confusion of registration came organization. This naturally fell into the hands of the "stale freshmen" (for the unsophisticated—those who entered in the wrong class in 1906). Elections were held, and the following were chosen to guide the destinies of the year.

President, R. B. Jennings; Vice-President, H. L. Scott; Secretary-Treasurer, S. A. Cummiford; Council, Messrs. Nickle, De la Porte, McBride and Cawley.

In athletics, "as a curtain-raiser," the 1910 Football Team fought its way to the finals for the Mulock Cup. This successful opening was due in no small degree to the management of Mr. J. I. McSloy and the captaincy of Mr. Bert Allison. It is safe to predict that the hockey season will develop a championship team to battle for the Jennings Cup.

All the societies, so pregnant in college life, have found the freshmen earnestly and energetically taking part. In the realm of the "immaculate bosom and fair women" they have proved themselves no dullards, and accordingly their conquests (at least, so I'm told) have been numerous.

The dream of greatness in the engineering world has by this time received some rude shocks in numerous encounters with trig., algebra, statics, etc. The road to knowledge is not a royal, triumphant march, as it seems from the outsider's point of view, but to the contrary it is a narrow, slippery path, perched on a dizzy height, with countless obstacles barring the way. The hall of learning is not a 'land of perpetual sunshine.' It can be better termed a 'land of intermittent flashes of sunshine and shower.'

It is the earnest hope of every man in the School that the final examinations will find the entire year sailing in the barque of Success over the waves of wider knowledge into the Haven of Prosperity, still preserving all the might and "esprit de corps" of its freshman year.

"Set squares, tee squares,
Two-foot rules,
Transits, Theodolites,
Engineers' tools.
Engineers, Draughtsmen, Transitmen,
School of Science, School of Science, Ninteen-Ten."

H. E. CAWLEY, '10.

EXECUTIVE OF CLASS '10, S. P. S.

NICKLE T. C. McBride

H. L. Scott Vice.-President

H. E. CAWLEY A. V. DE LA PORTE PROF. C. H. C. WRIGHT Hon.-President

R. B. Jennings

S. A. CUMMIFORD President Secretary-Treasurer

PEQUEGNAT, MARCEL

"Il ne chante pas ses éloges."

Marcel Pequegnat ventured into Berlin. Ont., on April 27th, 1886, and homesteaded near the five points. He attended the public school and collegiate of that famous town of sport, where he combined football with faithful study. He came to "School" in '05, and has ever since been the "information bureau'' for noughty-eight. Not content with being on top in his studies, he took an active interest in association football, making the S.P.S. Senior Team and the Varsity First Team in '06. He toured with the '06 Varsity Champions, won his "T," and was elected Third-Year Representative to the Athletic Association. Among his fellows "Peg" is quiet and reserved, but a firm believer in the passage of scripture, "Man was not made to live alone."

PIVNICK. MAURICE

"His wishes were the laws of his actions."

Maurice Pivnick was born in the town of Minsk, Russia, 1886, and came to this country in October, 1901. Without the slightest knowledge of the English language, he entered public school, and completed his matriculation at the Jarvis Street Collegiate less than three years later. The great event in his life occurred in the year 1905, when he entered the Mechanical Engineering Course at the School of Practical Science, paying his way financially by teaching at one of the city night schools. His ability to overcome obstacles, together with a kind and generous nature, has made him highly respected by all who know him well. The love of truth and abhorrence of all things mean have done much to characterize him.

PHILLIPS, HAROLD GEOFREY

"Conspicuous for mirth and laughter, The ladies first, the fellows after."

Harold Geofrey Phillips was born in Petrolia and received his public school education at Tillsonburg and Minden. After matriculating with Honors at Markham High School, he came to Varsity and decided to enter in the Civil Engineering Course with the class of '07. At the end of his second year, he accepted a good position in the Engineering Department of the Canadian Northern Railway at Winnipeg, where he spent twelve months. Later on, to gain wider experience, he worked a season with the District Engineer of Saskatchewan, having Saskatoon as headquarters. In the fall of 1907, he returned and joined the class of '08. The boys have an eve on him, and will watch his evolution into fame.

PROCTOR, EDWARD MOORE

"Twould be endless to tell you the things that he knew."

Edward Moore Proctor was auspiciously ushered into this world in 1888, at Sarnia, Ont. He spent his youthful days and attended school in that town, and in 1904 matriculated from the Sarnia Collegiate Institute. After another year spent in industriously seeking knowledge at the same institution, he entered the strenuous life of 'the "School" with '08. Although very successful in his works. "Proc." has found time to be an active member of all student organizations. As a popular member of his year and as an enthusiastic supporter of all athletic and School functions, he will be remembered by the men of his year. All '08 unite in wishing him and predicting for him success.

PUBLOW, CEDRIC FRANKLIN

Born at Pilot Mound, Manitoba, on October 27th, 1886, he is in all respects a genuine Westerner. He was educated in his native town, and in 1902 took a Teacher's Certificate. After having taken a Normal training, he entered the profession of teaching, but in the fall of 1903 he gave up his position and came to the "School." During his course he has taken an active interest in Y.M.C.A. work, particularly in the initiation of freshmen or sophs. He also gave to Torontonensis a very definite and pronounced support. If you want to get wise on a subject, all you have to do is: "Say, Pub., just a minute here, please."

RANSOM, JOHN THOMAS

"In arguing, too, the parson owned his skill.

For even though vanquished, he could argue still."

A Torontonian of the eighties, his public school and collegiate courses were crowned with well merited success, and his all-round good fellowship has won for him a host of friends. Entering "School" in 1905, he chose the Mechanical Engineering Department, as a vehicle to fame, but after taking Honors at the first annual examinations, decided that Civil Engineering was more to his liking, so on re-entering in 1906 he took up that line of work. His general ability and particular superiority in Mathematics guarantees him success, whatever field of activity receives his attention, Notwithstanding his devotion to study. the other features of college life were unneglected, athletics, social life and Y. M. C. A. work all received from him due share of interest, and the year '08 unanimously join in wishing a prosperous future to this favorite son.

QUA, ARTHUR HARPER

"A youth to fortune and to fame unknown."

Arthur Harper Qua received his early education at Paris. Having matriculated from the high school there, he proceeded to follow out his original idea of becoming an Engineer. Thus, he came to Toronto and became a student at the S.P.S. As a School man he was naturally drawn into sports of various kinds, which have done a great deal for him in the way of all-round development. In Y.M.C.A. work and in other literary and scientific circles, he has taken a keen interest. This, together with his genial ways and cheerful manner, has won for him a warm place in the hearts of his fellow students.

REDFERN, WESLEY BLAINE

"A heart to resolve, a head to contrive, and a hand to execute."

In Owen Sound in 1886 there was great rejoicing over the birth of the subject of this sketch. Having passed pleasantly the Teddy Bear stage, he entered the Owen Sound Collegiate, matriculating in 1904. After deliberating on many getrich-quick schemes, he finally decided on a course in Civil Engineering, as being the most practical, and entered the School with '08. During his academic course he has always taken a deep interest in all student organizations and the esteem with which he is held is evinced by his election as Vice-President of the Engineering Society. He has also been pleased to take Honor standing in his course each year, and graduates with the best wishes of his class-mates.

RICHARDSON, FREDERICK LEEDS

"And still the wonder grew
That one small head could carry all
he knew."

In all these biographies, "Richie" stands out on the horizon of our memories like Mars at Perihelion. Born at Maple in '88, he started his educational career at five. He matriculated in '04, entered the S.P.S. the following year, and has since been one of '08's most ardent supporters. In appearance he is an advertisement for any boarding-house. and is the proud possessor of a strong, athletic body. Richie is a conscientious student, a good living fellow and by his good nature and keen interest in sports and everything in connection with the School, he has made many friends, and we all heartily wish him God-speed.

ROBERTSON, FREDERICK ALGERON

"There was a man in our town and he was wondrous wise."

Frederick Algeron Robertson, familiarly known as "Robby," gave his first "Toike Oike" in Toronto in 1885. His judicious selection of a birthplace, combined with a natural aptitude for scientific research led him, after a short sojourn in Pickering College, to the home of the "meek and peaceful," where he joined the class of ''07. Two years at the School so endeared him to his professors that they were loth to see him depart, so he is with us now in '08. His unfailing cheerfulness and good humor and other A1 qualities, especially the possession of an inexhaustible tobacco pouch, have won him friends in all the years, who combine to wish him the success he deserves. "Here's looking at you, Robby."

RICKER, HERBERT ADAM

"It kept him from the paint and brush, That smile that won't come off."

Herbert claims the modest burg of Dunnville as his birthplace, and from its high school he obtained his Junior Leaving standing. After wielding the rod for two and a half years, and endeavoring to inspire the minds of the young, his ambition soared higher and Herb. threw in his lot with "Toike Oike," around whose halls he soon became one of the best known men of "noughtyeight." Passing successfully through a siege of life in the "Smoky City" speaks well for his fortitude and stickto-itiveness. Always in good humor and ready to lend a helping hand, an upholder of college spirit as it should be, he's a "gey lad wi' a future."

ROBERTSON, ALEXANDER ROSS

"A man he is of honesty and truth."

In Glencoe, on May 22nd, 1888, the doctor said, "It's a boy," and our genial friend Ross was ushered into this vale of woe and pleasure. Born with a goodly share of Scotch and Irish blood in his veins, he started life with a valuable asset. After matriculating from the Glencoe High School, and being of a practical turn of mind, he entered the School with the class of '08, and his studious tendencies are evinced by his still close association with his first classmates. But Ross is not simply a good student. Primarily, he is a good fellow, in the broadest sense of the word. He has seen life from a practical side in association with his father and in survey workr in the north. He has also the distinction of being the first son of any School graduate to graduate. He has the best wishes of his class-mates for his future success.

ROBINSON, WILLIAM A., B.A.

"A man not given to words or strife; a man of sense."

One day last century, he first blinked at the sun in Ludington, Michigan. At the age of six months, however, that perception and foresight which are particularly his began to manifest themselves. when he migrated to Winnipeg. Matriculating in 1898, he entered Manitoba University, from which he graduated in Higher Mathematics in 1901. Stocked with so much learning, he tried for some years to impart it to the rising generation. In 1906 William's perception fully manifested itself, when he came east and joined the glorious class of '08 in the second year. Although unknown as an office seeker, his influence is not inconsiderable. A genial manner and manly kindness bespeak future success.

ROGERS, LINNAEUS JOSLYN

"A woman is only a woman;
But a good cigar is a smoke,"

"Jos." first inflicted himself upon a long-suffering world in the town of Oshawa in 1887. He obtained his Senior Matriculation in '05 and entered the course of Applied Chemistry at the S.P.S. in the same year. His university career has been marked by abundant effort, and his standing in his year has been correspondingly high. His keenness of perception, resulting in spontaneous appreciation of the humorous side of events, has made him a favorite with all with whom he came in contact. We feel confident that his future will be as successful as his great ability and sterling character would lead us to expect.

ROBINSON, ROY CLIFTON

"Some say that gleams of a remoter world

Visit the soul in sleep."

Roy, familiarly known as-"Bobbie," originates from the wild and woolly West. He first decided to roam the prairies on August 21st, 1884, at Brandon, Manitoba. Bob received his primary education in his native town, and matriculated from Wesley College, Winnipeg, in the spring of 1905, in all probability well versed in the doctrines of Methodism. He entered the S.P.S. '08 class of Electricals in the fall of 1905, and since that time has won for himself a warm place in the hearts of his fellow students. "Enthusiasm" is said to abound in the West, and "Bob" demonstrates this assertion with one exception -he is prone to disturb the early morning lectures. College is where true friendships are formed and Bob's career will be watched by the class of '08 with interest. They will always be expecting some wonderful electrical development to burst forth from his fertile brain.

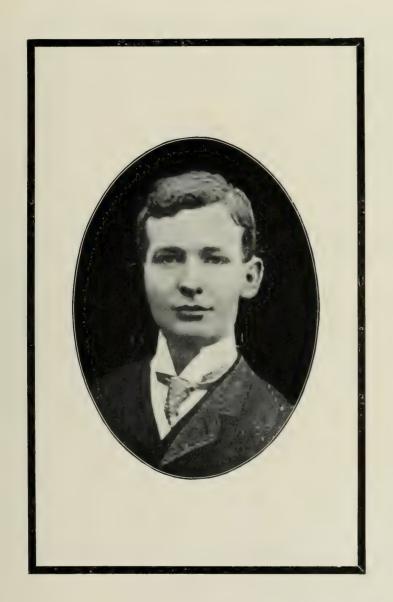

ROSE, R. RANDAL

"In a cabin, in a canyon, Excavating for a mine, Dwelt a miner."

R. Randal Rose was born in Seaforth in 1888. Received his preliminary education at Seaforth in the public school and collegiate institute, also at Wingham and Guelph Collegiate, from which he matriculated in 1904. Entered the "School" in the department of Mining Engineering with the class of '08. His vacations have been spent in New Ontario, also in the Eastern Townships, on the Geological Survey of Canada, to which he was appointed in his second year at the "School." During his course he was a follower of association football, playing on the Senior School Team, '06-'07 and '07-'08.

SECOND YEAR S. P. S.

In Memoriam

Osborne Samuel Corrigan

Born May 17th, 1885 Died May 5th, 1907

ROSS, DAVID

"Fair Science frowned not on his humble birth."

In the summer of 1887, so noted for its sun spots, followed by areas of intense heat and electrical disturbances, there arrived in London, amid great éclat, Davy Ross. After having completed the public school course he entered the L.C.L., where he made many friends and also took an active part in the school sports. Having completed his matriculation he registered at the S.P.S. in the department of Mechanical Engineering. Davy has chosen an excellent course and his many friends at the School wish him every success.

SANDERSON, ALLAN USILL

"In brilliancy he dazzled the sun."

A. U. Sanderson, generally known to the boys as "Sandy," is a fitting subject for the above quotation, considering the magnificent results he has attained in the color scheme. "Sandy" was born in Toronto in 1888 and began his education in Wellesley Street School. After going through all but the roof there, he completed his preparatory course at St. Andrew's College. He entered the class of '08 at its inception, and by singular good fortune has managed to stay with it. Nevertheless, his course has shown him capable of making a success of his career.

ST. LAWRENCE, JOHN

"A heart to resolve, a head to contrive, and a hand to execute."

Jack was born in England, but at an early age decided that Canada needed him, and he has been here ever since. After favoring with his presence many different parts of Ontario, he finally selected London as being most deserving of his permanent abode. Here he gained much valuable experience in engineering work, and fitted himself to enter the School. Since being here he has not only proven himself a student of the first rank, but has taken that interest in other college affairs which betokens a broad mind. That his ability has been recognized by the year is shown by the various offices to which he has been elected, and it is safe to say that no graduate of '08 will leave more friends than he.

SECORD, ARTHUR OLIVER

"Who, with a natural instinct to discern, What knowledge can perform, is diligent to learn."

Arthur Oliver Secord made his howling début on the scene of life's activity on January 6th, 1887, in Brantford, Ont. Receiving his primary education at the Brantford Public Schools and matriculating at the Collegiate Institute, he decided to delve deeper into the mysteries of engineering and entered the S.P.S. in the Civil Department. Rumor has it that he is a descendant of the great Laura Secord, but the descent must have been great. "Art," though not of a vociferous nor spontaneous character, is composed of the necessary elements of common sense and good judgment to formulate a compound which will ensure success in his chosen profession, and carries with him the good wishes of the entire class.

SHAW, WILLIAM E. V.

"Tempus fugit, the child of yesterday is the man of to-day."

Born in Sydney, N.S.W., Australia, on June 3rd, 1883. He imbibed a certain amount of knowledge by attending Newington College, Sydney, All Saints College, Bathurst, and Sydney University. In 1905 he enrolled at Toronto University, ostensibly with the view of becoming an electrical engineer. In reality he has succeeded in making the Senior Rugby Team, 1906 and 1907, in winning the swimming championship for 1906 and 1907, and in being elected to the Camera Club Executive. It is a matter of supererogation to sound his praises for those who know him, but we must say to the unfortunates who do not that he is a "right good fellow," and in those three words we embody his past successes and our confidence in his future.

SPENCE, JOHN J.

John J. Spence is a pure Torontonian. At an early age he attended Upper Canada College. While in attendance there he took an active interest in sports, being a member of all the teams. On passing from Upper Canada College he began his career in the Faculty of Applied Science, University of Toronto.

SHEARER, HARRY FOSTER

"But there's more in him than thou understandest."

Like so many born to be great, Harry is a son of the soil. Providence was kind at his very advent, directing the stork with his precious burden to Vittoria, in the famous County of Norfolk. His youth developed engineering inclinations and with a view to improving these he decided to come to S.P.S. after taking preliminary work at Simcoe High School. At School he has taken a keen interest in athletics and Y.M.C.A. work. Harry is of a cosmopolitan composition, well known, and feels "at home" at nearly every college comprising the U. of T.. and it is said that his fraternizations extend even beyond the borders of the University. Harry will be an electrical engineer.

SQUIRE, GILBERT E.

"He has a sadness in his air, Born, maybe, of his overcare."

Gilbert E. Squire spent his early years near Mitchell; there his good-natured smile won the respect and admiration of his instructors. Always a lover of animals, he soon became interested in horses, and he still takes a lively interest in all that pertains to the "horse." On matriculation at Mitchell he began his engineering education with '08. During the course there has always been present the evidence of good will towards everyone and a quick appreciation of the good points of other people. If he develops the resourcefulness and ingenuity of which his youth gives such abundant promise, he will easily triumph over the difficulties that may in future confront him.

STAMFORD, WILLIAM LEONARD

"A peculiar grace, to face Great issues; good or bad."

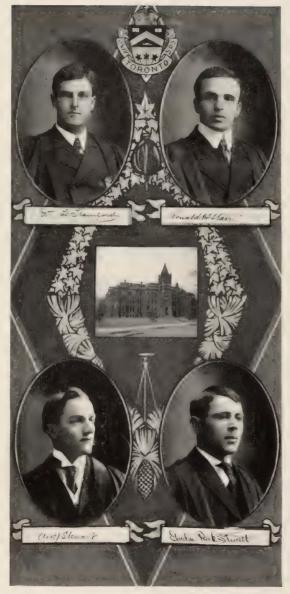

The original of above landed on this sphere at the town of Dundas. Ont., in 1883. Here he attended the public school and after a few years residence in Victoria, B.C., returned to his native town and completed his matriculation, then tossed in his lot with the year of noughty-eight at S.P.S. "Stam.," as he is familiarly known among the boys, has identified himself on the athletic field in association football, playing on three school teams. His unassuming manner and genial temperament has gained him many friends. Three years theoretical and practical work should enable him to hold his place in his profession.

STEWART, ASA W. J.

"Had sighed to many, though he loved but one."

Asa entered this world one bleak November morning many, many years ago, in the oily town of Petrolea. Attended public and high school in his native town and was a source of constant worry to his teacher. After matriculating he retired to his father's oil property and for some time operated the wells. Came to the "School" and went in for constellations under C.H.C. Went joyfully into "scraps" and cheerfully into "cosy corners." Was elected Representative on the Engineering Society for '08 in his second year, after a notable fight; also President of the year. Was member of Students' Parliament for third year. Has few enemies and hosts of friends. His next honors will likely be matrimonial.

STARR, RONALD H.

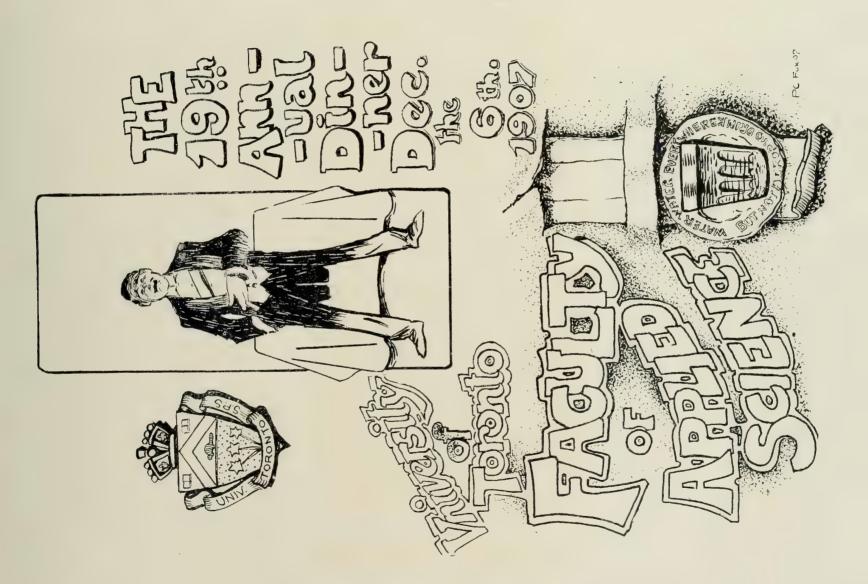

"Twinkle, twinkle, little Starr, How I wonder what you are?"

Born in Brandon, Manitoba, in 1884. Shortly after the family moved to Brampton, Ont., and then to Toronto, where he received his public school education. At the age of thirteen he took up his residence in Kingston, where he attended the collegiate institute until he matriculated in 1902. He spent one year in the employ of the mechanical and electrical department of the Kingston Street Railway Co., and two years with the Toronto Street Railway Co., this practical work greatly helping him in his studies in Electrical Engineering. All his life he has actively participated in sports of all kinds.

STIRRETT, GORDON PARK

"As merry as the day is long."

"Gord." first appeared in this "vale of tears" in 1886 and has been on the job ever since. He finished his preparatory education at the Petrolea High School. Making a start at the School in the class of '06, he spent two years in the Mining section, but hearing of the fame of '08 he decided to wait and let it catch up to him. While here he played rugby on the Junior School Team. After spending two years in practical mining work, "G. P." came back to the School last fall. He is not very well known among his present class-mates, but is sure to be popular when he is better acquainted. Since coming back he has made a place on the Third Year School Rugby Team, playing in the Mulock Cup games.

School Dinner Extracts

Dr. Ell-s (opening at first page of a large book)—"The first man"—
(pause). Someone in class—"Adam" (laughter).

Dr. Ell-s—"I am sorry to say that the resemblance here to the Garden of Eden is not very striking." (Applause.)

Professor (returning to class after two minutes absence while things were rather lively)—" I'm glad to see, gentlemen, that you do not waste your golden opportunities."

Dr. Ell-s (to Third Year, after a semblance of a scrap with the Meds.)—
"My prayer is for three days' rain."

Equation of a Full Load-I. 8 a. T.

The Freshmen at the Gym. who interrupted the Arts Banquet (?)
—" Come on in, the water's fine."

Prof. McK'-z-e (to hesitating freshman) — "What is the matter? What group are you in?"

Freshman-"H."

Prof. McK-z-e-" Down below."

STOCK, JAMES J.

"I'd ha' you sober, and contain yourself; Not that your sail be bigger than your boat."

James J. Stock was born at Stratford some time ago. At collegiate he showed more than average ability in getting good results from a minimum amount of work. Thinking he had a practical streak in him—and knowing no better—he decided upon an Engineering course. He entered the School along with the class of '08, and, fortune favoring him, has managed so far to stay with it. Though taking a long time to gain the state of manhood, he has finally got there, or at least thinks he has. Concerning his future career as a civil engineer, one can only hope for the best.

STUART, JOHN L. GIBSON

"His real habitude gave life and grace To appertainings and to ornament."

John decided to be a Civil Engineer and accordingly matriculated to that department of the Faculty of Applie 1 Science in 1904. His first vacation was spent on construction work with the Toronto-Sudbury branch of the C.P.R. The following summer found him engaged in Government Township Surveys in New Ontario. He was next employed by the Canadian Northern on their new James Bay division. He has also obtained a practical knowledge of Civil Engineering under City Engineer Rust, in the Roadways Department. His artistic temperament can be judged by a glance at page 326 of this volume of Torontonensis. This year was spent in the Mining Department.

STUART, HAROLD BROWNLEE

"An affable and courteous gentleman."

Harold Brownlee Stuart first made himself heard in the town of Mitchell, in 1889. In this same town he spent his boyhood days, matriculating from the high school in 1904. While in attendance at that institution his literary tastes were much appreciated and he was elected President of their Literary Society. Being of an ambitious nature and having a great liking for mathematics, he enlisted in the ranks of '08 in Civil Engineering, and his School spirit soon made him quite popular among his classmates. In order to become familiar with the mysteries and hardships of his chosen profession, he spent his vacations engaged in general engineering work near Mitchell and in fire ranging and fighting mosquitoes in New Ontario. We predict that the same good qualities which attended "Loui" in his University career will win for him a very successful future.

SWORD, ARTHUR DITMASS

"The pen is mightier than the sword."

He was born in Toronto and has lived here all his life. Art received his preliminary education at Dufferin Public School and Jarvis Street Collegiate Institute, matriculating from the latter. The following fall found "Art" enlisted in the ranks of '08 Electricals. Despite the fact that it is an old proverb, "Art" emphatically denies the above statement. To substantiate his convictions he forsook the call of a literary career for the more strenuous one of Engineering, in which we all wish him well.

TAYLOR, JOHN WATSON ROY

"In those proud days he little cared for husbandry or tillage."

Being reared at Keene, near the Electric City, with its many magnetic attractions, it seems natural that one of scientific inclinations should follow an electrical career. After receiving his preparatory education at Norwood High School this personage spent three years sufferance "wielding the birch." Then his natural inclinations burst forth and the class of '08 claimed him as a victim. Here he entered into the full spirit of college life and upon all occasions had a ready hand to uphold the honor of the yellow, blue and white. If industry, ability and determination count for anything, Roy will certainly succeed.

THOMAS, VERID C.

"When every god did seem to set his seal To give the world assurance of a man."

Verid C. Thomas was born at Markdale, Ont. He received his public and high school training in Toronto and matriculated from Jarvis Street Collegiate Institute in 1903. "Tommy" always manifested a "thirst for knowledge" in the scientific line, which he sought to gratify by joining the year '08 of the Faculty of Applied Science. He proved himself to be a true student, ever seeking to intelligently interest himself in his work, and his intellectual energy and love for study obtained for him an Honor standing. Modest and optimistic in disposition, he always proved himself very companionable to his class associates, "Tommy" intends returning to the American Westinghouse Co. to specialize in electric locomotives.

QURBULINBULINBULINBULINBULINBULI

TAYLOR, WILLIAM EMERSON

The above student was born at Massie. Grev County, in 1881. The earlier part of his life was spent on the farm. Even as a boy he longed for college halls, and as soon as opportunity came he left the farm, entering the Owen Sound Collegiate in 1903. He matriculated in 1904 and took his Senior Leaving the following year. In the fall of 1905 he entered the School with '08 in the Civil Engineering Department and has taken an Honor course throughout. He is of quiet and unassuming disposition and is best known by his closest friends. He is persevering and conscientious and will without doubt meet success.

THORNLEY, JOSEPH HARRY

"He was stately, young and tall, Dreaded in battle and loved in hall."

The subject of this sketch began his career in Ocean Grove, N.J., but early showed his wisdom by moving to Canada and making his home in London, Ont. In this city he obtained his preparatory education at Rectory Street Public School and at the Collegiate Institute. After matriculating into Toronto University he spent a year with the T.N.O. Railway and then in the fall of 1905 began his course in Civil Engineering. Harry has acquitted himself well in his class work, but has not confined himself to this, taking a leading part in many student activities. He was last year a member of the Gymnasium Team at the Assault-at-Arms and holds the Presidency of the University Boxing Club for the year 1907-1908. He has won many friends during his course and goes forth with their best wishes for a successful career.

TOMS, CHARLES GODFREY

"If He play, being young and unskilful, for shekels of silver and gold, Take His money, my son, praising Allah. The kid was ordained to be sold."

Chad attended Parkdale Collegiate and the Technical School, where, besides passing his examinations, he learned to play football and hockey. Then he came to the School, where he is qualifying for a Civil Engineer. His athletic record has been a distinguished one. In the summers he has represented the Argonauts at various regattas. He has played for three years on the first rugby and hockey teams. This year, when the prospects are good for the best hockey team Varsity ever had, he is Captain. His athletic experience and his personal popularity combine to make him one of the Athletic Directors for the present academic year.

VAN NORMAN, CLARENCE P.

Clarence Percival Van Norman was born in Toronto, which has been his home ever since. "Van" received his pre-liminary education at Jarvis Street Collegiate Institute, where he early discovered the difference between power and energy, in further pursuit of which he joined the class of '08 Electricals. During his whole course, Van has shown himself to be very apt, becoming especially proficient in the useful art of "cooking"—lab's. "Van" intends to affiliate himself with the Westinghouse Company, and we wish him all success.

TYE, HOWARD WARNER

"Nature made him what he is, And ne'er made such another."

Howard Warner Tye was born in 1883, in the village of Haysville, Waterloo Co., Ont. In after years he attended the Galt Collegiate Institute, taking the Junior Leaving in 1901. Next year he started to work for the Construction Department of the C.P.R. in the Northwest, leaving them to enter the S.P.S. with the '07 class. After completing his second year the C.P.R. saw fit to employ him as one of their resident engineers in the Northwest, where he stayed two years, afterwards re-entering the S.P.S. with the '08 class.

VILLENEUVE, THOMAS L., B.Sc.

"A moonlight night,
A girl in sight,
And heaven's not far away!"

The stork dropped the subject of this sketch on his father's farm at Chicoutimi, Quebec, A.D. 1881. Having overcome all vouthful trials and troubles, he entered a course in Classics and received from Laval University the privilege of writing B.Sc. after his already elongated signature. On his arrival in Toronto, English was "all Greek" to Frenchy and on this account much credit is due him for the able manner in which he has worked through the course. Tommy was always popular with the boys and his sonorous voice, leading the tune of "Alouette," will ever be remembered by his class-mates. For Tommy we predict a future no less notable than that of his compatriot, Sir Wilfrid.

WALKER, JAMES ALEXANDER

"When girls were there, he was always handu.

Some called him 'Hiram' and others 'Sandu.''

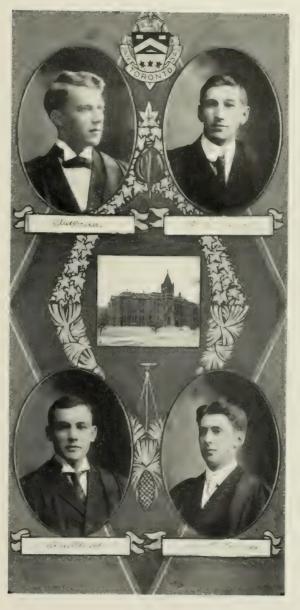

James Alexander Walker was born in Guelph, August 6th, 1887. He matriculated at Guelph Collegiate Institute in 1903 and his natural proclivities led him to the School of Science with the class of '07. Owing to illness he dropped out a year, returning with the class of '08. Alec has always been keenly interested in University affairs, having represented his first year on the Dinner Committee, his second year on the Class Executive, and in his third year the Science Faculty on the Undergraduates' Union Executive. He is also a member of Psi Delta Psi Fraternity. His apprenticeship was served with the city engineer at Guelph, and surveying in Manitoba and British Columbia. To attempt the prophetic role would be useless, but the future lies before him. Here's to Walker! May he live long and prosper.

WEBB, CHRISTOPHER EVERIST.

"One thing is forever good; That one thing is success."

Chris, was born in Granton, Ontario, but as soon as he could walk had to seek a bigger sphere, so he stepped down to Toronto. Ryerson School and Harbord Collegiate took charge of the boy to try to prepare him in sports and other things for what was coming at the School of Science. He entered the School with the class of '07, but owing to illness was out a year, thus enabling the members of '08 to have the pleasure of his company. In return, they let him manage their rugby and hockey teams. Chris. will always be remembered by his class-mates as a good fellow, and he has the best wishes of all to make good the one thing, "success."

TIMETTER TERTIFICATION TO THE STATE OF THE S

WAUGH, BRUCE W.

".1 merrier man, within the limit of bocoming mirth, I never spent an hour's talk withal,";

Bruce Waugh sprang into prominence near Seaforth in 1888. He early showed signs of greatness, both as a student and athlete, and during his cours, at the Sea forth Collegiate Institute was a favorite alike with teachers and school-mates. After a brilliant course at collegiate he drifted to the S.P.S. to study Electrical Engineering. Here he has managed to combine an enthusiastic support of athletics with an Honor standing on the class lists, a rare accomplishment. He is held in respect and esteem by all who know him on account of his ability and geniality and his many friends predict for him success in his chosen profession.

WEDLAKE, REGINALD MAXWELL

"Tis well said—he is a man."

Reg. first opened his eyes in this bright world at Brantford, Ont., on May 31st, 1885. This "long-headed youngster" received his primary education in his home town and matriculated from the Brantford Collegiate Institute in 1904. The following year he entered the '08 class of Electricals in the S.P.S. Although not prone to push himself forward too ardently, he has shown that he is a good student and one that possesses the qualitieshonesty, patience and determination-that go to make the successful man. It is a certainty that his fellow students of '08 will watch his career with keen interest, not only on account of the student qualities he has shown, but mainly for those sterling traits of character that make "the man."

A DRAFTING ROOM EPISODE

WEIR, ROBERT PHILLIP

"I am but mad north, northwest; when the wind is southerly, I know a hawk from a hand-saw."

It was on the morning of May 28th. 1887, that the Toronto Daily Bread announced that "Our genial citizen, Mr. R. A. Weir, is all smiles them days—it's a boy." The early years of the subject of this sketch were passed in a study of domestic science, until one unhappy day, when our hero was first introduced to the birch, in Ryerson Public School. In this institution of knowledge he learned all about the multiplication table, thus laying the foundation for an engineering career. After leaving Ryerson he entered Harbord Collegiate Institute, where he became proficient in engineering love affairs. Having exhausted the possibilities of high school life, he entered the S.P.S. in the fall of '04 in the Department of Electrical Engineering. During his course he has made many friends and we predict for him a bright future in his profession.

WHITE, ERNEST V. H.

"He is as fond as an Arab of dates."

"Whitie" was born in Southampton, in 1886. He completed his public school education in Burlington and attended Hamilton Collegiate. After matriculating he spent a winter in the Southern States. and some time in his home town. Having in his youth constructed a paper water wheel on a suburban stream, he resolved to follow the profession of civil engineering and joined the ranks of '08 "School." Here he has been very successful and has been marked by all as a jolly good fellow. Ernie has had considerable experience in office work and has also been "close to nature" in the mining regions of New Ontario. Thus. we can see a bright future before him and trust he may live to build his fortune in the city, or by the camp smudge.

WEST, ALEXANDER MACKENZIE

"An ag'd interpreter, tho' young in days."

Born in the middle of the eighties, near the city of Toronto, he passed the early years of his life doing much good. Like many another boy, he went to school, studied as little as possible, and gradually grew to manhood. Later, he moved to Vancouver, where he fell in love with the beautiful scenery and climate. He has traveled extensively, thus acquiring an education not to be obtained in books. He matriculated in 1901 and entered the School with '08. He is quiet and reserved in disposition and has an easygoing way that is not wearing on his constitution.

WHITE, WALTER J.

"His open eyes desire the truth.

The wisdom of a thousand years is in them."

Walter J. White was born at Hallett, South Australia, in the year 1883, and there learnt his ABC's. He obtained his matriculation at the Boulder City School of Mines, Western Australia. Jack traveled extensively in six different countries, which helped to mould him into an alert, happy and industrious fellow. After many miraculous adventures, hair's breadth escapes and thrilling experiences, he lit in Toronto in 1905. Wise in his thoughts, words and actions, a book of worldy knowledge and experience, a practical man, he commands the respect of all, and by his pleasing and friendly disposition he made many true friends. He it is who succeeds in the face of difficulties. We all wish him a successful career.

WHITE, WALTER RUSSEL

"Lands he could measure, terms and tides presage,

And even, the story, ran, that he could gauge."

Born on his father's farm, the Red Rose Estate, in the year —, a delicate little lad, but fast outgrowing this, we see him, from six to eleven years of age, leading his class-mates in the little country school. At high school his geniality and industry won the affections and admiration of all who came in contact with him. He then strove to impart some of his knowledge to the young. but thinking there might be more remunerative positions than teaching school, he entered S.P.S. in 1904. He was unable to return for the 1906-07 term. but we are glad to have him with our '08 class. The many friends of Mr. White wish for him a continuation of his successful career.

WING, DANIEL OSCAR

"And this was all the harvest that I reaped,

I came like water, and like wind I go."

On the morning of April 6th, 1886, the peaceful village of Camden awoke to find its population increased by the advent of little D. O. W. And the child Oscar grew in wisdom and stature. After two years sojourn in Camden he waxed weary and one morning wee Oscar packed his carpet bag and started for fresh fields to conquer, and stood before Berlin's gates. Gaining admission, he became a worthy citizen, and in due time graduated from the C. I. there situated. The glamour of a higher education lured him to Toronto Varsity. Here he supplemented his course with work on the Gym. Team and Mulock Cup Teams of '05 and '07. He aspires to be a hydraulic engineer.

WILSON, FRANCIS DOUGLAS

"Every man has his fault, and honesty is his."

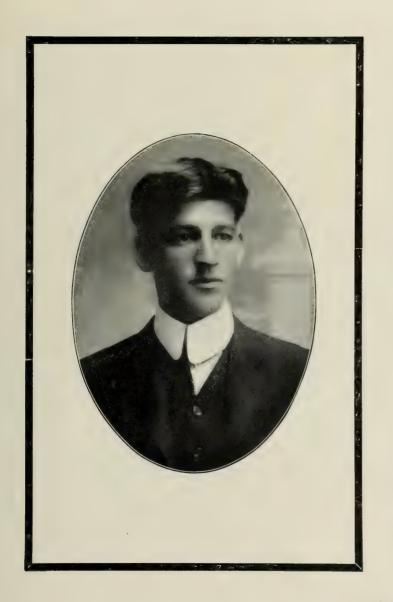

The subject of the following sketch was born in the "Forest City" in 1888. Receiving his elementary training at the London Collegiate Institute, he continued the good work at St. Michael's College, completing his matriculation there. In the fall of 1905 he registered at the S.P.S. with the ambitious hope of some day becoming a mechanical engineer. He is a diligent and industrious student, as shown by his Honor standing throughout his course, while his modest and gentlemanly manner has won him many friends, who wish him every success in his future work.

YOUNG, RUSSELL

"He was six-foot a man, all clear grit

On the banks of the fair Mississippi, in the town of Almonte, "Busty" first saw the light of day, away back in the '80's. He grew in wisdom and knowledge, grace and stature, and after taking a brilliant course at the high school of his native town, where he completed his "practical work" in a most creditable manner, he donned the vellow, blue and white. He soon became a favorite with the boys, as shown by the honor conferred upon him in his freshman year of being chosen Delegate to the Nashville Students' Volunteer Convention. Obtaining Honors during his college career, he leaves our halls with splendid prospects for future usefulness.

In Memoriam

Arthur Gerard

Born, Ottawa, Dec. 14, 1884 Died June 2, 1907

JAMES BRANSTON WILLMOTT, D.D.S., M.D.S.

Dr. J. B. Willmott

In the case of any calling, its history is written in the biographies of its members, but its rise and progress are most frequently due to the efforts of a limited number. Of these few, some have graced their profession by particular attention to one of its phases, others to different aspects of the work. Thus, Dr. J. B. Willmott's importance as a factor in the development of Dentistry is due pre-eminently to his successful efforts in the cause of dental education. This was characteristic of his thoroughness, since the fundamental training of the student determines to a great extent the conduct of the practitioner. The conduct of the practitioner is responsible for the status of the profession.

Dr. Willmott was born in Halton County in 1837, and spent his first seventeen years in that vicinity. In 1854 he entered the preparatory department of Victoria College, Cobourg, but ill-health prevented his proceeding to a degree in Arts. In 1858 he commenced his dental education in the office of the late W. C. Adams, and two years later began practice in Milton. Some years later he entered the Philadelphia Dental College, and in 1871 obtained the degree of D.D.S. The same year he moved to Toronto, where he has since been in active practice. In 1875 he passed the

prescribed examinations and received the degree of M.D.S. from the New York State Dental Society.

The successive steps of progress since the incorporation of the Royal College of Dental Surgeons, in 1868, to its present degree of efficiency, each bearing the mark of Dr. Willmott's personality and careful attention. His being Secretary of the Board of Directors of the College since 1870, and Dean of the Faculty since its institution in 1875, has given him an excellent opportunity for continuous work. His effort has always been to keep the standard of efficiency of the School as high as possible, and, in carrying out this policy, he has won for himself the respect of the many students with whom he has come in touch.

As a result, in his mature years, Dr. Willmott finds himself highly appreciated by the graduates of the R.C.D.S., and his ability widely acknowledged by the profession. Notwithstanding his energetic career, he gives promise of enjoying for many years to come the satisfaction of a well-spent life. To have initiated and to have been largely instrumental in developing a professional school, which in its efficiency ranks among the best dental schools in America, is an achievement of which the Doctor may well be proud.

ROYAL COLLEGE OF DENTAL SURGEONS

The Royal College of Dental Surgeons

T is very pleasant to write about anything that is young, yet strong and flourishing. It is seldom that any association or organization has reached such a standard as is now held by the R.C.D.S. in the life of a single man, the Dean. Dr. J. B. Willmott saw dentistry in Ontario in its infancy. He has fathered its advancement and now sees it an efficient, honored and ethical profession. He is still Secretary of the Board of Directors. It is given to few men to see such fruits of their labors.

"Why should good words ne'er be said Of a friend until he's dead."

Factors of honest pride culminated in his son, Dr. W. E. Willmott, whose giant memory, untiring energy, quick initiative, mastery of details, common-sense, tact and love for the College have made him a necessity to the institution. At an early age he was made Demonstrator, and shortly afterwards Superintendent. Events have proven the choice to be a wise one. In this latter capacity he could not be excelled, owing to his unique and intimate connection with dental education.

At the request of the Ontario Dental Society and by the direction of the Board, the School of Dentistry of the R.C.D.S. was organized in 1875, by Dr. J. B. Willmott and Dr. Luke Teskey, and at first occupied rented rooms on the corner of King and Church streets, Toronto, but more commodious rooms were afterwards secured at the corner of Victoria and Richmond streets. In 1887 the College moved

to a building erected for the School at 13 Louisa street.

Another worthy professor, whose name must be mentioned here, is Dr. W. T. Stuart, who has had charge of the Department of Chemistry and Anatomy since he was appointed to the faculty in 1877. He was a gold medallist in his Medical Course, and with his added experience and study seems to forget nothing. He lectures so hard and fast that he appears to be laboring to get it out of his system. Although an inveterate worker, he is at home in a dress suit.

Perhaps the proudest and gayest moment of the College was at the opening of the new building on College street, in 1896, the new wing being added in 1900. The hall was beautifully decorated with flowers, British and American flags, and festooned with the College colors, garnet and light blue. The ceremonies were graced by the presence of the Lieutenant-Governor, Sir George Kirkpatrick, the Premier of Ontario, the Hon. G. W. Ross, and Dr. Thomas Fillebrown, of Harvard University, members of the Board and Faculty and others. In describing these ceremonies we must not forget that there were present not a few ladies.

As the opening address, the Dean gave a review of Dentistry in Ontario, and was followed by Prof. T. Fillebrown, the invited speaker for the occasion. His beautiful character, his silver-tongued oratory, and scholarly grasp of the history, outlook and principles of Dentistry proved him to be an admirable choice. The example shown by his own high attainments and the ideal set forth in his address,

The Royal College of Dental Surgeons-Continued

"The Future of Dentistry," could not but have a strengthening and ennobling effect on the dental profession in Ontario. He said of the present of Dentistry that, as the old Indian said of Henry Clay, "his mouth speaks for itself."

In 1888 the R.C.D.S. affiliated with the University of Toronto. In the following spring the first class in the Department of Dentistry was graduated and the degree of D.D.S. was for the first time conferred by a British University in regular convocation.

At the first combined convocation and commencement exercises in 1900, Dr. C. N. Johnson, of Chicago, delivered the Doctorate address. He graduated from the R.C.D.S. in 1881, and from the Chicago College of Dental Surgeons in 1886. In the latter school he now fills the chair of Operative Dentistry, and is Vice-Dean. He has written text books, edited the Dental Review, and written poetry, novels and short stories. He can work tremendously and has not spent his time gathering flowers on old battlefields.

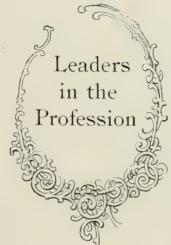

"Heights, by great men reached and kept, Were not attained by sudden flight, But they, while their companions slept, Were toiling upward in the night." The word which characterizes the present conditions of Dentistry is *change*. It is hardly safe to buy a text book, because it is almost out of date while it is being published. The times are daily becoming more propitious. Dr. Johnson says that numberless questions in dental science are clamoring to-day for further light, and it would sometimes seem that, with all the progress of the past, we had merely reached the outer vestibule of the tabernacle, and had before us yet the unrevealed treasures of the main edifice. The College building itself is continually changing to keep pace with new instruction. Owing to the fact that it is on prospective hospital grounds, it has been sold to the Hospital and a new one must be built. "Tom." Jones, who has been the worthy janitor since 1896, will have to move his home.

Here we changed from freshmen to seniors. What a change! What times! They were days of open-hearted friendship and free student life. Yet, with all these changes in the profession and the character of the student, it is well to remember "That is a true change, in which nothing is ever lost at a higher, which has been once really possessed at a lower."

J. E. T.

DR. R. BRUCE BURT

DR. THOMAS FILLEBROWN of Harvard

DR. C. N. JOHNSON of Chicago

DR. W. E. WILLMOTT

History of Class '08, R.C.D.S.

HERE we stood within the iron gates, and not daring to mix with the scrapping mob, struggling for the place of vantage next the door. We had plenty of time to look at one another and pick out the disconsolate and lonely ones leaning here and there against the wall. those to whom no one gave the glad hand and warm greeting after a summer's separation; they were freshmen, too. Then the door opened and in surged the crowd, carrying us up the stairs and into the large lecture room, where the process of registration was to be carried out. We did not know that hustling had long since been abolished, so every fresh outburst of chorus or yell was to us an approaching storm. When we were duly registered and separated from the greater part of our earthly possessions by the machinery of College finance, we wandered out to view our surroundings or to return to the back room we had secured through the medium of the "To Let" column of the daily paper.

After the Dean's opening lecture, work began—lectures, clinics and "how-not-to-do-it." We were all out on Field

DR. CLARK: "In my practice, gentlemen."

Day and wondered why the seniors did not march. We learned the yell, practiced it, and produced it in season and out of season for the benefit of those with whom we took our Physics lectures. Then came our photo on the steps of the building, and how often we look over that group, scarcely recognizing many of its members! In sport, '08 was to be reckoned with as soon as the rinks were in working order, for our hockey enthusiasts had individual reputations worth sustaining. Consequently, they laid claim to the Beattie Nesbitt Cup, and, encouraged by the vigorous rooting of their comrades, brought the mug home to '08.

Very uneventful the year now looks, but then every day was a new experience. Nothing in our work had any precedent, particularly in the laboratory, and few of us had ever before "attended lectures." But the year soon passed and the inevitable occurred—the examination hall—and scattered us to the four winds of heaven for the summer months.

In the autumn ours was the lot we so envied but a year ago. We no longer leaned with a motherless expression about the entry, but rushed about greeting our fellows, and bestowing superior or patronizing glances on the "poor freshies"

The fall of this year of malodorous fame was marked by a brush with the "School" while we were at the Biological Building. No one could define our motive, but it was our first real scrap and all enjoyed it to the full.

During the remainder of the year we had a clearer atmosphere, warmed by the wit of the genial Dr. Thornton, whose especial charge we were. None have forgotten those pleasant days, and none will forget the '08 dinner. The historian is unable to record whether or not McGuire was on time for the memorable event, since no reliable information can be obtained.

Alarming rumors now reached us daily of the prowess of the '09 hockeyists and we were advised to begin early our adieus to the cup. However, the "powers that be"

were kind, and again '08 were the Inter-Year Hockey Champions. It might here be mentioned that B.F.O.N. and P.I.L.L.O.W. was an important factor in deciding the outcome of the game. This year ended, since it is said all things must end, but we hope they will not all end in examinations.

Every year has some outstanding feature, and the sensation of the junior year is undoubtedly "entering the Infirmary." Here was our opportunity to prove the oft repeated statement of Dr. Webster that "about twenty-seven of you men don't know what I'm talking about," and "there isn't any kind of doubt at all" but that we did so. We demonstrated a remarkable degree of ignorance of Chemistry to Dr. Stuart, but finally learned to distinguish a "beautiful blue" from an iridescent crystal." Dr. W. E. W. showed us "how not to do" our "slip" records, but these troubles were more than compensated by the pretty slides exhibited by Dr. Hume, which gave evidence of that gentleman's good taste.

The years that looked so long at the beginning of our course have gone, and we wonder where. "Commencement exercises" will be the next in order, and after that "commencement" proper—the beginning of professional life. For the last time the class of '08 has come together in the capacity of undergraduates. Some have dropped out, but in point of numbers there is little change. But changes have occurred in the men themselves, rendering the freshman of four years ago well-nigh unrecognizable. In some these have been the result of development and progress, the taking advantage of opportunities, educational and social. To others, fortune has been less kind, and instead of these changes saddened circumstances have occurred in their life and surroundings outside the view of class-mates. We have seen the result, but we were sometimes ignorant or unmindful of the cause. To these members of the darkened home and lessened family circle may the future be brighter.

Friendships have been formed which will be life-long in duration. '08 has been a most congenial class. It is a deplorable fact that as we become better acquainted with some individuals we cannot but like them the less. The disagreement as to who these would be in '08 would be so marked that we are safe in saying that such are absent from our midst. On the contrary, those who were not at first so popular have proved on acquaintance to be among the best fellows of the year.

Of what commencement will be the beginning, whether of success or failure, is yet to be seen. Right principles of practice and of living have carefully and persistently been brought to our attention, and if these are adhered to, success should be the lot of all. With the ability of the average man of the class, we predict that this result will be realized. And here the history of '08 as a class ends, to be continued, we hope, in the biographies of successful practitioners throughout the whole Dominion.

DR. STUART: "Be careful to wash the precipitate."

THE YOUNGER SON

(Ry Permission of the Publisher, William Briggs)

If you leave the gloom of London and you seek a glowing land,

Where all except the flag is strange and new, There's a bronzed and stalwart fellow who will grip you by the hand.

And greet you with a welcome warm and true; For he's your younger brother, the one you sent away, Because there wasn't room for him at home;

And now he's quite contented, and he's glad he didn't stay, And he's building Britain's greatness o'er the foam.

When the giant herd is moving at the rising of the sun, And the prairie is lit with rose and gold;

And the camp is all abustle, and the busy day's begun, He leaps into the saddle sure and bold.

Through the round of heat and hurry, through the racket and the rout.

He rattles at a pace that nothing mars;

And when the night-winds whisper and camp-fires flicker out.

He is sleeping like a child beneath the stars.

When the wattle-blooms are drooping in the sombre shedoak glade,

And the breathless land is lying in a swoon,

He leaves his work a moment, leaning lightly on his spade,
And he hears the bell-bird chime the Austral noon.

The parrakeets are silent in the gum-tree by the creek;
The ferny grove is sunshine-steeped and still;

But the dew will gem the myrtle in the twilight ere he seek His little lonely cabin on the hill. Around the purple, vine-clad slope the argent river dreams;
The roses almost hide the house from view:

A snow-peak of the Winterberg in crimson splendor gleams:

The shadow deepens down on the Karroo.

He seeks the lily-scented dusk beneath the orange tree; His pipe in silence glows and fades and glows:

And then two little maids come out and climb upon his knee,

And one is like the lily, one the rose.

He sees his white sheep o'er the green New Zealand plain, And where Vancouver's shaggy ramparts frown.

When the sunlight threads the pine-gloom he is fighting might and main

To clinch the rivets of an Empire down.

You will find him toiling, toiling, in the south or in the west A child of nature, fearless, frank and free;

And the warmest heart that beats for you is beating in his breast;

And he sends you loyal greeting o'er the sea.

You've a brother in the Army, you've another in the Church;

One of you is a diplomatic swell;

You've had the pick of everything and left him in the lurch; And yet I think he's doing very well.

I'm sure his life is happy, and he doesn't envy yours;
I know he loves the land his pluck has won;

And I fancy in the years unborn, while England's fame endures,

She will come to bless with pride—the Younger Son.

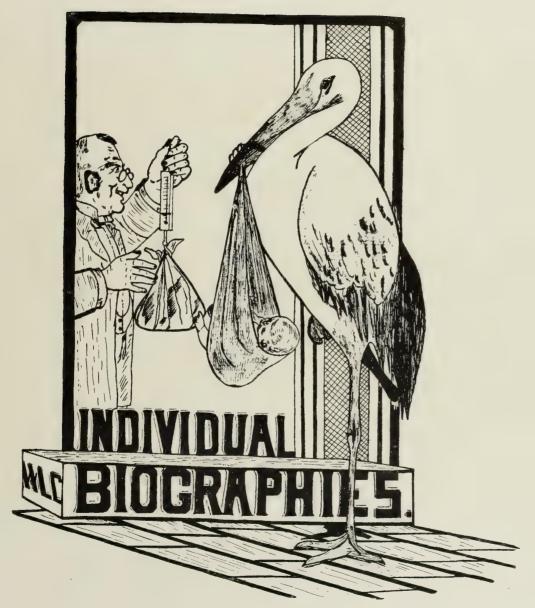

ROBT. W SERVICE.

COLLEGE EXECUTIVE COMMITTEE

THE INFIRMARY

BANCROFT, LESTER JAMES

"Though modest, on his unembarrassed brow

Nature had written gentleman."

"Ban" is one of those wise men from the east, hailing from Vankleek Hill. He was born on December 3rd, 1886, at Crossburn where the tall timbers grow. Farming wasn't "Banny's" line, however, so at the age of six he moved to his present home and received his primary education in the Vankleek schools. Matriculating in 1904, he joined the '08 class at R.C.D.S. and has already succeeded in making his mark in the science of dentistry. "Ban" is always a rooter at the games and is a proficient handball player. We all wish him "bon voyage" through life.

BILLINGS, MAURICE ROGER

"I swear he is true-hearted, and a soul None better in my kingdom."

In 1886 "Josh" was shown around as the plumpest baby of a large family living on a farm near Brockville. In the collegiate, books seemed to be in the way of sport, but in spite of that he won the senior championship. Matriculating in '02, he went back to the sod for a year and then brought his big heart up to the R.C.D.S. Books again proved a slight tangle-foot, but he helped to uphold the honor of the R.C.D.S. in football and hockey, being manager of the latter association in '06-'07. He has been President and Vice-President of his class, interested in Y.M.C.A. and Torontonensis.

BANNERMAN, LESLIE ALEXANDER

"There stands a man."

First commenced to trouble his parents on July 26th, 1883, at Bradford. After obtaining his matriculation in Owen Sound Collegiate Institute, he entered the Royal College of Dental Surgeons with the class of '07. After two years with this class, during which he held the offices of Vice-President and President of his class, he decided to remain out a year and graduate with the class of '08. His chief hobby is soldiering, having held a commission in the 31st Grey Regiment for six years. He is one of the popular men of his class, and became a member of the Xi Psi Phi Fraternity in his junior year. The best wishes of '08 follow him.

BLAIR, JOHN FREEMAN

"Blessings on thee, little man,"

Way back in 1887, they found him in a cigar-box up in London. His education began immediately, and that accounts for his graduating while still of tender years. It is said on good authority that he is an officer in the artillery, and we believe it when we hear portions of his vocabulary that are truly military. Somebody about college said, "Hurt Jack and you hurt the class"; and that adequately expresses his popularity. He has very creditably filled several offices, being particularly energetic in the promotion of social functions. The best wishes of the class will follow him, even in the wanderings he proposes to undertake after Commencement Day.

BLEAKLEY, JOSEPH ARNOLD

'The sinew and the fore-hand of our host.''

"Blake" was born in 1884, on the farm in North Gower Township. He received his public school education at North Gower and matriculated from Kemptville High School in 1904. As a member of '08 he has always maintained an active interest in athletics. He was a member of the championship soccer teams of '05 and '06, the Jennings Cup hockey teams of '05-6, and of the handball team of '07-8, which brought the first handball championship to R.C.D.S.that of the City Handball League. His frank disposition and good fellowship have won for him the esteem and good wishes of both faculty and students.

CHALMERS, WILLIAM LOGAN

"It is good to lengthen to the last a sunny mood."

William L. Chalmers, a native of Prescott County, Ont., lived with his parents on a farm near Vankleek Hill until eleven years of age, when the family moved to town. After spending a year in his brother's store, Will entered the Vankleek Hill Collegiate Institute, where he spent four years full of profit to himself and of uncertain pleasure to his instructors. During this time he was a valued member both of the town band and of the V. K. H. hockey team. In 1903, after another year "behind the counter," Will entered the R.C.D.S. While here he figured on the Jennings and Beattie Nesbitt Cup series, proving that a good student can also be a good sport. We trust the future has in store for him like success in his chosen profession.

BROOKS, CLARENCE EDWIN

"Whence is thy learning? Hath thy toil O'er books consumed the midnight oil?"

First broke the stillness of the night in Brant County. In the Woodstock Collegiate he proved himself an apt scholar. When he came to college he kept to his old tricks and held second place in examinations. Yet he was not a "plug," but a witty companion and jovial friend. He was always roped in by the Y.M.C.A., but liked the "At-Homes." He was poor at handball, but could sling porcelain fast enough to be demonstrator. He lent his literary talent to the Hya Yaka and Torontonensis.

CHENEY, HUGH LOUGH

"A day for toil, an hour for sport, But for a friend life is too short."

Hughie took possession of his mother's home in Vankleck Hill in 1885. He also went to school in that town and learned to play hockey at the age of sixteen, when he helped his team to win the Ottawa Valley championship. His high ambition led him to enter the class of '08 in the R.C.D.S. He held his own with a hardworking class and shared its social responsibilities. Here he again adorned the ice, assisting '08 to twice win the Beattie Nesbitt Cup and the R.C.D.S. to take possession of the Jennings Cup in 1906. For this he was elected President of the hockey club in his junior year. In his fourth year he widened his interest and became assistant business manager of the Hva Yaka.

CLAPPISON, ORMAN SPENCER

"And panting time toiled after him in vain."

But what's in a name? Arrived on the scene of hostilities August the twentieth, 1886, at Hamilton. He is supposed to have received his preliminary education in the collegiate of that city, but nothing is very definitely known on the subject. In October, 1904, he embarked on the study of dentistry with "Kitten" Blair and "Scrooge" Johnson, and since that time has been a popular member of his class and a member of a fraternity.

DUFFIN, DAVID WARD

"He bears him like a portly gentleman."

"Duff's" eyes first came unbuttoned down in Hastings County, near Belleville. Here he received his education, collegiate and model training. For three years he ruled in an absolute monarchy, where his subjects, in the persons of his pupils, sometimes loval, sometimes rebellious. occasionally required him to prove his right to the throne. But in '04 the new era began and "Duff" was himself a subject. However, he bore the changed condition of affairs with the smiling countenance we all know so well. He has at all times taken a lively interest in the current of college affairs, his particular charge this year being the Litandeb, of which he is President.

DALRYMPLE, WILLIAM ANDERSON

"........ and wrought
All kind of service with a noble case
That graced the lowliest act in doing
it."

William Anderson Dalrymple spent his youth in the vicinity of Wellandport. Later, he matriculated from Smithville High School. His Scotch ancestors have given him determination and decision, which qualities, combined with frankness and healthy optimism, have made him many friends among both old and young. His scholastic attainments will bring him the success we all wish him.

GRAINGER, JOHN

"O, wonderful son, that can so astonish a mother."

It was in the opening of the '80's that John decided to become a citizen of our planet, and since that happy time the world's progress has been truly phenomenal. The community of Walkerton reaped the benefit of his juvenile activities; while the life of the Walkerton High School was enriched by his presence in early youth. Seeking relaxation from the stronuous life, John drifted southward to Toronto, and joined the R.C.D.S., where he has since added his to a galaxy of stars known as the class of '08. He has proved a loval son of his Alma Mater, and has won the esteem and confidence of all, as is shown by the positions he has held.

AT-HOME COMMITTEE

HAMILTON, RICHARD SANFORD

"Studious he sat with all his books around:

Sinking from thought to thought a vast profound."

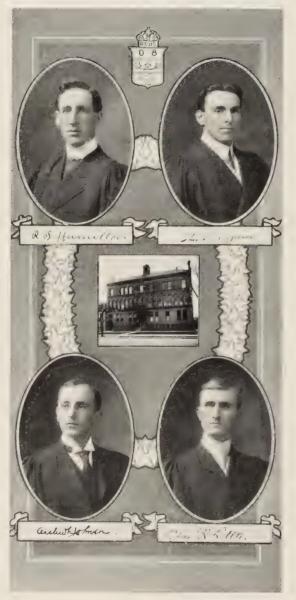

Richard Sanford Hamilton, better known as "Dick," began to cipher in Huron County. Like many great men, he is a son of the soil. Having aspirations for knowledge, he began his collegiate training in Harriston and further improved his education by a voyage to Old London. Soon, he went forth to impart his knowledge, but deeming himself unable to do sufficient for the welfare of humanity in this line, chose the dental profession and joined the class of '08. At college he was ever willing to aid his fellow-student, and by his characteristic demeanor steadily won many estimable friends, who appointed him Vice-President of his senior year. We all predict for him a prosperous future in the town fortunate enough to secure his citizenship.

JOHNSON, ARCHIE LAUGHTON

"His years but young, but his experience old."

Put in his best days in Strathrov, troubling his mother and sister for the first time in 1886. He then graduated from the home collegiate at an early age, but when he came to college he had an old head on young shoulders. His chief hobby is the militia, in which he has served for seven years, passing through all the ranks of non-commissioned officers, and is now signal officer in the 26th Middlesex Light Infantry. and has been a member of the 6th Field Battery and of the 48th Highlanders. He has been a member of the Omicron Chapter of the Xi Psi Phi since his freshman vear.

HIGGINSON, THOMAS D.

"I'd rather gang supperless tae my bed Than get up in the morning early."

Son of the late Capt. Higginson, of Hawkesbury. There he entered high school and matriculated in 1900. After spending three years at home and one in the Agricultural College at Guelph, he entered the R.C.D.S. in 1904, indenturing with Dr. Dent, of Ottawa. Though quiet, his activities were broad. He helped '08 to win the inter-year cup in hockey and served on the At-Home Committee, Hya Yaka and Royal Dental Society. In his final year he became a member of the executive as President of the Rugby team, which never lost a game.

LITTLE, CHARLES REGINALD

"Keeps his counsel, doth his duty, Clings to his friends, and loveth beauty."

Hails from Kent County. He received his primary education in a quiet country schoolhouse on the banks of the Thames. He lived for some years on the farm, but tiring of rural life sought a sphere of wider usculness. He entered the Chatham Collegiate in '01, matriculating after three years of successful study, and then joined the class of noughty eight. "Charlie" will always be remembered for his quiet, unassuming manner, and we prophesy for him a decided success in the practice of his profession, a profession eminently suitable for such a character and such a man.

MACKENZIE, ARCHIBALD

"I know thee for a man of many thoughts."

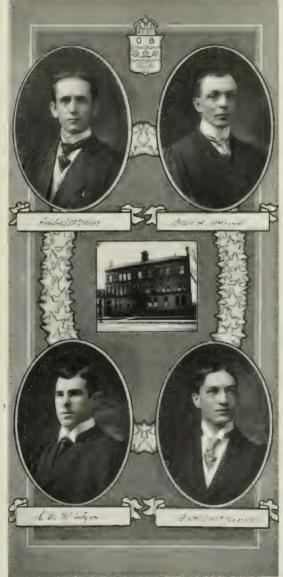

Born in Rothsay, Ont. Being Scotch, he moved to Toronto to go to school. Here he won a public school leaving scholarship and then attended Parkdale Collegiate and Toronto Normal School. He taught in North Bay and Barrie and proved himself a born disciplinarian. He entered the R.C.D.S. with the rest of us. Though he hated books, yet he could study when he at last saw he had to. In his senior year he woke up and became President of the Royal Dental Society, assistant editor of the Hya Yaka and chairman of the executive.

MacINTYRE, CLARENCE WALKER

"In merry jest."

It was in the village of Beamsville that our Clarence, better known as "'Curly," enriched the world by his nativity. Here he spent his youthful days, and incidentally visited the "educational factories" until he had acquired enough wisdom to engage in life's strenuous battle. Business occupied his time for a few years, when our friend decided that the dental profession was in need of him. His originality and amiable manner have won for him the friendship of all his classmates.

McGUIRL, WILLIAM HENRY

"I am a man more sinned against than sinning."

On the second of January, 1879, in the City of Kingston, the subject of this biography first saw the light of day. Born as he was in the very midst of the holiday season, he naturally leaned towards those conditions which best favored pleasure and enjoyment. He spent his childhood days in the Limestone City, but later became acquainted with Collingwood, finally landing in Ottawa. In the year 1899 he passed junior leaving at the Ottawa Collegiate and for the three and a half years following pursued life as a school teacher. Within the college we know "Mac" as very fond of music. He has favored us from time to time with mandolin and banjo selections, which were always well received.

McKEOWN, GEORGE HERBERT

"His tongue, his face, his action and spirit plainly show he is a gentleman."

A loyal citizen of Ontario since the year 1886. Received his public school education in Russell and matriculated from Vankleek Hill Collegiate Institute in 1903. Desiring to make "dentistry" his life profession, Mac joined the class of '08. Since that time he has taken great interest in all college circles. We extend best wishes that the success which has attended him during his course may be his in the bright future.

THE GARDEN OF LIGHT

In the garden of light
O'tis sweet to dream,
'Mid the lilies white
By the placid stream,
To wander through glade and fairy ring,
To wander and wonder at everything.

There a brownie dwells
In each acorn cup;
And from hidden wells
There bubbles up
The freshness of wine—the violet's hue,
The light of your eyes—the forget-me-not's blue.

In each rocky cleft
There are drooping ferns;
For, with fingers deft,
In those gray old urns
The fairies dropped seeds, and the earth was kind,
And sheltered them safe from every wind.

There the sunlight weaves
A carpet gay
Thro' the dancing leaves;
And the sunbeams play
In arrows swift through each shady nook,
In a tangle of light on the bed of the brook.

In the sunset hours,
And the twilight gloom,
The white moon-flowers
Spread forth their bloom;
And under the oaks, while the whip-poor-will sings,
The fairies dance in magic rings.

Then the young moon peeps
At the garden of light,
And a fairy sleeps
In each lily white;
So softly in clouds she veils her feet,
Lest the garden should wake at their gentle beat.

JEAN O. CARMICHAEL, '08.

MACLACHLAN, COLIN CAMPBELL

"Gie fools their silks and knaves their wine,

A man's a man for a' that!"

Mac was first unearthed in Renfrew and received his education there. During this period he was also frequently dug up from the rugby field, for we understand that before his grey matter gained the ascendancy Mac was an athlete. Since joining '08, his athletic proclivities have declined. Barring the Secretaryship of his class and the occasional raiding of his instrument roost, his life, from a spectator's standpoint, has been quite uneventful. Being a Presbyterian and not a Methodist, we can safely say that the even tenor of his inner life has been as little disturbed. Mac's success will be in direct proportion to his Scotch stick-to-itiveness -which is saving much.

MILLS, LAWRENCE I.

"None but an author knows an author's cares,

Or Fancy's fondness for the child she

Lawrence I. Mills claims the Scotch town of Fergus as his home. There he spent his youth and received his early education. At the high school "Lorne" proved himself to be a fine athlete, twice winning the school championship. From there be began the study of dentistry and as a preliminary to his college course spent two years in a dental office at home. At the college he has taken exceptionally high standing each year, and, as well, has interested himself greatly in the college organizations, being editor of the college paper, the Hva Yaka, for this year. His genial manner and the stick-to-itiveness in his character have made him a great favorite with his fellow students and are bound to carry him successfully through life.

MATHIESON, WM. ALEX.

"He is a soldier, fit to stand by Caesar and give directions."

William Alexander Mathieson was born in the city of Belleville. He received his preparatory education in the public and high schools of that place. Later, he entered commercial life in Toronto, and, after a few years, decided to take up a profession. Active in college work, he has held several offices. In his final year, as Business Manager of the Hya Yaka, he did much to make it a success financially. He was also Secretary of the Royal Dental Society. As a member of the Forty-eighth Highlanders and a lieutenant in the University Rifle Association, he demonstrates his interest in military affairs. Being a staunch Scot, it is not surprising that "Colonel" shows the firm and steady characteristics for which that race is famed.

MORROW, HENRY MAXWELL

"I was not born for courts or great affairs,

I pay my debts, believe, and say my prayers."

First showed the strength of his lungs in Fenwick. He attended high school in Fergus and commercial college and collegiate institute in Hamilton. He kept store for a short time and then entered the R.C.D.S.. His being a Methodist minister's son accounts for this roving disposition. His moustache gave him frequent trouble, but it took a man for every hair to cut it off. "Max" was indentured with Dr. Gallop, of Milton, and Dr. Robb, of Niagara. He was so strong that books were too small for him.

NOTT. BEN. FOSS ORLANDO

"His honest, cheerful, modest face Aye won him friends in every place."

Ben first opened his eyes as a "wee laddie" in the glorious month of May in Oshawa. Ben grew, however, and after whittling the desks and wrestling with Homer and Cicero in the high school of his native town, went forth to wield the rod in rural districts, finally entering college with this illustrious class of '08. Ben is deservedly popular around college, enjoying the esteem of all the students and possessing the happy faculty of making friends and keeping them. He stands high in his class-lists, and has figured on the Hya Yaka staff, At-Home Committee, Hockey Executive, and this year is President of the College fraternity. Here's to continued prosperity to him.

POLLOCK, FRANCIS

"His limbs are cast in manly mold, For hardy sport, or contest bold."

Was born in the County of Bruce. He received his early education in the rural school and then attended Kincardine Collegiate Institute. After taking a course in model training he became a public school teacher, and for two years taught the juveniles with a decided success. In 1904 he decided to further his education and chose the profession of dentistry, matriculating in the R.C.D.S. in the same year. In the college, Frank is a true friend, and his kind nature has won him a host of companions. A good sport and a good student, he has the best wishes of his fellow students for a brilliant future in the practice of dentistry.

TURALIERUERUERUERUERUE

O'NEILL, JAMES G.

"A merry heart goes a long way."

The well-known subject of this sketch first saw the light of day in Arnprior. After climbing the rugged paths of knowledge to matriculation he vearned for higher heights and in 1904 our genial friend hied himself to Toronto, where in the autumn he entered the R.C.D.S. and later received the nom-de-plume of "Irish." And is Jimmie popular? Well, rather! Besides standing well in his classes each year, his excellent athletic qualities found for him a place on the Rugby and Hockey teams, while his frank uprightness of character and his genial warm-hearted disposition have made him many friends. We bespeak for "Irish" a very happy and prosperous future wherever he locates. May continued success be his.

RAMORE, W. D.

"I can't say but 'tis an awkward sight To see one's native land receding through

The growing waters."

Paddy hails from Fergus, having spent his youthful days on the banks of the Grand. After graduating from the collegiate, he wielded the birch for two years in a little red schoolhouse. He then decided to make dentistry his lifework and, coming to Toronto, entered the R.C.D.S. with class '08. During his course, he has been very popular, and has held numerous offices, being President of his class in the junior year. He is well known in lacrosse circles, having figured on the "Thistles" " home during the two years they held the intermediate championship. He was also a member of the "All-Canadian" team which went to Australia and upheld the honor of Canada in her national game.

REID, HERBERT WILLIAM

Herbert William Reid, known throughout the college as "Bill," was born in the Queen City on May 28th, twentyone years ago. He received his early education in the public schools of the city and matriculated very creditably from Harbord Collegiate Institute, where he was an ardent follower of and closely identified with all sports which took place there. The study and practise of dentistry were his earliest ambitions and we are all confident of the success the future has in store for him. Bill has not only made friends throughout his own faculty, but is largely known throughout the University.

ROBERTS, J. GRATTAN

"Not his the form nor his the eye
That youthful maidens wont to fly."

"Bobs," as he is familiarly called by his fellow students, cherishes memories of a boyhood spent on a farm on the shore of Lake Chemong, Peterboro' County. From the public school he went to Peterboro' Collegiate for one year. Not finding there a large enough scope for his energies he entered Woodstock College, where he spent three years in the pursuit of pleasure. "Bobs" graduated from Woodstock in '04 and decided to enter the profession of dentistry for the purpose of lessening the sum total of human suffering. We feel sure that in his future career his pleasant appearance and professional manner will captivate hosts of patients.

RICKARD, HOWARD BLAKE

"If I've been merry what matter who knows?"

In February, 1885, the stork made a call at the farm of James G. Rickard. Bowmanville, Ont., leaving as a souvenir of his visit "a bit of squirming humanity." By a marvelous process of evolution this developed into the subject of this sketch. After spending a couple of years in Bowmanville High School, Howard retired to the farm to inherit the traditions of his fathers. But this life did not offer scope enough for his ambitions, and once more he launched into the life of learning. As a member of '08 he has been "a hale fellow well met." His activities outside of college work were on the association football field and in the Y.M.C.A.

STEELE, GILMOUR J.

"Happy art thou as if every day thou hadst picked up a horseshoe."

Mr. and Mrs. Steele were made happier when the subject of this mass of words hung up his hat as an "angel unawares." He received his early education in Lemonville and then went to Markham High School, where his memory proved him a very needy help in the time of trouble. He is one of the youngest of his year, but did his best to keep up with the rest. Being a resident of this city and a son of a merchant and interested in music and the camera, he left college honors to others.

STEWART, JOSEPH

"At learning's fountain it is sweet to drink,

But 'tis a nobler privilege to think.''

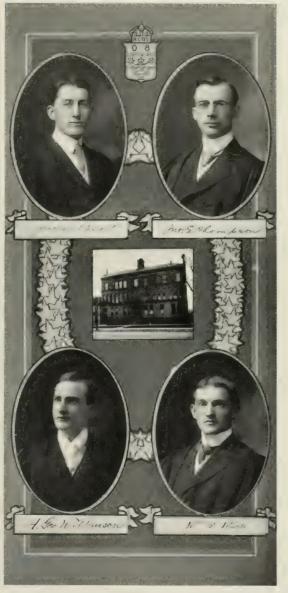

Thought he would like to live in Leamington and so he did. In 1904 he walked away from the nearest high school, having stolen the athletic championship medal before matriculating in 1904. Being President of the College Research Society, he invented a disc lubricator and a new flux. He debated for '08 and won. In his senior year he was made demonstrator in chemistry, metallurgy and bacteriology. To take his mind off his work the boys made him President of his year in '07-'08.

WILKINSON, HENRY GEORGE

"I do put on a sober habit, talk with respect, and swear but now and then."

"Wilkie" first awakened in Mount Forest in January of 1885, being something of a belated Christmas box; but his education was obtained in Stratford. In 1903 he secured his senior leaving, and under the direction of his father was schooled in the deep-laid schemes of commerce until we met him in '04. In his freshman year he, with his especial charge, "Gladys" Grainger, figured largely in the local pages of Hya Yaka, and he has since maintained his early reputation. Hockey, particularly the Beattie Nesbitt Cup, has always interested him greatly. Neither have "At-Home'' Committees been neglected, since they gave promise of a dance. "Wilkie's" class-mates will never fail to look in on him when passing through the spot that contains him and his sheep-skin.

THOMPSON, JOHN EDWIN

"An honest man he is, and hates the slime

That sticks on filthy deeds."

The "basso profundo" which has since made its owner the pride and wonder of his class-mates first broke the stillness of Brock Township, North Ontario, many moons ago. Ask those who know him whether or not he developed it. The routine and humdrum of preliminary education and later instruction in model school were undoubtedly wearisome to this genius. However, they were varied by an active interest in athletics for he won the senior championship at Uxbridge Collegiate in his last year there. From his verdant freshman days, "busy" has been "Sir John's" watchword and many activities of the college bear the mark of his energetic attention. The Y.M.C.A., of which he is President, and Litandeb owe him much. Experience has thus been added in large measure to his life equipment.

5

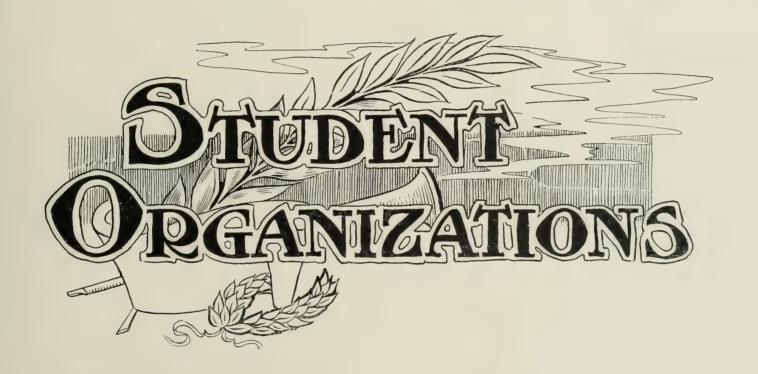

WURTS, WILLMOT BENTON

"Steady, calm and self-possessed, His feet, his hands could never rest."

Willmot Benton Wurts, born in Pickering some twenty odd years ago, spent his boyhood days in Stouffville, where he was best known as "Buvy," the lacrosse player. An accident which befell him while playing the national game, and more particularly its financial result, first directed his attention to dentistry. Consequently, on the completion of his preparatory course at Markham High School he put in an appearance on that memorable morning when '08, as verdant freshmen, awaited patiently their opportunity to enter. It was not long before he was a general favorite, particularly with the members of the fair sex who frequented the rinks. His many friends join in wishing him a happy and prosperous future.

Y.M.C.A. BUILDING

The Undergraduates' Parliament

I N days not distant, when the University and University College meant much the same to the student, the Literary Society was the one organization in which the interests of all the undergraduates met. It was the Literary Society that had charge of the Conversazione, that sent the undergraduate representatives of the University to the dinners and dances of sister colleges, and that from time to time incurred the mild censure of those who ruled for discussing questions and doing things outside its province.

Mais tout passe; federation, affiliation and absorption made to stand out the fact that University College, though a great part, was not all, and its Literary Society ceased to be representative of the whole student body. The times called for some institution that, in matters of general student interest, might act as for all. Athletics being the matter of first moment in a well-ordered University, it is no wonder that the first response to the call was the organization of the Athletic Association of the University of Toronto, an authoritative body that has done much to regulate athletics and to bring together the different parts of the University. After years of waiting for a similar association that might speak and act with like authority in the various other interests in which all the undergraduates feel concern, action was taken in the academic year 1906-07. The Students' Parliament, organized a year before by students from all the Faculties and Colleges to cultivate skill in debate and the speaker's art, afforded a starting point. Its machinery was adapted to larger ends and there was formed the Undergraduates' Parliament, representative of

all in everything of general concern not otherwise provided for. The successful development of this project must have rested on the activity of many and the good-will of all, yet it is no injustice to those who co-operated with him and assured a happy issue to associate with the formation of the new Parliament the name of Mr. S. M. Eastman. He, more than any other, gave himself up to the task of mastering details and preparing a draft constitution for submission to the meeting of students called to pronounce upon the scheme. At the outset, the Committee in charge associated themselves with Professor Baker, to whom they ascribe no small part of the success that attended their efforts.

The function of the Parliament has been already indicated, and it is not necessary to quote from its constitution the article bearing on its objects. In its first year it held several meetings, at which were present students from all the Colleges. It also co-operated with the President and the Caput in adjusting those little difficulties that arise when groups of students come together and life is young. During the current year the Parliament has continued these offices, and has just seen its arrangements for two "Theatre Nights" crowned with a success beyond all hopes. It is vain to predict, yet the two years' history of the Parliament would seem to justify the hope that, in the development of student control of discipline, as proposed in the University Act, it may be a real factor, helpful in guarding against mistrust and misunderstanding, and that it will be a force, ever increasing, making for an enthusiastic unity.

Undergraduates' Parliament Executive

Theatre Night

FTER a death-like sleep of three years, University Theatre Night was resurrected by a Committee of the Undergraduates' Parliament. From the first, the Committee was in difficulties. The theatre managers remembered the good old days when everybody wore a sweater, carried a club, a bag of flour, or missile of some description, and, consequently, warmly invited the students to stay away. The only hope lay in raising the standard, and placing the function on a level with the University dances and dinners. The Committee selected the Royal Alexandra, partly on account of its newness—principally because it was hoped that the new management had never heard of previous Theatre Nights. After terms had been secured, invitations were issued to the Lieutenant-Governor, the Premier, the President, the Board of Governors, and the Heads of the Faculties. At first the authorities held back, in doubt as to the advisability of connecting themselves with a questionable enterprise, but later accepted at such a rate that it was necessary to pack them in the boxes like sardines. When the tickets were placed on sale, the freshmen broke in windows in order to exchange their shekels for slips of pasteboard, and the supply was exhausted before half the students were accommodated.

The first night was held on January 20th, and was a decided success. The "gods" behaved like courtiers, sitting in silent envy of, or sympathy with, their more fortunate companions in the lower regions. Reports having been circulated regarding the contemplated suicide of several

"fussers" who had become involved in promises—without tickets to fulfill them, it was decided to hold a second night on Friday, January 24th, calling it "Dominion Night," to distinguish it from the first. The Governor-General and Mr. Sutherland were guests from Ottawa. Part of the guests of the first night were re-invited—but only part—because the Committee remembered the sardine episode; besides giving up their box they suffered the hardship of remaining behind the scenes or decorating the walls during the performance.

Everyone enjoyed the play—"Old Heidelberg"—except those whose lady friends were moved to tears by the touching episode of the forsaken maiden in the last act. The singing might have been better, but was good on the whole, considering the orchestra and the lack of practice. The financial results were satisfactory, the proceeds of the second night practically paying the expenses of both, and leaving a handsome surplus to be handed over to the Parliament.

But the financial consideration, though important, was secondary to the social. The most praiseworthy feature in connection with the affair was the gentlemanly behaviour of the students—individually and collectively. If this continues, Theatre Night on a higher standard will have become an established function, and the old episodes, with the objectionable rowdyism which so often characterized them, will have been a thing of the past.

University of Toronto Theatre Night Committee

W. K. HARRIS (Knox) W, S. VERRALL (Medicine)

J. T. ROBERTS (Dent.)
J. T. STIRRETT (University College), Chairman
(Absent)—R. HAGARTY (Science), Secretary

HE Undergraduates' Union was organized during the session of 1900 and 1901. During the seven years of its subsequent existence, prosperity and gradual growth of membership have been features of great gratification to those in office during these years. The membership this year is in the neighborhood of four hundred and fifty and is representative of the Faculties of Arts, Medicines, Science and Theology.

Probably the facilities offered by the Medical Society for social intercourse and of smoking "O.P." tobacco are responsible for a rather slim membership from our Hippocratean sojourners. The "School" men are numerous enough and their presence may possibly contribute to the above excuse for the Meds. Arts is naturally a source of many, due, doubtless, to the proximity of the Union to their halls of learning.

Although the number of men who gain the advantages offered by this organization is small in proportion to the number registered at the University, the present Executive feel that a greater support can hardly be expected until more capacious quarters are available. The present fraction of the west wing far from meets the needs of the student body. The University is a large institution now and is growing rapidly. Other similar colleges in Canada and elsewhere possess to a much greater extent that University spirit of which we hear so much, but experience so little. Many of them are supplied by virtue of either endowments from private individuals or assistance from the State with suitable quarters as a general meeting place for students of their various Faculties. The conclusion is obvious.

Again, we would like to take this opportunity of suggesting to any interested reader one other feature of existing conditions of affairs which is doubtless responsible for some lack of support from the men of Varsity. We refer to the Dining Hall, or, to use a very apt adaptation of Dickens coined by John Lang, '06, to "Do-the-Boys Hall." Many

of us who consider the convenience of the place to slightly over-balance the fare, know from sad experience that there are other lunch counters in town. The question has been discussed over and over again, but no satisfactory answer has been suggested as to where the money goes—certainly not in defraying expenses. Ruthvan lost money every year until he was able to make a summer tour of the continent. We wish the new man the same success. From what we know, we think it not too egotistical to claim for the student body the ability to conduct the affairs of a good dining hall themselves.

All we claim outside of our rooms is a control of "Varsity." All we wish is that we had greater control. The weekly is good, but there have been times when it might have been better.

And so, in concluding these few suggestive criticisms, may we hope that before many years the University of Toronto will possess a Union of which it will have reason to be proud, and which will be a nucleus from which, and to which, the affairs of the students, socially and otherwise, will of necessity radiate.

However, as things stand, we are struggling along and making the very best of things generally. This year the Executive followed up to some extent changes which were initiated for the first time by Mr. C. D. H. MacAlpine. The pool and billiard room being now closed every forenoon has proven to be of advantage to the lecturer's attendance records. The method of paying the "Colonel," although objected to by many at the beginning of the term, has to a great extent decolorized conversations in the top flat, so that the oscillations of the atmosphere without the Union have this year been somewhat less irritating than heretofore. And so we hope that the time is not far off when the Board of Governors will recognize our attempts to make the Undergraduates' Union an institution worthy of a handsome support by way of alleviating its very limited quarters

The Undergraduates' Union—Continued

The retiring Executive take this opportunity of thanking the other members for their faithful support during the past session, and wish the incoming officers, especially the Secretary-Treasurer, the same loyalty that we have enjoyed throughout '07-'08. And, in concluding, allow us to extend to the graduating body our very best wishes for future success, although we hope that those remaining in the city will maintain their association with the Club,

and that whenever the others are in town they will not neglect to pay us a visit. Most profuse gratitude is also due the Secretary, Mr. A. D. LePan, for the open-latch way in which he has sacrificed the privacy of his room to satisfy his altruistic tendencies, and his many friends, who have so imposed upon his time and kindness, especially join in wishing him that success in his profession which his merits and thoughtfulness of others are sure to bring him.

J. Ross G. Murray, '07.

University College Literary and Scientific Society

NDER the Party System, the Literary and Scientific Society of University College continues to thrive and hold its place foremost among student organizations in the University. Last year, under a Unionist Executive, this year under an Old Lit. Executive, after a brief, sharp struggle at the conclusion of each year, the antagonism of the spring elections forgotten in the intervening vacation, the opening of the Lit.'s year in autumn sees the two parties joined hand in hand, striving to attain higher ideals, to exert the Society's influence in the direction of improvement in various departments of the University, to welcome the members of each year to the benefits they may derive from partaking in its proceedings, and to uphold the honor of the College in inter-college and inter-collegiate debate.

In the early meetings of the fall term, one could not but note the absence of those old war-horses of '07, the standard-bearers of the Old Lit. Party and of Unionism in the past year: Holy Willie, whose words full of conviction seldom failed to convert; the dauntless Cooke, so generous in illuminating the benighted freshmen; Eastman, who invariably rode the old nag, "Student Discipline," till it died; Davis, whose sentences, well-weighed before utterance, were never found wanting; and many others whom the allotted space forbids our mention.

But their places are filled, and amply filled, by a new line of leaders, who, bearing less of party malice, couch their eloquence in less sarcastic tones, and blend their efforts with more united effect. Among these are the First Vice-President, the high-minded Highlander, arrayed in fine shoes, who aims to build a structure of those planks on which he stood when elected, and prove it "very good";

the stately Carlyle, whose decided statements never fail to conclude the matter in question; that "hill of flesh," who occupies the seat beside the royal chair, and who lends his musical talent to please the grateful ears of the delighted audience; Eddie Williams, about whom were centred the Unionist hopes, who continues to give his best energies for the general good of the Lit. and its members; and many others of the graduating year, besides those rising stars who will bear the brunt in coming years.

This year an especial effort was made to have the open meeting a success. The meeting was held in the new ('onvocation Hall and was well attended. The Hon. Geo. E. Foster gave an excellent address, emphasizing the necessity for special preparation for men who purpose entering politics. T. C. Robinette, President of the Society, delivered his inaugural address, and an address on Canada, by W. K. George, Esq., followed by a short address to the Society by President Falconer, concluded what was perhaps one of the most successful open meetings the Lit. has had.

The dimer, under the chairmanship of Mr. J. D. Whetham, was a decided success, the speeches being undoubtedly the best, as a whole, in the history of the College.

"Stag Night," an innovation this year, was also a grand success, notwithstanding the raid on the gym. by some School men, and the "scrap" which followed, which, rather than decreasing the evening's enjoyment, served only to give greater variety to the proceedings.

Lack of space forbids us to enter further into the endeavors and accomplishments of the Society. We leave it to the succeeding years to uphold the records of the past and to reach out to greater things than have been.

EXECUTIVE COMMITTEE, UNIVERSITY COLLEGE LITERARY AND SCIENTIFIC SOCIETY, '07-'08

The Women's Literary Society

THE optimism that was felt concerning the welfare of the Women's Literary Society for the year 1907-08 has been in every way justified. The first meeting which took the form of an Autumn Tea to welcome the freshmen, was held on the 12th of October. About three hundred were present, undergraduates, graduates and wives of the Faculty. Mrs. Falconer was the guest of honor and Mrs. Alexander and Mrs. McMaster responded to the toasts to the wives of the Faculty and the Alumnæ. This year marks another change in the social functions of the Society, namely, the passing away of the Spring Reception, which is to be united with the Arts-Dance.

The regular meetings have been exceptionally good, with an average attendance of eighty, and the interest has been especially evident in the loyal support which the women have given the debaters in both Inter-year and Inter-college debates. In the former, the Juniors won the victory, and University College won from Trinity College in the Inter-college debate. The debaters were Miss Marshall, '08, and Miss MacLachlan, '08. An unusual feature of this year is a German play, to be given under the direction of the President of last year, Miss van der Smissen.

With Miss Findlay, '08, as official representative, the work of Evangelia House, the University Young Women's Settlement, of which the Society is Beta Chapter, has been taken up with more active interest than ever this year. Every day some of the members of the Society take classes in English, sewing or some other department of work,

The Executive feel that of all their college memories none will be pleasanter than those of their work for the Literary Society, and extend all good wishes to those who follow in their footsteps.

Officers:

Honorary President—Miss C. C. Benson, Ph.D. President—Miss L. M. Thompson, '08.

Vice-President—Miss M. Findlay, '08.

Recording Secretary—Miss A. Dulmage, '09.

Cor. Secretary—Miss Christine Graham, '10.

Treasurer—Miss L. M. Van Duzer, '09.

4th Year Rep.—Miss A. V. MacWhorter, '08.

3rd Year Rep.—Miss A. Anderson, '09.

2nd Year Rep.—Miss O. MacKay, '10.

1st Year Rep.—Miss A. Ball, '11.

Women's Literary Society Executive

IST ROW—ALMA ANDERSON, '09, 3rd Year Representative; Alice Ball, '11, 1st Year Representative; Olive MacKay, '10, 2nd Year Representative; and Row—M. A. V. MacWhorter, '08, 4th Year Representative; L. Mabel Van Duzer, '09, Treasurer; Agnes Dulmage, '09, Recording Secretary; Christine Graham, '10, Corresponding Secretary, 3rd Row—Miss C. C. Benson, Ph.D., Honorary President; Lena Thompson, '08, President; Marion Findlay, '08, Vice-President.

Inter-College Debating Union

In 1898 a Debating Union was formed comprising the Literary, Scientific and Debating Societies of University, Wycliffe, Knox, Trinity and Victoria Colleges, McMaster University and Osgoode Hall. As defined by the constitution, the object of the Union is, "The encouragement of debate among the colleges of the city; and to this end the carrying on of a series of Inter-College Debates, including the awarding of the Championship of the Union."

On Oct. 16th the first Executive meeting for this season was held. After electing the officers, arrangements were made for the first series of debates. These arrangements resulted in McMaster winning the bye, Trinity debating with Knox. Victoria with University College, and Wycliffe with Osgoode Hall. Trinity, Victoria and Osgoode emerged victorious and they with McMaster entered the semi-finals,

McMaster debating with Trinity and Victoria with Osgoode Hall. On going to print, further results are unknown.

A year ago Mr. Hugh L. Kerr, B.A., very generously donated a handsome shield, designed by himself, to be presented each year to the winners of the series. McMaster University had the honor of winning this first, and at present it adorns their halls.

Early this season communications were received from the Ontario Agricultural College, desiring admission to the Union. Owing to a clause in the constitution, it was found impossible to admit them for this year's series, but steps were taken whereby that college will be able to enjoy all the privileges of the Union in future years. This increases the number of contestants to eight, and with a growth in numbers we may safely presage a growth in interest and activity, and thus a furtherance of the objects for which the Union exists.

Inter-University Debating League

THE Inter-University Debating League, which has come to occupy such an important place in University life, was formed in 1901. It was then composed of McGill, Queen's, and University College, Ottawa not becoming a member until some three years later. The object of the League is to secure the permanence of debating contests between the leading universities; to increase the intercourse among the students of Canada, and to foster the art of public speaking.

Toronto did not begin brilliantly, for she was defeated the first two years by Queen's. Her turn soon came, however, and she succeeded in holding the championship for the next two years, an honor to which she has not since been able to attain. This year the preliminary debates took place on December 5th, when McGill and Toronto were the guests of Ottawa and Queen's respectively. In each case the home speakers were the victors. Queen's and Toronto joined issue on the question of the exclusion of Japanese immigrants from Canada. J. A. Carlyle and J. D. Campbell, of Toronto, arguing for the affirmative, showed the grave danger of admitting people so alien in race and civilization that assimilation must necessarily be

impossible. Their opponents maintained that Canada needed Orientals to develop her natural resources, and that exclusion would lead to serious international complications. They advocated restriction and won. In the final debate, held on January 21st, on the subject: "Resolved, that the Canadian Senate should be abolished," the logic of Ottawa proved more than a match for that of the Presbyterians. The winners of the trophy proved conclusively the utility of the second chamber.

This year an important change was made in the constitution whereby the Undergraduates' Parliament of the University of Toronto may replace the Literary Society of University College in the League whenever the latter sees fit to surrender its present privilege. With speakers chosen from the whole student body, Toronto should have a much better chance of being successful in future contests.

The officers for 1907-1808:

President—D. A. McArthur, B.A., Queen's. First Vice-President—J. A. Carlyle, Toronto. Second Vice-President—M. Doyle, Ottawa. Secretary-Treasurer—A. G. McGougan, McGill.

Victoria College Union Literary Society

ITH a glorious history of fifty-one years behind it, the Union Literary Society stands to-day as the great student assembly of Victoria College. In the spring of 1903 an organization known as the Alma Mater Society was formed, with the object of dealing with undergraduate business, thus leaving the "Lit." more time to follow literary lines. As this Society held only two regular meetings during each college year, and as the vast bulk of affairs was handled by the Executive alone, it was found that the voice of the student body was not satisfactorily heard in the legislation, and control was passing into the hands of a few. So, in the spring of 1907, the Union Literary Society and the Alma Mater Society amalgamated under the name of the former.

This Society meets every Saturday evening in Alumni Hall. Its meetings are divided into two sessions, the first literary and the second business. In the former, addresses, debates, songs, contests of oratory, essays on art and science, are given, and the Society aims to lessen in some degree the narrowing influence of the various college courses. The

business session is given to the transacting of the business of the student body. The house is divided into Government and Opposition, the President of the Society occupying the Speaker's chair. The Cabinet consists of the Presidents of the various college societies and six members chosen by the Premier. Routine business is transacted by this Executive and reported to the House. Matters of import are introduced after discussion in the Cabinet, and, in the full discussion which is allowed, the matters of student interest are thoroughly debated and decided by the voice of the student body.

The "Lit." as the student assembly has control over all other college societies. Including all students, it forms a unifying force, binding the various segments of "Old Vic." together and making for that peculiarly evasive, intangible blessing termed "esprit de corps."

C. Montrose Wright.

Victoria College Women's Literary Society

HE aim of the women students of Victoria College is all-round culture—physical, mental and moral—and the part of the Women's Literary Society in this programme is that of intellectual development. In the bi-weekly meetings of the Society, the programmes consist of debates, papers on current and literary subjects, music, sharp practice debates, and everything that makes for the broadest intellectual culture. The influence exerted by the Society is strong, and its membership this year includes almost every woman student in the College.

University of Toronto Medical Society

THE University of Toronto Medical Society was organized January 9th, 1895, to deal with matters pertaining to the general interest and welfare of the students, to encourage interest in medical science and literature, and to be a means of communication between the student body and the Faculty or other body when such is desirable. For previous years each successive class has been faced with the difficulty of choosing a year pin. This year the Medical Society had a pin designed which shall be used in the future as common to all the classes. The design is in the snape of a Maltese cross, beautifully set with pearls and the year in raised gold numerals.

The reading room was furnished with the best newspapers and periodicals and a number of new chairs were added. Owing to the desire of the students to keep in touch with the recent scientific medical research work the Medical Society obtained a number of the best medical journals.

Music seemed to be the best desirable way of spending the leisure moments between lectures, so the Medical Society secured a piano and a number of the popular songs, including the University Song Book.

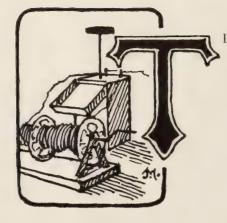

The College function, the annual "At-Home," had the hearty co-operation and support of the Society.

In order that the medical student be not deprived of any of the advantages of social life, a new 'phone was put in. One 'phone was not satisfactory for such a large number of students, because there would generally be two or three waiting until the person talking had finished his conversation, and the latter would either have to ring off before he had accomplished the object of his conversation or deprive those waiting of a chance to expound their eloquence.

We must regret that the open meetings have not been as numerous as we would have liked, but such as we had were well attended, educative and entertaining, notably the discourse given by Dr. Newton Albert Powell on "The Country Doctor." The Medical Society is anticipating having two or more in the following months.

The Engineering Society

HE life of the Engineering Society, though as yet not a long one, has been one of steady and substantial growth. The credit for the organization of the Society should be given to Messrs. T. Kennard Thomson and H. Bowman, two optimistic spirits who felt, despite the misgivings

of the students at

large, that a society such as this should have its place in the life of the then School of Practical Science. This was in 1885 and the first organization meeting took place on the occasion of a small gathering of sympathetic professors and enthusiastic students who met on the invitation of Mr. Thomson, in his room.

The first President of the Society was chosen from the Faculty, and from 1885 to 1888 Dean Galbraith, who, along with Professor Ellis and other professors, had given the new society every support, filled that office. After seeing the Society safely started on its career, Dean Galbraith in 1888 vacated this office and his successor, Mr. Haultain, was chosen as the first student President. Since that time the Presidency has been held by students, and more lately by graduates attending for fourth year work.

In the early stages of its history the Society held meet-

ings on every second Tuesday during the session, but later this was changed so that they now take place on the first and third Wednesday of each month. Since its inception the growth of the Society has been steady and sound, with very few reverses, although it sustained a serious loss in 1891 in the disastrous fire which nearly wiped out University College. At that time the Society had an exhibit of instruments, books and papers in the main building and these were entirely destroyed, entailing a serious blow to the library, which was not at that time in its present flourishing condition. The membership has grown until to-day there is no other organization in the University of Toronto that is so representative of the students in its faculty. In the first years of the Society membership was subscribed for by a voluntary fee on the part of those wishing to join, but in 1894, through the instrumentality of Dean Galbraith and the Council of the Faculty of Applied Science, a membership fee was charged each student and included in the regular fees for the School course.

Last year the constitution of the Society was redrafted and the Society was sub-divided into sectional groups, each presided over by a Vice-President. A general meeting is now held on the first Wednesday of each month and three sectional meetings on the third Wednesday. This arrangement appears, from the short trial it has had, to work out very satisfactorily, and to-day the Engineering Society, under the Presidency of Mr. T. Hogg, assisted by a capable Executive, is not only a vitalizing force in the undergraduate life in the Faculty of Applied Science, but a potent factor in student life of the University of Toronto.

A. D. L. P.

Engineering Society Executive

Second Field Company, Canadian Engineers

HIS Company, formerly known as the Toronto Engineers, and, at that time, wholly recruited from University students, was organized in the spring of 1901, by Professor W. R. Lang, recently appointed to the Chair of Chemistry in the University, and who was qualified by twelve years' service in the Auxiliary Engineer forces of the Old Country to train and command a unit of this kind. Nine selected men of the first 200 who signed the service roll went in May to Stanley Barracks for a sixweeks' course of instruction in infantry duties, drill and interior economy. In the fall of the year the Company was recruited to full strength (55) and took part in the mobilization and review of the troops of the 2nd Military District on the occasion of the visit of their Royal Highnesses, the Duke and Duchess of York, forming a guard of honor in part of the University when the Prince and Princess visited it. The corps went under canvas in May, 1902, on Garrison Common for the prescribed 12 days' training, when field works of all descriptions were erected, duly inspected by D.C. and an R. E. officer from the Royal Military College, and demolished. At the military tournament held in the city in 1903, the company built a barrel-pier bridge in the arena in the remarkably short time of under ten minutes from entering the hall till the first of the troops (cavalry) began crossing it. The original company officers were Capt. Lang, Lieutenants J. T. M. Burnside, and A. C. Macdougall, both well-known University graduates. Wilkie Evans S.P.S.) was the first Company Sergeant-Major, and Mr. Williams, of the gymnasium staff, was Quarter-Master Sergeant. In 1903, it was decided to remove the headquarters of the corps to the Armouries, in order to bring the Company in closer touch with the rest of the garrison. Temporary quarters were assigned on the north side, and by command of the Militia Department a City Section was raised and the establishment increased to 181 of all ranks and 53 horses. H. N. Gzowski, a third-year "School" man, was now Company Sergeant-Major, and the corps had lost Lieutenants Burnside and Macdougall—the former serving

the Empire in the West African Frontier Forces, and the latter having taken up a good position with the British Westinghouse Company in the United States. Each year the Company has gone to the Divisional Camp at Niagara-on-the-Lake under General Otter, where, in addition to going through a course of instruction in Military Engineering, it has done its share of the regular duties pertaining to its branch of the service, such as water supply, running telephones and, in 1905, the whole telegraphic arrangement of the camp was given into its charge. On C.-S.-M. Gzowski's promotion to commissioned rank, Sgt. J. J. O'Sullivan succeeded him, and did yeoman service in raising the Company's strength and efficiency. Each Thanksgiving Day the corps has been employed in its technical duties. In 1904 a large pontoon bridge (see opposite page) was constructed over the Humber, by which the attacking troops advanced on the doomed (?) city from the west. In 1905 demolition formed the principal part of its work at that field day. 1906 saw a remarkably fine pontoon bridge thrown over Credit River under adverse conditions of approach and banks, which Capt, Russell Brown, R.E., who was umpiring. praised very highly. The Thanksgiving manoeuvres of October 30th this year was another dry outing, no river interfering with the passage of troops engaged.

The main training of the Company is done in camp at Niagara; those who cannot attend for this agreeable outing are trained evenings and Saturdays in the fall in knotting, lashing, use of spars for temporary bridges, pontooning on the lake, demolitions with percussion and electric fuses and guncotton, use of field level, derricks, sheers, gyns or drill of a mobile company of engineers. The present officers are Major W. R. Lang, Capt. S. P. Biggs, Lieutenants H. N. Gzowski, H. F. H. Hertzberg and T. H. Irving, with Dr. Barton as medical officer. The University non-commissioned officers are Company Sergt.-Major (supernumerary) J. J. O'Sullivan, Quarter-Master Sergt. E. J. Kepath, Sergts. Robertson, Maclachlan, Danks, Molesworth and Ewing;

these with seven other corporals.

THE ENGINEERS

The Royal Dental Society

THE Royal Dental Society is one of the most important student organizations of the College. Its object is to advance dental education and to provide professional development along lines leading up to the Provincial societies and associations.

To accomplish these ends monthly meetings are held, at which papers on different phases of Dentistry are presented by students. Prominent men of the profession are often secured to present some subject of especial interest. Open discussion always follows these papers, in which everyone is at liberty to participate. The meetings are enlivened by local or outside musical talent.

The student who takes advantage of the opportunity afforded by this Society is benefited in various ways. If he gives a paper, he gains a thorough knowledge of some particular branch or subject that he may not have properly

understood before. In taking part in the discussions he develops the faculty of accurate and rapid thinking, and this under the favorable circumstance of speaking to his fellow students. After graduation, if he is a progressive practitioner, he will attend the local Society meetings and also those of the larger associations. In this case, he will understand the organization and carrying on of such meetings and may take an intelligent part in their management and programme. Thus, the Royal Dental Society stands for a liberal education in Dental Science and professional life.

EXECUTIVE OF THE ROYAL DENTAL SOCIETY, '07-'08

H. C. BANFORD, '11, Freshman Councillor

W. A. Matheson, '08, Sec'y-Treasurer

II. M. Mozrow, 'o8, Senior Councillor HAROLD CLARK, D.D.S., L.D.S., Hon.-President

J. B. CARMICHAEL, '10,
Sophomore Councillor

V. E. HART, '09, Junior Councillor A. G. B. MacKenzie, '08, President

The Literary Institute of Trinity College

THE Literary Institute of Trinity College, of which every man is a member, has for its object the training of men in language and debate, the management of the Common Room and Students' Library, and the purchase of reading matter. During the present academic year the Council has been actively engaged. The interest in debates has been quite up to the standard, and an endeavor has been made to arrange these with a view to preparing men for the Inter-collegiate series. The constitution has been revised and printed. An oratorical contest has been established. The Hon. Thos. Crawford, M.P.P., kindly donated a medal, and the Institute granted three cash prizes. On December the seventeenth the contest was held. There

were nine entries. Mr. Baker won the first place and medal; Mr. L. V. Redman, second place; Rev. A. L. Ried, third place. The result has quite warranted this new feature, and it is to be hoped that coming Councils will continue this practice.

In the matter of Inter-collegiate debates, little can be said as yet. Trinity won from Knox by default in the first series, and at the time of writing the semi-final and final series have not taken place.

The Annual Conversazione of the Society was held on Thursday evening, January the twenty-third, and proved that Trinity has not forgotten how to entertain.

St. Hilda's Literary Society

ST HILDA'S Literary Society is one of the oldest of the College institutions, and was established at a time when the small number of St. Hildians made such an undertaking a most enterprising one. The Society has grown steadily since those early days and the prospect for the future is especially bright, as henceforth there will be four undergraduate years in College.

The Inter-College debates with University College and Victoria arouse a great deal of interest, as do also the debates between the different years for the College Championship. In the opinion of the majority, the two meetings of the Society which are most eagerly looked forward to are the first one after the Christmas vacation, at which the programme is contributed entirely by the freshies, and the open meeting, when we have the pleasure of welcoming our graduates and representatives from the sister colleges.

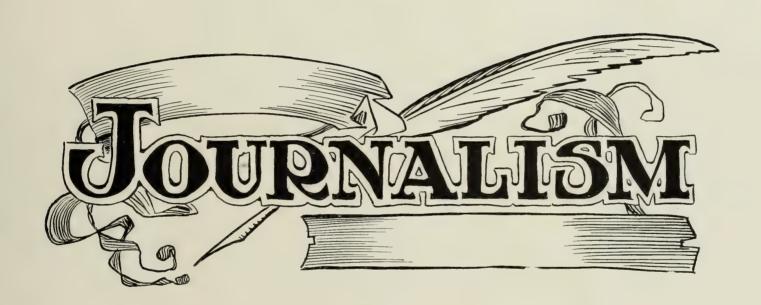

Executive for 1907-08:

President—Miss Newton, '08, Vice-President—Miss Embree, '09, Recording Secretary—Miss Gwyn, '08, Corresponding Secretary—Miss Alley, '10, Treasurer—Miss Thompson, '09, Ex-Officio—Miss Somerville, '10, 1st Year Councillor—Miss Hately, '11.

St. HILDA'S LITERARY SOCIETY EXECUTIVE

IST ROW—MISS HATELY, 1st Year Councillor; MISS Alley, Corresponding Sery; MISS THOMPSON, Treasurer; MISS SOMERVILLE, Ex-Officio. 2nd Row—MISS EMBREE, Vice-President; MISS NEWTON, President; MISS GWYN, Recording Secretary.

HE Varsity is a weekly magazine, published twenty times during the College year, by the Undergraduates' Union. It began as the organ of the Literary Society, but was taken over some years ago by the Union, absorbing the newspaper, "College Topics," which the Union had for a time taken under its wing. The purchase has been justified from a financial standpoint, as the paper now yields a considerable revenue to its owners. More than that, it has given the Varsity an opportunity to develop into a University instead of a College paper. The Literary Society last year, confident that the Union was looking after the Varsity's interests well enough, relinquished the measure of control it had retained in the paper's management at the time of the purchase.

Torontonensis is an annual, and Varsity but a weekly, so this dignified publication is able to regard impartially the merits of the pert little journal which rushes before the public every week. To begin with, it must be said that the Varsity compares favorably with any College weekly on the continent, or, at least, with any that are sent to Toronto as exchanges. The force of the compliment is lessened by the fact that there are not very many successful weeklies in the field of College journalism, but Varsity is able to stand comparison with even some of the more pretentious monthlies and bi-monthlies.

What faults have to be found with the *Varsity* are due largely to the position it tries to fill. It is neither wholly a magazine nor wholly a newspaper, and the two elements, which have very little in common, vary in its make up according to the literary offerings, the importance of University events, and the taste of the editor. Some day there will be a newspaper established, and although its coming will probably be resented at first, it should help the *Varsity* by leaving it free to cultivate one portion of the field, quite wide enough for the operations of two papers.

A paper such as *Varsity* serves several purposes. To its owners the financial aspect is important. The demand of the readers is that they be amused, and, indeed, a paper could not live long which did not interest its subscribers. But the great service *Varsity* renders, the service which is sufficient reason for its existence, is to those who work for it. There is a paper not because people want to read it, but because there are persons who want to write it. Those who contribute to its columns are the ones who derive benefit from the *Varsity*, although perhaps those whose compositions are rejected get some profit from the experience. It would be a double advantage to the paper and to themselves if more of those who can write would interest themselves in *Varsity*.

L. H.

Carlyle, School of Practical Science; F. P. Varcoe, University College; N. L. Lesueur, University College.

J UST when the spirit of journalism first entered old Vic. is now no longer even a matter of speculation. It was, however, in the fall of '78, in the old Cobourg days, that spurning the mediocrity of college essays and prose competitions, it demanded other and wider means of expression and led to the launching of a new enterprise in the guise of an eight-page journal, rejoicing in the name of Acta Victoriana. The raison d'etre of this venture was expressed by the first editorial board as "A desire to make the advantages of our College better known, to open up a medium of communication between students and ex-students, to stimulate students to literary effort and to obtain an interchange of thought with students of other colleges."

Granting all the cheerful optimism associated with college life, it is doubtful if even the most sanguine of its early friends ever anticipated the continued success that was to attend it through succeeding years. Like the proverbial bay-tree it grew and prospered, and when Vic. left its Cobourg home and started housekeeping in the brown-stone building in Queen's Park, being able to draw its resources from a wider advertising field, *Acta* reappeared in richer guise, larger in form, well bound and handsomely

designed, to occupy by the unanimous opinion of its contemporaries a foremost place in college journalism.

The secret of its continued success lies in the fact that no other organization in the College is so identical with the history, traditions and ideals of old Vic. as this magazine, which for three decades has accompanied the changing scenes and fortunes of its college home. True to the ideals of its founders, *Acta* has ever had in view a twofold duty, to allow every opportunity for the discussion of matters of student interest, and to keep those who have passed the portals of college in close touch with the scenes of former days. It thus stands as the strongest link that binds the graduate to his Alma Mater and by awakening the fond memories associated with those former days it keeps the flame of college spirit in a healthy glow.

The students and graduates in their turn have always given Acta their most loyal support, and by advice, counsel and contribution have aided those who bear the immediate work of publication. What the future of Acta will be we will not attempt to forecast. But with the generous support of the College, a sanctum in the new Library and the continued loyalty of the student and graduate body, we are assured that it will maintain that prestige which it now commands as a college publication.

Trinity College Review

THE Trinity College Review deserves special mention among the features of the College. Its first editor was Mr. Travers Lewis, D.C.L., who began the issue of the paper in 1880, under the name Rouge et Noir. Although originally a private enterprise, its immediate success caused the students to undertake its publication, which has gone on uninterruptedly now for twenty-eight years. Among its editors and contributors may be found the names of many who have since become famous—Archibald Lampman, Sir Gilbert Parker, Walter Rogers and many others. With such men as these to manage and contribute to this publication, the Review, as it was renamed in 1888, made rapid strides. Though, as is the case with every paper, and especially with college magazines, it has from time to time had to face real difficulties, the Board of Management has always risen to the occasion, and to-day the Trinity University Review, aided by the efforts of all who have the inter-

ests of the paper at heart, is not unworthy of those names associated with its initial success, nor of the College whose name it bears. The *Review* is published monthly during the academic year and has a wide circulation among the many Alumni of Trinity College. The following are the names of the business and editorial staff, who have so ably conducted the paper during the present year:

- J. C. Potts, B.A., Editor-in-Chief.
- E. A. Baker, '08, Business Manager.
- H. A. Bracken, B.A., Assistant Editor.
- A. H. McGreer, B.A., Assistant Editor.
- L. V. Redman, '08, Assistant Editor.
- J. F. Wiseman, '09, Assistant Editor.
- H. P. Rossiter, '09, Assistant Editor.
- R. K. Gordon, '09, Assistant Editor.
- J. H. Dixon, '10, Assistant Editor.

St. Hilda's Chronicle

ST. HILDA'S Chronicle this year completes its seventh volume. It is issued three times yearly and aims especially at providing a bond of union and a means of intercourse between graduates and undergraduates. College news and topics of general interest are discussed in

its columns, and it is proving itself yearly more valuable in its chosen sphere. The past year has been especially successful. The subscription list has increased and the contributors have included eminent men, not only from our own University, but from those of the United States.

St. HILDA'S CHRONICLE STAFF

Hya Yaka

THE *Hya Yaka* is a journal published monthly during the College term by the students of the R.C.D.S. Although only in the fifth year of its existence, it has met with splendid success. The encouragement it has

received, both from undergraduates and alumni, has been more than sufficient to justify its publication and to assure its continued existence. Each year has marked an increase in its popularity and influence, until at present it is the most powerful organization of the R.C.D.S.

It is essentially a students' organ, and is devoted to their interests. Through it all are at liberty to express their views on any matter of common interest. The writings of prominent men of the profession appear from time to time, thus keeping the undergraduates well informed concerning the most advanced thought of the profession. The graduates are kept in touch with life around the College, its advancement, the reforms accomplished and those agitated. Their interest in their Alma Mater is in this way maintained, and the students are always better for the interest taken in them by the alumni.

In athletics, the *Hya Yaka* endeavors to encourage clean sport among the students. It does much to arouse interest in the various games, and publishes full accounts of all the matches, inter-year and inter-faculty. With these objects in view it should continue to be the worthy mouthpiece of the institution it represents.

Men's Dramatic Club

THIS Club is an organization constituted quite informally to provide a sort of official excuse with which those students who have histrionic ambitions can entice an audience to pronounce a verdict on their abilities.

A number of men in the University, who were anxious to have an opportunity of doing some acting, came together late in December, 1907, and decided to prepare one or two plays, thus forming the Dramatic Club. Owing to the fact that the three months of the University year in which the student would most welcome distractions from work in the shape of rehearsals had gone, it was decided that it would be impossible to enter upon any extensive plans. It was thought better to provide one evening's entertainment by way of advertising the existence of the Club and depend upon the experience thus gained to make more ambitious

plans for next year possible. The Committee has found that there is no lack of material and a great deal of interest has been shown in the project. There is no reason why at least part of the entertainment at next year's theatre night should not be provided by amateurs from the University, and in all probability sufficient talent could be discovered in the next two years to justify a company representing the University being sent to compete for the Governor-General's prize at Ottawa. At present, plans are under consideration for presenting one or two short plays in Convocation Hall some time in the beginning of March. The officers are as follows:

President—Thomas Moss. Vice-President—J. E. Hodgson. Secretary—Douglas Hallam. Committee—S. C. Dyke, —. Warrington.

Women's Dramatic Club

THE Dramatic Club expresses the wish of the women of University College to develop the outward expression of their education, rather than to allow it to remain within, or to be badly expressed.

The primary aim of the Club is voice culture, with the physical poise which attends it; while the secondary, if not equal, aim is dramatic expression.

Under the efficient and sympathetic training of Mrs. Scott-Raff the girls have learned to love their work, and have come to find that their academic education means much more to them as they learn to express themselves naturally and clearly.

In dramatic study Shakespeare has always held the highest place in the Club; and while a presentation of an entire play is out of the question, various scenes and abridged plays have been presented from time to time. These are given merely as studies in dramatic art, without any stage scenery.

In March of 1907 the Club presented W. S. Gilbert's classic comedy, "Pygmalion and Galatea." For this, Mrs. Raff kindly permitted the use of the Greek Theatre, which greatly enhanced the effect, while Miss Wreyford trained the girls of the Physical Culture classes of University College in a graceful Greek dance, which gave a very effective conclusion to the play.

This year the girls of the Club are working on "As You Like It," from which they might take as their motto the impulsive words of the "heavenly Rosalind,"

"Do you not know I am a woman?
When I think, I must speak!"

English Literature Club

THE English Literature Club was founded in 1906. It is a small organization—necessarily so—for the number of men around the University who would take pleasure in the proceedings of such a body is not large.

It was formed by a few students possessing a love of good literature, who hoped by mutual exchange of ideas to increase their knowledge and appreciation of the works of men of letters.

The membership of the Club is limited to no faculty or college—the only requirement being an enthusiasm for good literature. The meetings take place once every two weeks. At each gathering one member is called upon to expound the works of one of his favorite authors. He reads such

passages as he chooses, and they are commented on by the other members.

The Club has only two officers, a President and a Manager. The President is Dr. M. W. Wallace, who has held that office since the foundation of the institution, and to whom its success is very largely due. The present Manager is S. C. Dyke.

Some of the authors discussed by the Club are: Hogg, the Ettrick Shepherd, introduced by Dr. Wallace; Edgar Allen Poe, by Geo. Coutts; R. L. Stevenson, by J. R. Harris; Miss Coleman, by T. Larsen; Walt. Whitman, by C. A. Lazenby; Alphonse Daudet, by L. A. Miller; Mallory and the Morte a' Arthur, by S. C. Dyke.

The Speculative Club

THE Speculative Club was founded in March, 1904. Its membership was confined to undergraduates. Its aim was to discuss any problem of real speculative interest. As it was found, however, that some of the members did not like free (and easy) discussion of religious questions, the Iconoclastic Club was formed in 1905. By the spring of 1907 the numbers of the latter organization had found that they had "knocked" everything and everyone (excepting themselves), and so they decided to begin "speculating" once more. Hence, during the present year, there has been but the one Club.

At the present time there are eighteen regular members and a number of past-members who occasionally appear at meetings. These gatherings are held every two weeks. After dinner the Club proceeds to the discussion of the

evening. There are no rules—a dictator appointed for the evening having complete control.

The "idea" that underlies any such organization must take the course of all things human. So it was found at the beginning of this year that a different policy was needed if the Club was to survive. Now no longer is the membership confined to undergraduates. Members of the Faculties of Arts and Practical Science, students in Medicine, Arts and Theology—all engage in lively and (usually) goodhumored argument. Probably in no other academic club open to both graduates and undergraduates is there such freedom of speech—and probably, also, in no other club is one so apt to have opened to one some new avenue of thought.

Political Science Club

The members, as a rule, take a keen interest in all matters connected with the University, and besides it is very difficult to obtain speakers other than the professors in the course who have given the subjects acute and careful study.

Through the kindness of the T. Eaton Co. the members had the privilege last autumn of inspecting the factory and plant of that firm and of seeing first-hand the effect of keen business insight and a perfect system in industrial concerns. On January 31st, 1908, Miss E. M. Keys, '06, and Mr. H. H. Davis, '07, who are engaged in post-graduate work in Economics, addressed the Club on "The Conditions

of the Working Classes in Toronto." Their addresses were interesting and illuminating. They gave the students an insight into the real benefit to be derived from such studies. The open meeting of the Club has not yet been held.

Officers:

Hon. President—S. J. McLean, B.A., LL.B., Ph.D. President—James Gilchrist. '08.

Vice-President—T. B. Malone, '09.

Treasurer—E. G. McMillan, '09.

Secretary-G. N. Shaver, '08.

4th Year Representative—R. A. Humphries, '08.

3rd Year Representative—J. E. Campbell, '09.

2nd Year Representative—N. D. Tytler, '10.

1st Year Representative—F. P. Vokes, '11.

Economic Club

THE average student needs friendships of an intensive rather than of an extensive character. He believes that more pleasure and profit come to him from a close acquaintance with a few than from merely knowing a great number. Because of this circumstance the present-day tendency among college students is to get together in small clubs of limited membership, where those who for some reason prove congenial to each other may take the fullest advantage of a short period of fellowship at College.

With such an end in view the Economic Club was inaugurated in 1905. The membership is limited to fifteen University College students, mutually interested in economics and in each other. These meet every second Friday at six o'clock, dine together, and engage in the informal discussion of some question of general interest until adjournment is made to the Lit. at eight o'clock. The Economic Club aims to be helpful to its members without putting burdens upon them. This result is accomplished in two ways: On the one hand, by the complete absence of machinery, officers, fees, assessments and laws, written or unwritten; on the other hand, by such an arrangement of the time and duration of the meetings as to give the minimum of interference with the studies or social engagements of the members.

The members are:

Carlyle, J. A.
Campbell, J. D.
Dewar, A. M.
Fisher, J. C.
Griffin, H. L.
Hindmarsh, H.
Kilpatrick, G. G. D.
Williams, E. S.
Lambert, N. P.
McDonald, W. L.
Smith, G. M.
Stirrett, J. T.
Turner, H.
Urquhart, G. A.
Williams, E. S.

Camera Club

HIS Club was formed in the fall of 1906, some of the leading spirits in its organization being Mr. G. R. Anderson, M.A., Lecturer in Physics, and now Hon. President of the Club, and Messrs. Huber and Blatchwood, of '06.

The object of the Club is to enable those students, graduates and members of the staff who are interested in photography to meet and profit by the experience and knowledge of others, and thus gather enthusiasm and encouragement from discussions with others of like interests.

Meetings are held twice monthly, and addresses are given by men who have made a study of particular branches or subjects, questions and free discussion being encouraged.

Members have the use of a dark room and enlarging camera kindly loaned by the Faculty, and chemicals are provided by the Club.

An exhibition of photographic work is held at the end of the season and prizes awarded in the various classes of work. The exhibition held in the spring of 1907 was an

extremely creditable one, and some very artistic work was presented.

Though only in the second year of its existence, the Club deserves a prominent place among the University organizations which are working to breaden the interests and develop the abilities of our students along lines not merely of utility—though photography is of great practical value to the engineer—but of artistic feeling and culture.

The Executive Committee for the present session is composed of the following members:

Hon. President—G. R. Anderson, M.A.

President—J. D. Keppy, '06.

Vice-President—A. B. Mitchell, '08.

Secretary-Treasurer—C. R. McCollum, '09.

4th Year Councillor—A. H. Hull, '06.

3rd Year Councillor-W. E. V. Shaw, '08.

2nd Year Councillor—C. B. Langmuir, '09.

1st Year Councillor—H. W. Fairlie, '10.

S.P.S CAMERA CLUB

Electrical Club

1

HEN the Electrical Club was organized the underdertaking was considered a somewhat risky experiment. The originators realized that the new club must pursue a line of work hitherto unattempted and fulfill certain requirements which could not be conveniently or efficiently met by existing institutions. The main idea was that in a club restricted to third and fourth year Mechanical and Electrical students, papers could be read of more direct interest from the technical standpoint than those usually presented to general student bodies. It was also felt that the limited membership would result in freer discussion and provide opportunities for self-expression which many students fail to find elsewhere. The majority of the papers should be presented by members and outsiders called upon only under special circumstances.

The Club was organized along these lines in December, 1906, and the success of the experiment was evident at once. Very hearty support was immediately forthcoming from the students affected and from the members of the Faculty concerned in Mechanical and Electrical work. In spite of the handicap imposed by the work of organization and the

trouble of finding out and rectifying inevitable defects, the results accomplished in this initial season were extremely gratifying to those having the project at heart.

This year has amply borne out the promises of last. The Club got off to a flying start and had everything running smoothly early in the term. The membership has considerably increased, and indications seem to point to the possibility of future Executives being forced to devise ways and means of preventing the Club from developing past the point at which the advantages of the small society are lost. The meetings have been largely attended as a natural result of the high class papers presented. Saturday morning visits to the various power plants and manufacturing firms about the city are arranged from time to time and are always highly appreciated by the members.

The Electrical Club has now had a fair trial and has proved that it occupies a sphere of usefulness entirely its own. As long as its members continue to show the keen interest and willing helpfulness that have been evinced in the past, the Club is assured of a long and successful career.

S. P. S. ELECTRICAL CLUB, '07-'08

H. C. Barber, 3rd Year Councillor F. H. Moody, 3rd Year Councillor L. G. Ireland, Secretary-Treasurer F. R. Ewart. President

A. H. HULL, 4th Year Councillor C. L. GULLEY, Vice-President

Modern Language Club

HE Modern Language Club for the year 1907-8 held eight very successful meetings. The Club met on the first and third Mondays of the month, and generally the meetings were very well attended. Two open meetings were held in the Chemical Ampitheatre, when two interesting evenings were devoted to lectures with lantern illustrations. On December 16th Prof. F. J. Davidson gave a very interesting lecture on "Impressions of Quebec." The illustration slides were exceedingly fine from the historical and picturesque points of view, and revealed to many in the audience several new sides to Quebec life, and Quebec scenery. The second open meeting was held on February 24th, when Prof. I. H. Cameron gave a delightful lecture on his recent visit to France.

The regular meetings were held in the main building at 4 o'clock, when papers on literary subjects were read by undergraduates.

During the year there were fourteen papers read; three of these were theses, which proved to be very interesting and instructive and were read by the Misses M. A. McLach-

lan, '08, S. W. Nichol, '08, J. A. Carmichael, '08. On January 27th a very exhaustive paper was read by the Hon. President, Dr. Buchanan, on the subject "At a Spanish Theatre in the Seventeenth Century." The paper delighted every one, and the Club was unanimous in a hearty vote of thanks.

The meeting on November 18th was devoted to the study of Canadian poetry, when three papers were read on the life and work of Dr. Drummond, Marjorie Pickthall, and Miss Coleman, by the Misses E. L. Atkin, '09, A. Rothwell, M. Whyte, respectively. These papers were well prepared, and the quotations were highly appreciated by the audience.

In the fall term four papers were read, dealing with modern prose writers. "Joseph Conrad," by Miss Coad, '09, "George Gissing," by Miss Helson, '10, "Jack London," by Miss Quail, '09, and "Zangwill," by Miss Williamson, '10. A very excellent paper on "Guy de Maupassant" was read by R. K. Gordon, of Trinity College, and on November 4th, one on "W. B. Yeats," by D. H. Stewart, '09.

Classical Association

HIS Association aims to clothe the dry bones of dead literature and history with the vividness and reality which comes from sympathetic study, only possible when all "practical" aims are eliminated—to engender that "humanitas" for which the Classical Association preeminently stands. At its meetings all distinctions are obliterated, and undergraduates, professors and graduates, forgetting all differences, remember that they are students of the most momentous period of human history and the noblest portion of human knowledge. Here the young student launches out on new paths, not, perhaps, to the furtherance of the study of Classics, but certainly to that of his own culture and breadth of mind. We are coming more and more to see that education is not always a success in proportion to its market value, but that this world has a very pressing need for men who can think broadly and read deeply on human affairs, and who do not despise the type of mind which the Humanities tend to mould.

The following papers were read: Quality and Quantity in Pre-Socratic Philosophy, A. Dewar, '09; German Universities, Dr. Bell; Sites and Scenes in Rome, Dr. Johnston; Rise, Development and Decay of the Greek Chorus, Miss Zuern, '10; The Homeric Question at the Beginning of the Twentieth Century, translated by Mr. Colquhoun; Recent Archæological Work in Rome, Prof. Wilson; Circle of the Younger Scipio, W. N. Sage; Menander, as the Link Between Attic and Roman Comedy, S. R. Tompkins.

Officers, 1907-08:

President—R. C. Halliday, '08. Vice-President—Miss A. M. Gillies, '07. Secretary—S. R. Tompkins, '09. Treasurer—A. Fry, '10. 4th Year Councillor—Miss C. M. Knight, '08. 2nd Year Councillor—Miss Smithson, '10.

The Philosophical Society

HERE seems to be a prejudice on the part of the ordinary man against the philosopher. He is regarded as a man of theory and not a practical man. It is indeed thought by many that the problems he is dealing with are not problems at all, or if they are they are not problems which have any practical bearing on life. The old definition of a metaphysician as "A blind man in a dark room looking for a black cat that isn't there' pretty accurately represents the popular opinion in the matter. Such a conception of the philosopher and his work is a pseudo-conception. He is dealing with the most important and most practical of all questions—he is seeking to find the meaning of life. Every man must be, to a certain extent, a philosopher; he must have a certain view of what life means, although he may not be a logical thinker or know anything of the subtleties of metaphysical distinctions. The student of philosophy, however, has a great advantage over the ordinary man, for, by studying the theories of the past, he may profit by the mistakes of others, and is, therefore, less liable to error.

The Philosophical Society supplements the course in Philosophy, and in it subjects are dealt with which are not directly within the work prescribed. During the year we have had three open meetings. Dr. Abbott spoke to us on the "Problem of Body and Mind," Mr. Smith discussed "Immortality," and Mr. Thos. Findlay addressed us on "Ethics in Business." Besides these, we have had papers at the regular weekly meetings which have been of interest and help to us all.

The officers for the year were as follows:

Honorary President—Dr. T. R. Robinson.
President—A. N. Copper, '08.
1st Vice-President—W. M. Howlett, '09.
2nd Vice-President—D. Mitchell, '10.
Secretary—A. A. Scott, '08.
Treasurer—S. H. Prince, '08.
4th Year Representative—Miss L. E. Marshall, '08.
3rd Year Representative—Miss J. E. Rothery, '09.
2nd Year Representative—J. A. Shirley, '10.

The Mathematical and Physical Society

HE M. and P. Society, organized in 1882, is one of the live societies now in existence in University College. The members of the Society are drawn from the courses in Mathematics, Physics, and Astronomy and Physics. Meetings are held fortnightly, at which interesting papers are read, upon the lives and works of great mathematicians and physicists of the past, or upon recent scientific discoveries which are illustrated by experiments, or upon some interesting topic in the field of pure Mathematics. The Society, therefore, not only keeps its members in touch with the history of the Sciences of Mathematics and Physics, but also with the progress of modern research in these Sciences.

At the opening meeting of the Society, held on December 5th, 1907, Prof. MacKenzie delivered a very interesting and instructive address on the subject "From Day to Day." Officers:

Hon. President—Professor M. A. MacKenzie, F.I.A. President—A. M. Simpson, '08. Vice-President—P. S. McLean, '09. Secretary-Treasurer—A. J. Dempster, '09. Corresponding Secretary—J. D. Campbell, '08. Fourth Year Representative—C. S. Wright, '08. Third Year Representative—S. P. Mather, '09. Second Year Representative—J. E. Wilkinson, '10. First Year Representative—J. E. Campbell, '11.

T. C. D. K. Klub

NOTHER year of *Klatsch* and smoke, music and suppers, has passed away. The season was brought to a close by two functions, the first being a coeducation supper and the second a dinner for men only. The former, at which the St. Hilda's German Club was present, was held in the Don's Common Room, and the

latter at McConkey's. German edibles were attractions on both occasions, music and conversation wiling away the latter part of each evening.

During the present academic year the Club has had a large accession to its membership, as witnessed by the photograph which accompanies this sketch.

Le Cercle Français, Trinity College

In October, 1905, Le Cercle Français entered Trinity College as a freshman. It has since that time attained to the dignity of third year rank, having carried off honors each year of its course. But it is to be hoped that next year it will not graduate and leave us, but that it will take a long course of successful post-graduate work. The number of members has steadily increased, until now the Club contains some fifteen would-be Parisians. The object

of the Club, according to the envious uninitiated, is to give the students some idea of how to drink coffee and smoke cigarettes à la française. Needless to say, nothing could be farther from the truth. Of course, the object is to learn to speak French. That French actors and actresses are present only through the medium of Mr. Routh's gramophone is perhaps just as well for their peace of mind.

TRINITY COLLEGE DEUTCHER KLATSCH KLUB

Trinity College Glee Club

"I USIC hath charms." Truly have these words been verified in connection with this college, in the ever-increasing popularity with which the Glee Club has been received, both within the College itself and by the lovers of music who have so kindly patronized the annual concerts given by this organization.

After a great amount of painstaking labor on the part of our worthy Conductor, Mr. Francis H. Coombs, the Club, with a membership of twenty-five, made its debut at a concert given last February, 1906, in Convocation Hall. The high reputation made at its first appearance was more than sustained at the second concert held in Convocation Hall, on April 4th of last year. The standard of excellence attained may be judged by the favorable comments given by the press; by the repertoire, which included works by such composers as Mendelssohn, Sullivan, Dudley Buck, Hadley and Franz Abt, and by the fact that those who assisted were artists of such widely recognized merit as Miss Hope Morgan, Mrs. Franklin Dawson, and Mr. J. D. A. Tripp.

With a membership of forty men, a large percentage of whom have belonged to the Club since its inauguration, and so have had the benefit of instruction and practice during that time, the concert to be given on February 27th of this year should surpass those of previous years.

In addition to the annual concert, the Club has decided upon a new venture, in the form of a trip to be taken some time in January.

Among the many institutions within the walls of Trinity, the Glee Club, though yet in its infancy, has received a place of well-deserving merit and prominence. Long may it continue to flourish!

S. W. H. H.

The Committee for 1907-08:

Honorary President—A. H. Young, M.A. First Vice-President—The Provost.

Second Vice-President—G. E. Holt, M.A.

President—A. H. McGreer, B.A.

Vice-President—S. W. H. Hornibrook.

Secretary—E. H. Cox.

Treasurer—R. G. Forneret.

Representative from Divinity-J. F. Carson, B.A.

Representative from '08—G. L. Ingles.

Representative from '09-W. G. Raikes.

Representative from '10-C. G. S. Stuart.

Representative from '11-E. A. Higley.

Victoria College Glee Club

AST year it seemed that the Glee Club had achieved the greatest success to which it could ever hope to aspire, but evidently "the end is not yet." The Executive were very fortunate in again securing the services of Mr. H. M. Fletcher, and the two years' training under this eminent conductor no doubt accounts for the high degree of perfection attained this season. Not a little of this year's success is also to be attributed to the assisting artists, Miss Ida M. Landers, reader, and Miss Louise Williams, soprano.

As quality, not quantity, has been our aim this year, the Club is numerically somewhat smaller than in previous years, but the results of this new policy have been such that the Executive has reason to compliment itself. Contrary to the usual practice, also, two week-end trips were made this season, by which arrangement the students concerned did not lose so much time from their studies as on former occasions when the Club was away from College for a whole week. Brampton, Orangeville, Brantford, St. Catharines and Niagara Falls all have reason to remember us, both for our excellent programmes and our jovial dispositions, but more especially for the hearty way in which we showed our appreciation of their festal bounties.

We hope that this Club will long continue to sustain the traditions of its past, and to maintain the important position it deserves in the student life of Victoria College.

The Dental Litandeb Society

It endeavors to develop a literary taste among the students of the R.C.D.S. and also to train them for executive positions. This is done by holding debates, mock trials, mock parliaments, the different modes of election, and other executive transactions. This organization endeavors to make its monthly meetings pleasant and so music and song are added to its programmes.

Dr. W. E. Willmott has been its trusted and able pilot. He has been its friend since its formation, about six years ago. Varied success has favored its young life. However, owing to the extension of the academic course to four years, and so an added life and increased numbers in the College, a brighter future is to be expected for it.

The Western Club of University of Toronto

THE Western Club of the University of Toronto is the youngest organization at the University. The membership is limited to men who come from Western Canada and the Western States. When the Club, which is purely a social organization, is in full swing, it expects to have about one hundred members. The main object is to get the men from the Yukon acquainted with the men from Texas and all the students from points between acquainted with one another. It will give a helping hand to the freshman from the plains, welcome the man from the hills and talk wheat to the man from the

grain fields. Its aim is to make the student from the West feel that there is an organization here of which he is a part as soon as he comes; to make him feel at home, in fact.

The Club embraces the whole University. Its constitution is limited and its formality is Western. Free speech is encouraged and sought after.

The Executive is composed of men. The offices and officers are:

Honorary President—R. A. Falconer.

President—H. Turner.

Secretary-Treasurer—R. H. Douglas.

The University of Toronto Monthly

THE University of Toronto Alumni Association was organized in April, 1900; the first number of The University Monthly appeared in July of the same year. The relation of these two institutions will be evident from a consideration of the following clauses in the constitution of the Association: "The object of the Association shall be to unite the Alumni in promoting the interests of the University of Toronto;" "The membership shall consist of all graduates and undergraduates in any faculty or department of the University of Toronto, and of all persons who have attended the regular exercises of any department of the University for a whole session, and of all members of the governing and teaching bodies of the University and of federated and affiliated institutions:" "It shall be the duty of the Executive Committee to provide as soon as possible for the publication of a journal in the interests of the Association."

The logical deductions from these three clauses are: That *The Monthly* is the creation of the Alumni Association, that its constituency is identical with the membership

of that Association, and that its objects are the objects of the Association. More explicitly, it is the organ of the graduates of the University of Toronto in all colleges and faculties, and depends for support upon the body which founded it. Its object is to promote the interests of the University of Toronto, primarily, by furnishing graduates and friends of the University with more accurate and more concentrated information as to the inner and outer life of the University, and as to the careers of its Alumni than can be provided by the public press; and, secondarily, by offering spaces for articles discussing questions of general interest to University people. The Monthly of the current year appears in a new dress and in a slightly enlarged form; further increase in size is contingent upon the continued and intensified support of the graduate body. This support includes, besides the trifling subscription fee, the habit, on the part of the individual graduate, of sending to The Monthly any items of news relating to the University or to his fellow graduates which may come under his notice.

General Athletics at Varsity

superintending the general athletics at Varsity, the most outstanding feature is the high degree of enthusiasm displayed by men who need exercise least, and the lack of interest in athletics on the part of those needing exercise most. Fortunately, by the system of physical examinations, we have been enabled to get a larger number than at any time previously to take up some form of athletics. The gymnasium class, boxing and swimming classes, are larger than

ever. In general athletics (football, hockey, track, etc.), as Varsity has won six championships out of a possible seven, no comment from the physical director is necessary. It might be worth our while, however, to consider why thinking men are in favor of athletics for college students. It is simply and wholly to ensure health of body not only during student days, but for the days of active business or professional life.

Many men of large mental calibre have fallen by the wayside in life's battle because their bodies were unable to withstand the demands put upon them. This attaining and retaining of health is one of the most important reasons, as we have said, but men who have studied the question have found that there is a mental and a moral training in athletics which equals, if not surpasses, the actual physical benefit. It is not the aim of the physical department of the University to make "competition" its motto, nor to turn out athletes whose prowess adds fame and lustre to the name of the University. The real aim of the physical department is to render men physically efficient to fulfill life's duties, and to enable them to have a body that will stand any strain that rightly-guided ambition demands from it.

Some Universities make physical training an essential subject towards graduation; students are required to indulge in some form of athletics at least two hours each week. One University will not grant a degree to a student who is unable to swim.

While our authorities cannot as yet see their way clear to make physical training compulsory, they are at present seeking to evolve a system whereby the students who need exercise will get it. That students upon entering will be at least advised to secure a physical examination before entering upon their studies. At present this examination is compulsory before entering any form of athletics. But as a matter of fact, many things can often be pointed out to a student during this examination that may mean very much to him during his academic career. In fact, he may learn things that will be helpful to him always. Students will often labor under serious handicaps that are absolutely unnecessary. Their hours of study can often be shortened by having a properly-acting digestive apparatus ensure a clear brain. The athletic games proper, while frowned upon by some authorities, are really most powerful factors in making "men."

Students in these games are taught to control the temper or be left off the team by their captain. They are taught to sink their individual prowess in the interest of "team" play. They are taught to think and act quickly, or their opponents will have them at a disadvantage. This training for the student, mentally, morally and physically in athletics, where he exercises his entire vitality and enthusiasm, is but a training for his life's work.

I quote a paragraph which appeared in *Moody's Magazine*, from the lips of the President of one of the greatest bonding companies: "You are a college man? Or you are not. Well, it makes little difference, speaking broadly, with the surety people, so far as your honesty is concerned. But were you an athlete at college? A point in your favor. Your physical condition, your stamina, is apt to be good, which decidedly 'helps some' in the preservation of your moral strength."

The gentleman quoted above deals in the moral integrity of his fellow men. It is simply business, a matter of dollars to him. Comment thereon is unnecessary.

JAS. W. BARTON, M.D.

THE GYMNASIUM

DR. BARTON, Medical Director

Rugby Football

NCE again the football season is a thing of the past, and the Toronto crowds demonstrated by their patronage that Inter-Collegiate football is to their liking. Though looked upon by many as a poor season, in reality it was the best for several years. True, the senior championship did not rest with the Blue and White, but the Intermediates won for the first time in six

years, and the Juniors for the first time since the formation of the league.

The reasons for the lack of success of the seniors may be summed up in the one word, inconsistency. One week they would play up to championship form, and the next week they would do all to pieces. They were also pursued by persistent ill luck in the shape of accidents. Toms, last year's outside wing, injured his leg, and Wallace, one of the best of the new men, got water on the knee.

The first game of the season was against the old-time rival McGill in Montreal, and Varsity won out by a score of 10—7. When on the following Saturday Varsity won again from McGill on our own grounds, by a score of 15—10, prospects looked very bright for the season.

But Ottawa College put a decided check on Varsity's championship aspirations by winning a very poorly played game, the score being 13—8.

On Thanksgiving Day, in Ottawa, before a large crowd, the College again beat Varsity, after an exceedingly hard contest, the score being 13—10.

Varsity temporarily restored themselves to the good graces of their supporters by walloping Queen's to the tune of 20—5, only to lose the following Saturday in Kingston by a score of 9—3, after a very listless game.

The team were for the most part inexperienced, and

Murray Kennedy had a hard job in his captaincy. As it was the youngest team of many years, the majority will be back next season, and Fred Lee, the captain-elect, should have a far easier task.

The Intermediates had a splendid season, starting with two victories over Trinity. They were unexpectedly beaten by McMaster by a score of 21—6. Starting in next Saturday with a deficit of 15 points, they succeeded in defeating McMaster in a pouring rain by the score of 27—3. McGill II. were twice beaten, 21—5 at home and 13—7 in Montreal. The next Saturday they met Tammany Tigers, O.R.F.U. Intermediate Champions, in the first round of the Dominion Championship, and after the hardest kind of a contest won by the score of 7—3. They were prevented from playing in the final, the Hamilton Intermediates being under the ban of the C.A.A.U.

The Juniors also had a triumphant season, winning twice from McMaster and beating R.M.C. II. twice for the Junior Championship. They next played Parkdale Juniors for the Junior Canadian Championship, and, though unsuccessful, put up a splendid fight for the coveted honor.

Too much praise cannot be given to Mr. Harry Griffith for his persistent and systematic coaching throughout the season, and to Dr. A. B. Wright for his able assistance. The cheering and singing, under the leadership of Mr. Gennis Johnson, was the best as yet, and next year a determined effort will be made to establish a Rooters' Club.

The following men played on the different teams:

Seniors—Newton, Gaul, H. Kennedy, M. Kennedy (Captain), Coryell, Nasmith, Heuther, McDonald, Shaw, Hume, Martin, Cassels, Lee, Ramsay, Eakins, O'Gradý and Park, H. Clarke, Manager.

Intermediates—Evans, Ryerson, Lawson, Henderson, Cory (Captain), Bell, Carroll, Hopkins, Patterson, Kingston, Sifton, Hunter, Duncanson, Doherty, Douglas, McArthur, Hay, Ferguson, Willison and McLaughlin. Hewson Manager.

JUNIORS—Dickson, McCabe, Ferguson, Greene, Malone (Captain), Faulds, Dobbin, Graham, Davidson, Hay, McSloy, McLaughlin, Carroll, Frid and Marshall. Stewart, Manager.

Hockey 1906-07

OCKEY in the season of 1906-07 was the most successful ever experienced by Toronto University. Four championships were captured, the Senior Team winning the Inter-Collegiate Championship for the first time, and

the City Championship. The Intermediates won the Intermediate Championship for the second time, while the Thirds carried off the honors in the Junior series.

Things looked bright right from the first. To start with, there were six men of last year's team back, and Southam from the year before. Captain Herb. Clarke had the men hard at work from the first, and it was not long till they were all in fine condition. Two trips were taken during the Christmas holidays, one to Berlin and the other to Peterborough. This was before regular practice had started, but despite the fact that both games were lost a strenuous fight was put up and the result was uncertain till time was called. The first league match was in Kingston. A hard game was played, but the Varsity team was faster and played better combination. McGill came to Toronto the following week and were taken into camp fairly easily. Two weeks later Varsity met McGill in Montreal. For the first half the game was very even, but in the second half McGill tired and Varsity, coming strong, won handily. But a Waterloo was in store for Varsity. The Queen's contingent came up determined to do or die—they did. The going was soft and not at all congenial to our fast forwards. "Dicky" Mills, the Queen's goalkeeper, had horseshoes all over him; he put up an exhibition of goalkeeping seldom seen here—only once did Varsity succeed in getting past him. Meanwhile, Queen's forwards had poked in two, and the game ended with Varsity going strong, but unable to beat Mills. The Championship was ours, so we were able to forgive Queen's on that account.

A team from the Crescent Athletic Club of New York were defeated by a score which, out of respect for the aforementioned Club, we will not allow to appear in print.

The City Championship was won from the Argonauts in easy style. One of the crowning victories of the year was the defeat of Stratford—Senior O.H.A. Champions—on their own ice by the decisive score of ten to two. Then it was that "Beulah" Davidson was glad he played with Varsity.

An attempt was made by an "All-Star" Toronto team to defeat the invincible Varsity septette, but the flower of the city were vanquished by a score which modesty forbids us to mention.

The Second Team did great work in winning their Championship. They defeated McMaster and the Agricultural College in home and home games, and played off with the Royal Military College, winning the round handily.

The Thirds won their series in Toronto and then defeated Queen's III. in Kingston in the game for the Championship.

This is a short summary of the season. Space will not permit the mention of the merits of the individual players, but special credit is due to "Herb." Clarke, the popular Captain, for the way he handled the team and the excellent game he played. This year should bring forth a repetition of last year. The First Team is intact, with the exception of Gordon Southam, whose place is being taken by "Tony" Evans, of last year's Seconds. With Captain "Chad." Toms at the stick, the team should sail home without a defeat. The Seconds have a number of last year's seven back and should win out, while the Thirds are fairly strong.

R. A. L., '08.

THE UNIVERSITY OF TORONTO HOCKEY TEAM, 1906-07

The Track

' may be justly said that a brighter day has dawned for the University of Toronto Track Club, and the future is full of promise and encouragement.

McGill University has for many years been fortunate in the possession of some exceptionally

strong performers, and, as a consequence, has had an almost uninterrupted record of victories in their dual meet with Toronto.

Such an inequality has had its discouragement for Toronto, but she has persevered and to-day rejoices in winning in the most decisive manner the Inter-College meet, held in Kingston in October, 1907. This victory is largely due to the policy of the Club in holding an Inter-Scholastic meet, each year, open to all preparatory schools and colleges. This has developed much good material, and their performance in Kingston decided the day for Toronto. Nor was this a hollow victory, as McGill numbered among her athletes such distinguished members of her "old guard" as Kemp, Carney, Powell, Waugh and Donaghue.

Toronto has, however, some competitors of the first order, who ran with a display of fine judgment and splendid form. F. Halbhaus and L. Siebert alternated in winning first and second in the 100, 220 and 440 yards sprints. They won with ease in record time and displayed beautiful form. Wright and Woodley, with the difficult task of competition with Kemp, ran with great credit to themselves and made the McGill champion extend himself to win in both events.

Franks, a new man with great promise, won handily with the hammer and will yet be heard from in the best company. Kay, with the shot, performed, as usual, in excellent style. In the pole vault, Laflamme proved to be a surprise, and is full of promise. The same may be said of Copeland, in the discus.

The annual meet was well attended, and much interest and enthusiasm marked the winning of the different events. With a suitable grand stand and improved quarters for the competitors, the future of the Track Team is assured.

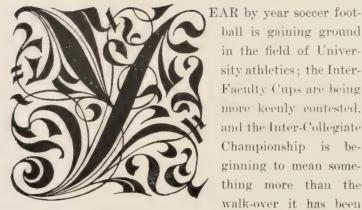

The officers for the present year are as follows:

Hon. President—Dr. W. E. Willmott. Hon. Vice-President—I. S. Fairty, B.A. President—Dr. E. Ralph Hooper, B.A. First Vice-President—Leónard Acton. Second Vice-President—H. G. Sprague. Secretary—John Cowan. Manager—R. G. Workman, B.A.

University of Toronto Track Team

Association Football

ball is gaining ground in the field of University athletics; the Inter-Faculty Cups are being more keenly contested, and the Inter-Collegiate Championship is beginning to mean something more than the walk-over it has been

for the University for the past few years.

In the Inter-Faculty senior series four teams were entered—S.P.S. Dents., Meds., and Arts. The result of the series was doubtful until the last game, when the Meds, succeeded in snatching the cup from the Dents, champions of last year, at the last moment.

In the Intermediate series, nine teams were entered and of these four at least were probable for the cup. This year a new faculty was represented in the series, the Faculty of Education, who, although somewhat handicapped in having to play their first game as a bye, on account of being late

in entering, yet gave promise of good things in the future. The championship was landed by the Victoria team after playing several very close games with the Intermediate Arts.

In the Inter-Collegiate series for the first time home and home games were arranged and played. Varsity again succeeded in winning the championship, but they had to work for it, Queen's putting the best team on the field that they have put up for years. McGill, although much inferior to Varsity or Queen's, also showed improvement on the past. A movement is on foot to establish an Inter-Collegiate Association Football League, with a definite written constitution. This will be a great step towards placing soccer football in the position it ought to occupy in University sports.

The officers for the year '07 were:

Hon. President-Dr. G. W. Johnston.

President—J. B. Cannon.

Vice-President—F. S. Dowling.

Secretary-Treasurer—J. G. Bricker.

Manager-J. Strachan.

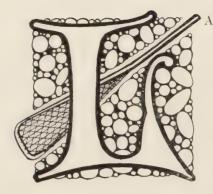

Captain—C. A. Mustard.

TORONTO UNIVERSITY ASSOCIATION FOOTBALL TEAM, 1907 INTERCOLLEGIATE CHAMPIONS

The Lacrosse Team

ACROSSE at Varsity is known mainly for the extended tour that is taken each spring through the Eastern States by the University Team. It is unfortunate that more of our athletes are not familiar with the national game of Canada because of its real value as a sport, for, undoubtedly, lacrosse is one of

the finest athletic pursuits in the world. Coming as it does at the end of the college term, the annual tour with all its charming enticements hardly suffices to create much enthusiasm among the fellows, who are generally hard-pressed with the work and worry of examinations. Hence, the team is usually composed of men who have acquired a knowledge of the game before coming to Varsity, and find a place partly through reputation and partly through material evidence of ability in the practices during the months of April and May.

The material for last year's team consisted of a goodly number of experienced players, and by the 22nd of May the Manager and Captain had chosen a representation which gave every promise of upholding the honor of the blue and white abroad. On the morning of May 22nd the regular twelve and one spare—thirteen in all—boarded the train for Geneva, N.Y., where they were to meet Hobart College that afternoon in the first game of the series.

The two teams accordingly crossed sticks on the Hobart College campus and after two hours of good play Toronto won a comparatively easy victory by the score of 6—3. The following day was spent in and around Geneva, which is a beautifully situated little city, being built on a promontary overlooking the placid waters of Lake Geneva. On the evening of the 23rd these congenial surroundings and the kind hearts of Hobart were left behind, as the team took its departure for New York.

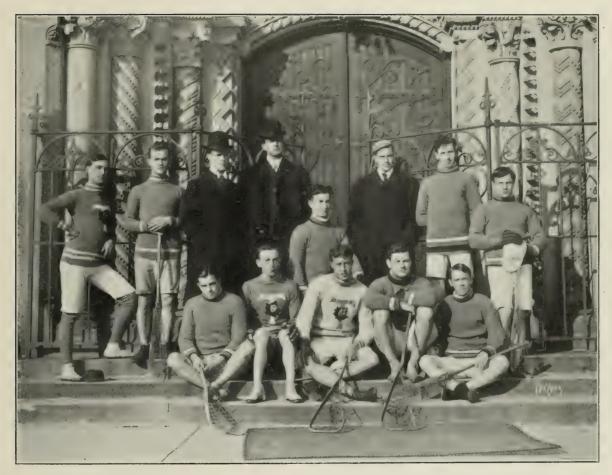

The summer home of the Crescent Athletic Club at Bay Ridge, Brooklyn, was reached on Friday, May 24th, after fourteen hours of steady travel, and most cordial was the welcome extended by the Americans to the visitors from Canada. Two games had been arranged with the Crescents, one for Saturday, the 25th, and one for Thursday, the 30th. The first, on the day following their arrival in New York, resulted rather disastrously for the students, who lost by 6 goals to 5. The defeat was altogether due to the poor condition and lack of combined play on the part of the Toronto players. In the second game, on Decoration Day, May 30th, however, a different style of lacrosse was exhibited, and a different result was consequently realized, Varsity completely turning the tables and winning by a score of 8 to 4. It was the first decisive victory over the Crescents in five years, and naturally there was great elation over beating the old rivals of the University.

The six days in New York were passed most enjoyably and on Friday, May 31st, it was with keen feelings of regret that leave had to be taken of the Crescent Club, whose princely hospitality had made the visit such a pleasant one.

Swarthmore College was the next and last point of attack and on Friday evening the team passed through Philadelphia and arrived at the picturesque Quaker village of Swarthmore, whose chief pride and adornment is its college. The Inter-Collegiate Lacrosse Championship of the United States is very often held, as it was last year, by Swarthmore College, and in defeating this team on Saturday, June 1st, Toronto again won the Inter-Collegiate Championship of America. The game was played in the pouring rain, and took the form of a burlesque rather than of a fair exhibition of lacrosse. The victory at Swarthmore afforded a fitting conclusion to the schedule of games, and late Saturday evening the tourists left Philadelphia en route for Toronto, arriving at their home land on Sunday morning. June 2nd.

Thus ended one of the most successful, although, possibly, not the most extensive, lacrosse trips in the history of the University, and when "the golden haze of student days" will have become still more hallowed and dim with age, the memories of pleasant hours spent at Geneva, on the banks of the Hudson at the Crescent Club, and with our Quaker fellows at Swarthmore will ever remain fresh and bright.

The Gym. Club

HERE is a great increase of interest shown in the gymnasium work this year, and this increase of interest, combined with the ever-growing number of students, has caused a record attendance in class work.

The increase has far outgrown the accommo-

dation. The dressing rooms were already crowded, and this year there were a great many who were unable to get lockers, and, therefore, a considerable number who otherwise would exercise there did not join the gymnasium for that reason. Then, too, the ventilation is very poor, and indoor exercise will do little good if the dressing rooms and the gymnasium are stuffy. It is, therefore, to be hoped that before very long either the present gym, will be enlarged or there will be a new one built.

This year Dr. J. W. Barton combines the post of Secretary of the Athletic Association and Medical Examiner, besides exercising a general superintendence of the gymnasium work. This is a much more satisfactory arrangement than formerly.

Prof. Williams takes the senior class work, the general class work, and has besides very large boxing and fencing classes. There are three general classes a week and the effects of "Prof's" teaching is shown in a number of promising candidates for the senior class.

The Assault-at-Arms, which is carried on mainly by the senior class, was very successful last year—the annual report showed a profit of over one hundred dollars. This year's Assault is to take place in the last week in February and promises to be as successful as that of last year.

The officers for 1907-08:

Hon. President—Dean Reeves.

President - J. G. Weir.

Vice-President—G. G. D. Kilpatrick.

Secretary-Treasurer—G. R. Workman.

Representatives from Meds.—P. N. Gardiner, A. D. McKelvey.

Representative from Knox—H. Johnson.

Representative from Victoria—J. Pearson.

Representative from Wycliffe—A. R. Beverley.

Representative from Dents.—O. Elliot.

University of Toronto Gym. Team

The Tennis Club

HE season of 1907 was a prosperous one for the Tennis Club. The membership increased and in place of a deficit the Club has a balance with which to begin next season. As in previous years, the Club entered two teams in the Toronto Tennis League.

The Senior team was not remarkably successful, but the Intermediates, after losing their first two games, were more successful, landing in second place in their district. The grass courts do not permit play in the first part of the season, and to this extent Varsity is behind the other clubs, the majority of whom have clay courts.

By a special arrangement with the Central Y.M.C.A. their players were allowed the use of the courts in the summer months, when many of the students were out of the city, and this arrangement was found to be very satisfactory as far as the Varsity Club was concerned.

The tournament held in October was very successful. The entry list was large, and notwithstanding that play was prevented by rain on three successive Saturdays, the events were run off in record time. The entries were chiefly from the undergraduates and graduates, while in previous years the entries from outside clubs were almost as numerous

as the student entries. This is a favorable sign that tennis is on the way to popularity in the University, and the time may soon come when the Varsity Tennis Team, as well as the other University teams, will be in an Inter-Collegiate League.

The results of the tournament were as follows:

| Undergraduate | Winner | Runner-up |
|-------------------|-----------------------|--------------------|
| Championship- | -Bartlett | Hodgson |
| Open Singles— | McEachran | Bartlett |
| Handicap- | McEachren | Hooper |
| Novice | Cumming | Castleman |
| Ladies' Open | Miss Moyes | Miss Cooper |
| Ladies' Handicap- | Miss Graham | Miss Fairbairn |
| Men's Doubles- | Patterson and Meldrum | Lambert and Hooper |

Officers, 1907:

Hon, President-E. J. Kylie, B.A.

Hon. Vice-President-A. W. McPherson, B.A.

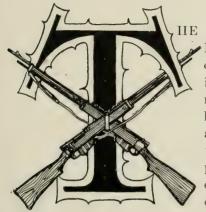

President, Dr. W. B. Hendry.

Vice-President-W. G. Bartlett.

Secretary-Treasurer—J. E. Hodgson.

Committee—W. L. MacDonald, T. G. McHugh, P. G. Kirby, G. G. Kilpatrick, F. Y. McEachern.

University of Toronto Rifle Association

Rifle Association is now one of the most flourishing of the many civilian rifle associations that have grown up in Canada since the authorities throughout the Empire, profiting by the experiences of the South African War. decided to en-

courage young men to learn how to shoot. The Association has on its rolls between three and four hundred men, Faculty and undergraduate. More members than ever before have turned out this year for practice at the Long Branch Rifle Ranges, where targets are supplied every afternoon, and also on Saturday mornings, during the season, with free transportation to and fro. Constant practice is developing many excellent shots, and the enthusiasm of the members shows that rifle-shooting, besides fitting a man for one of the highest duties of citizenship, is in itself a fascinating sport; not even "Colonel Bogey" of the golf links is so provocative of best scientific effort as those elusive targets that silently taunt the inexperienced rifleman.

To add to the keenness of competition, weekly prizes are given for the best scores by tyros. Other valuable prizes are now to be offered annually by the Association, chief among these being a shield presented by Honorary Captain Professor A. T. DeLury, for competition between teams

from the various Faculties of the University, which was this year won by the Faculty of Applied Science. The most coveted individual prize is the silver medal given by the Ontario Rifle Association to affiliated associations. It was won this year by Mr. E. L. C. Forster, after the keenest possible contest with Mr. A. B. Mitchell, one of Canada's crack shots, who was a member of the Bisley Team of 1907.

During the winter a couple of dinners have been held, at one of which a very instructive talk on rifle-shooting was given by Sergt.-Major F. W. Utton, of Stanley Barracks.

Prospects are bright for an extension of the Association's usefulness and popularity next season. The officers for 1907-08 are:

Honorary President—Principal Hutton.

Honorary Vice-President—Prof. W. Lash Miller.

Captain—Prof. G. H. Needler.

Lieutenants—E. L. C. Forster, E. L. McColl, D. F. Keith, A. B. Mitchell, O. S. Large, W. Matheson.

Secretary—T. Moss.

Treasurer—K. G. Fletcher.

Representatives on Committee—A. J. Mackinnon, H. W. Tate, C. S. Wright, C. B. Hamilton, J. E. Horning, A. M. Dallas, L. V. Redman.

Victoria College Athletic Union

NDER the direction of the Athletic Union, Victoria is represented in all branches of athletics taking place under the supervision of the University Athletic Association. It is true that in the contests no championships have come this way, but the play has been steadily improving, and any team that has defeated Victoria has had cause to know they were in a game, whether the contest were rugby, hockey or association.

Perhaps never have so many students taken part in the College athletics as at the present time. A new game, basket ball, has had to be provided to meet the demands of this increased interest, and so popular has hockey become that the Rink Committee has felt bound to double the accom-

modation for this pastime.

If the aim of athletics is the greatest good to the greatest number, then Victoria has no cause to be ashamed, but with this added enthusiasm in sports, we are hoping, in the near future, to turn out teams that will win not only practice games and the first two rounds in the different series, but teams that will bring the elusive silverware at last within our grasp.

It has been said of Victoria that it is insular, being inclined to hold aloof from the University as a whole. Athletics do not tend to prove this statement. At present

we are represented on the University hockey, rugby and lacrosse teams, besides having men with the Seconds and Thirds, who also hope, before they leave, to win for 'Varsity, and to earn their "T."

It is doubtful if any College in the Federation offers as many athletic advantages as Victoria for so small a fee. The reason is not hard to find—the rink. For years, during the winter months, this money-making project has gone merrily along on the campus. It not only affords the students exercise and amusement for the skating and hockey season, but is such a financial asset that all games can be enjoyed without necessitating any drain upon the resources of the individual student.

T. H. L.

ATHLETIC UNION EXECUTIVE, 1907-08

IST ROW—H. E. HEMINGWAY, '09, 3rd Year Rep.; W. A. McCubbin, '08, Athletic Stick; H. S. Lovering, C. T. Rep.; L. M. Green, '10, 2nd Year Rep.; E. G. Sanders, '08, 4th Year Rep.; C. B. Lang, M.A., Hon. Pres.; H. L. Morrison, '09, 1st Vice-Pres.; G. Rutledge, '09, Sec.; W. N. Courtice, '08, Ass n Rep.; J. H. Oldham, '08, Hockey Rep.; R. Gundy, '10, 2nd Vice-Pres.

University College Women's Athletic Club

N the Athletic Club the women of University College find opportunities to indulge in any line of athletics they wish: tennis, hockey, fencing, physical culture, or those delightful cross-country runs, known in feminine phrase as "paper chases."

The Athletic League, including St. Hilda's, Victoria and University Colleges, gives competition which enhances the various sport. This year the tennis tournament was enjoyed by the girls of University College, though they did not win. The outcome of hockey remains yet to be seen.

The paper chases make, perhaps, the best opportunity for the women of the different colleges to meet in athletic pursuits. Here the girls have a common aim, for which they strive most strenuously, ending at one of the College residences, where goodies are eaten and College yells given—those two great inculcators of the inter-collegiate spirit.

All these branches are carried on with good success by the various departments of the Club. The central feature is, however, the physical culture classes, consisting of dumbbell exercises, club swinging, fancy steps and marching. These are held under the splendid tuition of Miss Wreyford, a graduate of the Sargent School, Boston. Her enthusiasm for her work never fails to reach her students, and they invariably find that the class leaves them refreshed in body, alert in mind, and more keenly alive to the real "joy of living."

This year Miss Wreyford is preparing both Victoria and University College classes for an exhibition of the regular gymnasium work and some Swedish folk-dances.

The fencing classes are taken advantage of by a few only, but these find themselves fully repaid for their time and work by their keen enjoyment of this most concise and skilful of athletic arts.

Victoria College Women's Athletic Club

THE career of the Victoria College Athletic Club, which was organized three years ago, has been one of marked prosperity. A mere nominal fee constitutes membership, which qualifies one for participation in tennis, field hockey, basket ball and ice hockey, which are under the supervision of the Club.

Great enthusiasm has been exhibited in the skilful game of tennis and the tennis season has been one of marked success. Two annual tournaments for cups are held, an open tournament and a handicap. A team of six is chosen to play in the Inter-College Tennis Tournament with St.

Hilda's College and University College. Victoria's team was successful in winning back from St. Hilda's the cup presented by Mrs. Ramsay Wright. Those who witnessed the games had the fortune to see some excellent playing.

Although field hockey and basket ball have many devotees, tennis and ice hockey are universally more popular.

Great hopes are entertained for the ice hockey season, which was a most brilliant and successful one last year. Under the direction of a most efficient captain we cannot but expect continued success.

Trinity Athletic Association

HE athletic spirit at Trinity has undoubtedly once more been kindled. With the assistance of Mr. Griffith the football teams have been considerably improved and greater success is now assured for future years. The Second Team has been firmly established and ably helps the First. This year the Hockey Team was entered in the Jennings Cup series. The rink has been fully completed and is now in first-class condition.

The gymnasium, formerly a dead number in the College, is now a centre of activity. The building has been thoroughly renovated. Punching bags, single sticks, boxing gloves and new mattresses have been added and a gym-

nasium class was formed in the Lent term.

Greater interest than ever was taken in the "Field Day" sports and the "Steeplechase" this year. The events were keenly contested and the good records sustained.

The basket ball games were among the most interesting of the inter-year sports this year. A number of outside

games were also played.

In spite of the shortness of the season, cricket still thrives, and each year shows an improvement over the former. Tennis, too, finds a number of ardent supporters in College.

In conclusion, a word of thanks is due to the Committee who guided the Association over some very rough places during the past year.

Medical Athletic Association

ECESSARILY, wherever a large number of young men are thrown together at school, athletics will form a major part of their spare time. Especially is this the case where we have one faculty pitted against another, as in the U. of T., and the year 1907-08 has been no exception, particularly among the medical students. During the last few years, we have been gradually gaining ground in this department over the other student bodies, and during this year we have captured the most important "scalps." "Our soldiers won" at the U. of T. Field Day, carrying off the highest number of points, and assisted greatly to win the Annual Field Day against McGill and Queen's last fall.

At rugby our team played off the finals with S.P.S. and lost, only by a small margin. Then, at association football, after a strenuous series of games, our team won the Inter-Faculty Cup. Similar to our fate at rugby, the Jennings Hockey Cup was lost after we had won our series.

A characteristic, peculiar to our faculty alone, is the interest shown in inter-year games. At baseball the First Year won Dr. Silverthorn's Cup after several very exciting games, for in our number are some professional Eastern League players and many good amateurs.

The graduating year, '08, were easily able, as in '06 and '07, to hold Dr. A. B. McCallum's Association Football

Cup.

Much of the foregoing success at sport is due to the interest and support of a good Executive which we have had, for suitable appartments were provided for players to dress in and to store balls, bats, etc. A system of baths is promised in the near future.

"School" Athletics

HE past year has been no exception to the "School's" splendid record of pre-eminence in all forms of athletics. In past games for the Mulock Cup and Jennings Cup the School has nearly always made such a runaway race for the championship that this year the Executive decided upon an innovation which has done a great deal to increase the interest in the games, namely, the entering of three teams in each series. Despite predictions to the contrary, the Second Year nobly upheld the traditions of the School by winning the Mulock Cup. On the track, the School held their own splendidly, losing by only one point to their ever-formidable enemy, the "Meds." For the Association Cup, the School, while unsuccessful, made a good showing in both Senior and Intermediate Series.

In University athletics the School has also done its share. Eleven School men held positions on the Varsity Senior Rugby Team, and though unsuccessful in the championship race it was not for want of effort on the part of our representatives. On the track and hockey teams, while not so prominent, the School men nevertheless did their share. In gymnastics, basketball and swimming they also upheld their reputation as good sports.

The Executive wished to give members of championship teams something more tangible than the badges now given, but until the financial support given is largely increased this is quite impossible. The first year, with a membership of nearly three hundred, contributed about one-third the amount, viz., ninety dollars, contributed by the second year, with a membership of about two hundred. Of course, the third and fourth years did their share.

As soon as the freshmen realize that it is their duty to support the School athletics, both by attendance at the games and by adequate financial backing, the School Athletic Association will be in a position to undertake several needed reforms and to expand in a manner fitting the premier athletic association of the federated faculties.

University of Toronto Y.M.C.A.

THE Young Men's Christian Association of the University of Toronto is a federation consisting of the College Associations of Victoria and University College, Faculty of Applied Science, Medical College, Dental College and the Ontario Agricultural College, Guelph. The aim of this organization is to lead men to acknowledge Christ as Lord and Master, to enlist them in Christian service, to develop Christian character and generally to promote the religious welfare of the student body. This is accomplished through daily Bible study and mission study classes, religious meetings, personal interviews, while the more material needs are supplied by the help of a small

and very inadequate building, a boarding house list, handbooks, and a book exchange.

The work is carried on by a Central Executive Committee, known as the Federal Executive, with a General Secretary, who devotes all his time to the work, with the advice of an Advisory Committee, while matters financial are attended to by a Financial Secretary, with the advice of a Trustee Board.

This organization has grown rapidly in the estimation of both the faculty and students of the University, and is considered by all to be one of the most, if not the most, unifying and consolidating agencies in University life.

University College Y.M.C.A.

of Varsity Y. The greatest triumph is to be recorded in the Bible Study Department, where over 250 men were enrolled. About 200 of these persisted in the course. The Normal Classes owe much to Professors Wrong, Tracy, Davidson, H. A. A. Kennedy, of Knox, and Mr. Tackaberry for thoughtful guidance upon the deep things of the Bible. Those who availed themselves of the opportunity of attending these classes will not soon forget the keen interest and marked earnestness of the discussions. In spite of the constitutional mandate the Executive decided to forego the weekly religious meeting on the ground that too many meetings were a weariness to the spirit as

well as to the flesh. As a result, the work of the Association has been carried on quietly and effectively, without any startling display. But we believe that "still waters run deep," and that the Y.M.C.A. has a hold on the men of University College that it seldom had before. The inspiriting addresses of John R. Mott and William Jennings Bryan have left an impression which time can not soon, if ever, erase. The prime object of the Association has been kept in view—the bringing of the men into closer relationship with the Master, and we believe that the Association has not wrought in vain during the preceding year.

Medical Y.M.C.A.

URING the session of '07-'08 the Y.M.C.A. work in the Medical College has been carried on in much the same way as in previous years. An effort was made early in the year to enlist an added number in group Bible classes. This met with only fair success, but several classes have met faithfully all year and they report splendid progress and very interesting and profitable meetings.

The greatest advance we have made is in the organization this year of a Student Volunteer Band, numbering nearly twenty-five, and which has met regularly every Sunday morning. Great credit is due Mr. H. W. Baker, '09, who is the leader of this band, and who has provided interesting speakers for every meeting. This marks a new epoch in the Medical College, and we earnestly hope that the band is but a nucleus of a much greater one in the future.

The Dental Y.M.C.A.

HAT the Y.M.C.A. has secured a firm foothold and a recognized standing in the R.C.D.S. is beyond question. This year it is of interest to a still greater proportion of the students.

The most important phase of the work is Bible study and in this department the present is the banner year. There are more classes and a larger enrolment than ever before.

The first active interest in mission study has been awakened and is rapidly increasing. Much is due to the able assistance of Dr. W. E. Willmott in this particular phase of the work.

The social side occupies a unique position in the student life of the R.C.D.S., particularly at the opening of the session. In the absence of a college reception the Y.M.C.A. reception to the freshmen has come to be looked upon almost as a college function. We have reason to believe that it is highly appreciated by those whom it is intended to benefit.

The Hand-book Committee deserve congratulations on their work in producing so valuable a book.

Although the year has had its discouragements, and we are yet far from the ideal, we have the encouragement of substantial progress and increasing interest in the work.

Y.M.C.A. of Victoria College

THE Y. M. C. A. of Victoria College has for its object the cultivation of that which is of supreme importance to every college man—his true relation to Jesus Christ. We believe that it is an impossibility to reach the highest and noblest ideals apart from Him. Companionship with Christ strengthens the fibres of manhood, deepens the character, controls the will and sways the emotions. We have considered this relationship of paramount importance and to some, at least, this has been the greatest thing in the College course.

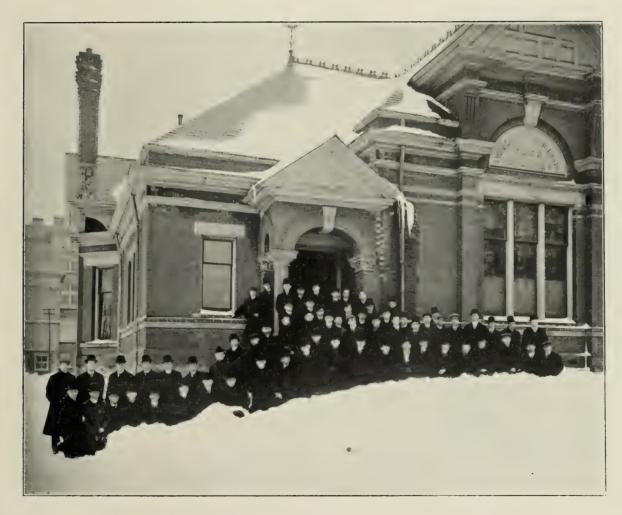

Applied Science Y.M.C.A.

A S each successive year passes it becomes more evident than ever that the action taken by a number of men three years ago in organizing a separate branch of the University Y.M.C.A. in the "School" was a wise one, for the Association is steadily gaining ground, and is now looked upon as a standard organization.

At the opening of the year a reception was given to the first year men and handbooks containing useful tables and formulæ were distributed to all the years. A canvass for membership and for enrollment in Bible study was also carried on during the first month. The Bible study is probably the most effective part of the work. The group system of study is followed and is very much appreciated by the men. The strongest recommendation for this study is found in the hearty endersation given it by those who have put it to a fair test.

The Missionary Committee have this year expended most of their time and energy in raising funds to go toward the work among the Chinese students in Tokyo. The canvass was entered upon immediately after the series of missionary meetings which was held, and the amount raised has been very creditable, indeed.

Shortly after the Christmas vacation a supper was held, when an interesting and profitable programme was given, the chief item being an excellent ddress by Controller F. S Spence.

The Anglican Club

A LTHOUGH only in its second year, the Anglican Club has gone about its work like any of the older societies. It has extended a friendly hand to the Missionary and Theological Society in Trinity, which duplicates its work there. More especially, it has aimed to work

hand in hand with the University Y.M.C.A. and carries on the work of Wycliffe Y.M.C.A. Its work is limited mostly to Church of England students in the University. In this capacity it is carrying on a useful, needy work and has a command that no other society can duplicate in its peculiar sphere.

ANGLICAN CLUB EXECUTIVE, 1907-08

Wycliffe College
Representative

W. N. SAGE, Secretary J. E. Thompson, President REV. PROF. COTTON, M.A., Director

J. A. Jackson, Vice-President G. R. Bracken, Treasurer

The Missionary and Theological Society, Trinity College

HE main object of this Society is to study the problems of the mission field and to stir up missionary zeal in the students. Of course, it is impossible to be interested in that about which one knows practically nothing. So the systematic study of the missions of the world is carried on at weekly meetings. The Society is a part of the wide-spread and active Church Students' Missionary Association, and throughout the whole of this Association China is the field which is being studied this year.

Missionaries from many different parts of the world address our Society from time to time.

Next year will be the Missionary and Theological Society's 25th Anniversary, which will be celebrated by a great convention of members of the Church Students' Missionary Association at Trinity College. Delegates from universities all over the American continent will attend, and addresses given by Bishops and other missionaries from many countries. These conventions are held every year; the last one was at the New York General Theological Seminary.

Besides the Mission Study Class, the Society has special services in the College Chapel. A Missionary Litany is said every Wednesday, and devotional services are held at other times.

In unity lies strength, and by pursuing our present policy of keeping in close touch with so large a portion of the Church of Christ lies the surest way of kindling in the hearts of students a sense of that duty to the Church which it is their privilege to perform.

G. M. B.

The Brotherhood of St. Andrew, Trinity College Chapter

In 1906 W. G. Davis and a few other men in College became interested in Brotherhood work, and worked faithfully in this sphere wherever favorable opportunity presented itself. It was then entirely unorganized. The following term a probationary chapter was formed under the Directorship of Mr. S. P. G. Wright, B.A. Through his untiring energy and aggressiveness the Society did much valuable work. On the 15th February, 1907, a charter was granted to the College constituting it a legal Chapter, and admitting it to all the rights and privileges of the Society.

Each year has added to its numbers, and to-day it is one of the largest Chapters in the city of Toronto, with twenty-two active members on its roll.

The College Chapter has always taken a keen interest in Brotherhood work at large. In May, 1907, C. R. Palmer was sent as a delegate to the Dominion convention, at Winnipeg. S. E. Morton, B.A., has filled very efficiently the Presidency of the Western district, and H. A. Bracken, B.A., is the College Representative on the Toronto Local Council.

At first there seemed little work for a College Chapter to do, but as time went on things developed and new spheres of influence opened up before its members. Not to speak of Sunday School teaching, holding mission services, parochial and sick visiting, attention has been especially paid to Bible Class work on Sunday mornings in the Central Prison, week-day visiting at the Home for Incurables, Parkdale, and at the Western Hospital. The Literary Institute has kindly turned over to the Society all magazines and periodicals, which greatly help the men in their work.

1908 officers:

Director—C. R. Palmer.

Secretary -J. II. Dixon.

Treasurer—E. Harrington.

University College Y. W. C. A.

HE worth of the Young Women's Christian Association of University College might be roughly estimated were each member able to lay before the public the physical and mental effort she had given to the work of this Society. No matter how the members might wish the contrary, the organization is not able to be profitable to any other than to her who gives such sympathy and effort.

Our opportunities were as follows: To help the girls of the first year in making such arrangements as are necessary on entering the University; to make and carry out programmes for the weekly meeting; to respond to the invitation of a City Mission to help in its musical services, and to the invitation of the Y.W.C.A. to take charge of two meetings a month, in one of the city branches; to meet with other students every week for the study of the Bible and of missions; to prepare to send representatives to the con-

ference of hundreds of women of the Universities, great and small, of the Eastern States, who meet every year on Lake George.

The epoch-making circumstance in the history of the Society in '07-'08 is the invitation of the Dominion Council of the Y.W.C.A. to the University women to take charge of the city associations which are this year being organized in Western Canada, to be "colleges" to the women of the West who have never been "undergraduates."

With the graduation of the women of '08 will vanish from University College the last representatives of that gathering to whom Miss McDonald told her hopes, as a student to students, before sailing for Japan. It is hard to imagine in what sort of coin the profit will come to a Society which has, through a fellow student, been putting its finger during '07-'08 on the women of a new nation.

Victoria College Y. W. C. A.

HE Young Women's Christian Association of Victoria College has since its organization in 1895 held an important place in the lives and thoughts of the women undergraduates. The aim of the Association is to make Christianity a potent factor in the life of every student, and its influence has been seen in this College in the increasing number of graduates who offer themselves for work as missionaries in foreign fields or as leaders in the city branches of the Association.

A regular devotional meeting is held every week and under the leadership of the girls themselves is made both interesting and helpful. The majority of the members are enrolled among the eleven Bible study and six mission study group classes which are held for half an hour weekly, at such times as are convenient for those belonging to the group. This last College year we were able to send three delegates to the conference in Montreal, held in January, and five to the summer conference, held each year at Silver Bay. From these conferences great inspiration is derived, not only by those privileged to attend, but also by those to whom the report is brought. By means of them we are kept in an intimate relationship with the world-wide movement. This year ninety per cent, of our women students are members of the Association, and we are hoping for very marked spiritual progress.

- 22. High Schools, first term, and Public and Separate Schools
- 24. Last day for notice of formation of new School sections to be posted by Township Clerks.
- 25. Christmas Day.

The Royal

Military College

THERE are few national institutions of more value and interest to the country than the Royal Military College at Kingston. At the same time its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving the highest technical instructions in all branches of military science to cadets and officers of Canadian Militia. In fact, it is intended to take the place in Canada of the English Woolwich and Sandhurst and the American West Point.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and in addition there is a complete staff of professors for the civil subjects which form such a large proportion of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis, the cadets receive in addition to their military studies a thoroughly practical scientific and sound training in all subjects that are essential to a high and general modern education.

The course in mathematics is very complete and a thorough grounding is given in the subjects of Civil Engineering, Civil and Hydrographic Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the system.

In addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds insures good health and fine physical condition.

Seven commissions in His Majesty's regular army are annually awarded as prizes to the cadets.

Three commissions in the Permanent Force will be given annually, should vacancies exist, to the graduating class, viz.: Every year one in the Infantry; and each alternate year:

One in the Engineers and one in the Horse Artillery.

One in the Cavalry or Mounted Rifles and one in the Garrison Artillery.

Further, every three years a Commission in the Ordnance Corps will be given to the graduating class.

Three 2nd class clerkships, or appointments with equivalent pay, will be offered annually to the graduating class, such appointments to be in the following Departments, viz.: Public Works, Railways and Canals, Inland Revenue, Agriculture and Interior.

The length of the course is three years, in three terms of $9\frac{1}{2}$ months' residence each.

The total cost of the three years' course, including board, uniforms, instructional material, and all extras is from \$750 to \$800.

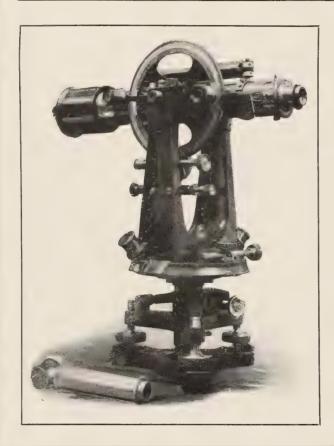

The annual competitive examination for admission to the College will take place at the headquarters of the several military districts in which candidates reside in May of each year.

For full particulars of this examination or for any other information application should be made as soon as possible to the Secretary of the Militia Council, Ottawa, Ont.; or to the Commandant, Royal Military College, Kingston, Ont.

Our Method of Shaping Collars

Q We shape turn-over collars by a new method. The collar is first passed through a machine which drops a fine stream of hot water on the seam, evenly and thoroughly dampening it.

Q The collar is then run through a heated groove which bends it over and irons it down, shaping it to fit the neck.

Q The seam being dampened makes it almost impossible to break or strain a collar by this method

Sixty Years in Upper Canada

With Autobiographical Recollections.

By Charles Clarke Late Clerk of Logislature of O tario.

Cloth, 321 pages, net \$1.50

"The book naturally deals with political events, and the epochmaking events of the past sixty years are clearly outlined. Interesting comparative sketches of Sir John A. Macdonald and Hon, George Brown are given, but the bulk of the book is devoted to the period covered by the active life of Sir Oliver Mowat. The personal references to the men, great and small, who guided the political destines of Ontario during its career as a province are full of interest. and the work, so far as a layman can judge, has been done with discretion and good taste. Mr. Clarke's book is certain to appeal to a large constituency. The Presbyterian.

Valedictory

It has come at last after four years spent in a miniature world a sphere filled with a curious jumble of realities and illusions, progress and retrogression, success and failure, as all worlds are, but college worlds particularly. After concentration comes dispersion. The foster mother has nurtured us for four years, watched us develop and mature. Now, from the old gray tower she scatters us to the four corners of the world. What have we obtained? Little in absolute facts, perhaps, but much in sympathy—in comprehension of the fancies, freaks, and foibles of human nature—the background and subject matter of all the 'ics and 'ologies in the curriculum.

The ships are leaving harbor—some with canvas spread hopeful, expectant; others, with indifferent course, are veering aimlessly; while others, again, with indolent sails drooping against the side, sway on the sluggish waters, drift and dream. Yet all say some kind of farewell. With the majority it is the morning, and the bright clouds piling joyously in the sky roll away to introduce the sun; but with the few it is the evening, and the end, with the sullen sky bending down in a forbidding arch where the fading sun hurries from sight, and the reluctant stars twinkle in murky obscurity.

The majority of us will remain in a state of happy mediocrity; a few will attain the laurel wreath and find, perhaps, among its seductive leaves the sharp points of concealed thorns.

But the amount of success matters little. The relation which the result bears to the opportunities offered is of real consequence. The world expects much of university people and criticises sharply any deviation from the standard, forgetting sometimes that graduates are human—only human, and very human. But to misquote Nelson: "The University expects every man to do his duty." Nothing else matters; the reward is a secondary consideration. Here we quarrel with ambition, "by which sin fell the angels," and which, let us remember, usually "o'er vaults itself." In the eternal justice of things we shall find our true spheres the work suitable for us. Then, let those of us who are dreamers—dream on. Great things have come from dreams. And let those who are workers, work on. There is infinite pleasure in toil, and in being tired—so tired that delicious langour casts its silken web softly over the numbing senses. and the world passes off the stage with subdued music and fading, changing lights—till all is still.

And this life epoch will fade gradually with time like a photographic film exposed to the light—but not entirely. Dim visions will remain like the shadow-pictures of childhood, where the half-familiar faces of angels and goblins, strange and fantastic, peered weirdly at us from the foot of the bed through the tense, enveloping darkness of the night. Vale dicimus, Alma Mater! May the memories of your fostering care "be with us yet," shrouding our onward path with tender light, and softening the days that are with recollections of the days that have been.

J. T. STIRRETT.
